

Ashy Drongo

Each dot represents the total number of detections after dawn or before dusk (in hours)

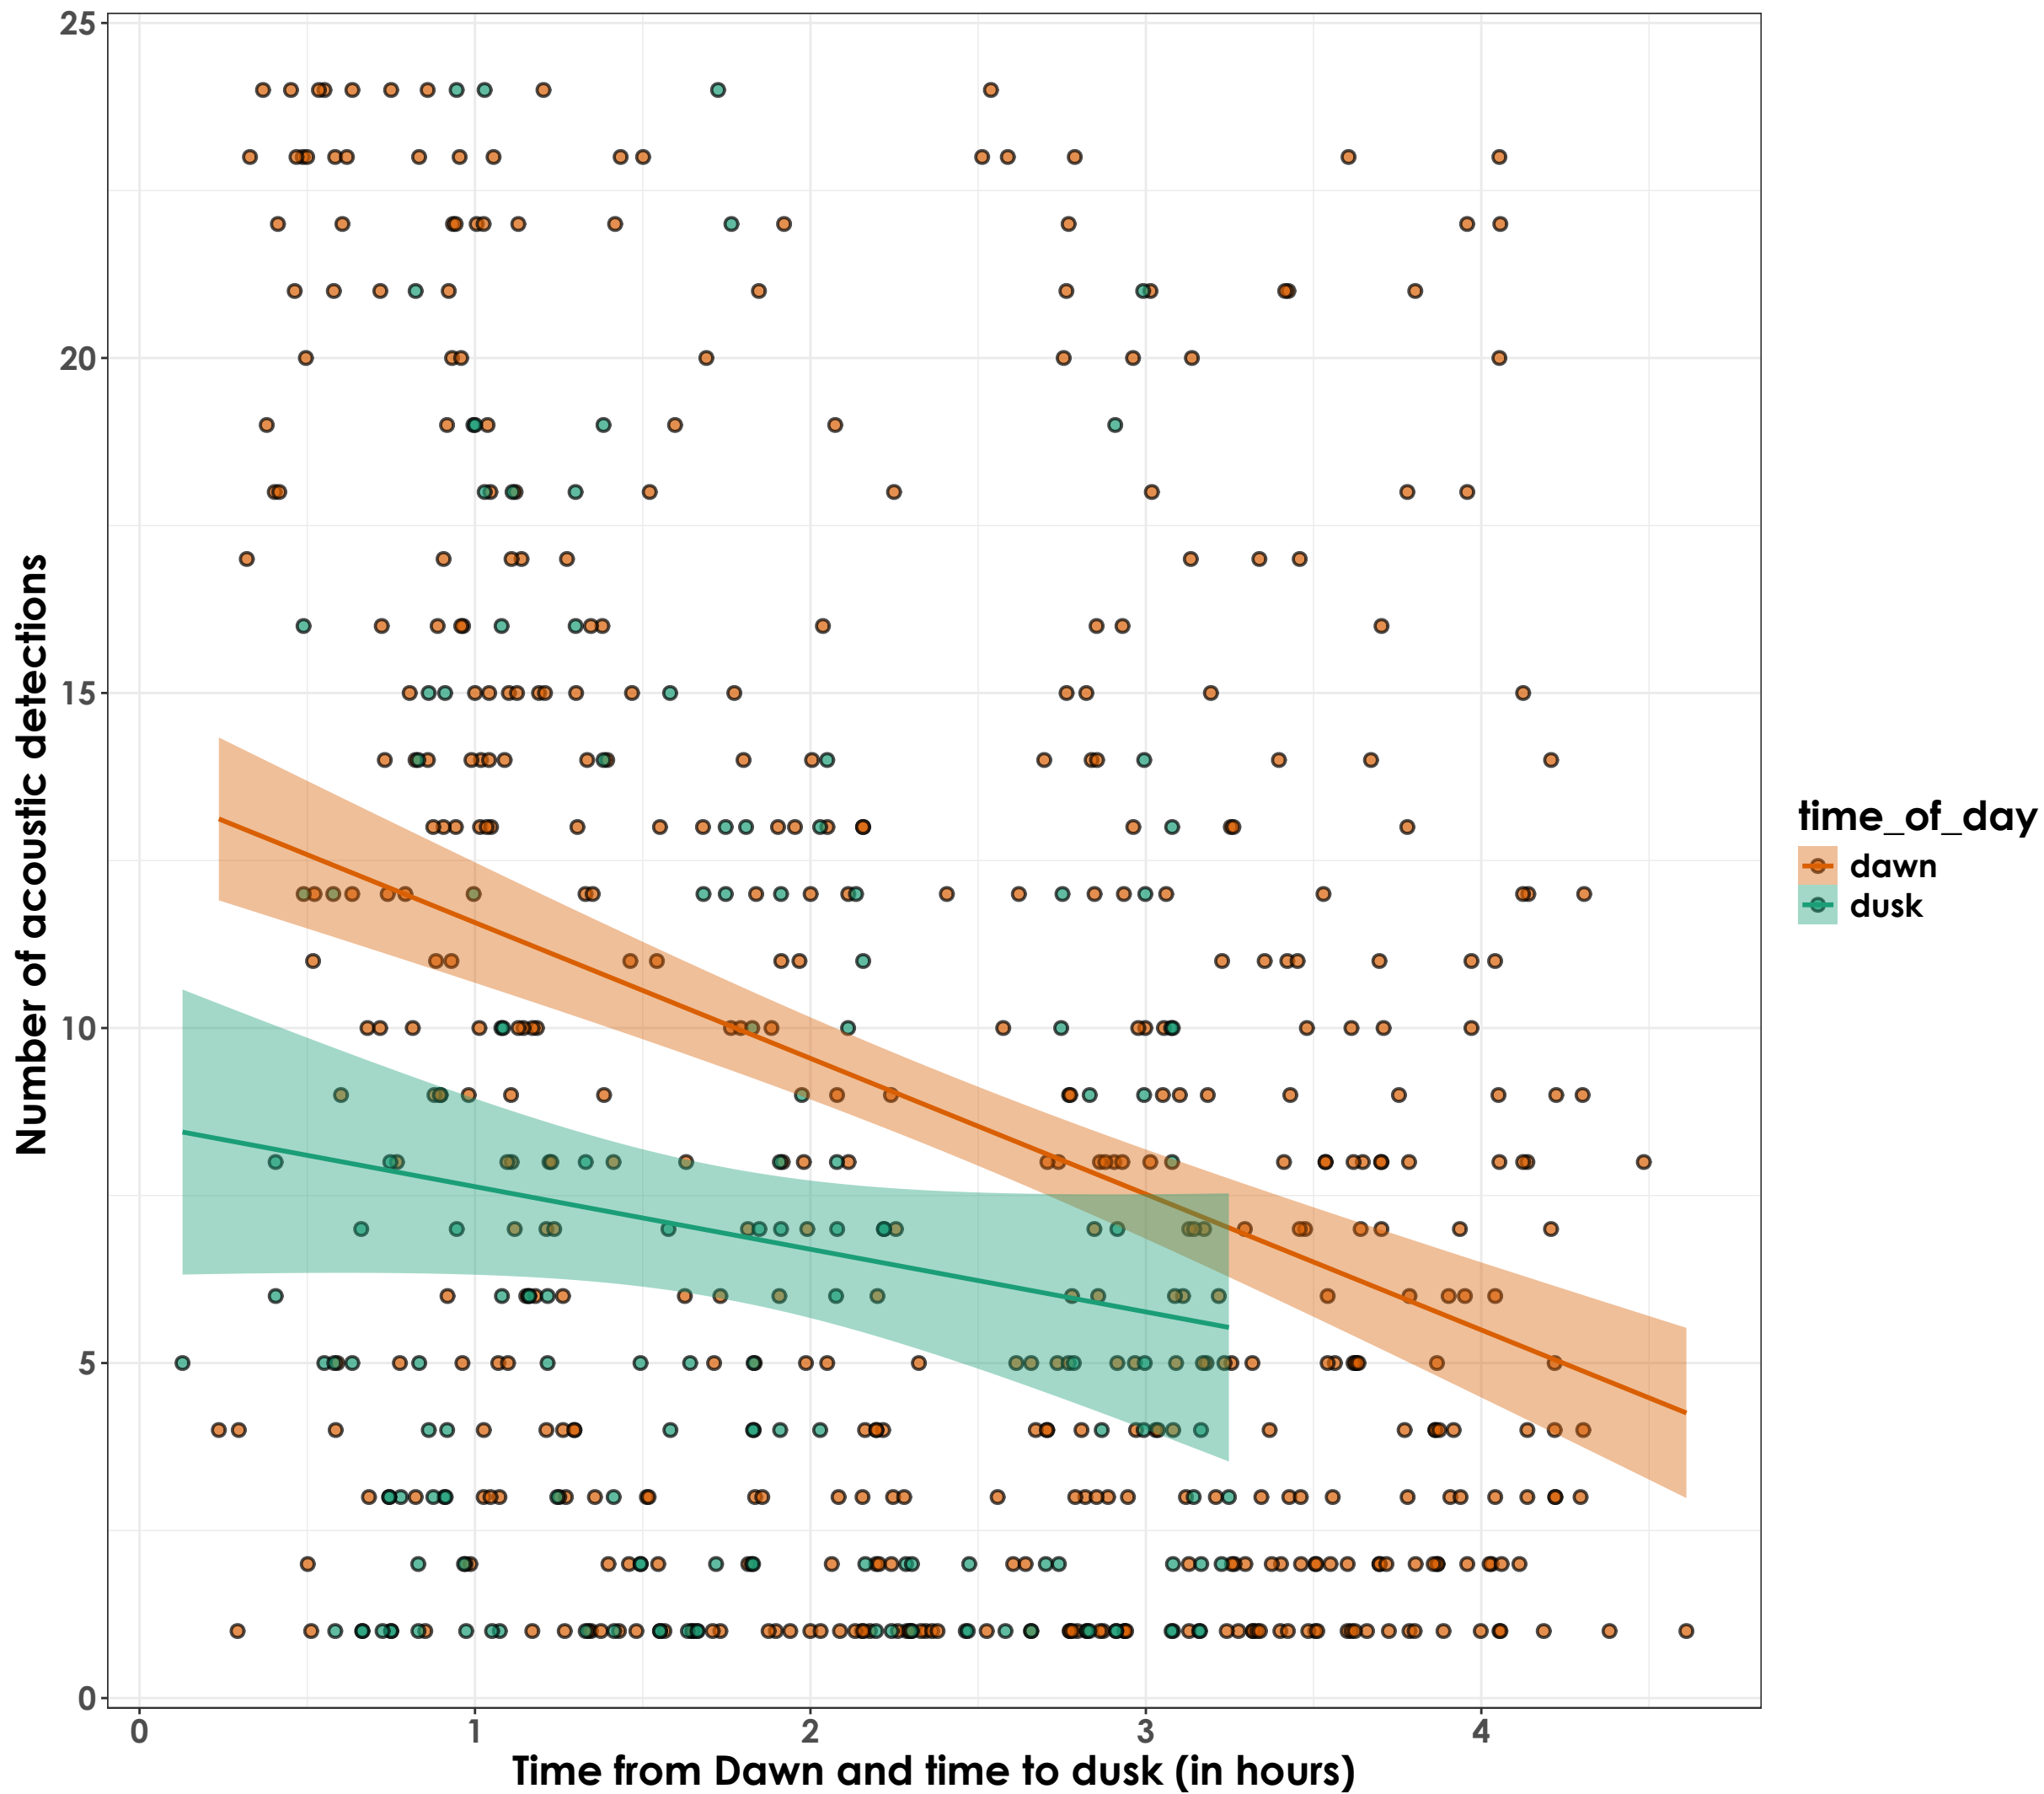

Crimson-backed Sunbird

Each dot represents the total number of detections after dawn or before dusk (in hours)

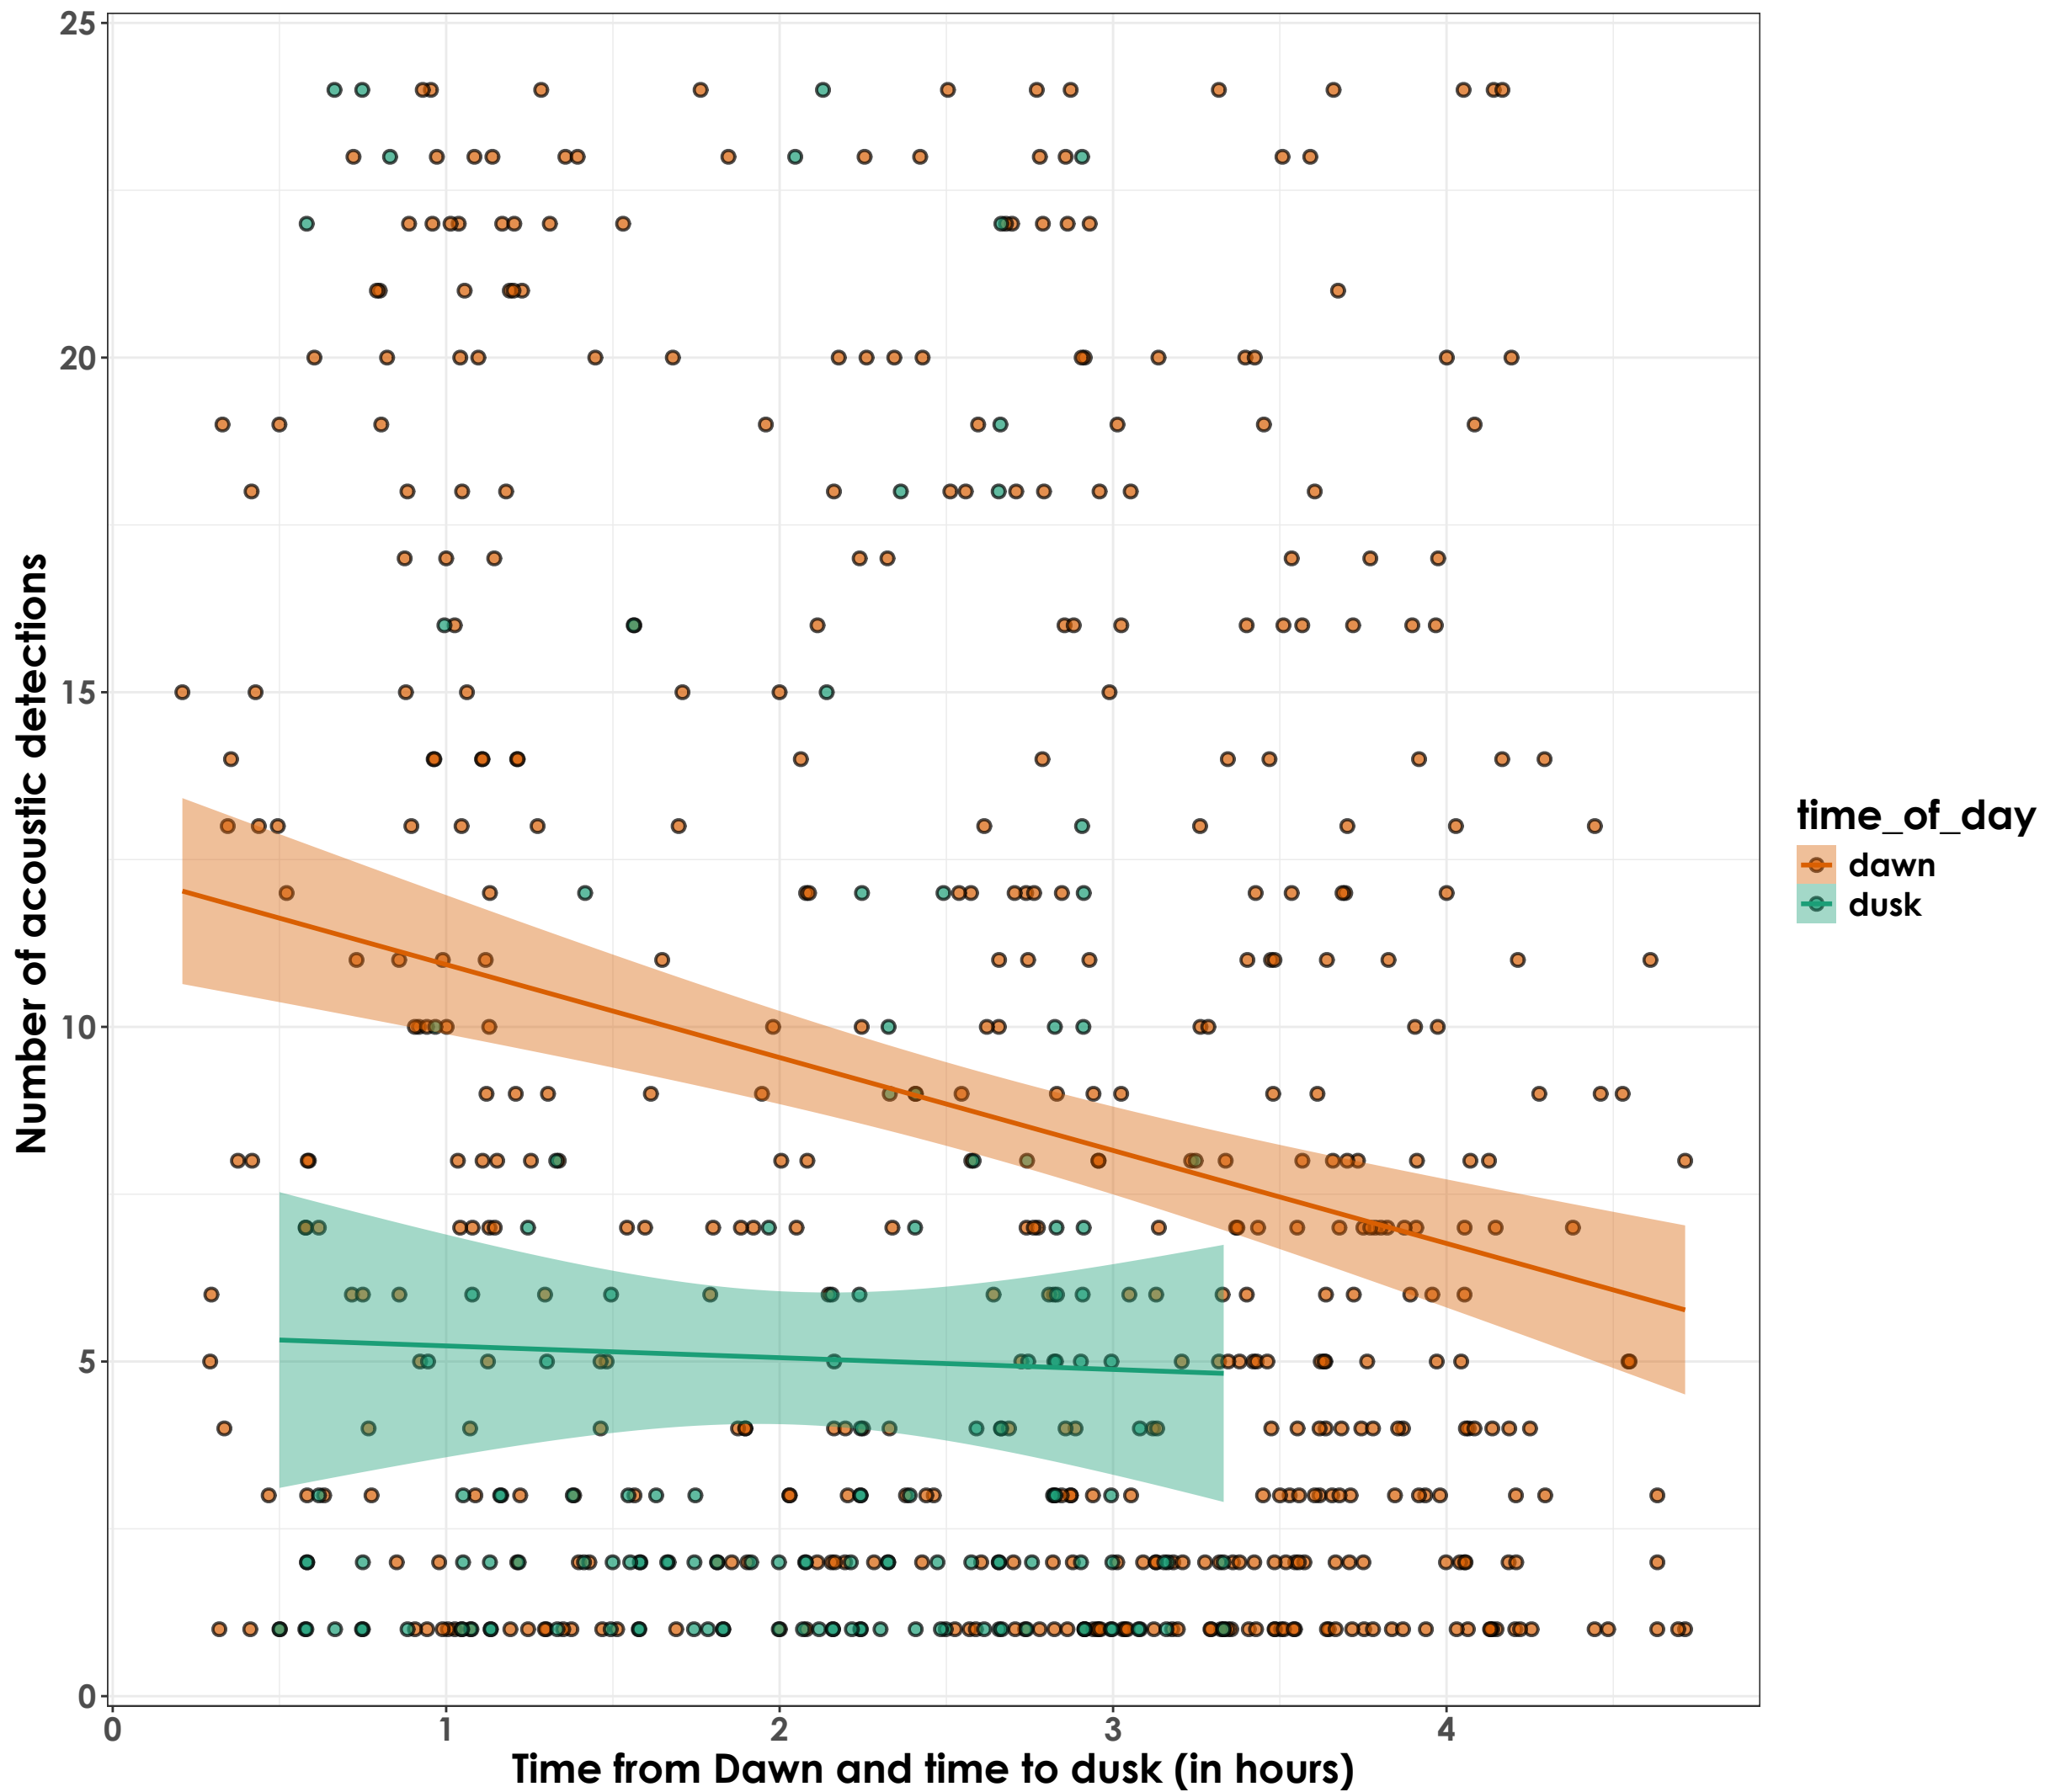

Gray Junglefowl

Each dot represents the total number of detections after dawn or before dusk (in hours)

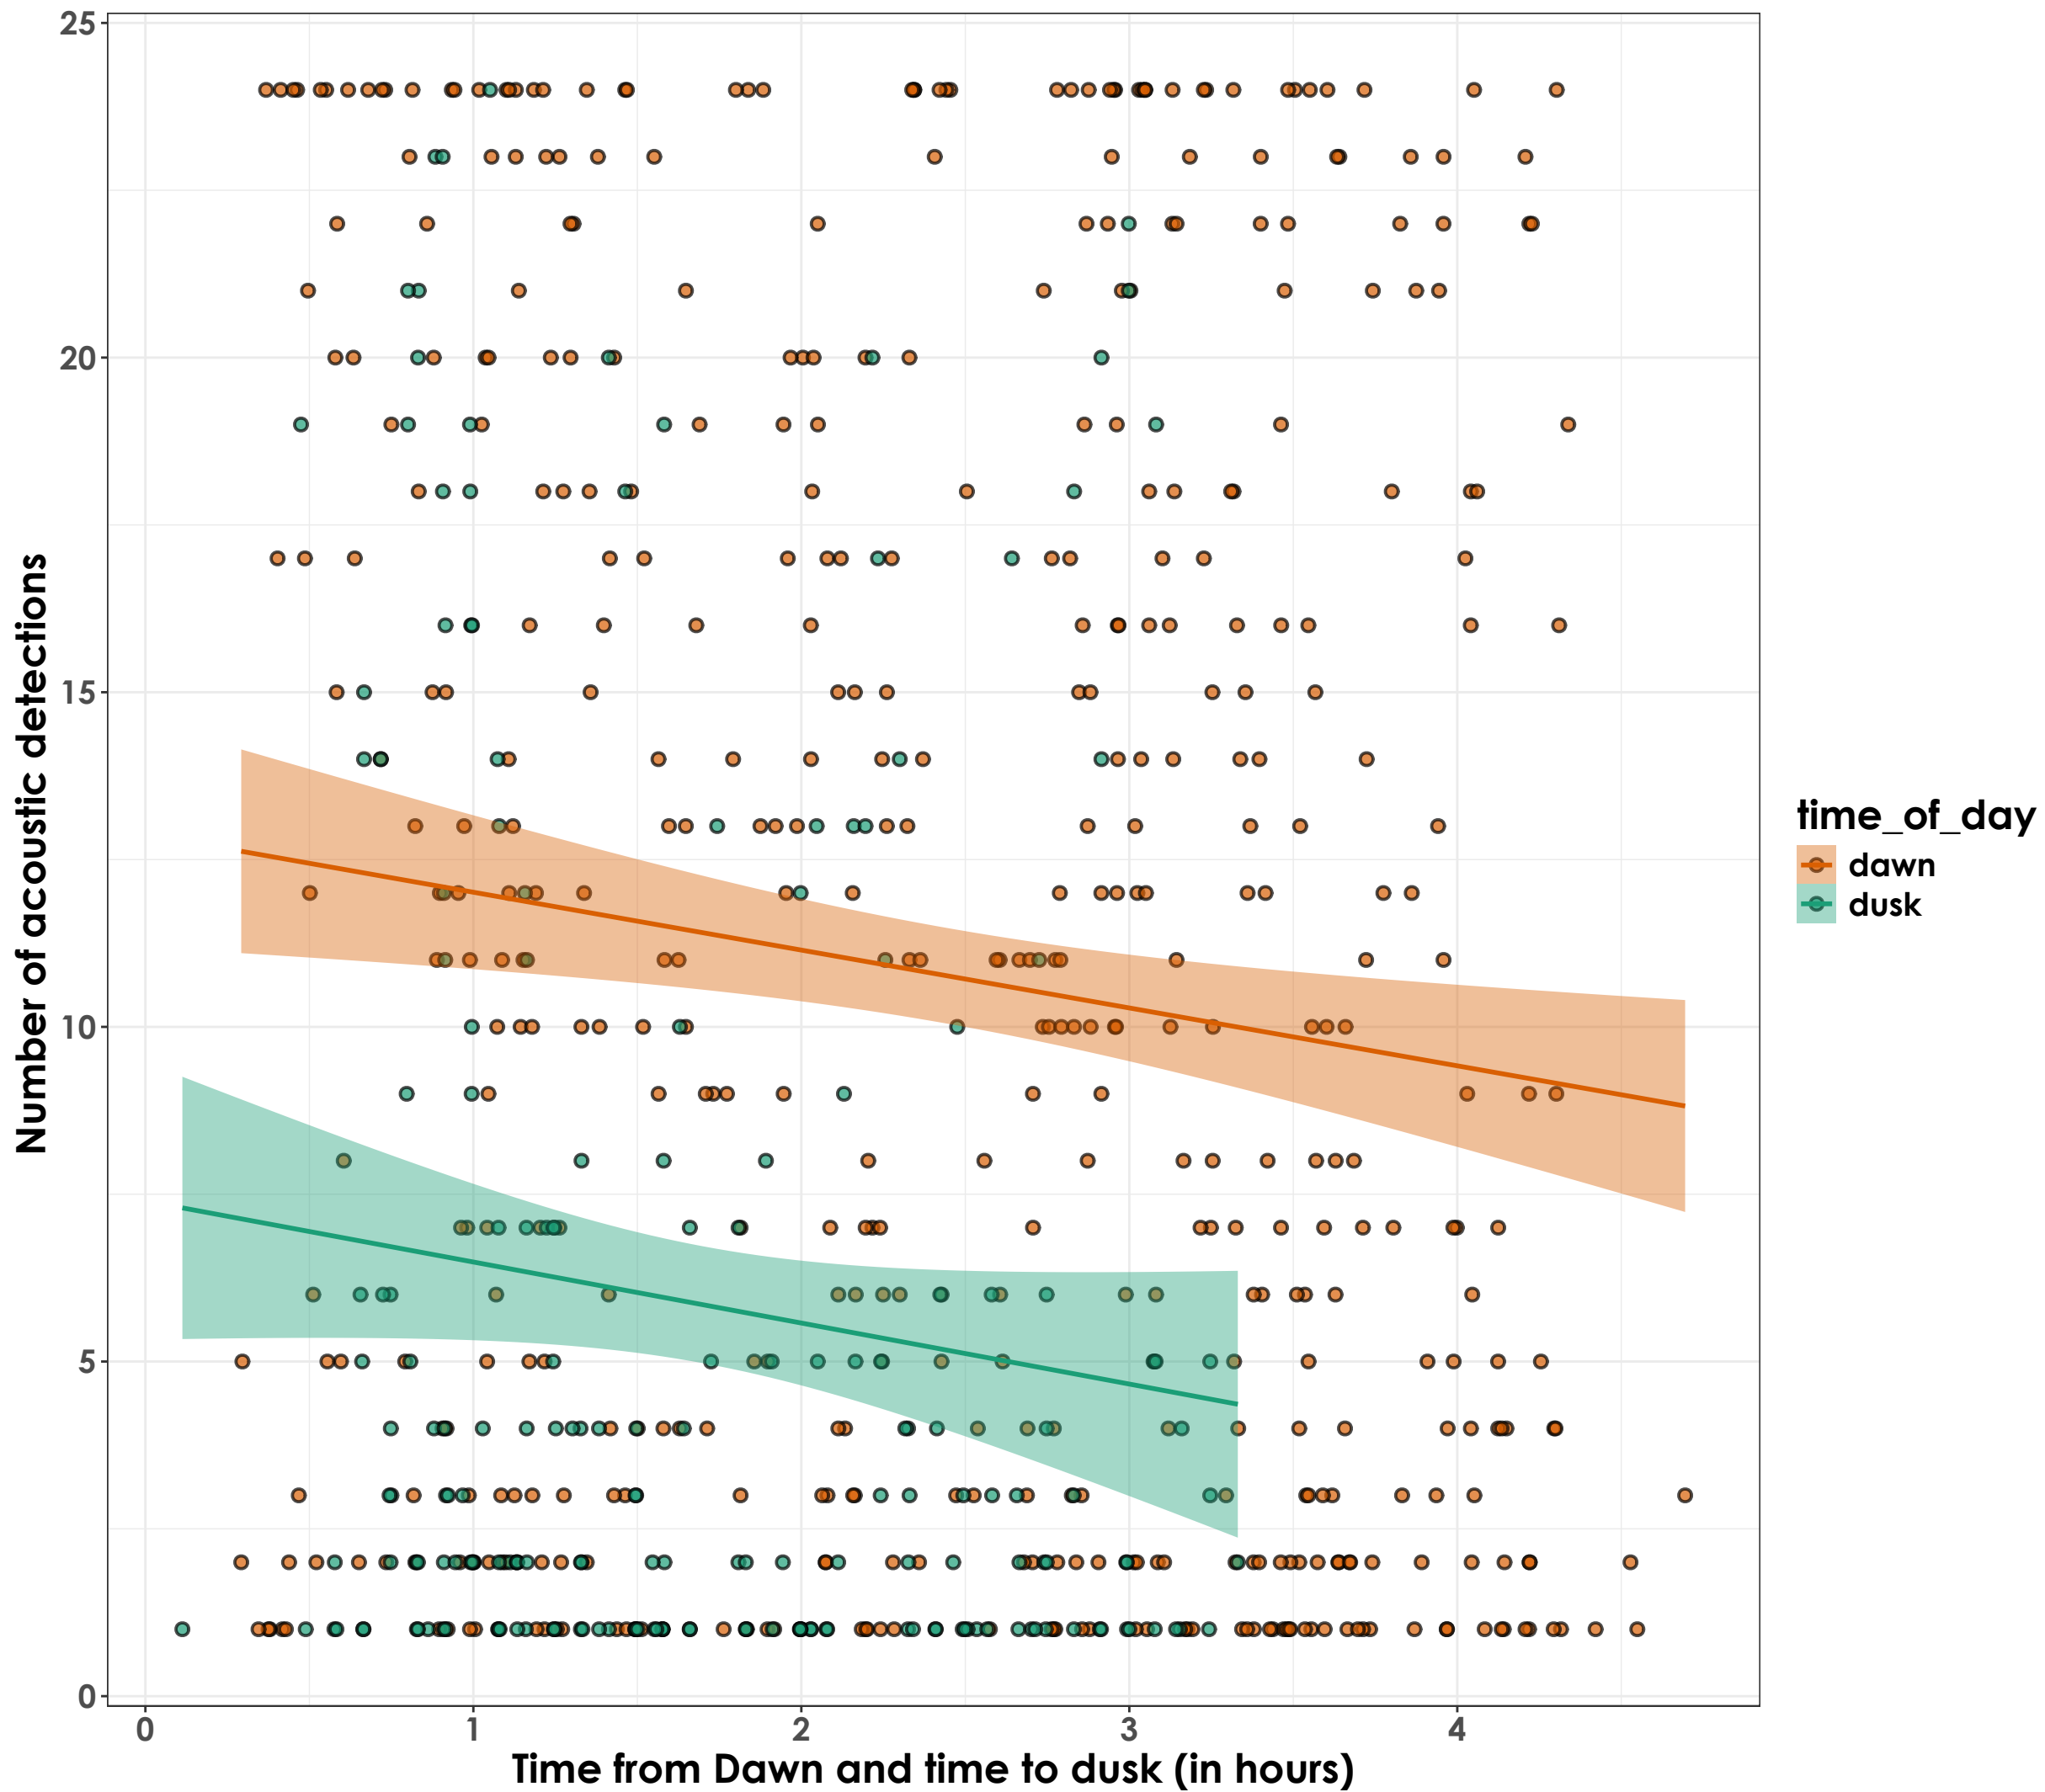

Greater Racket-tailed Drongo

Each dot represents the total number of detections after dawn or before dusk (in hours)

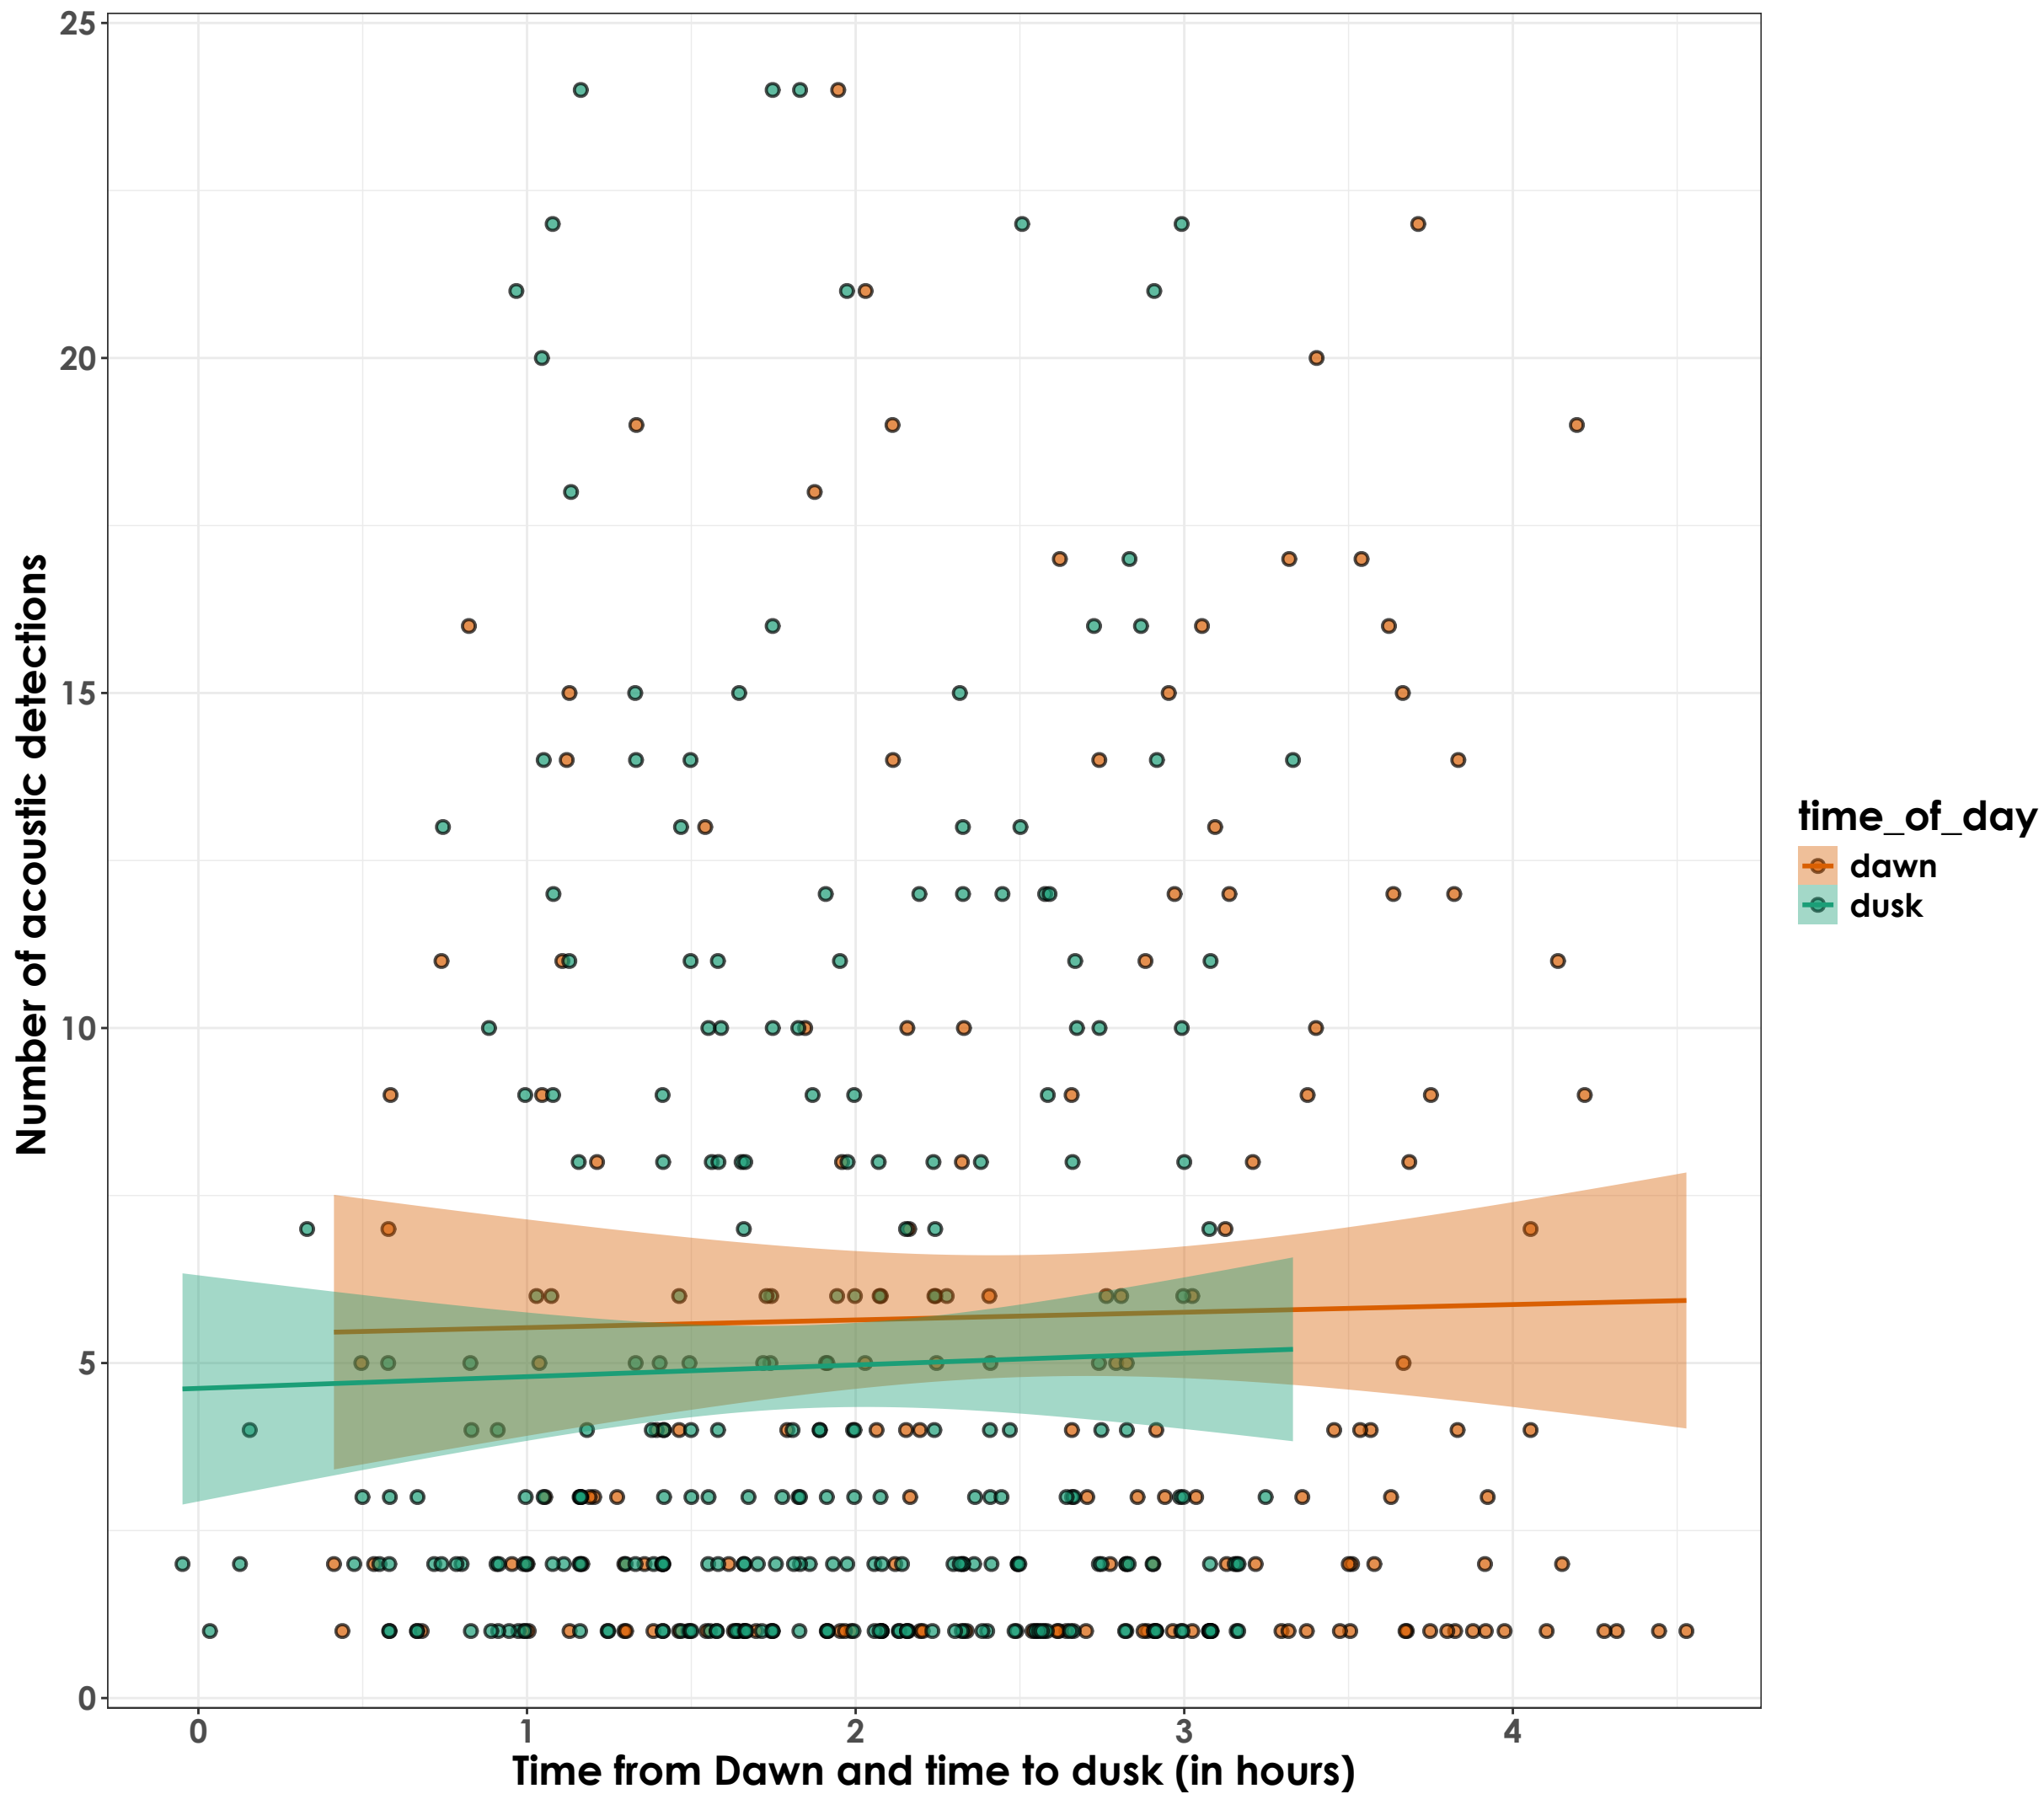

Indian Scimitar-Babbler

Each dot represents the total number of detections after dawn or before dusk (in hours)

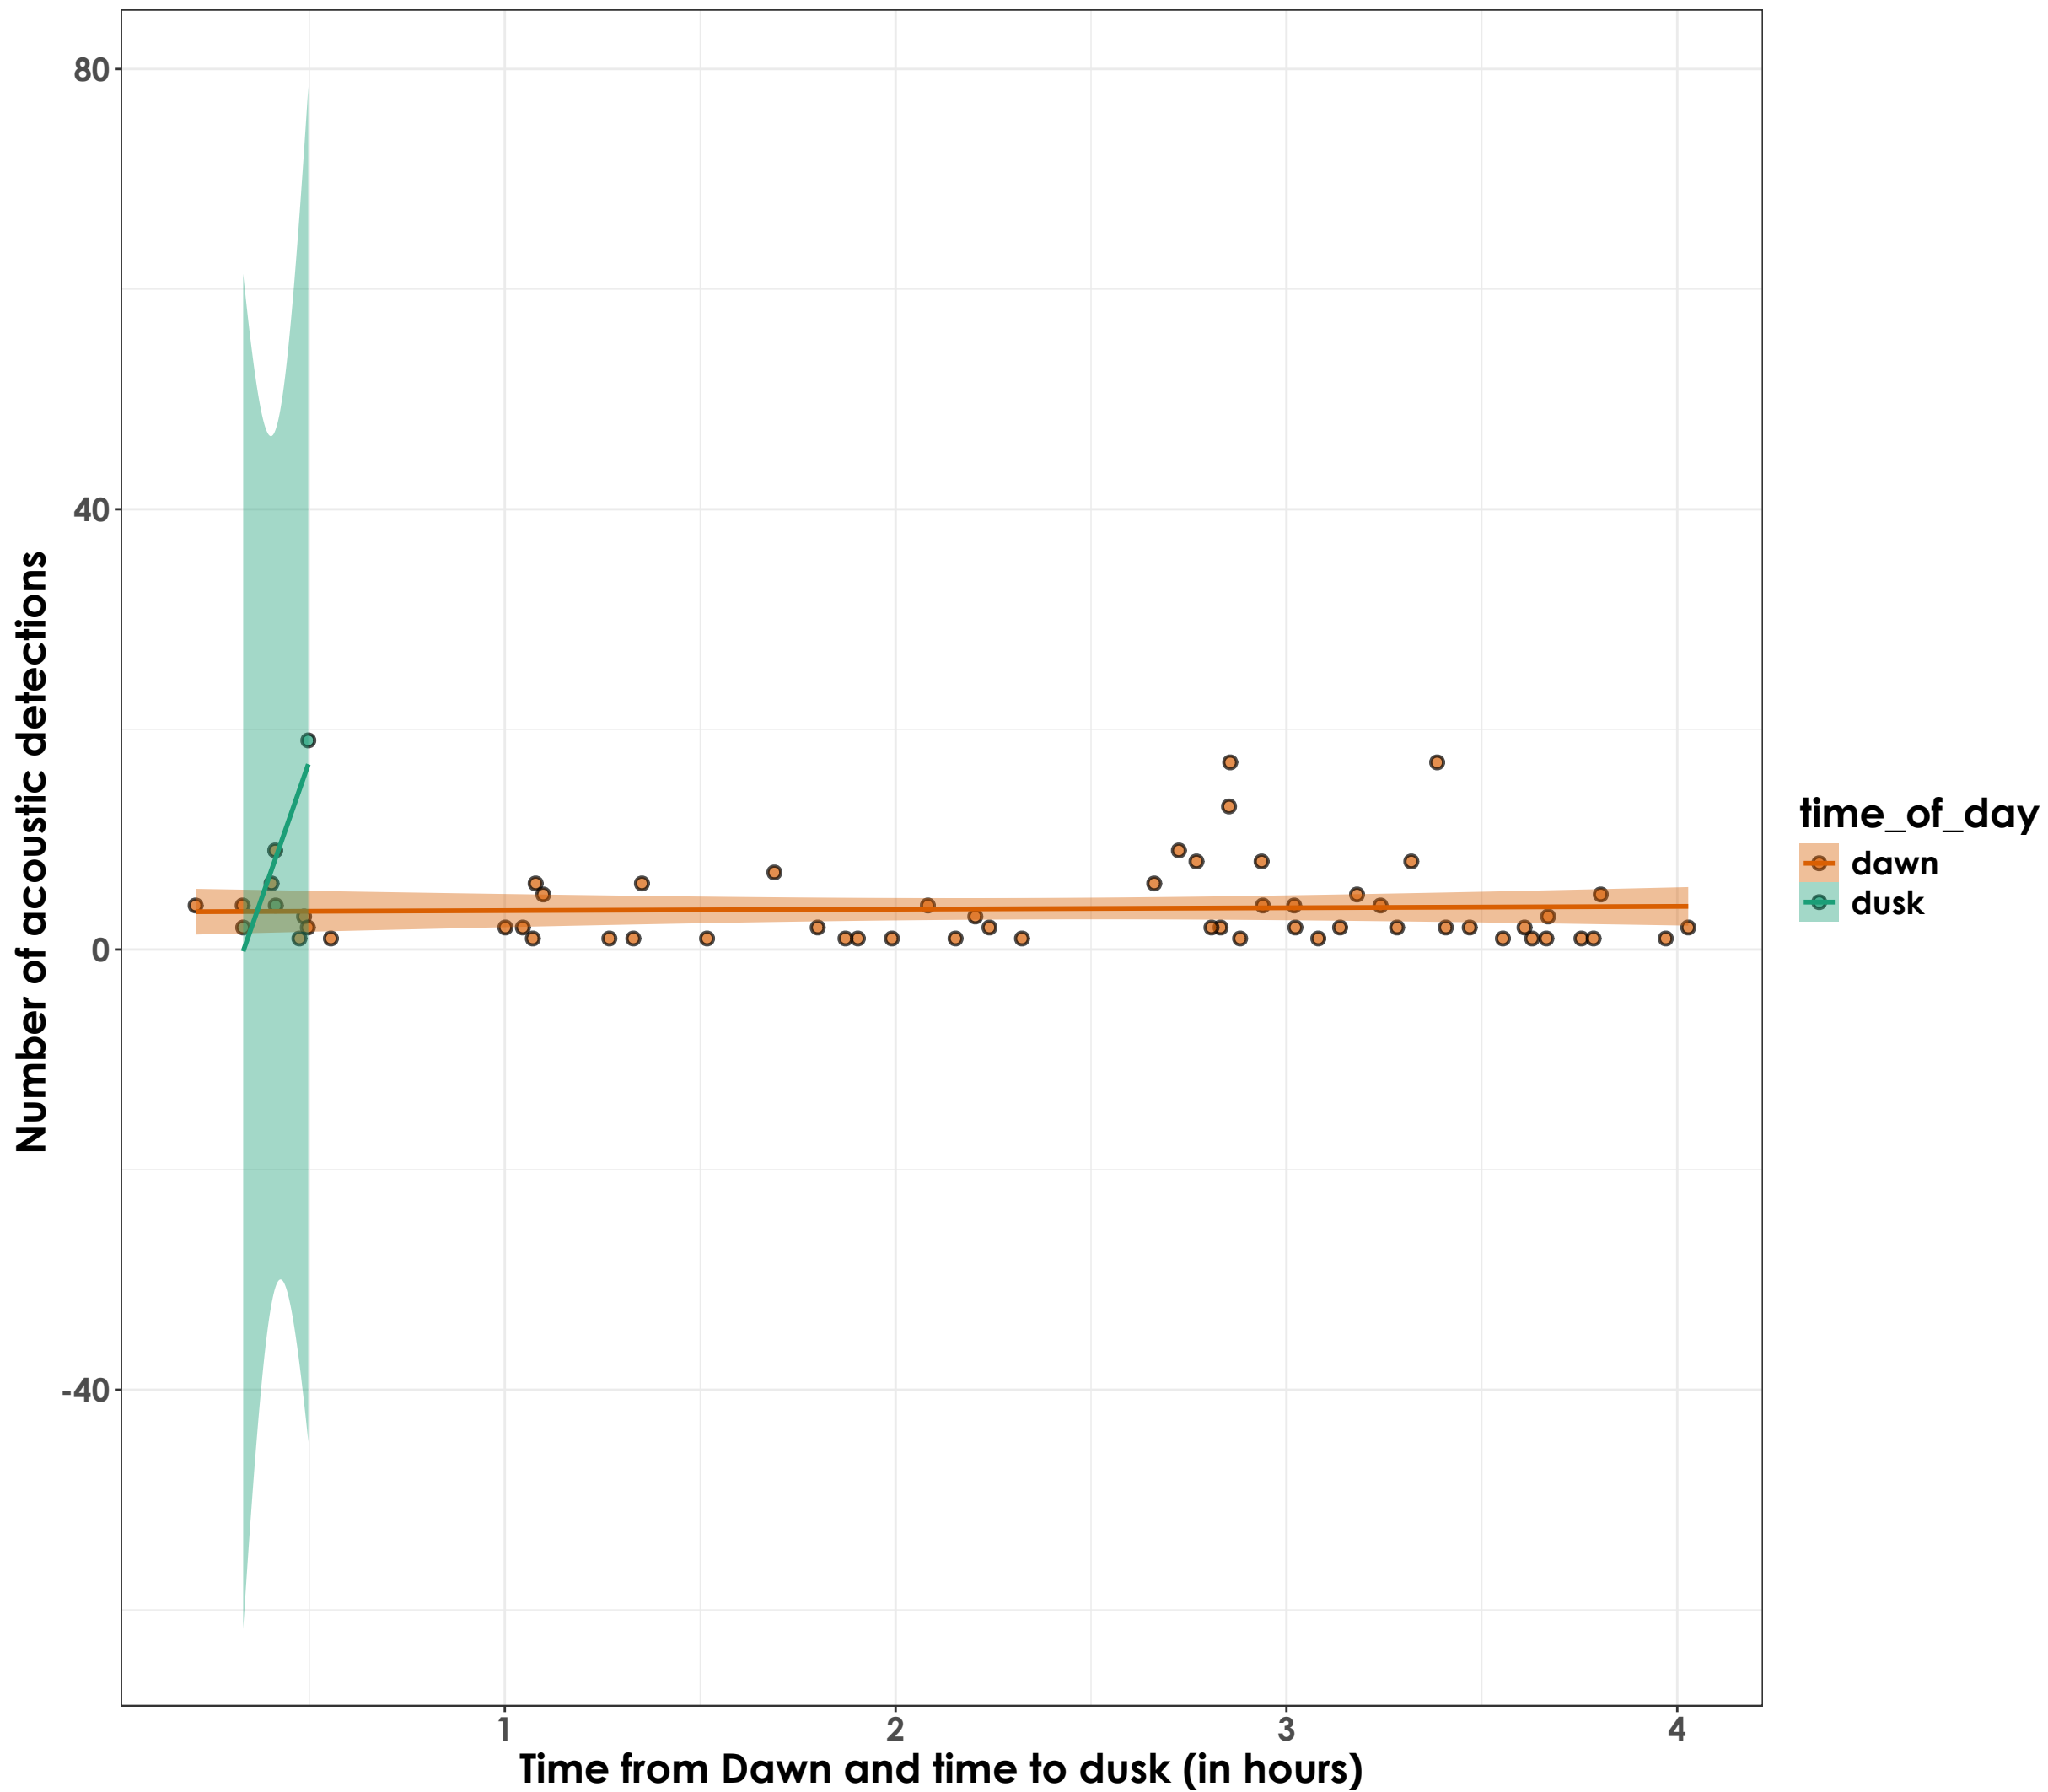

Malabar Gray Hornbill

Each dot represents the total number of detections after dawn or before dusk (in hours)

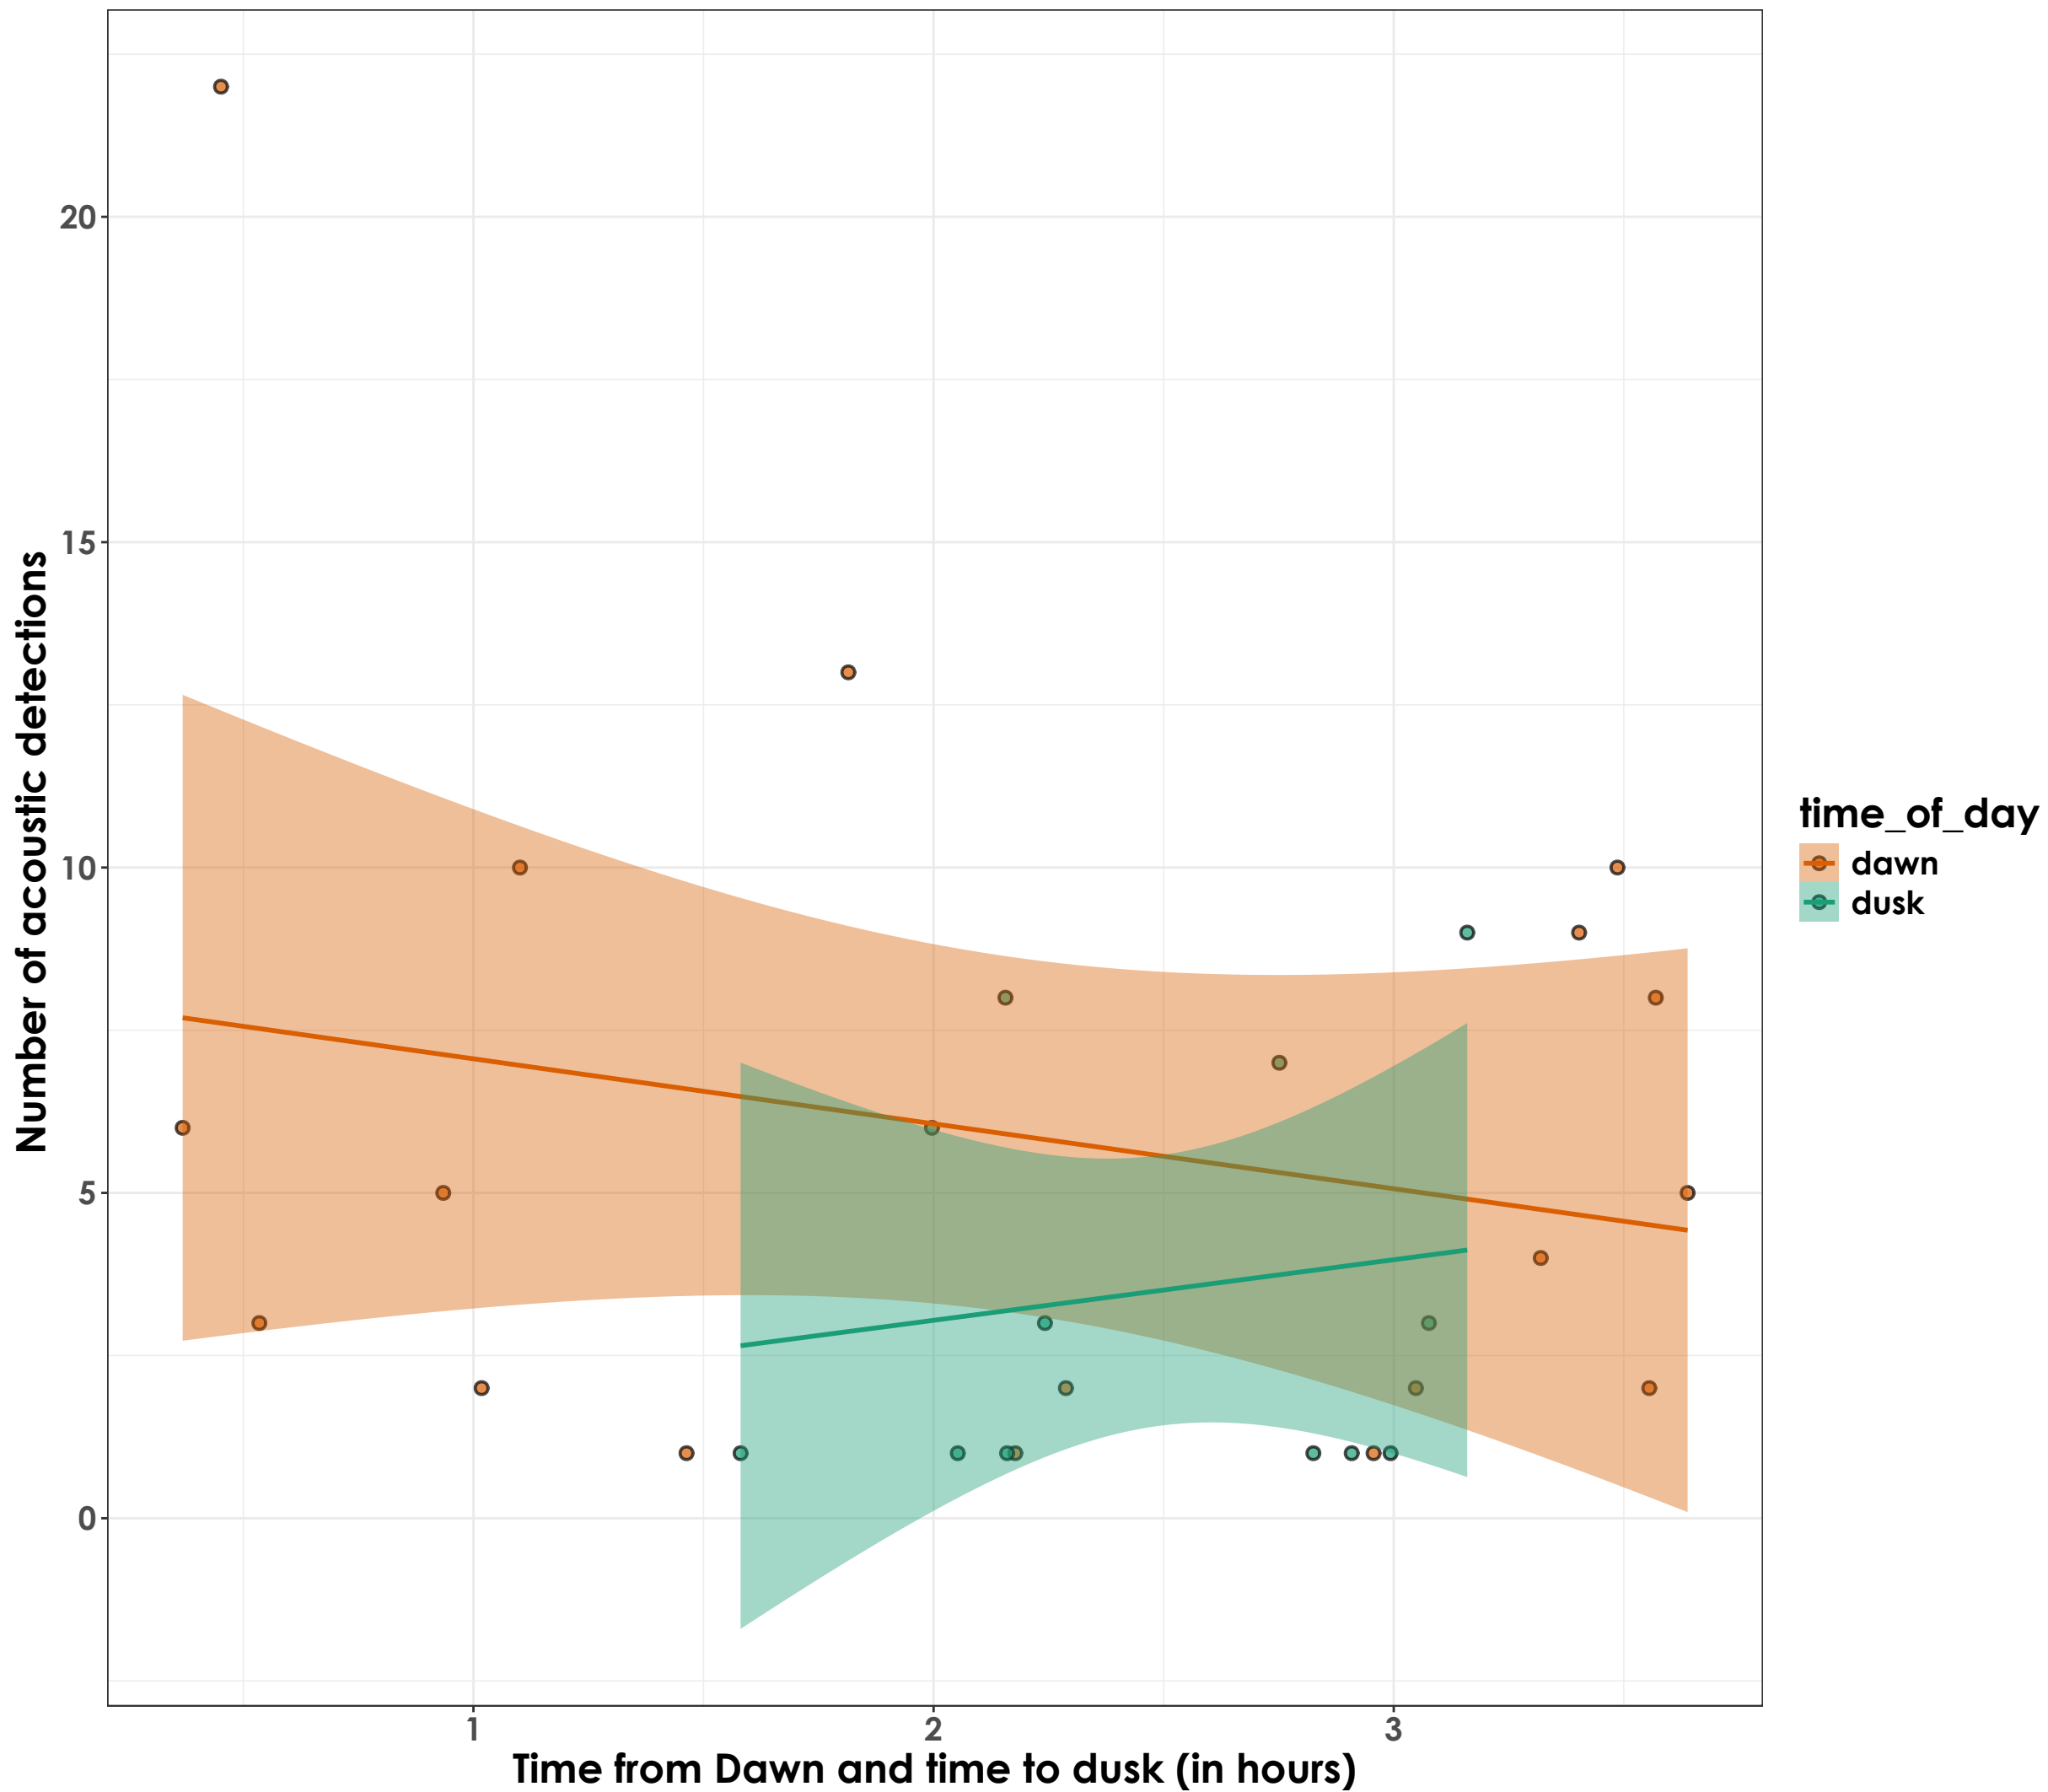

Oriental Magpie-Robin

Each dot represents the total number of detections after dawn or before dusk (in hours)

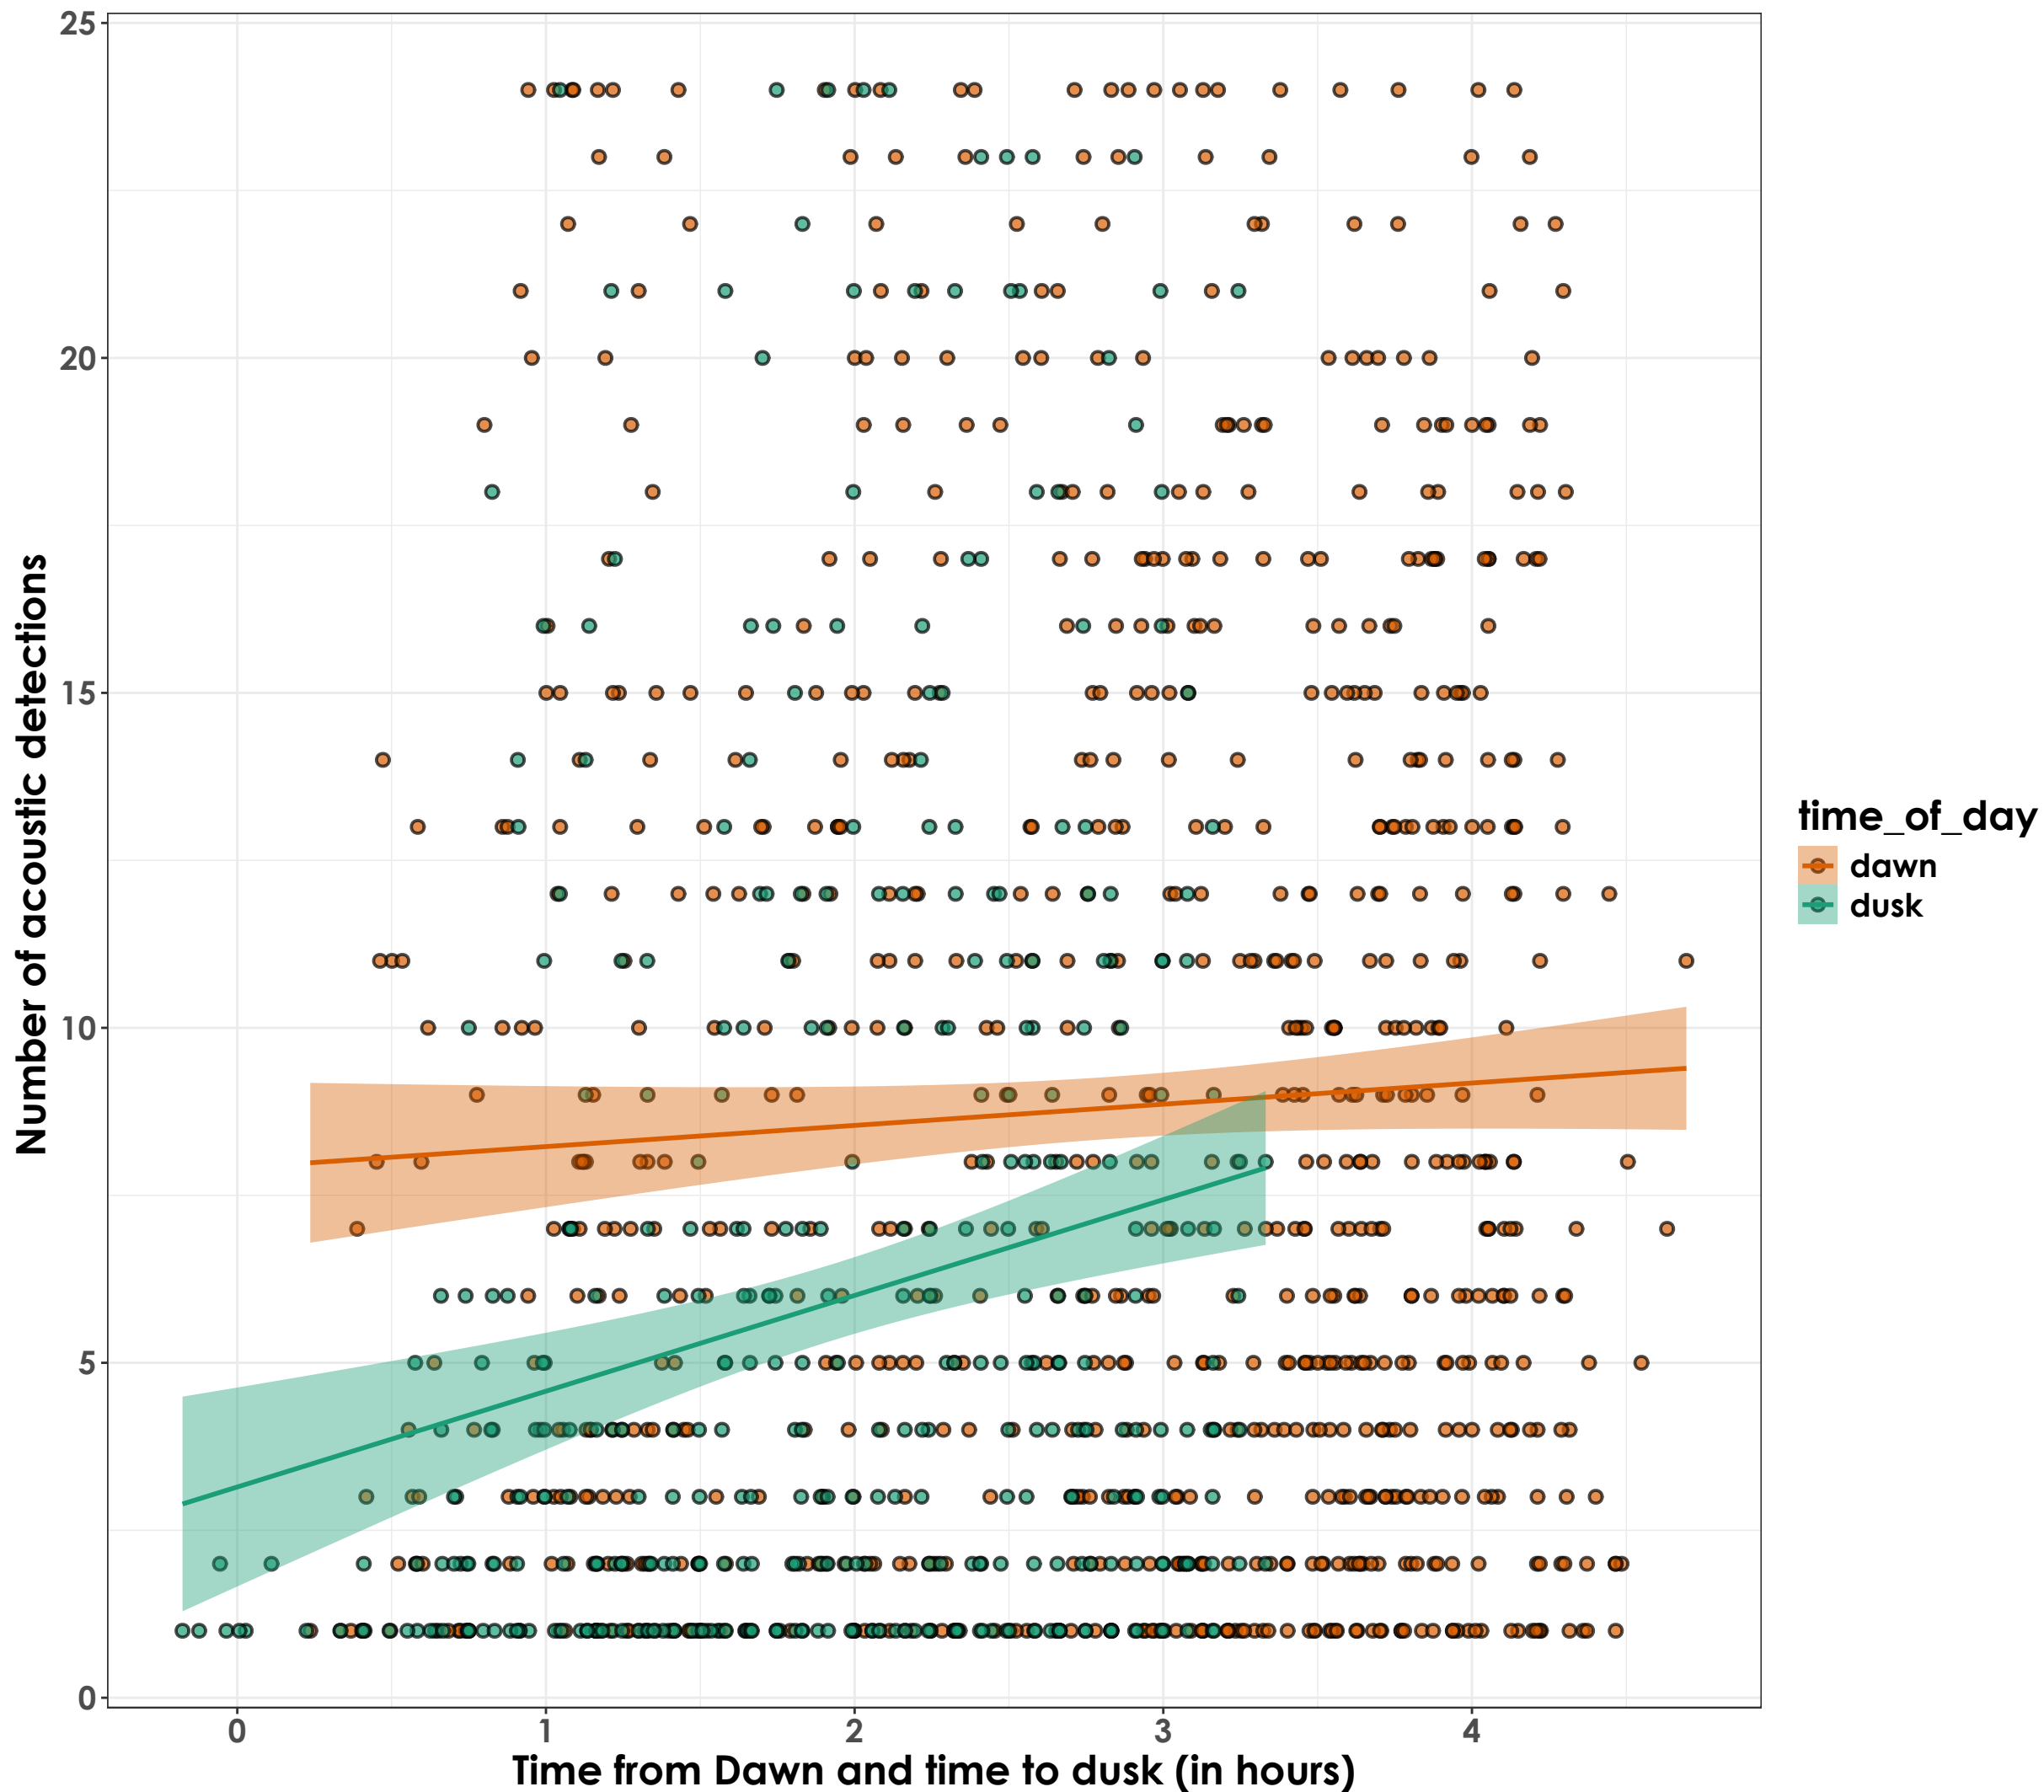

Nilgiri Flycatcher

Each dot represents the total number of detections after dawn or before dusk (in hours)

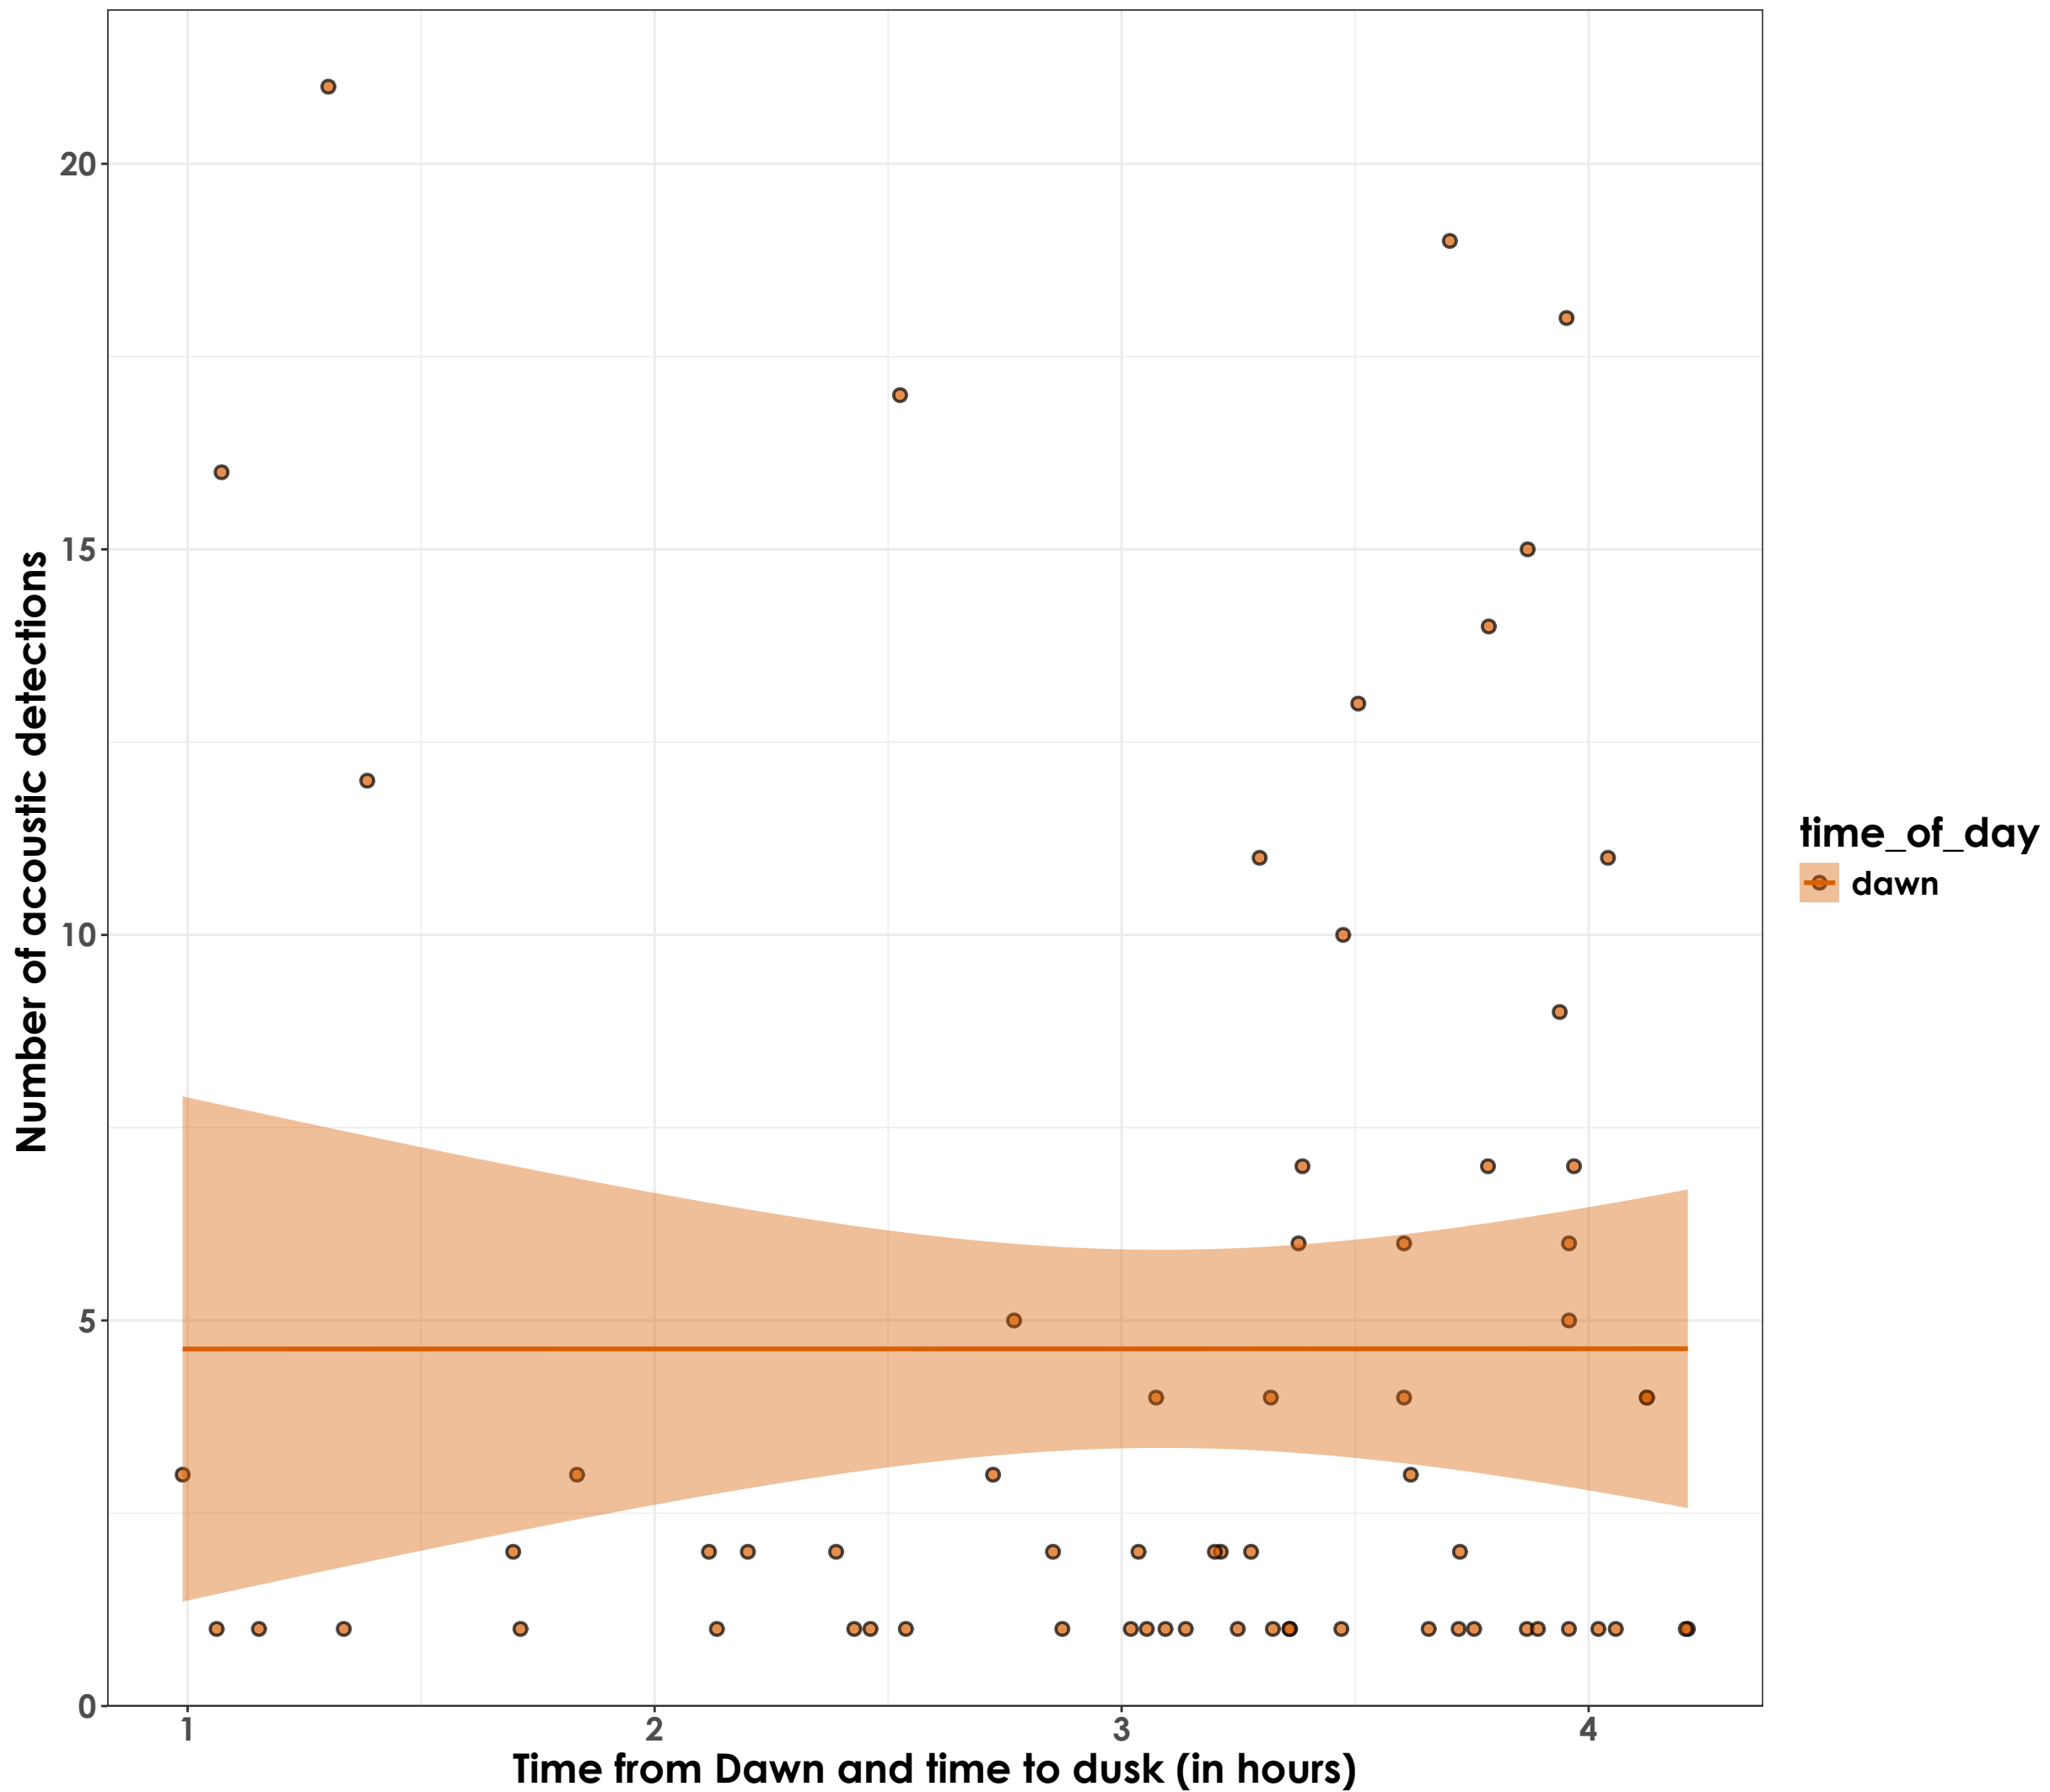

Nilgiri Flowerpecker

Each dot represents the total number of detections after dawn or before dusk (in hours)

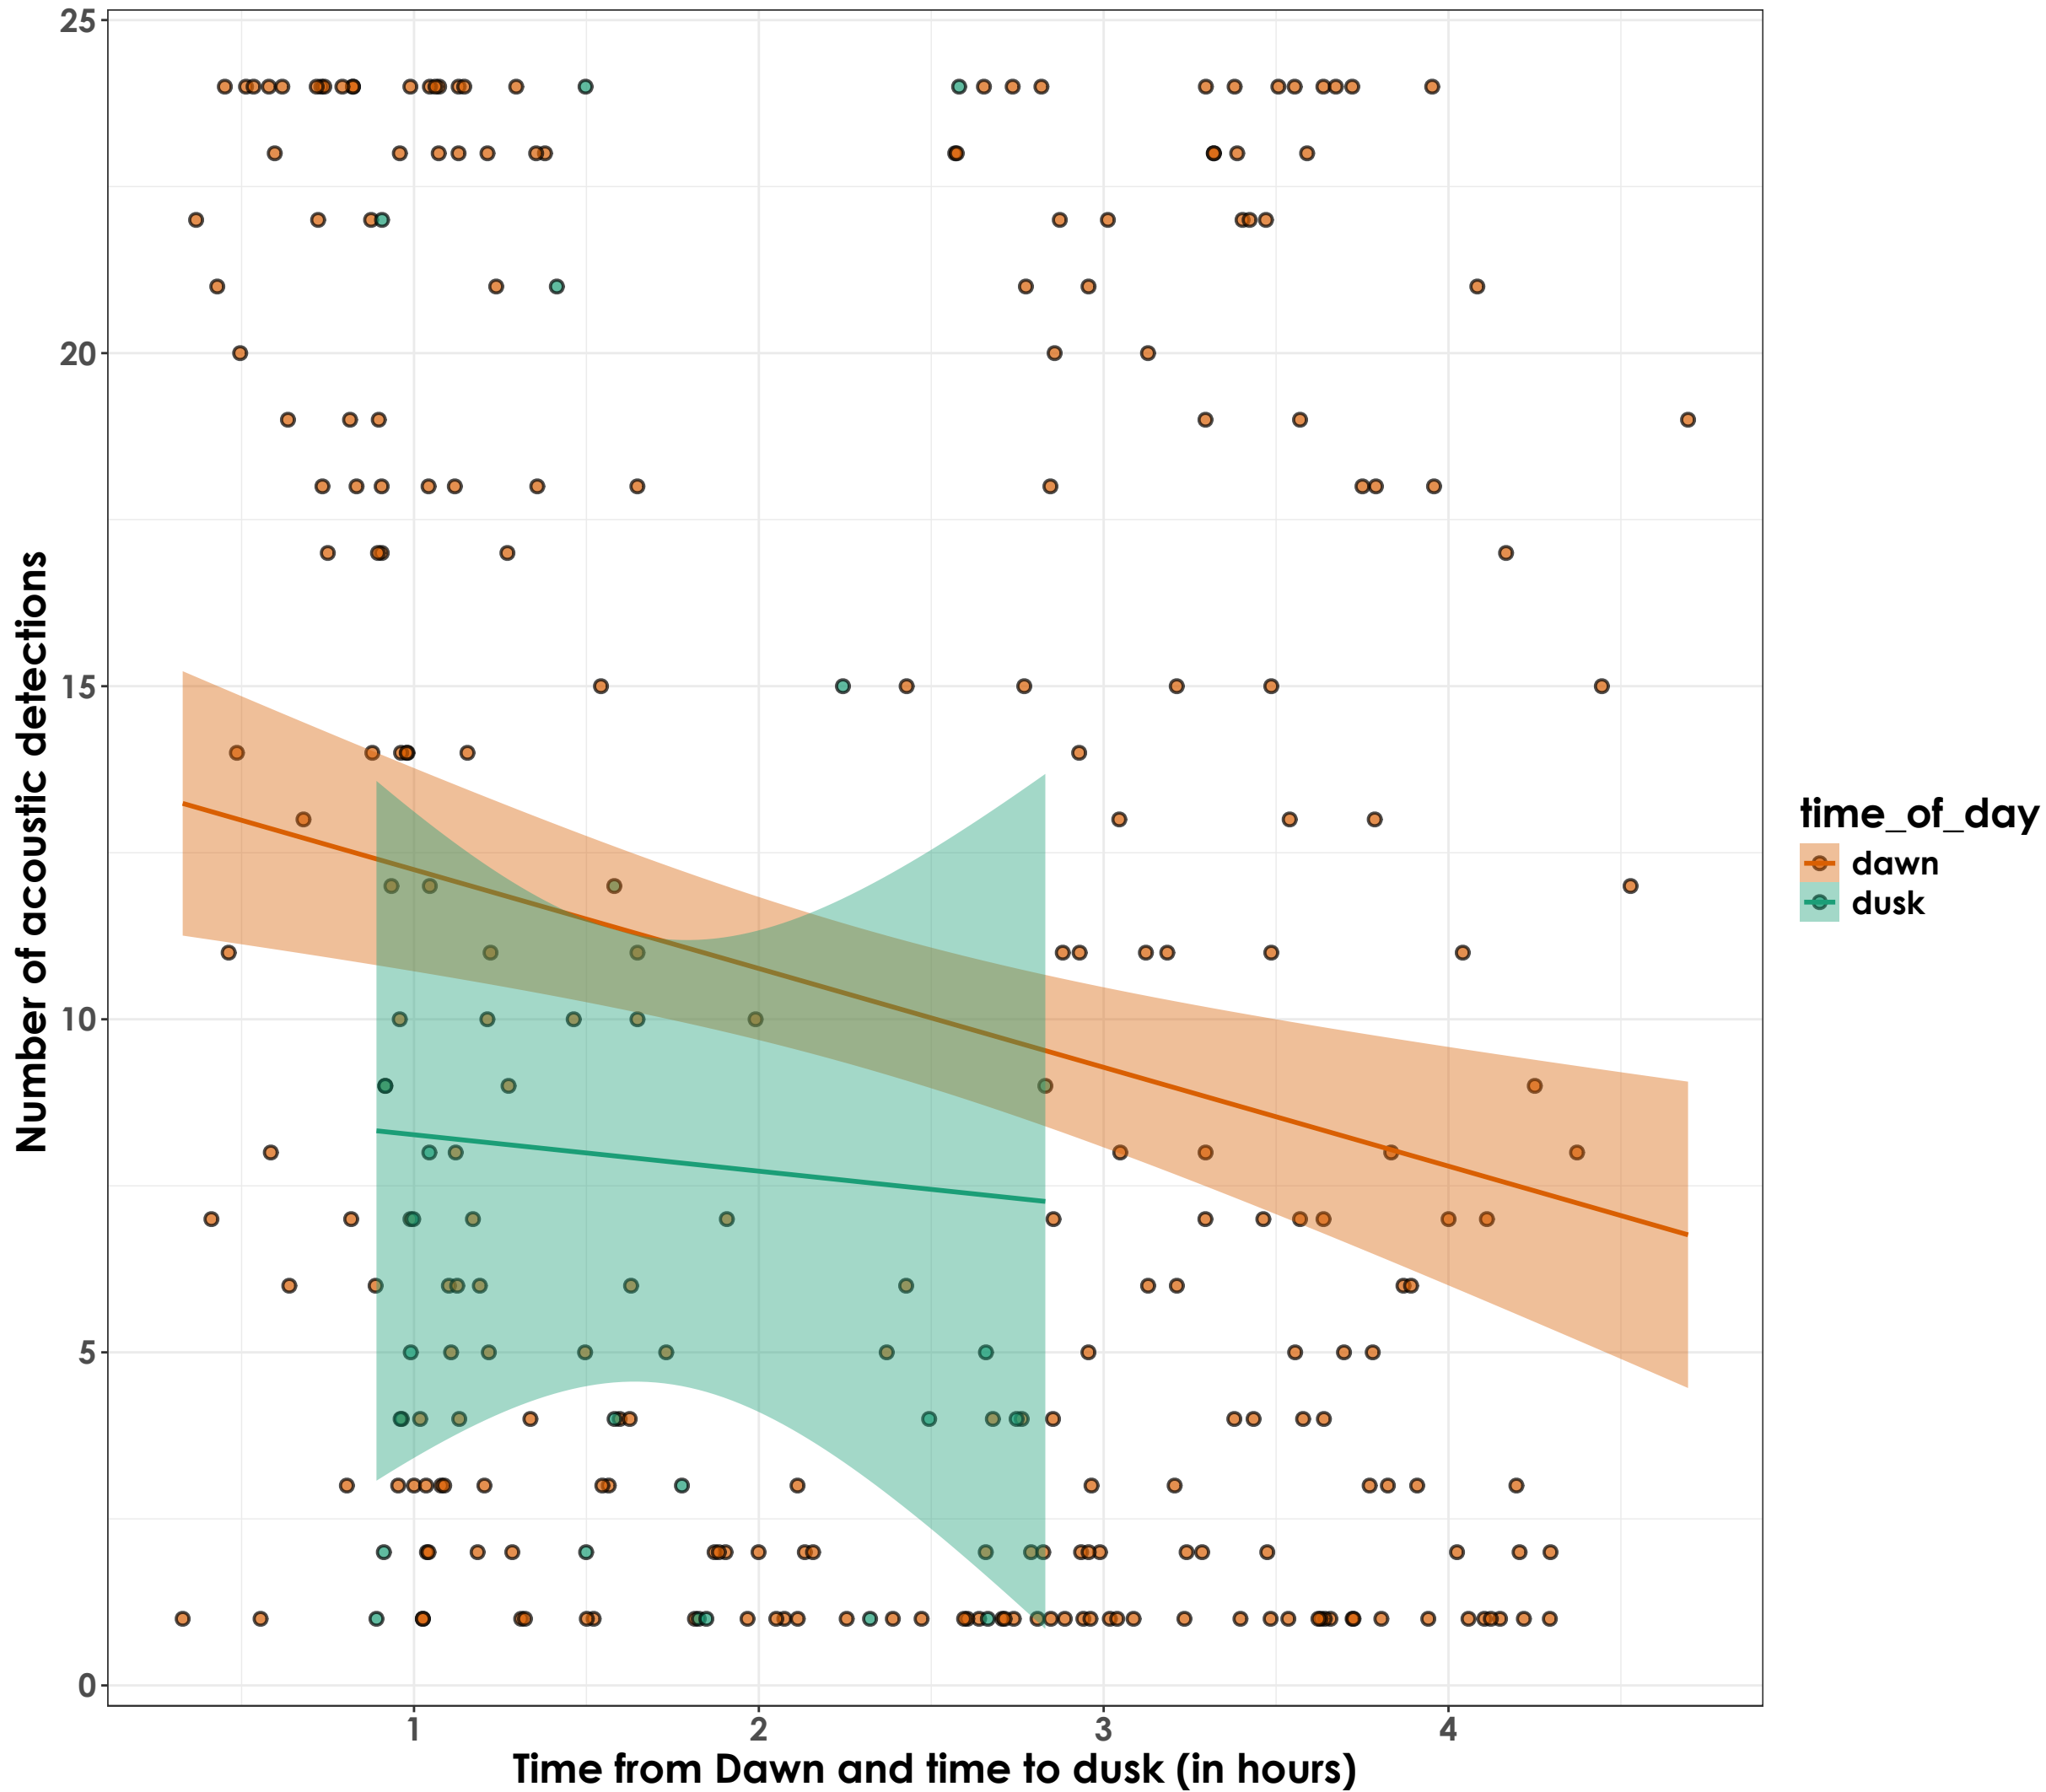

Purple Sunbird

Each dot represents the total number of detections after dawn or before dusk (in hours)

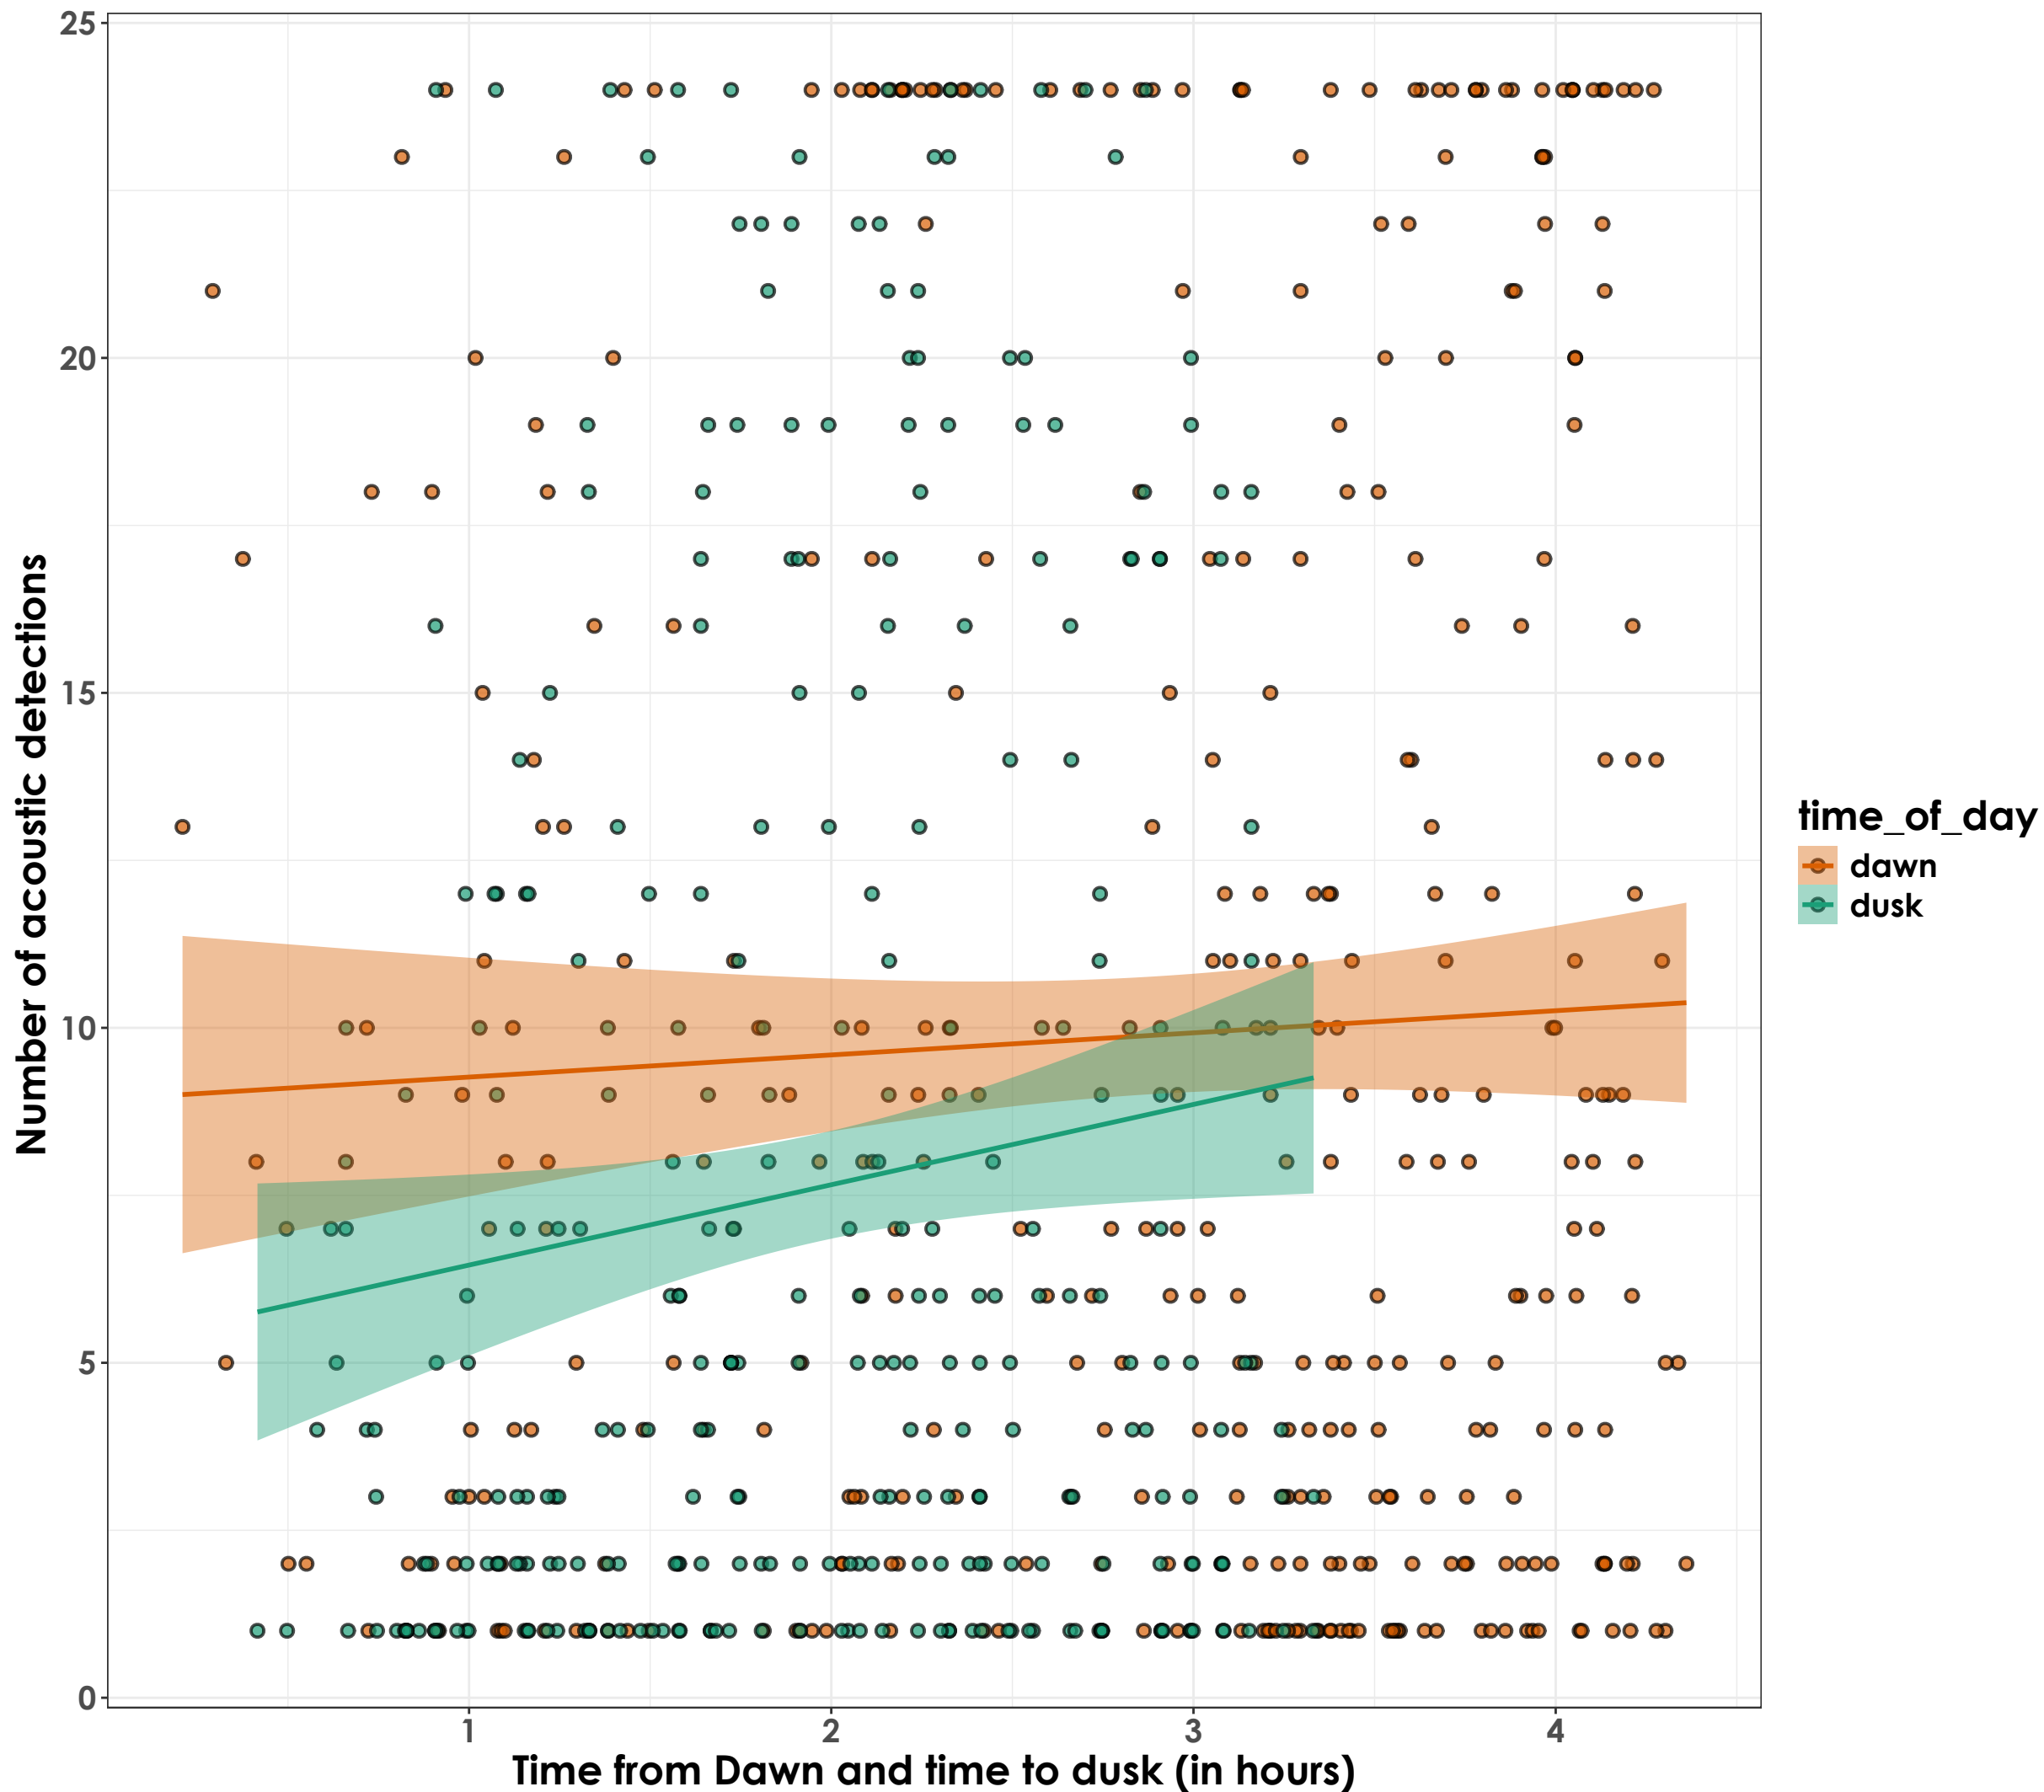

Puff-throated Babbler

Each dot represents the total number of detections after dawn or before dusk (in hours)

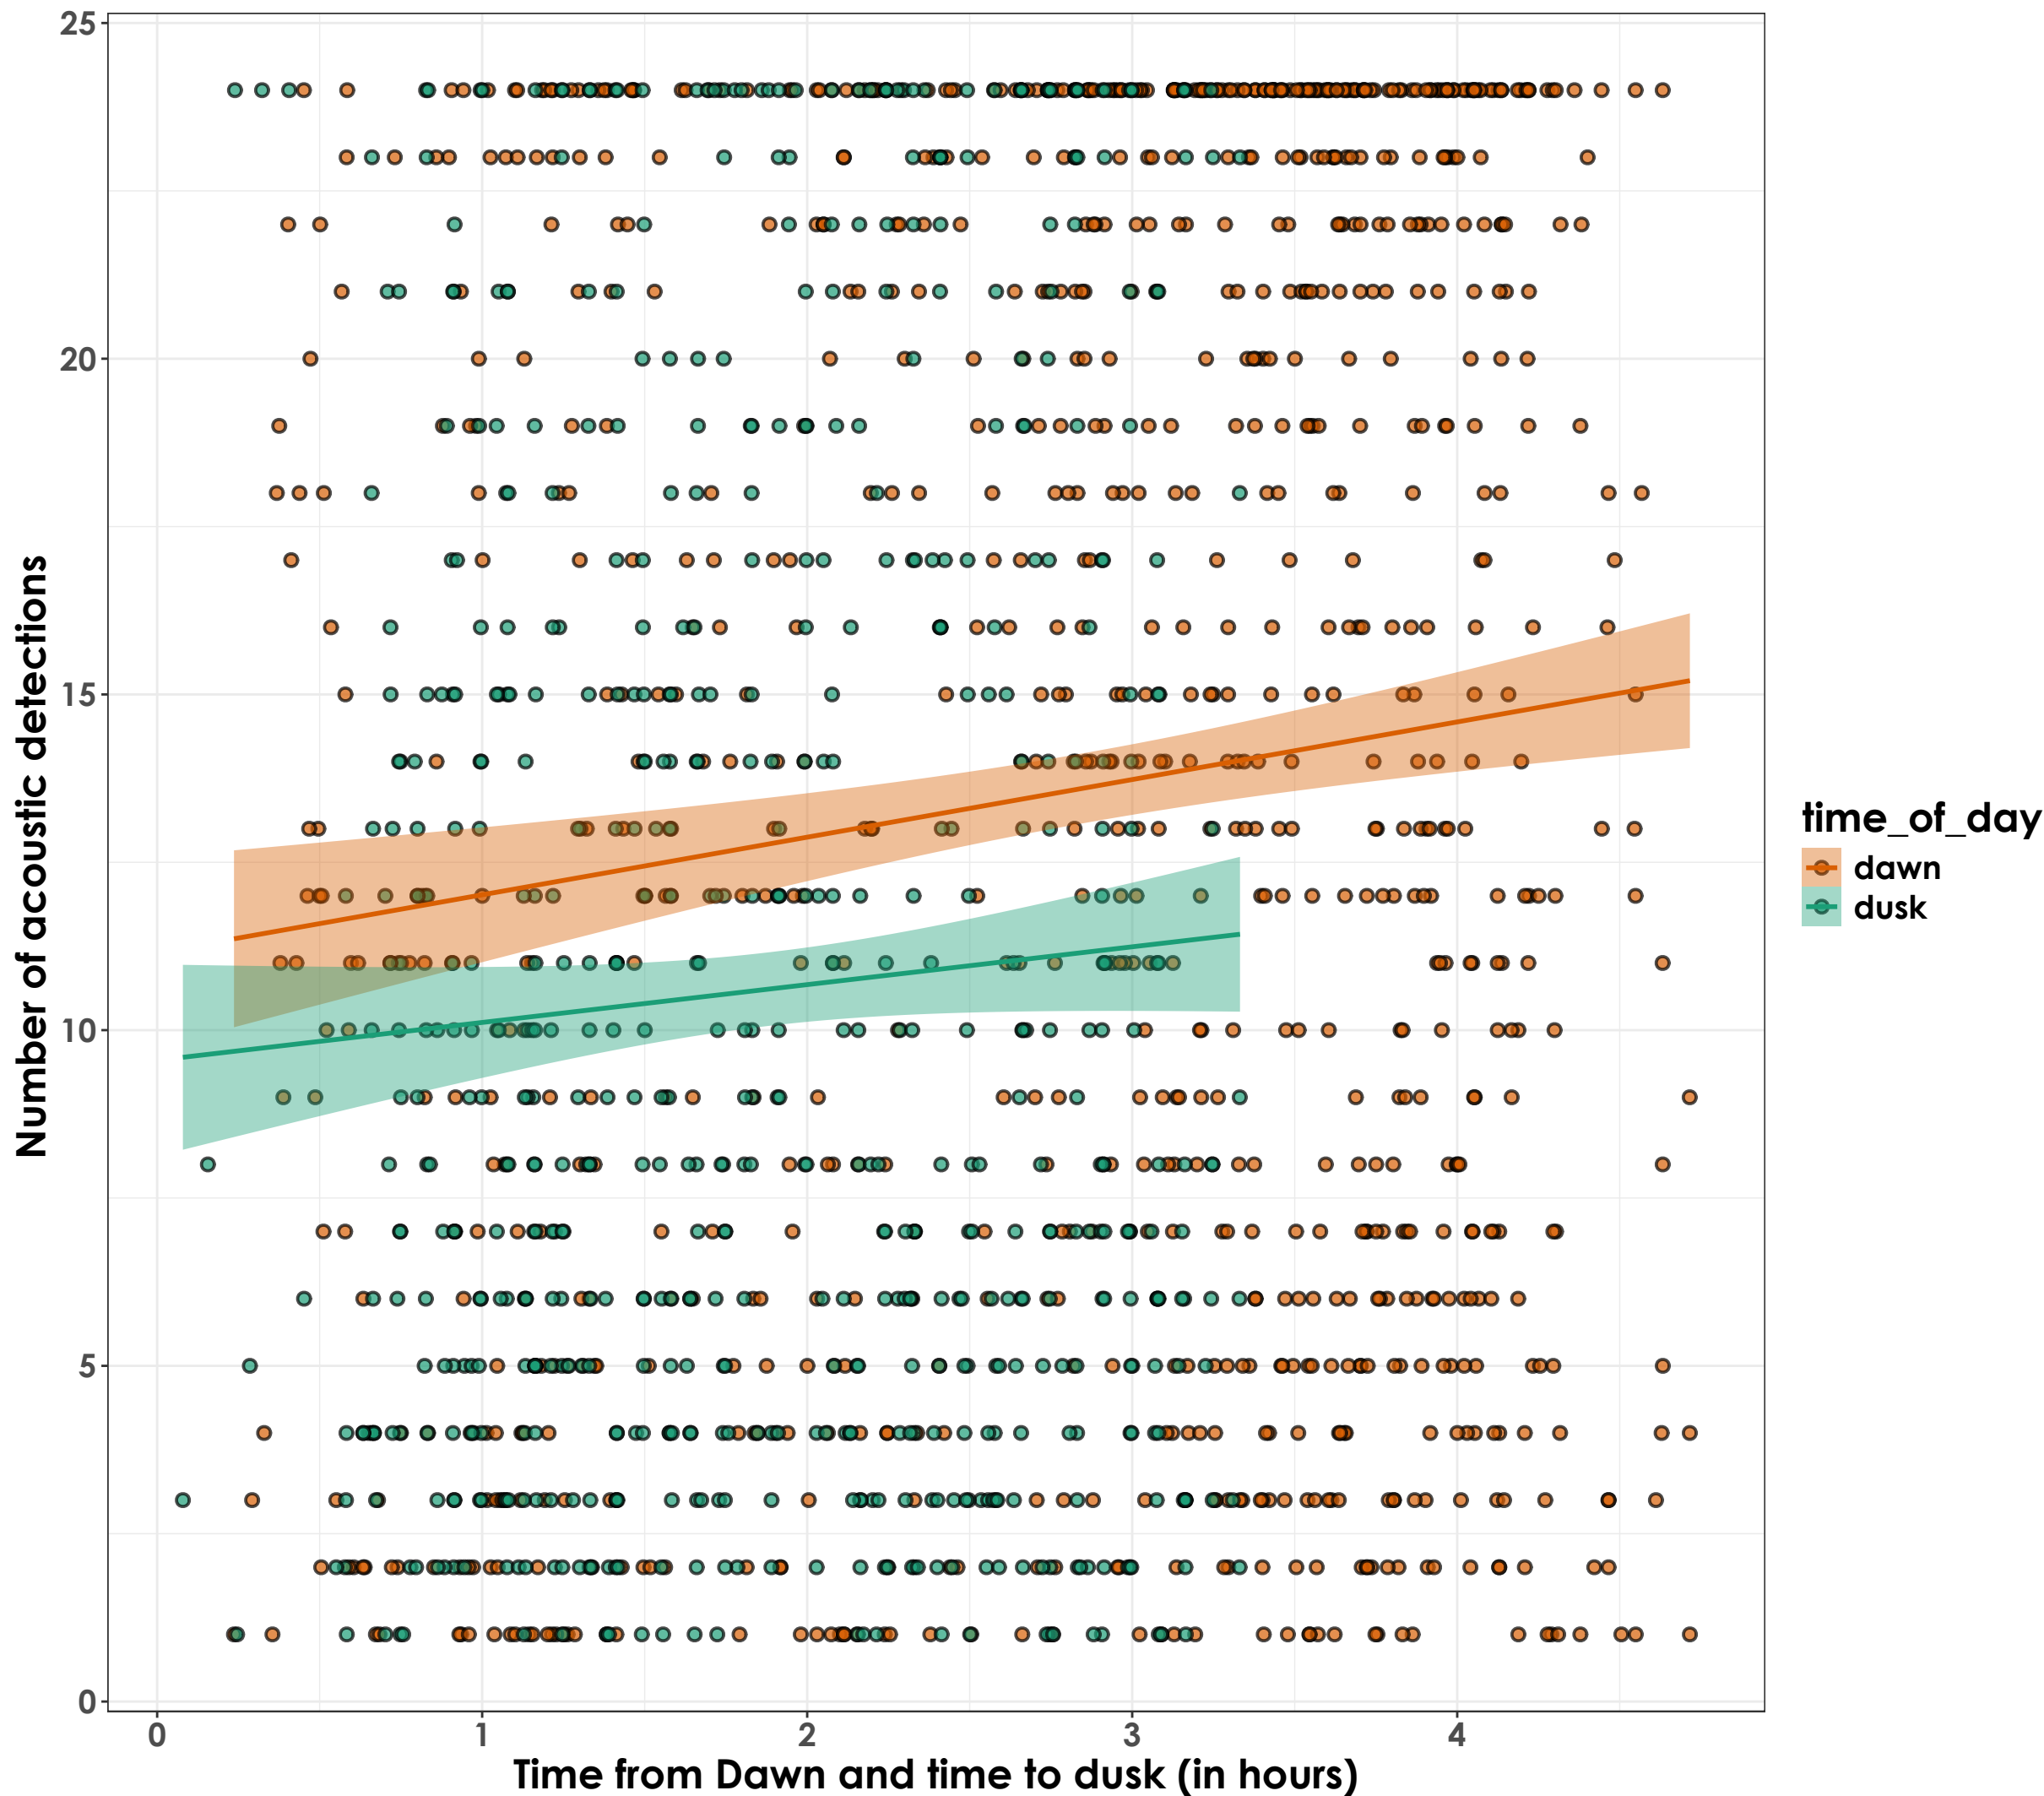

Square-tailed Bulbul

Each dot represents the total number of detections after dawn or before dusk (in hours)

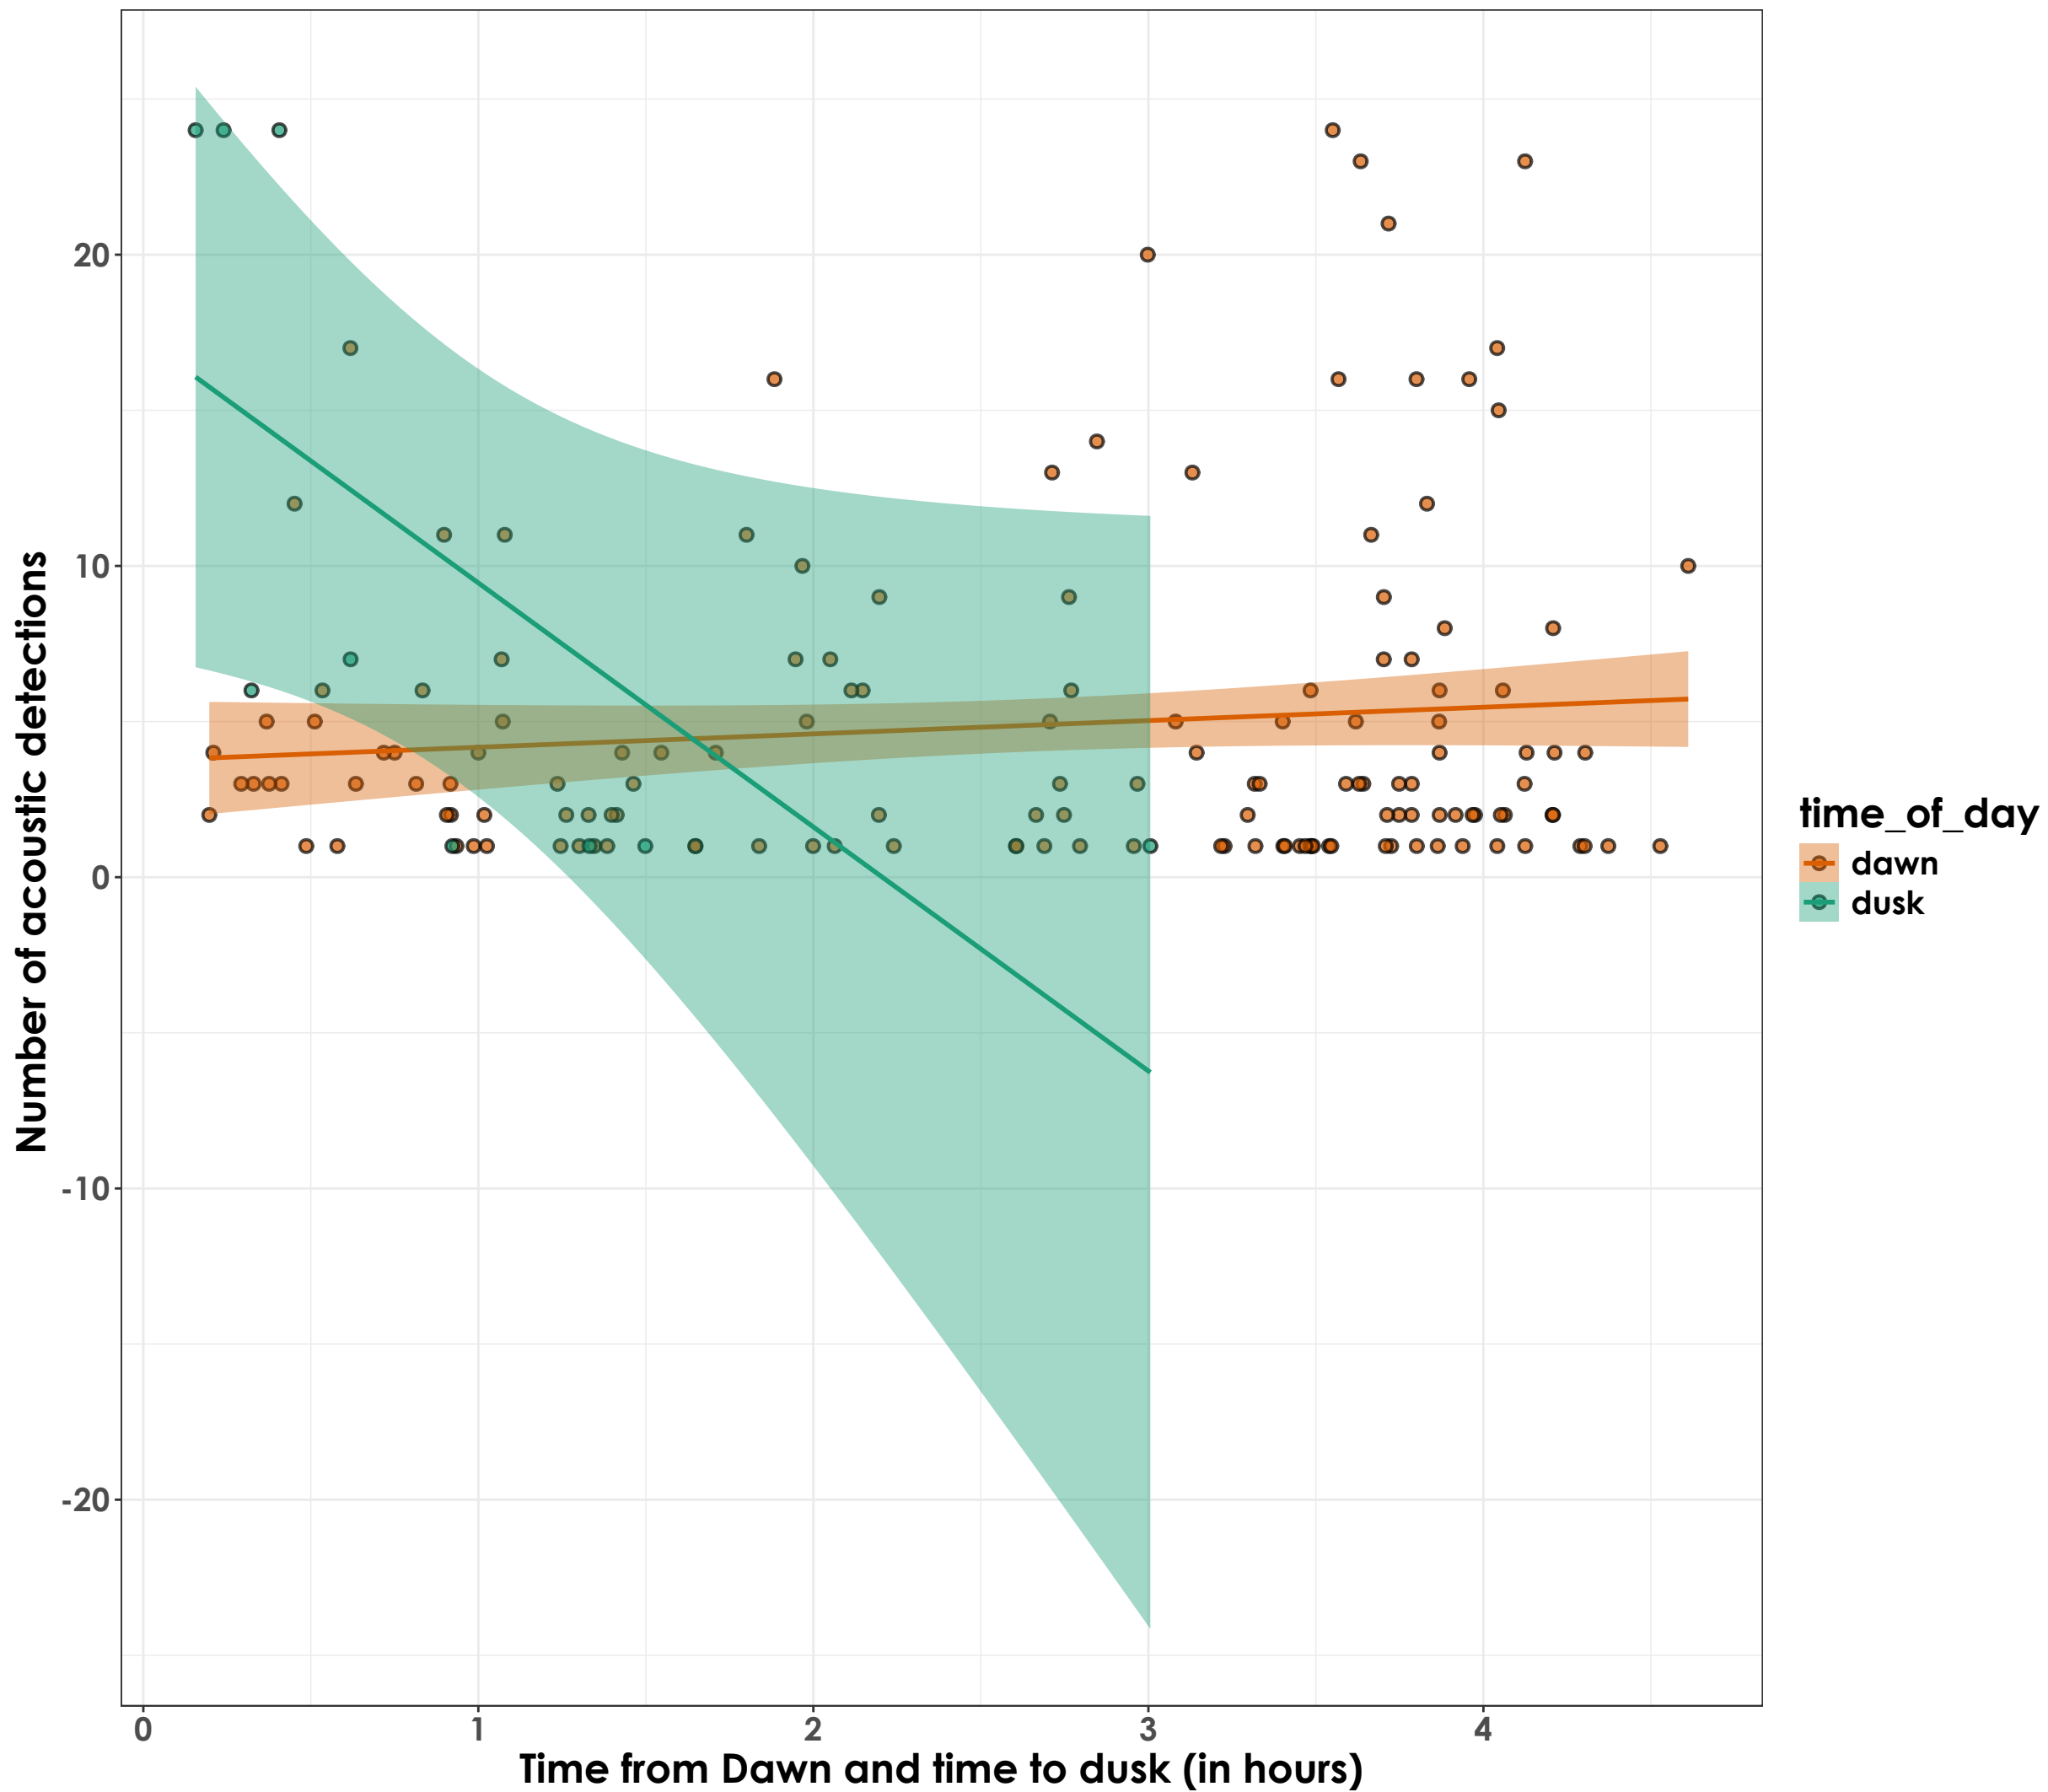

White-cheeked Barbet

Each dot represents the total number of detections after dawn or before dusk (in hours)

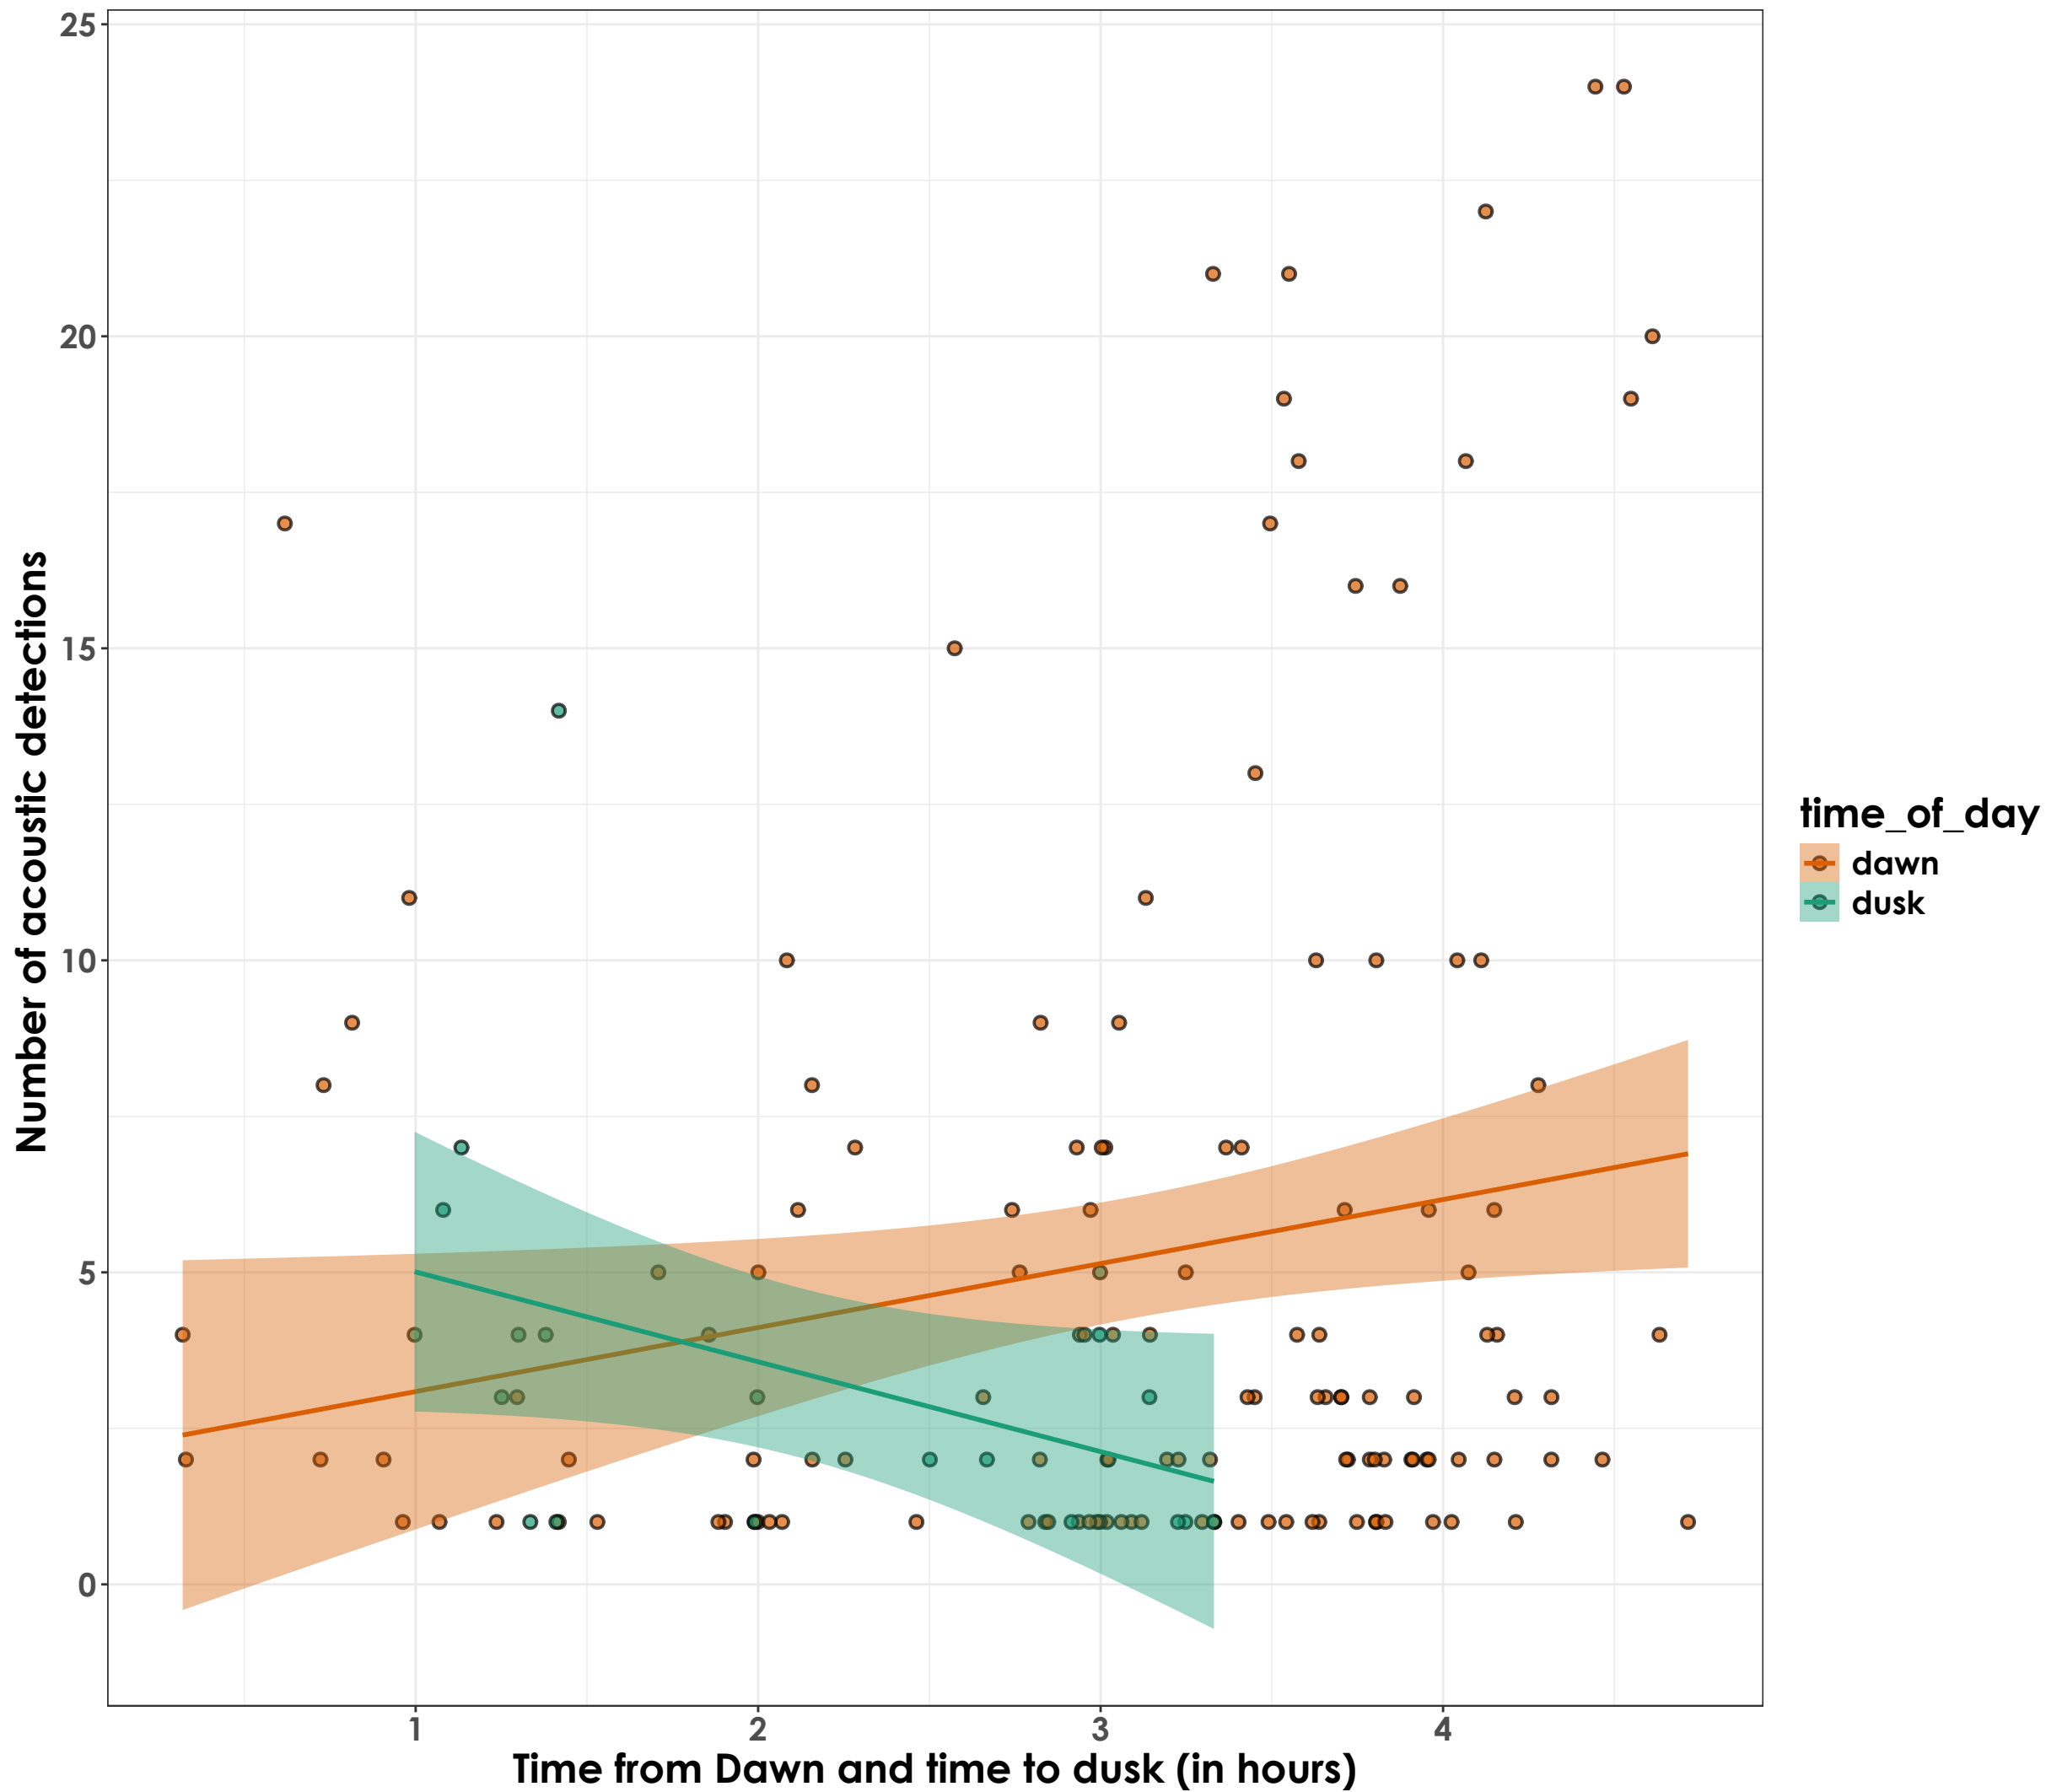

Common Iora

Each dot represents the total number of detections after dawn or before dusk (in hours)

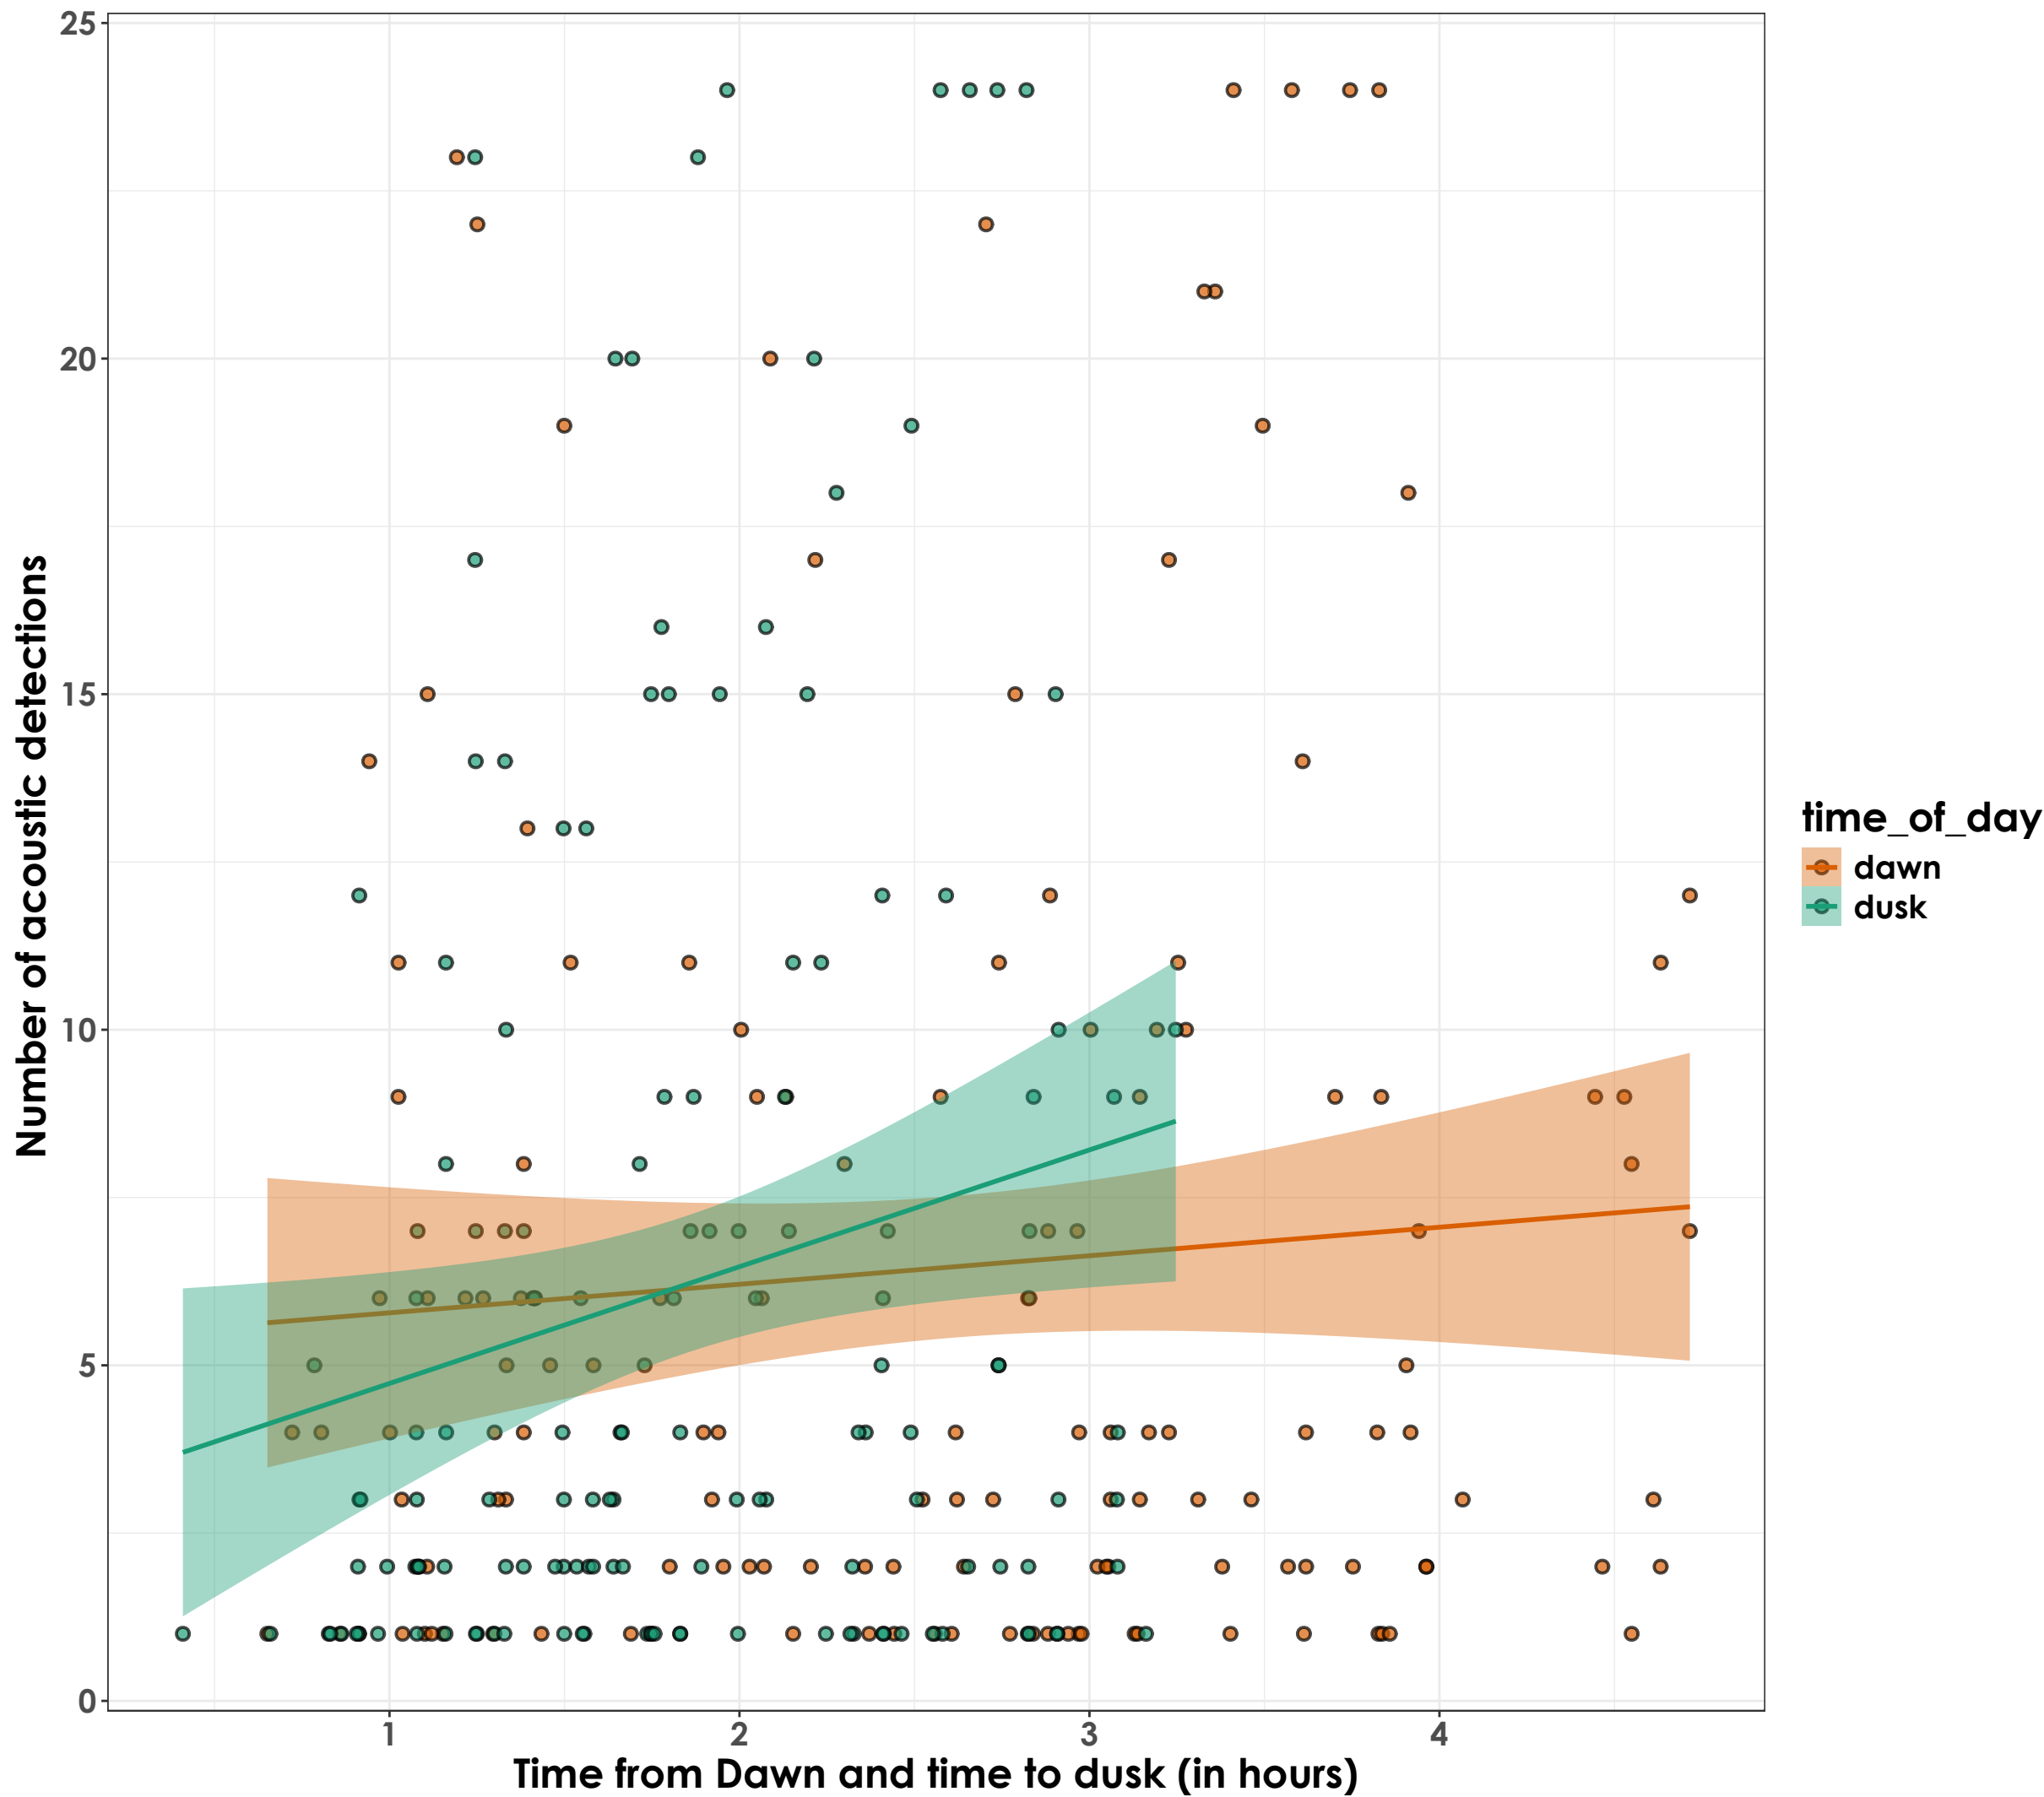

Common Tailorbird

Each dot represents the total number of detections after dawn or before dusk (in hours)

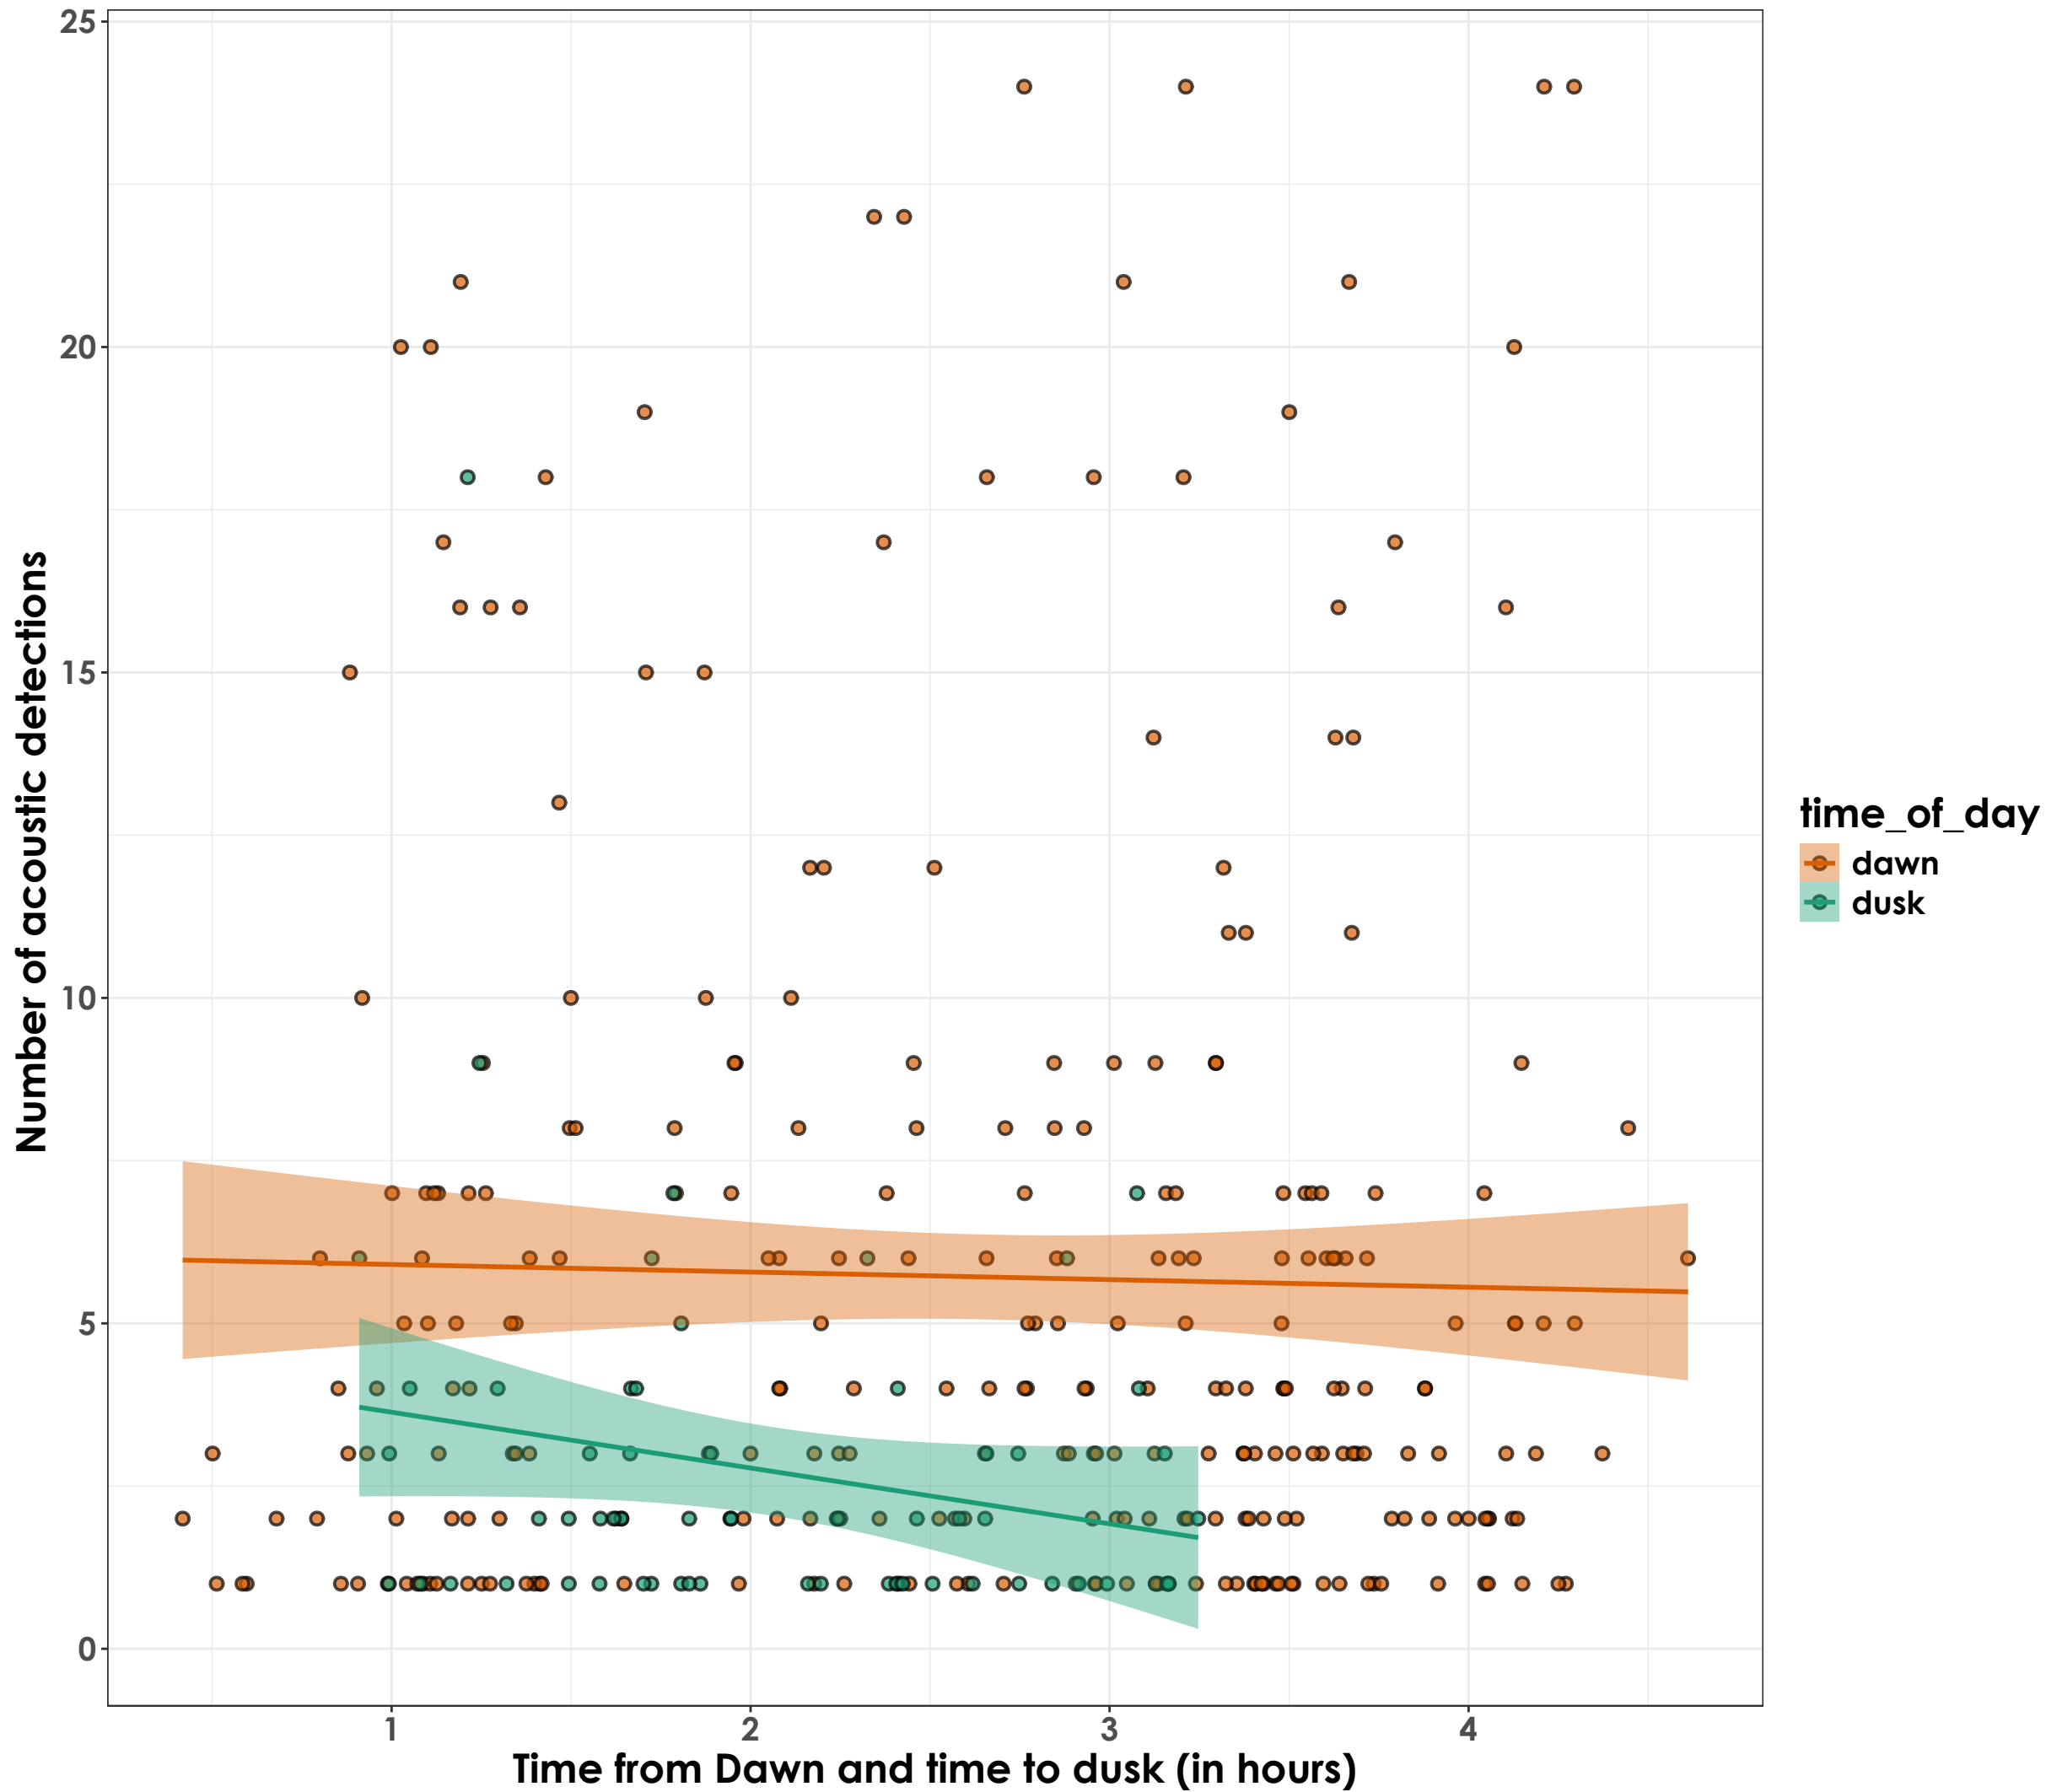

Large-billed Crow

Each dot represents the total number of detections after dawn or before dusk (in hours)

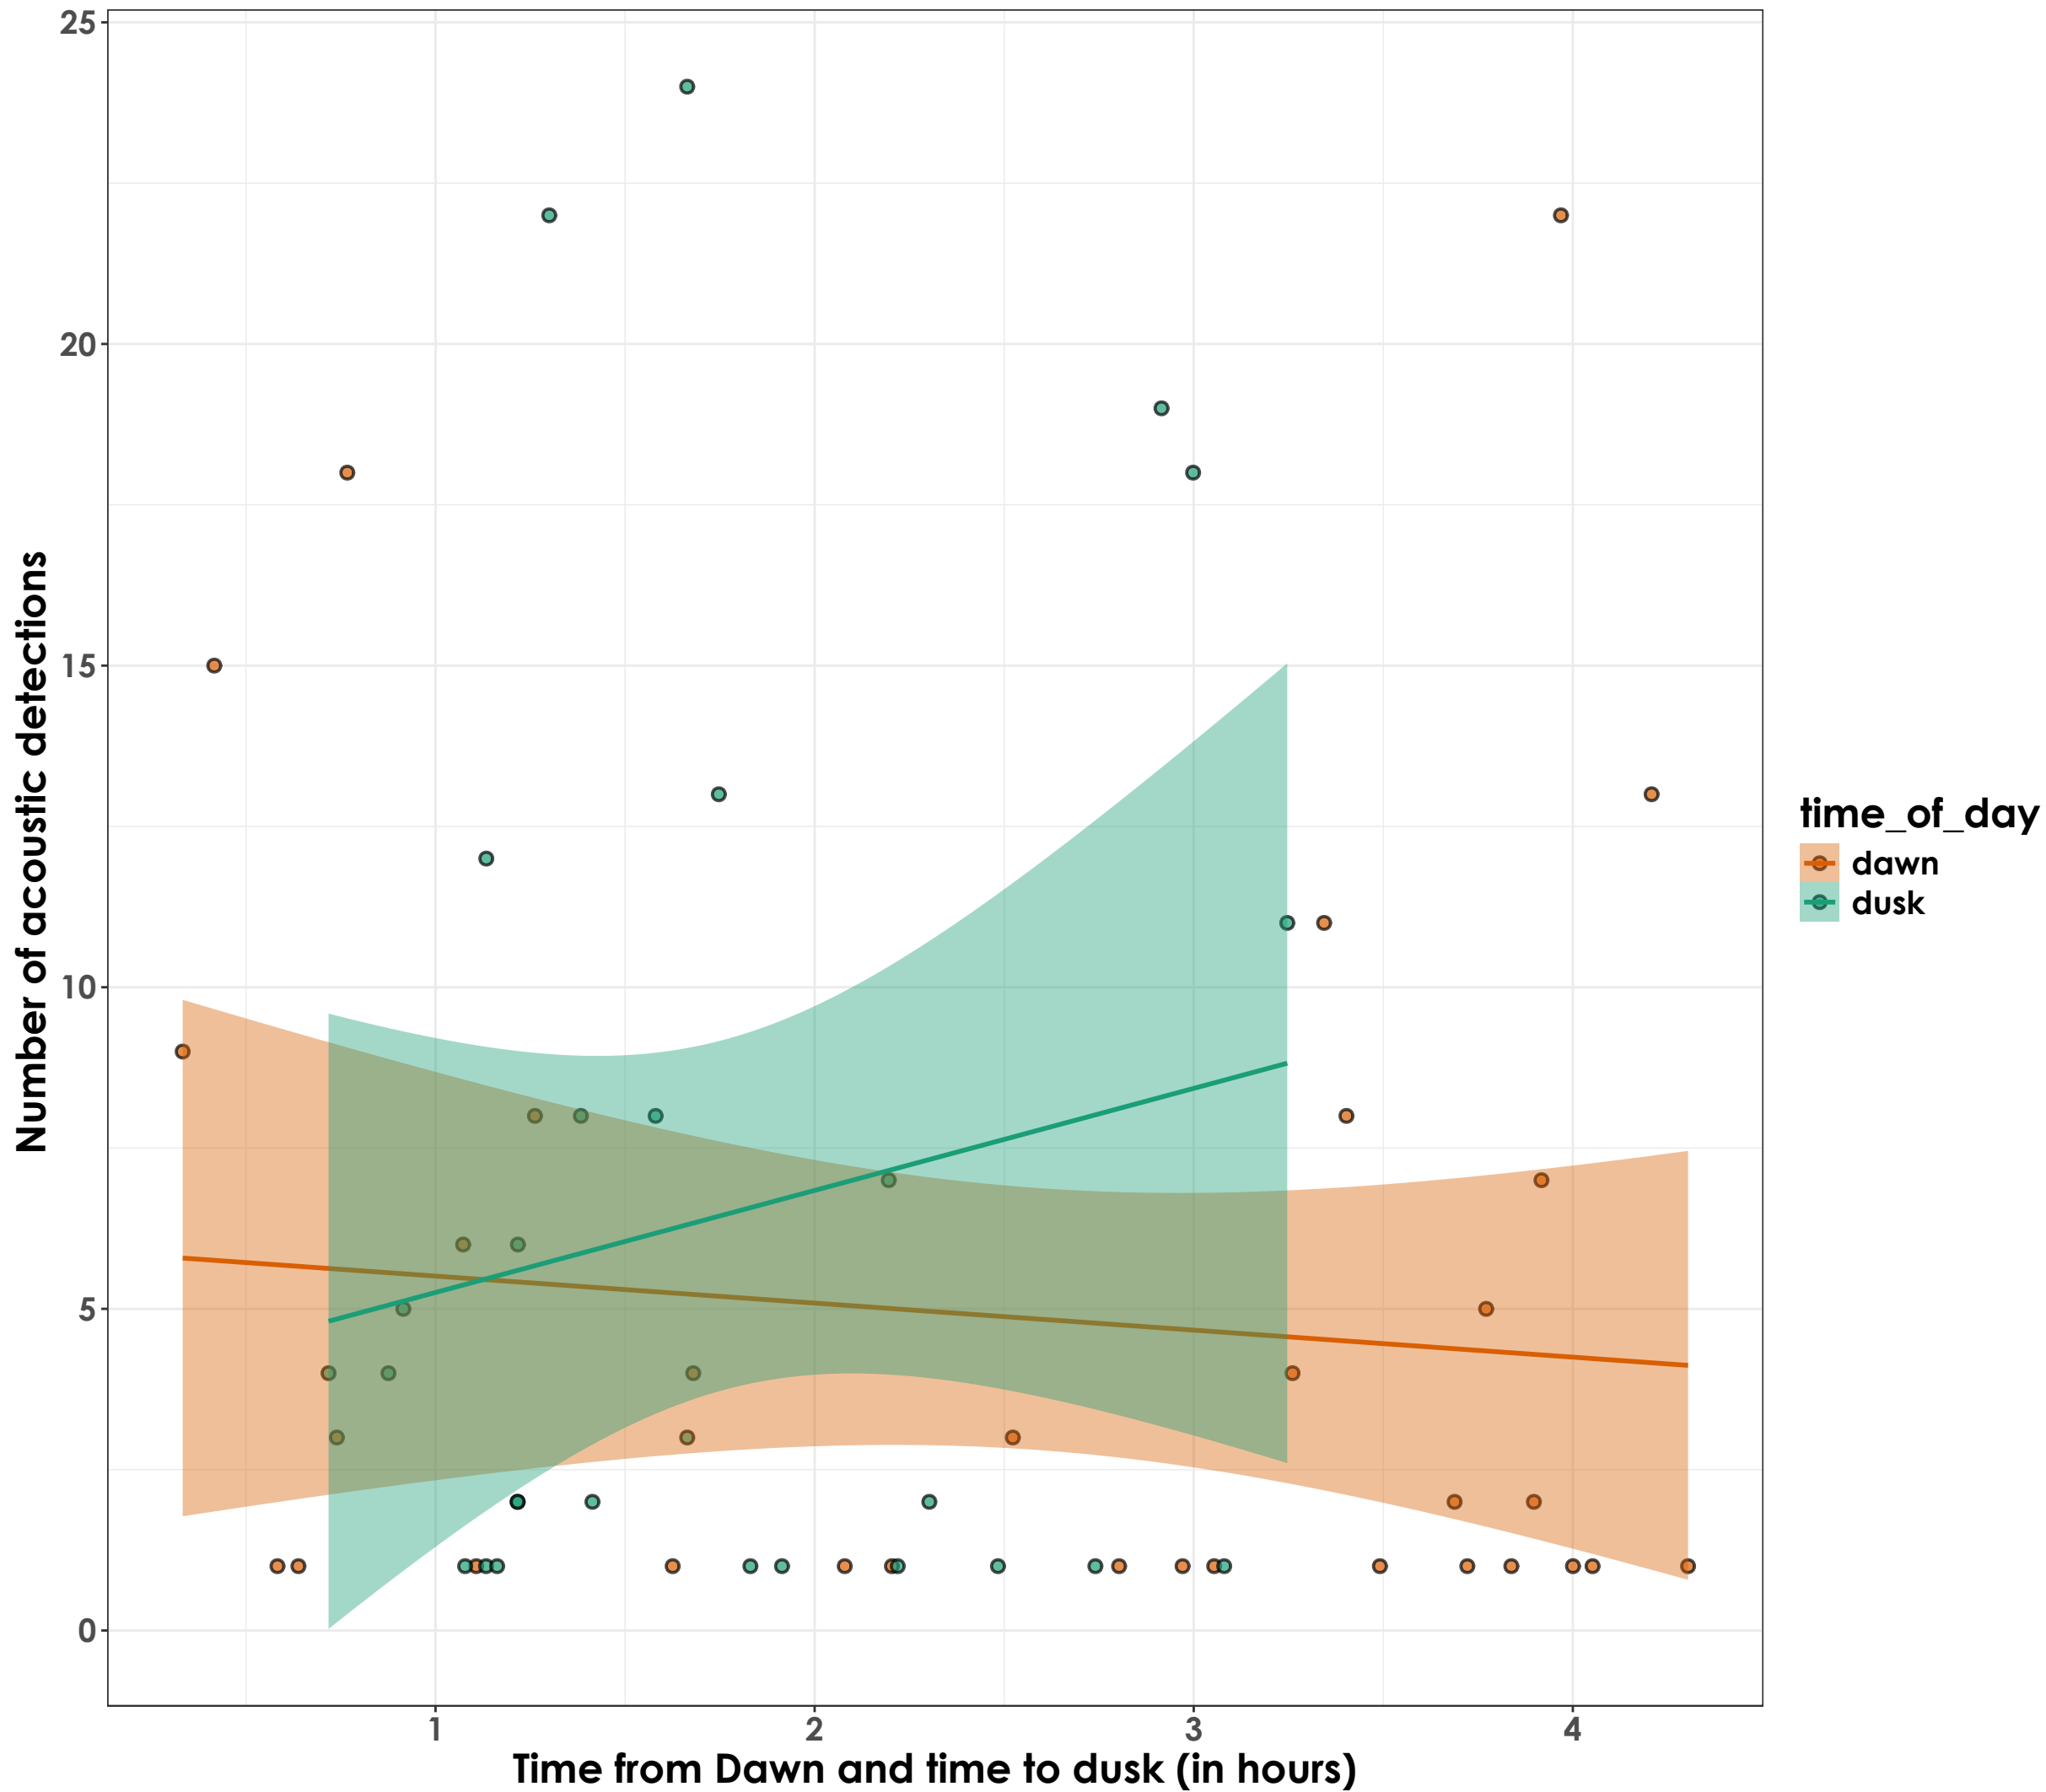

Velvet-fronted Nuthatch

Each dot represents the total number of detections after dawn or before dusk (in hours)

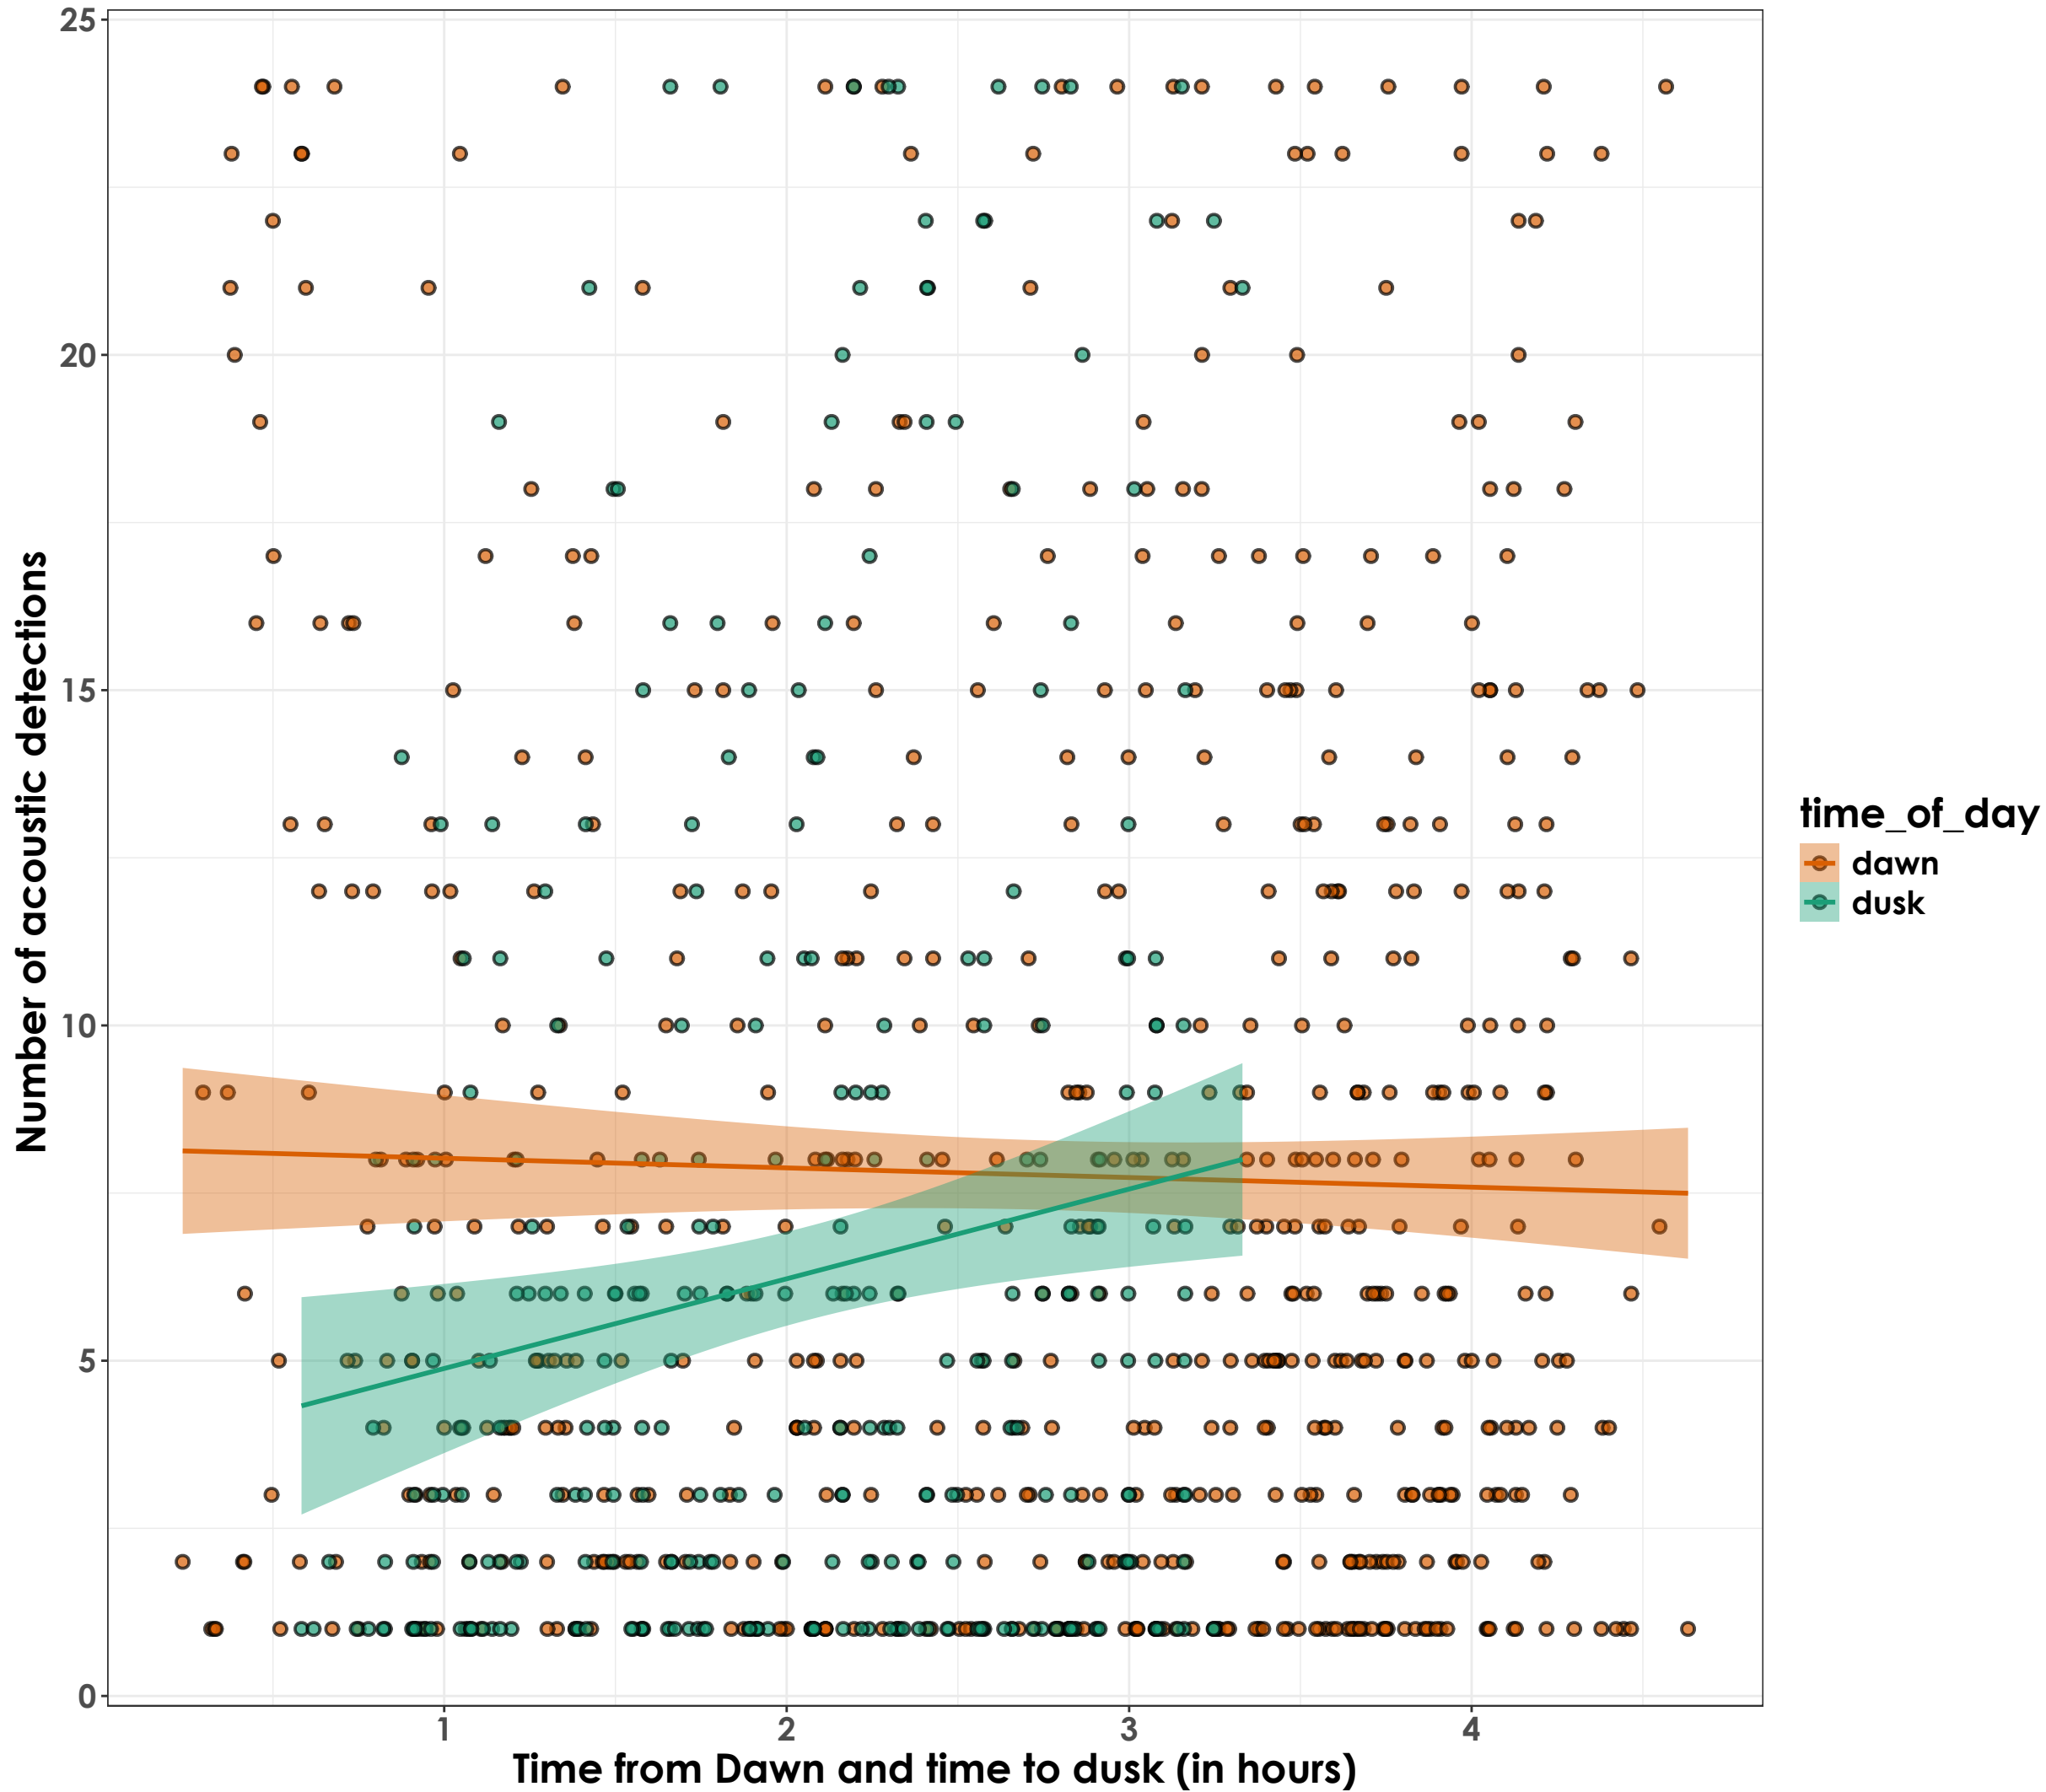

White-bellied Treepie

Each dot represents the total number of detections after dawn or before dusk (in hours)

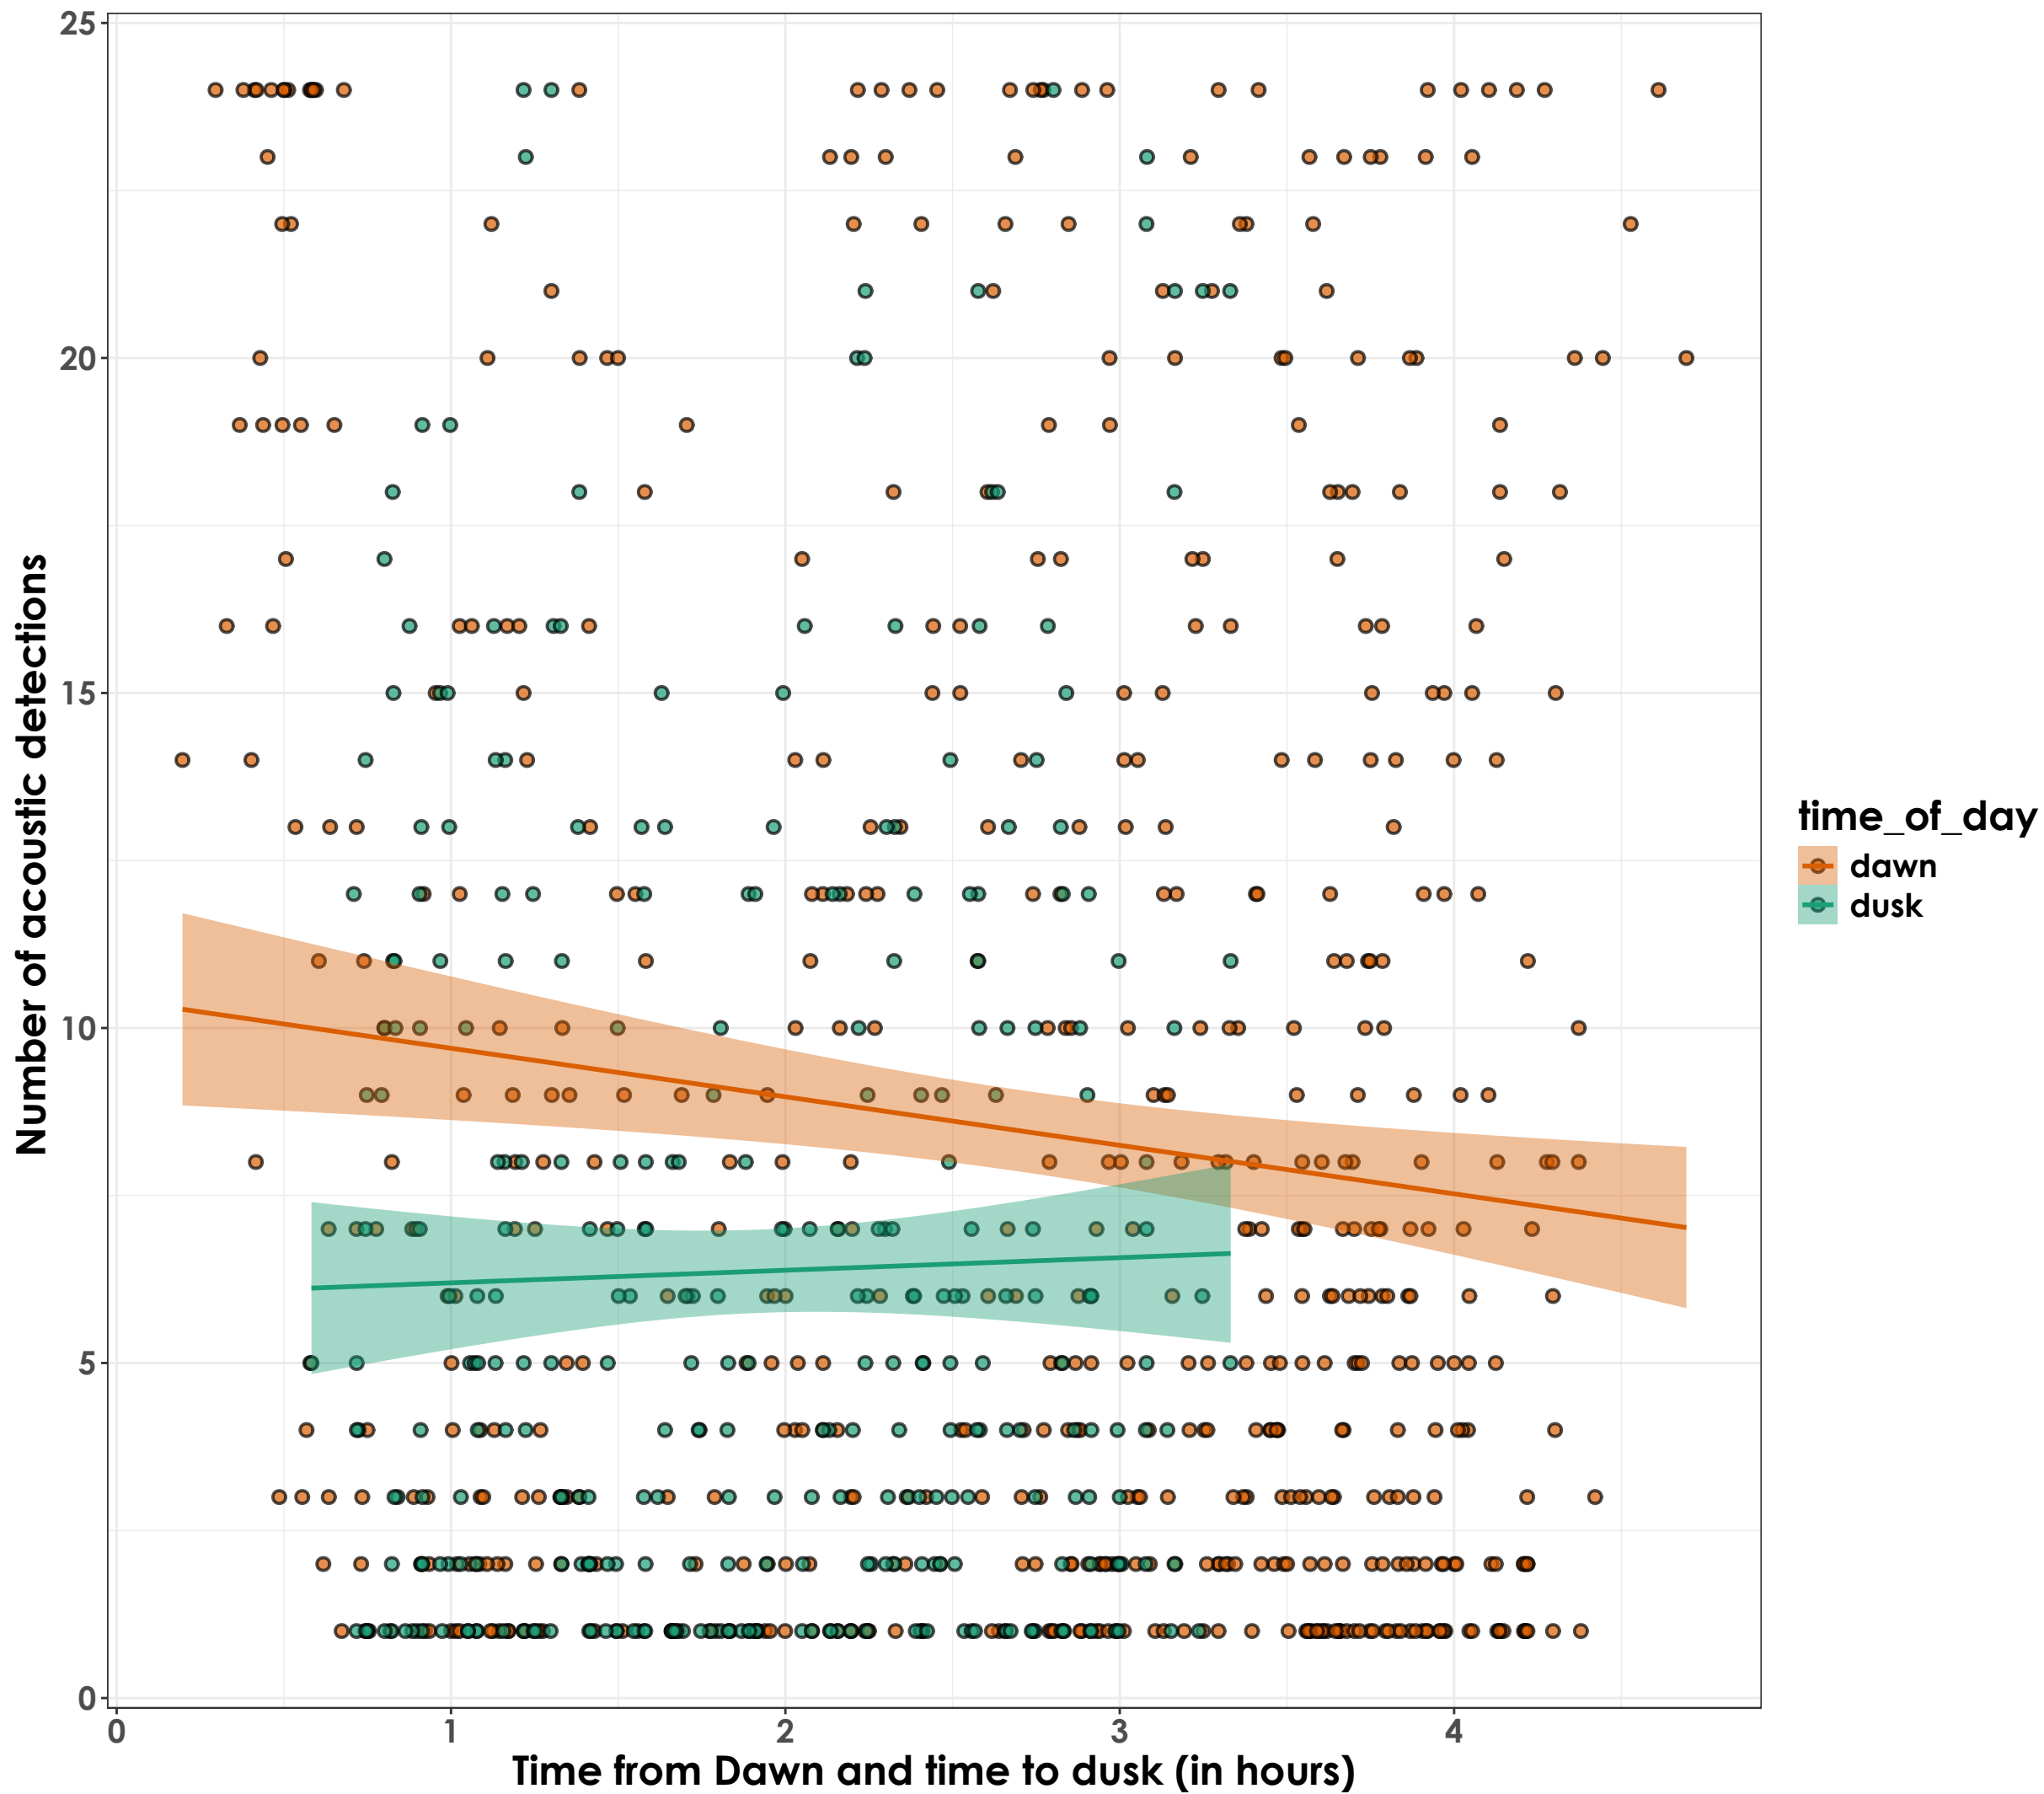

Yellow-browed Bulbul

Each dot represents the total number of detections after dawn or before dusk (in hours)

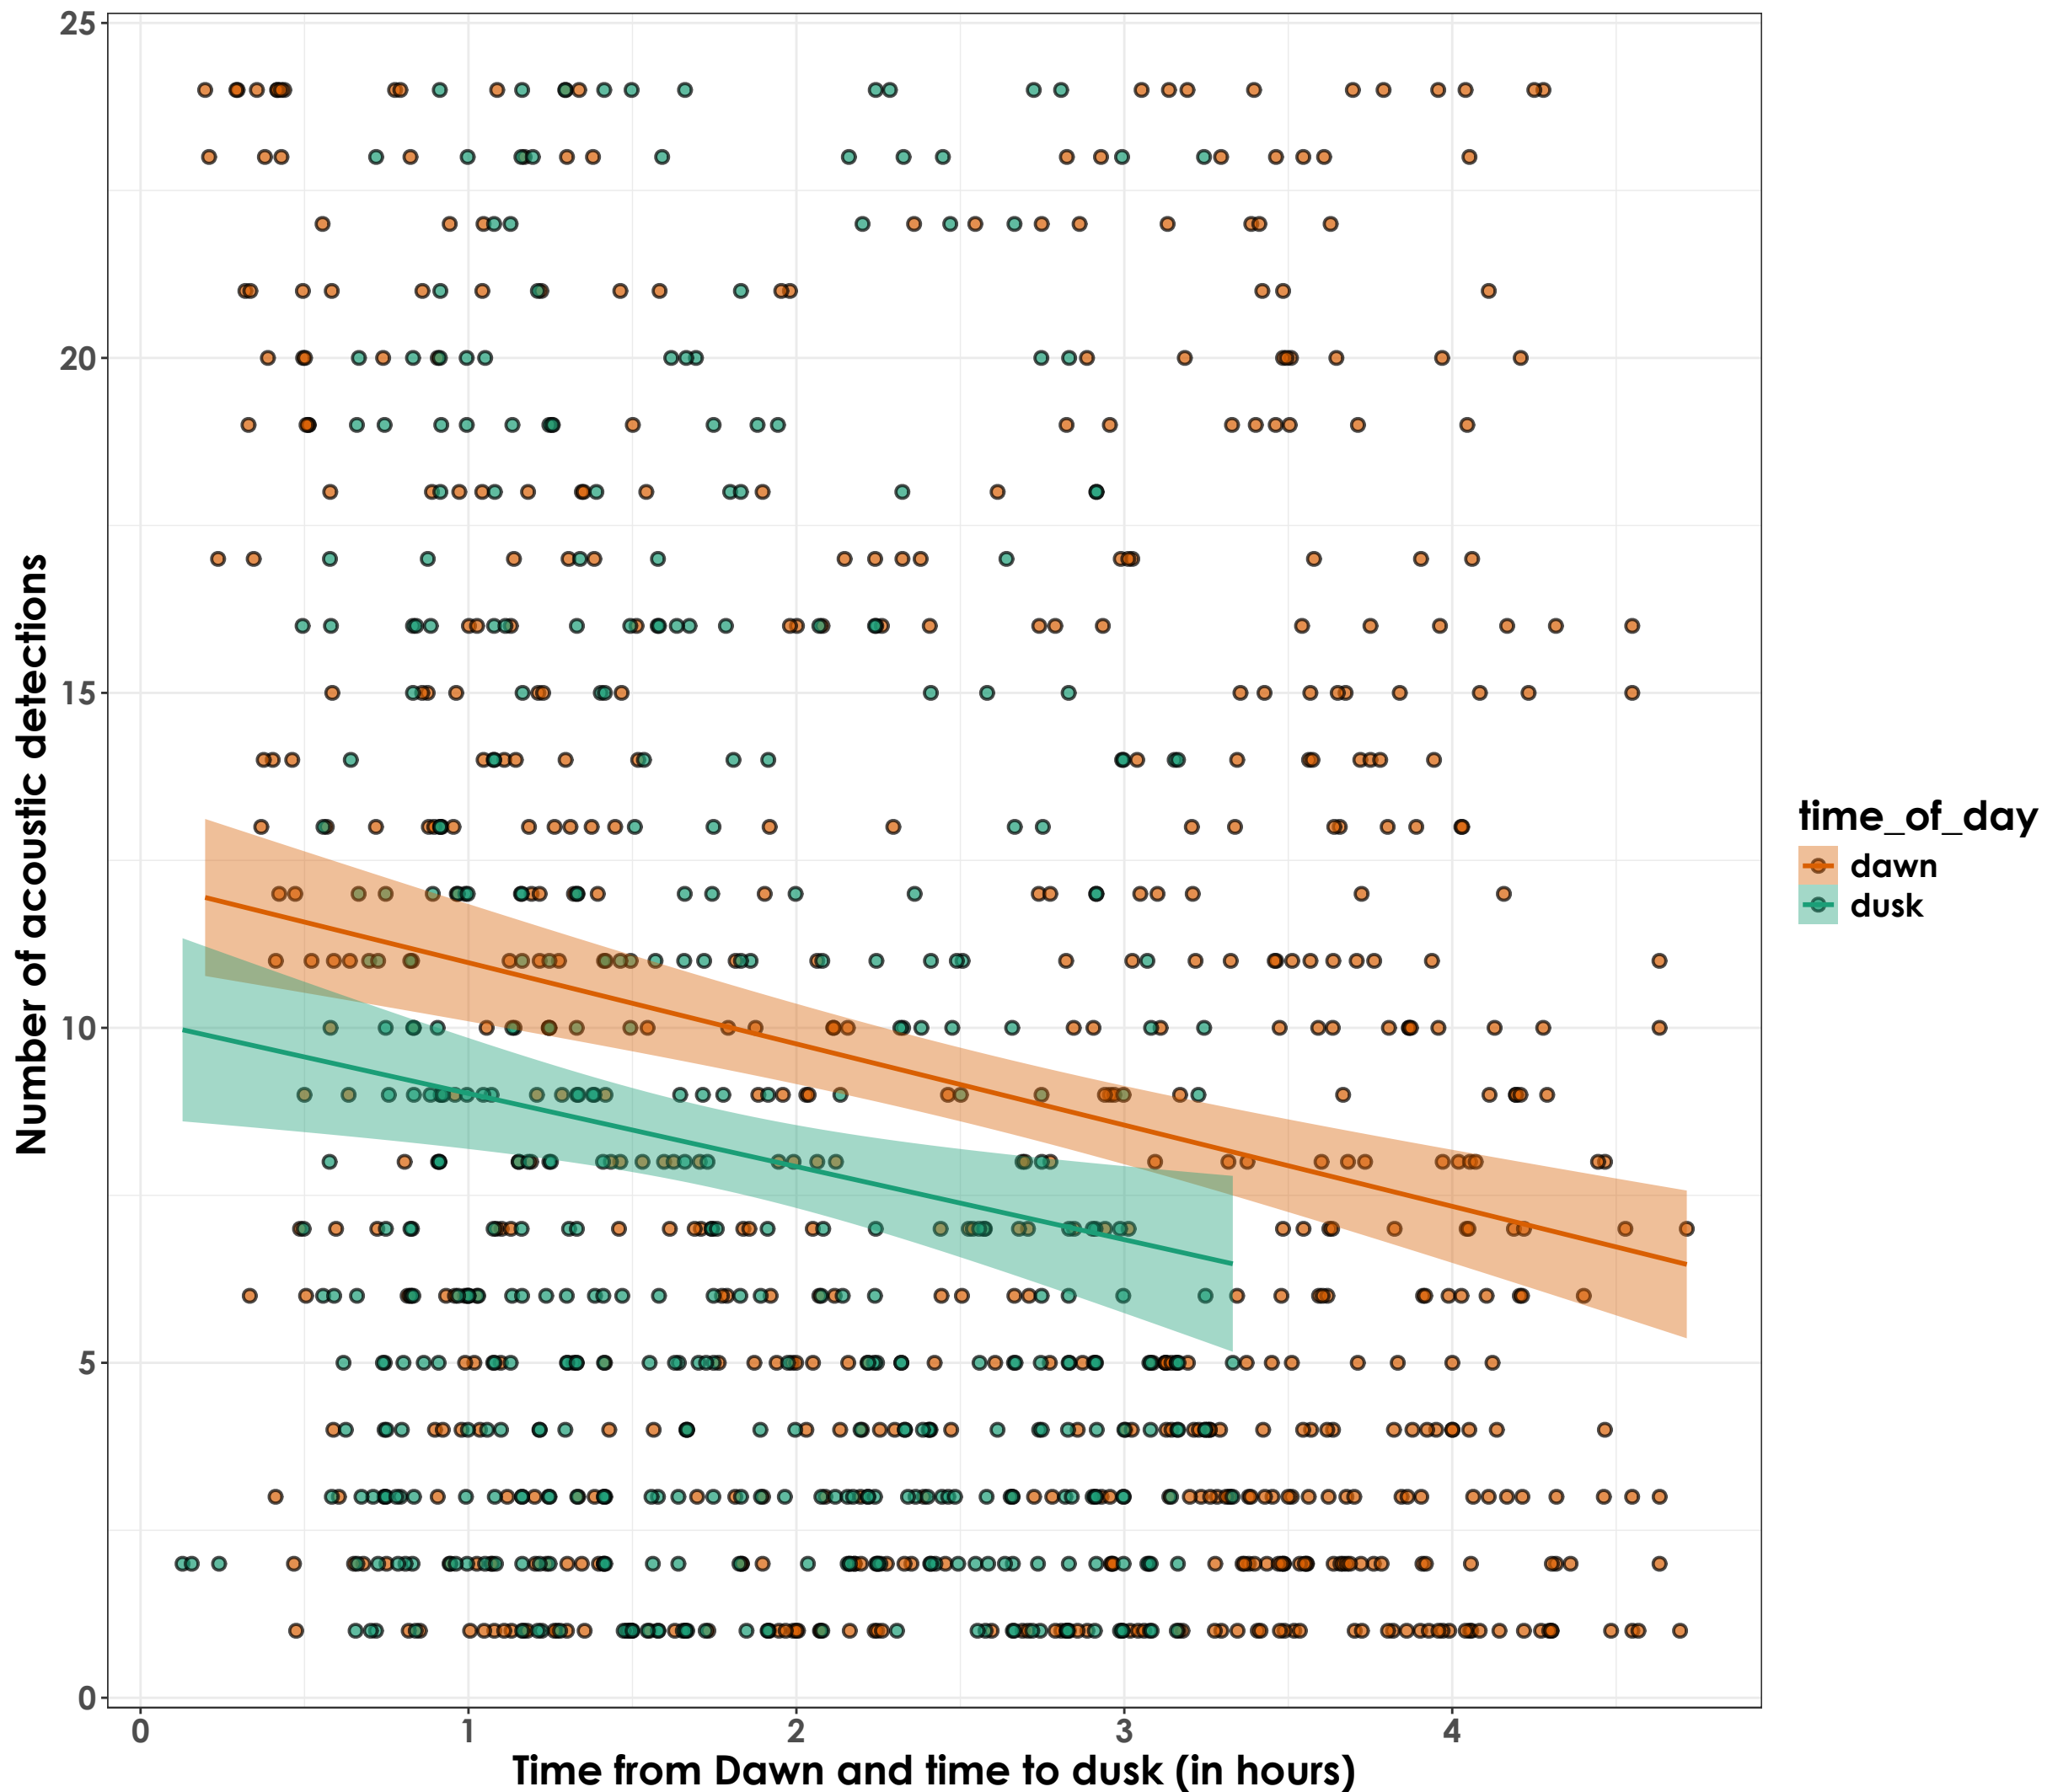

Indian White-eye

Each dot represents the total number of detections after dawn or before dusk (in hours)

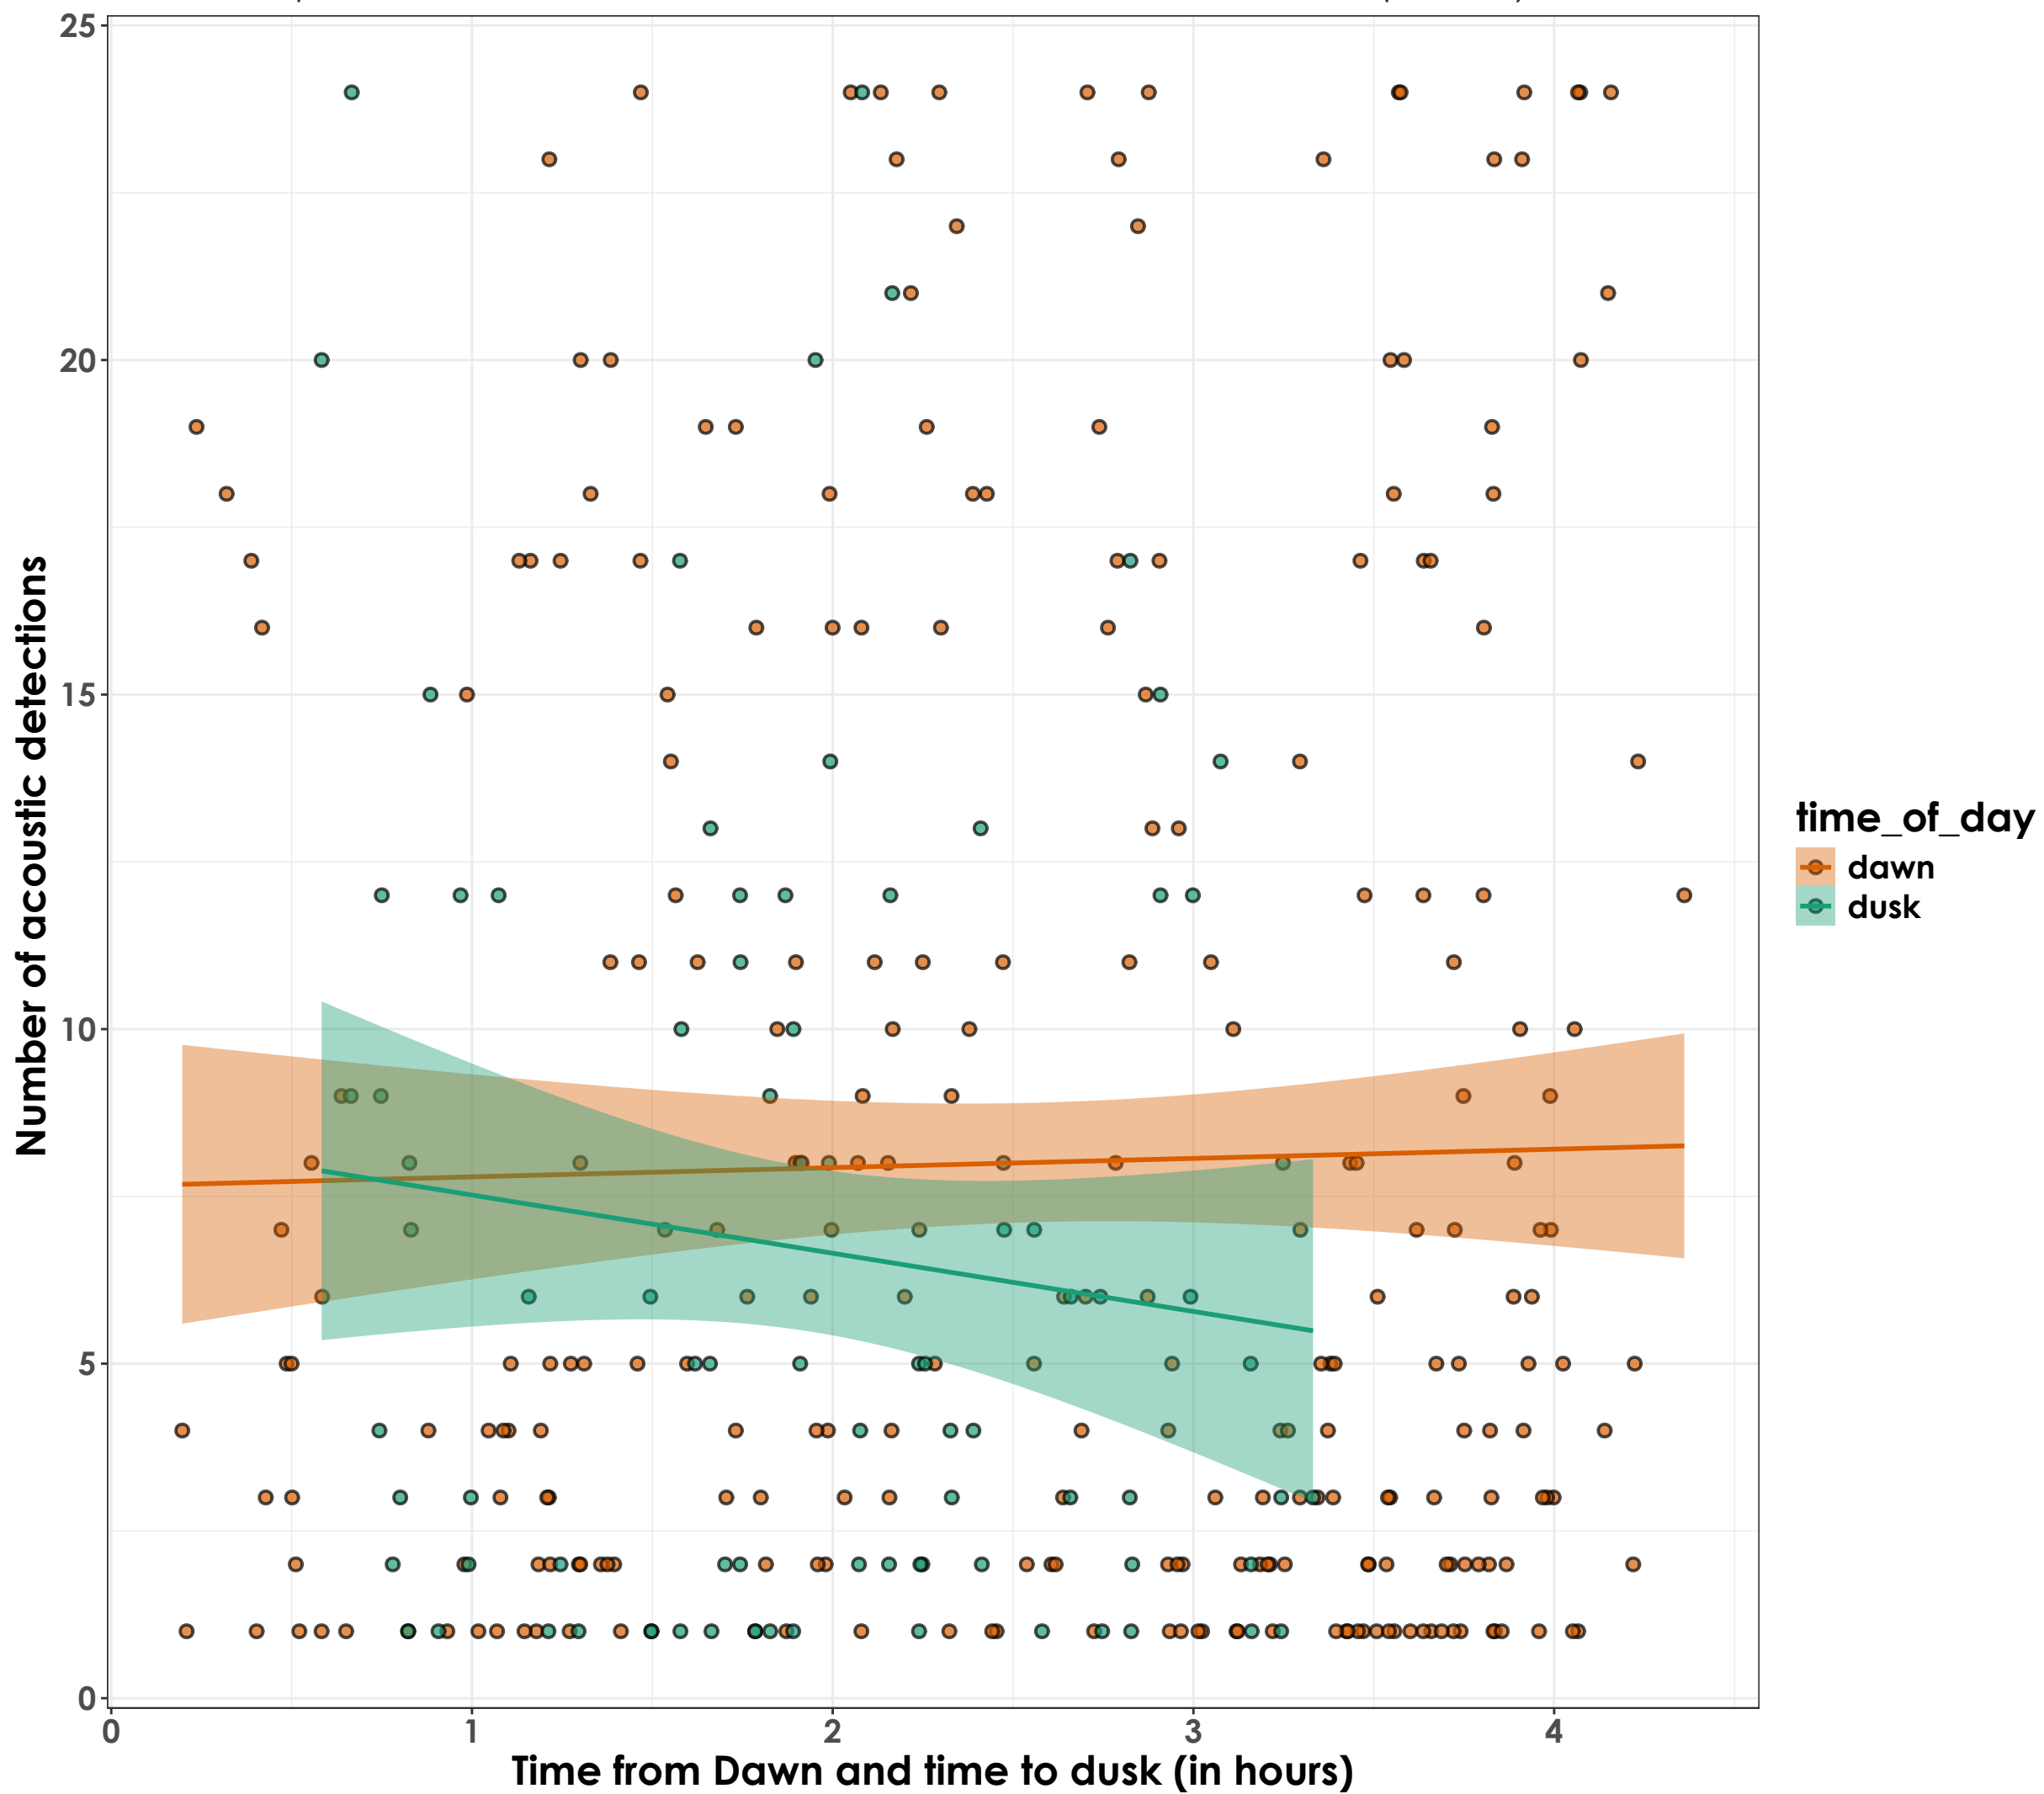

Malabar Whistling-Thrush

Each dot represents the total number of detections after dawn or before dusk (in hours)

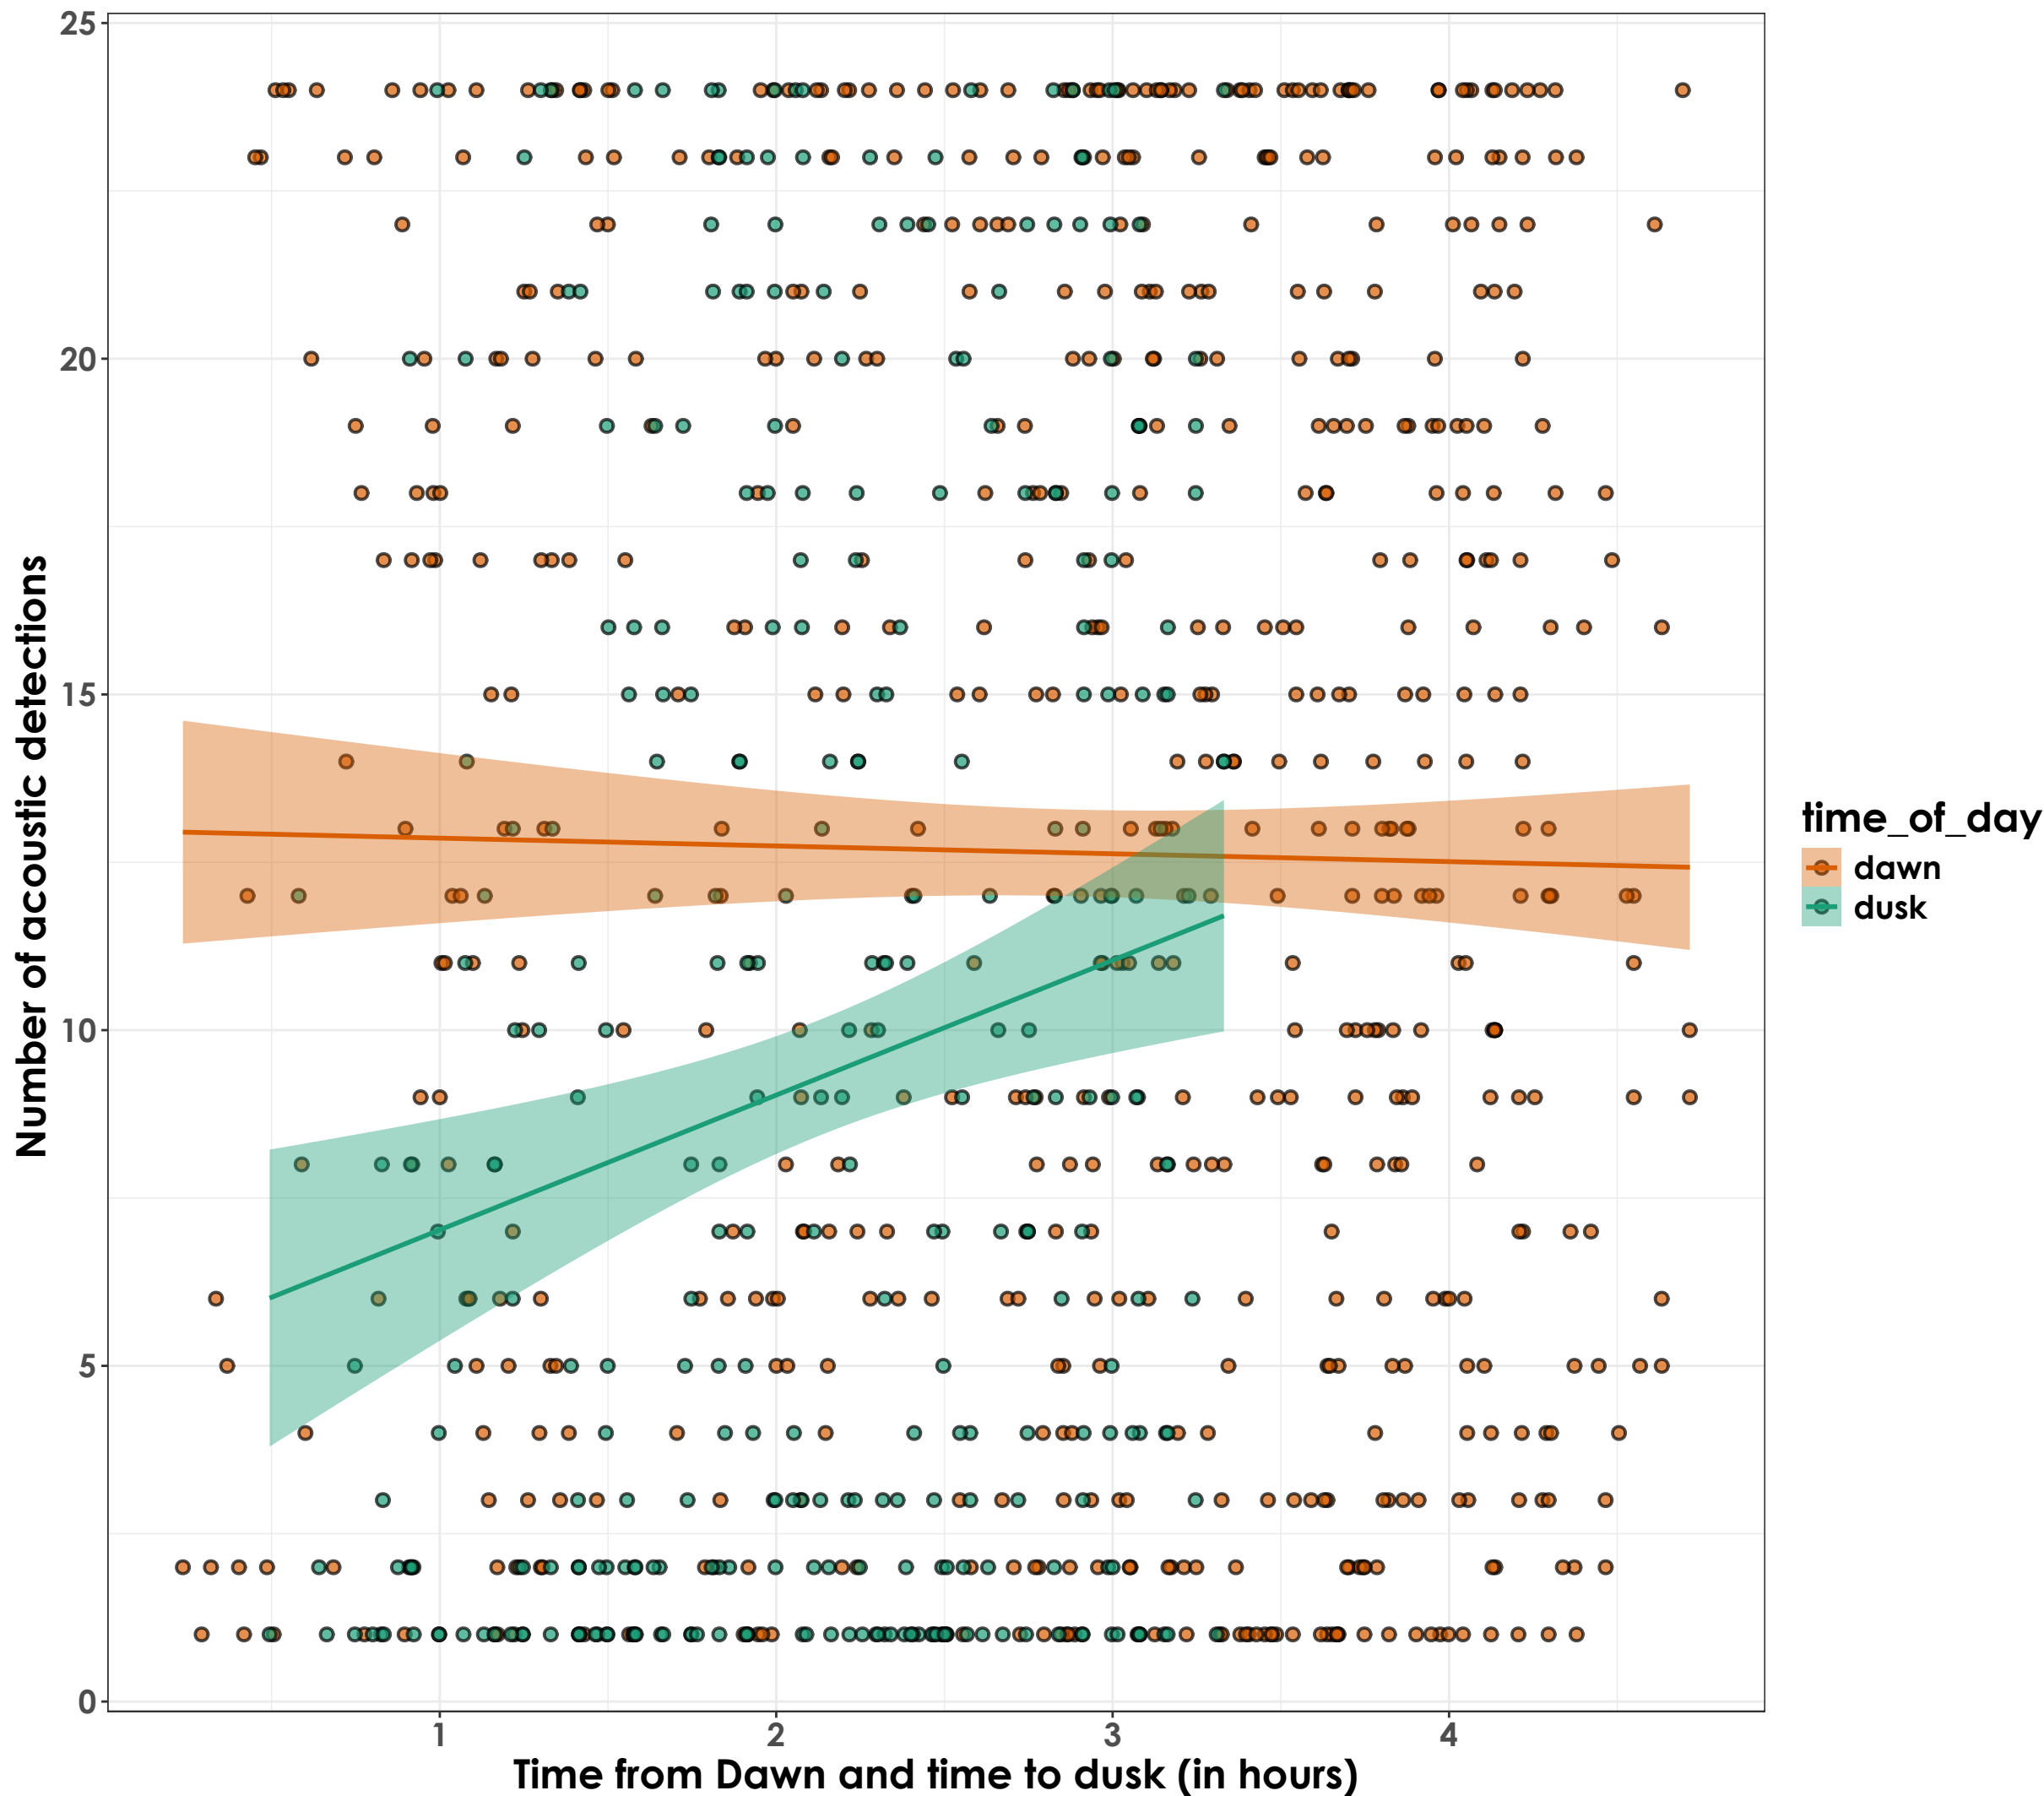

Orange-headed Thrush

Each dot represents the total number of detections after dawn or before dusk (in hours)

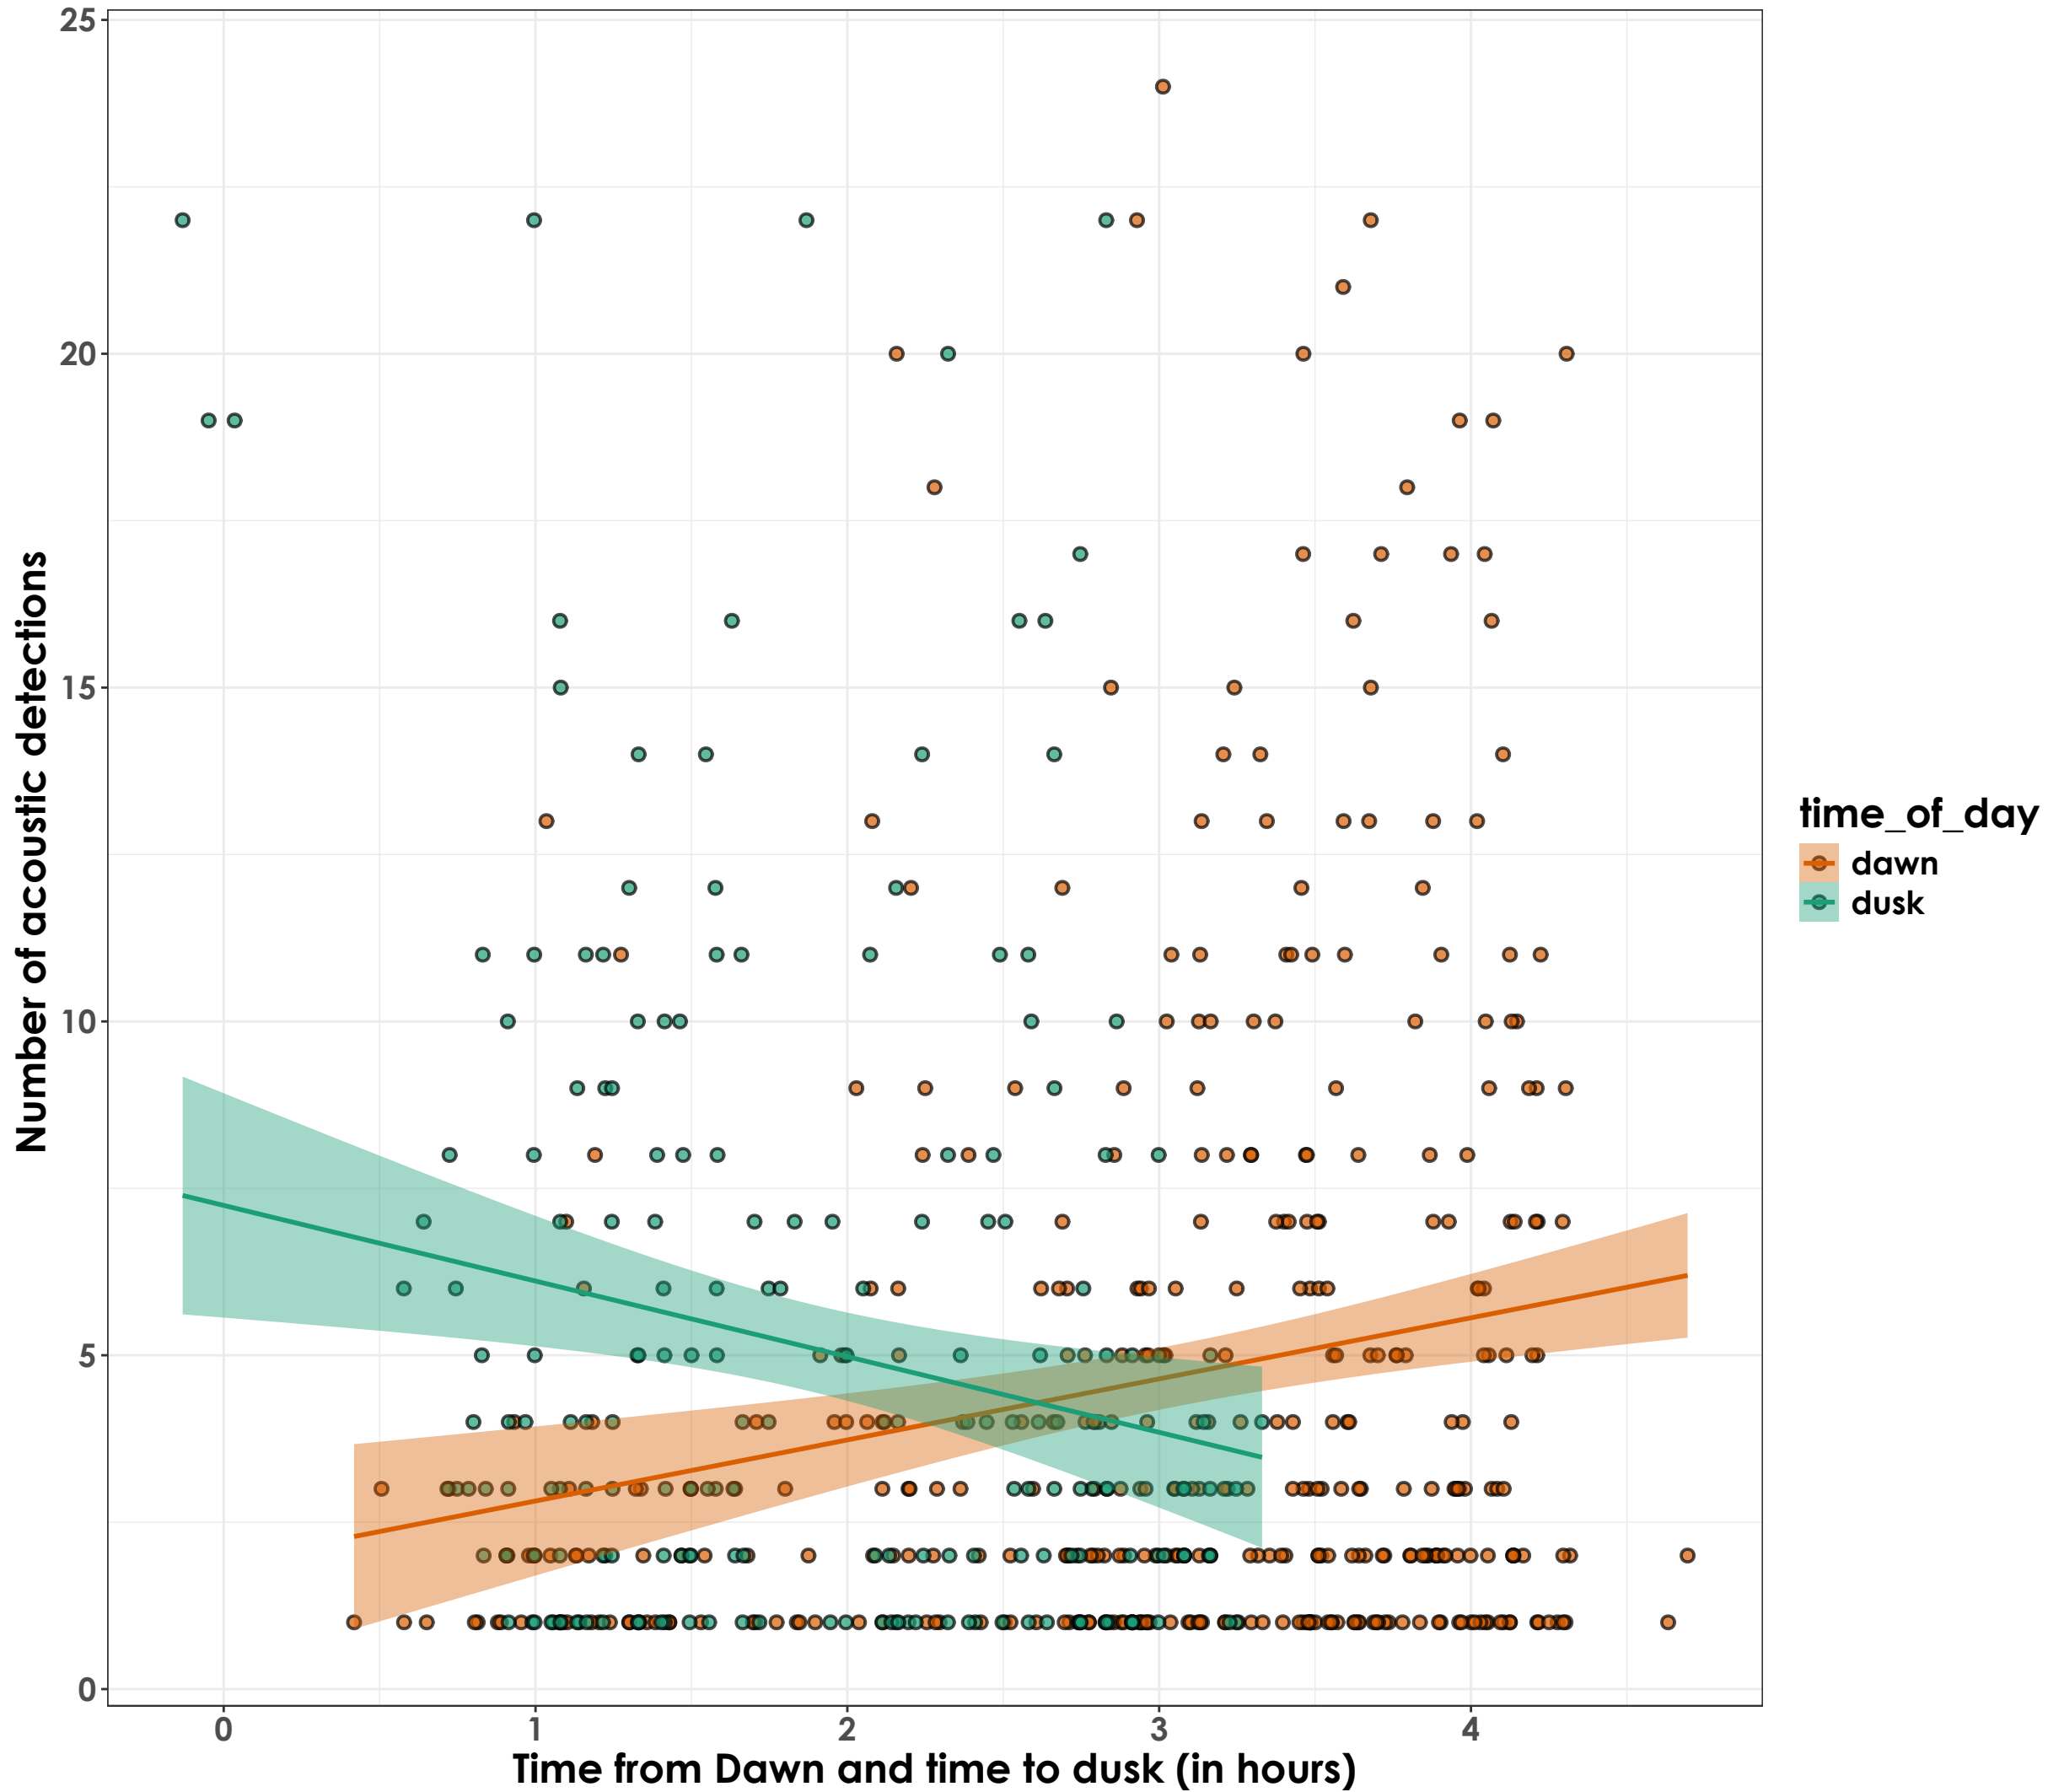

Red-whiskered Bulbul

Each dot represents the total number of detections after dawn or before dusk (in hours)

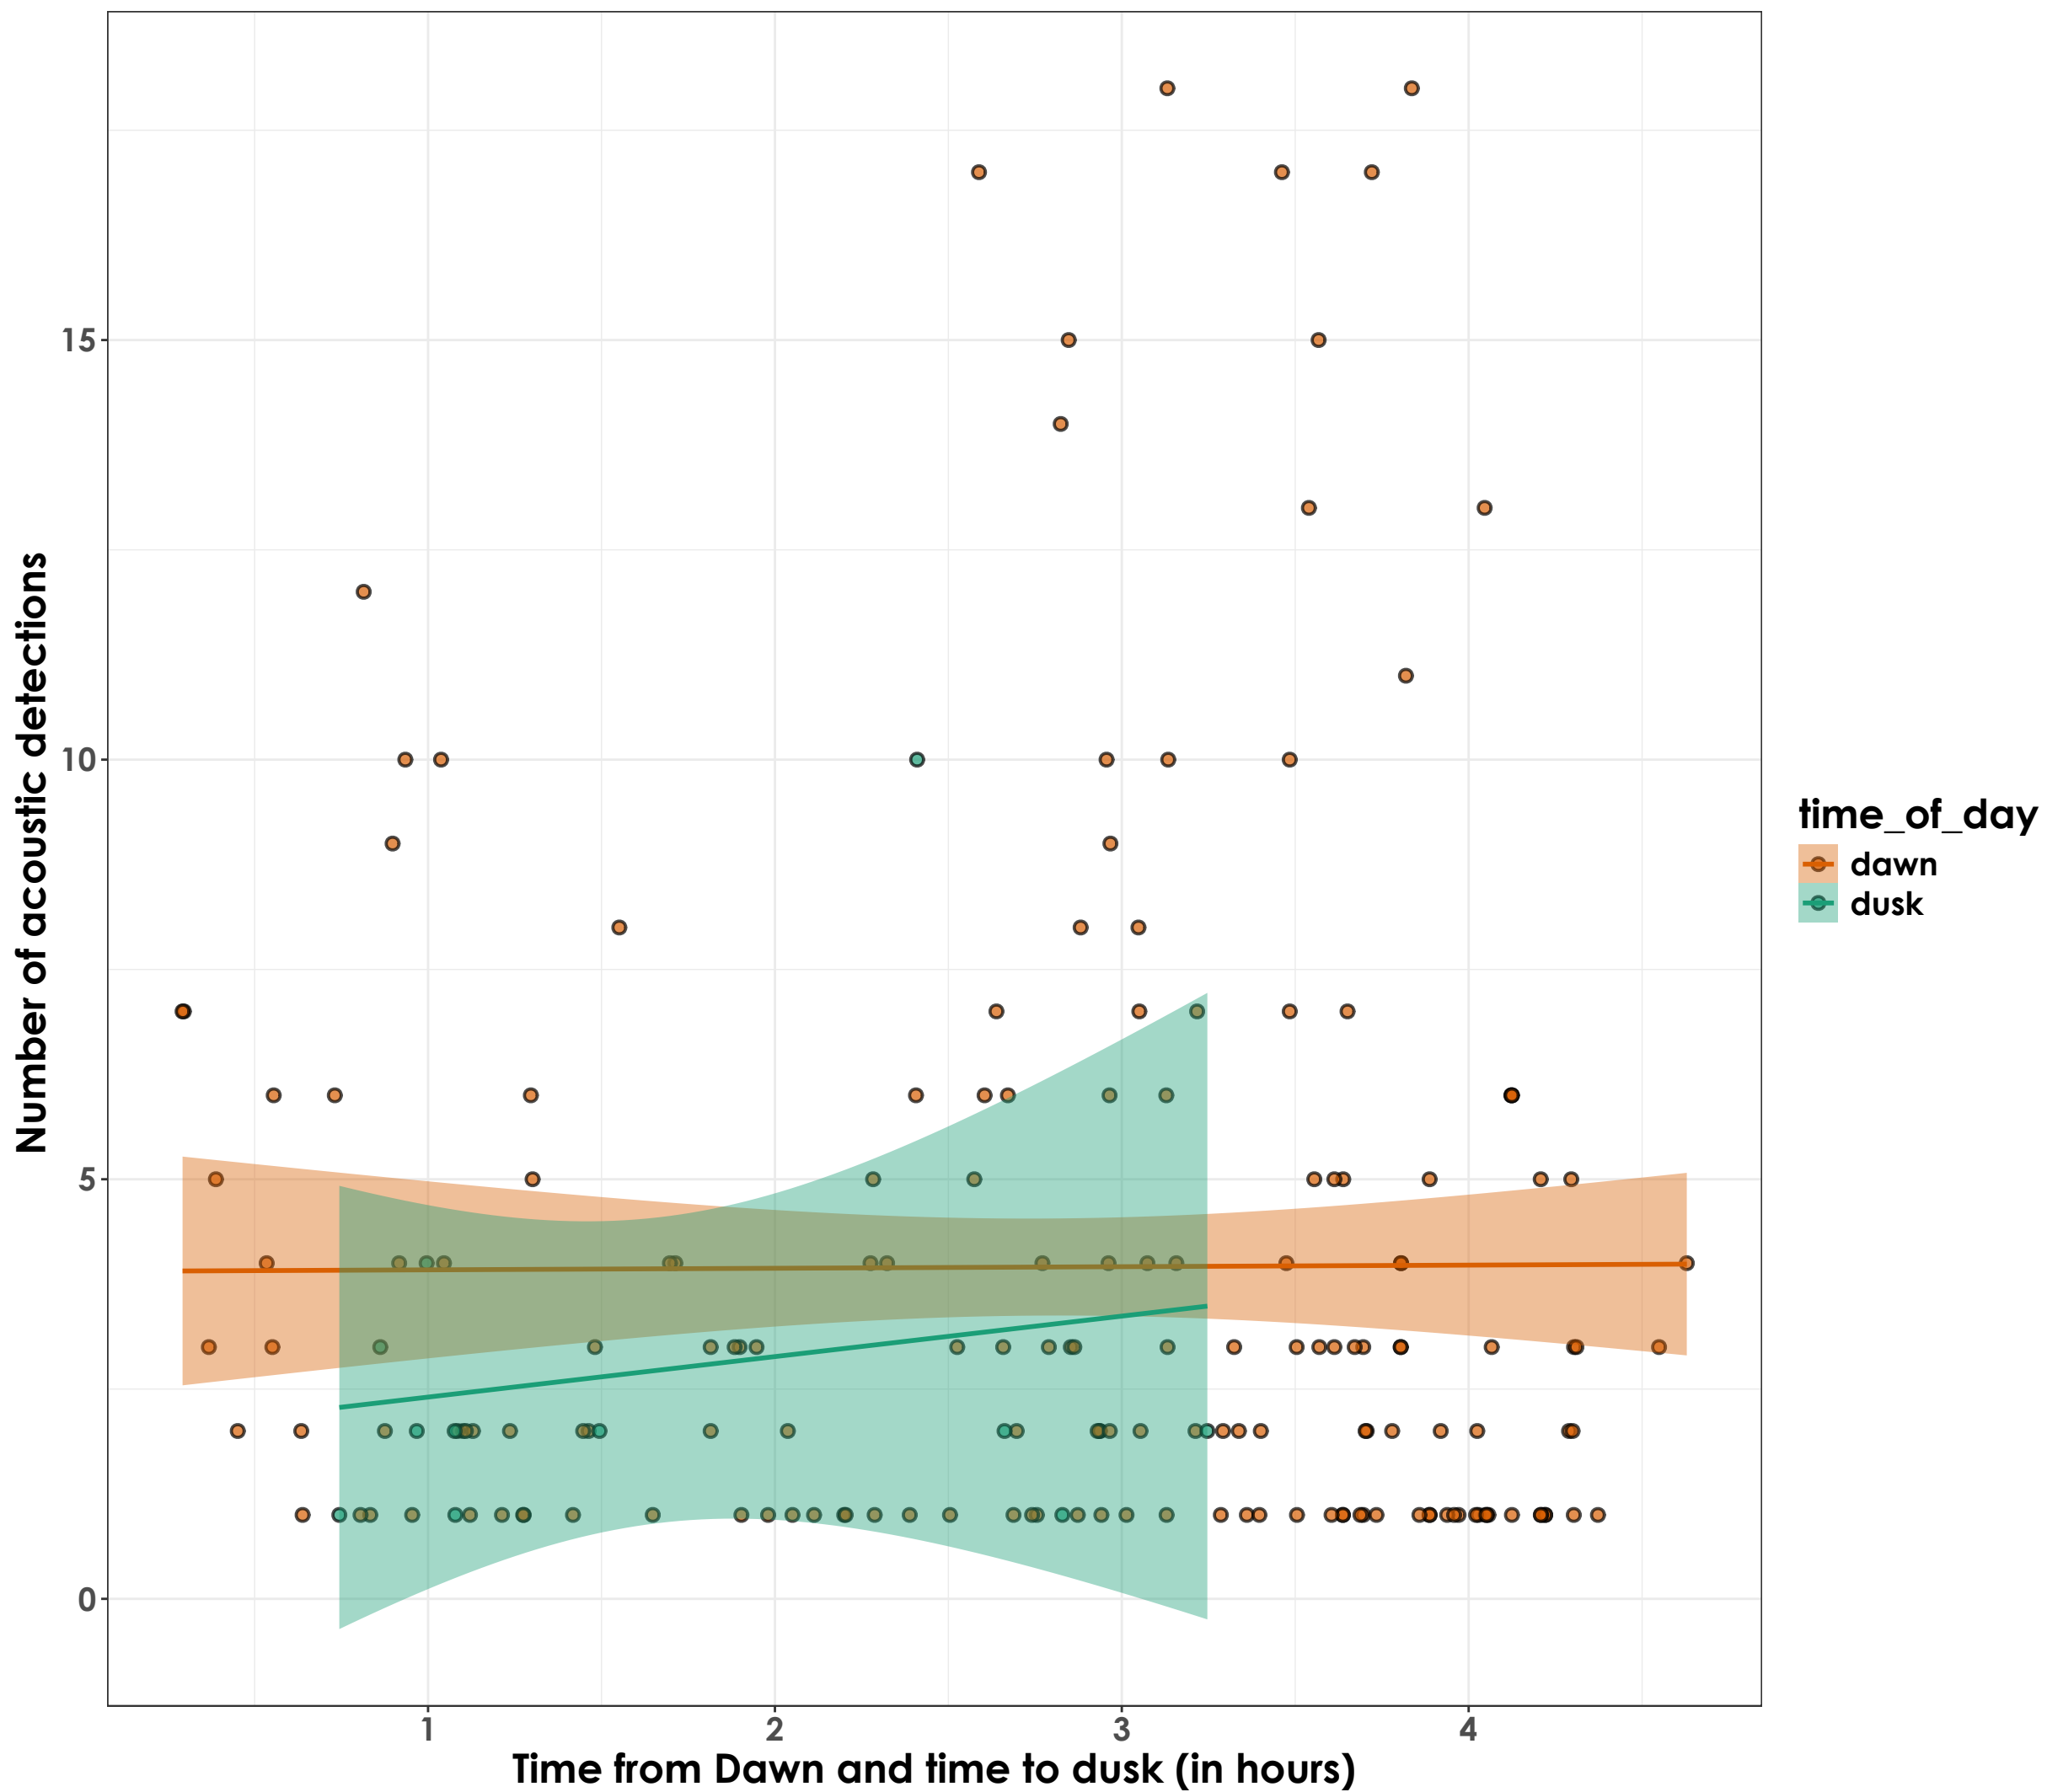

Vernal Hanging-Parrot

Each dot represents the total number of detections after dawn or before dusk (in hours)

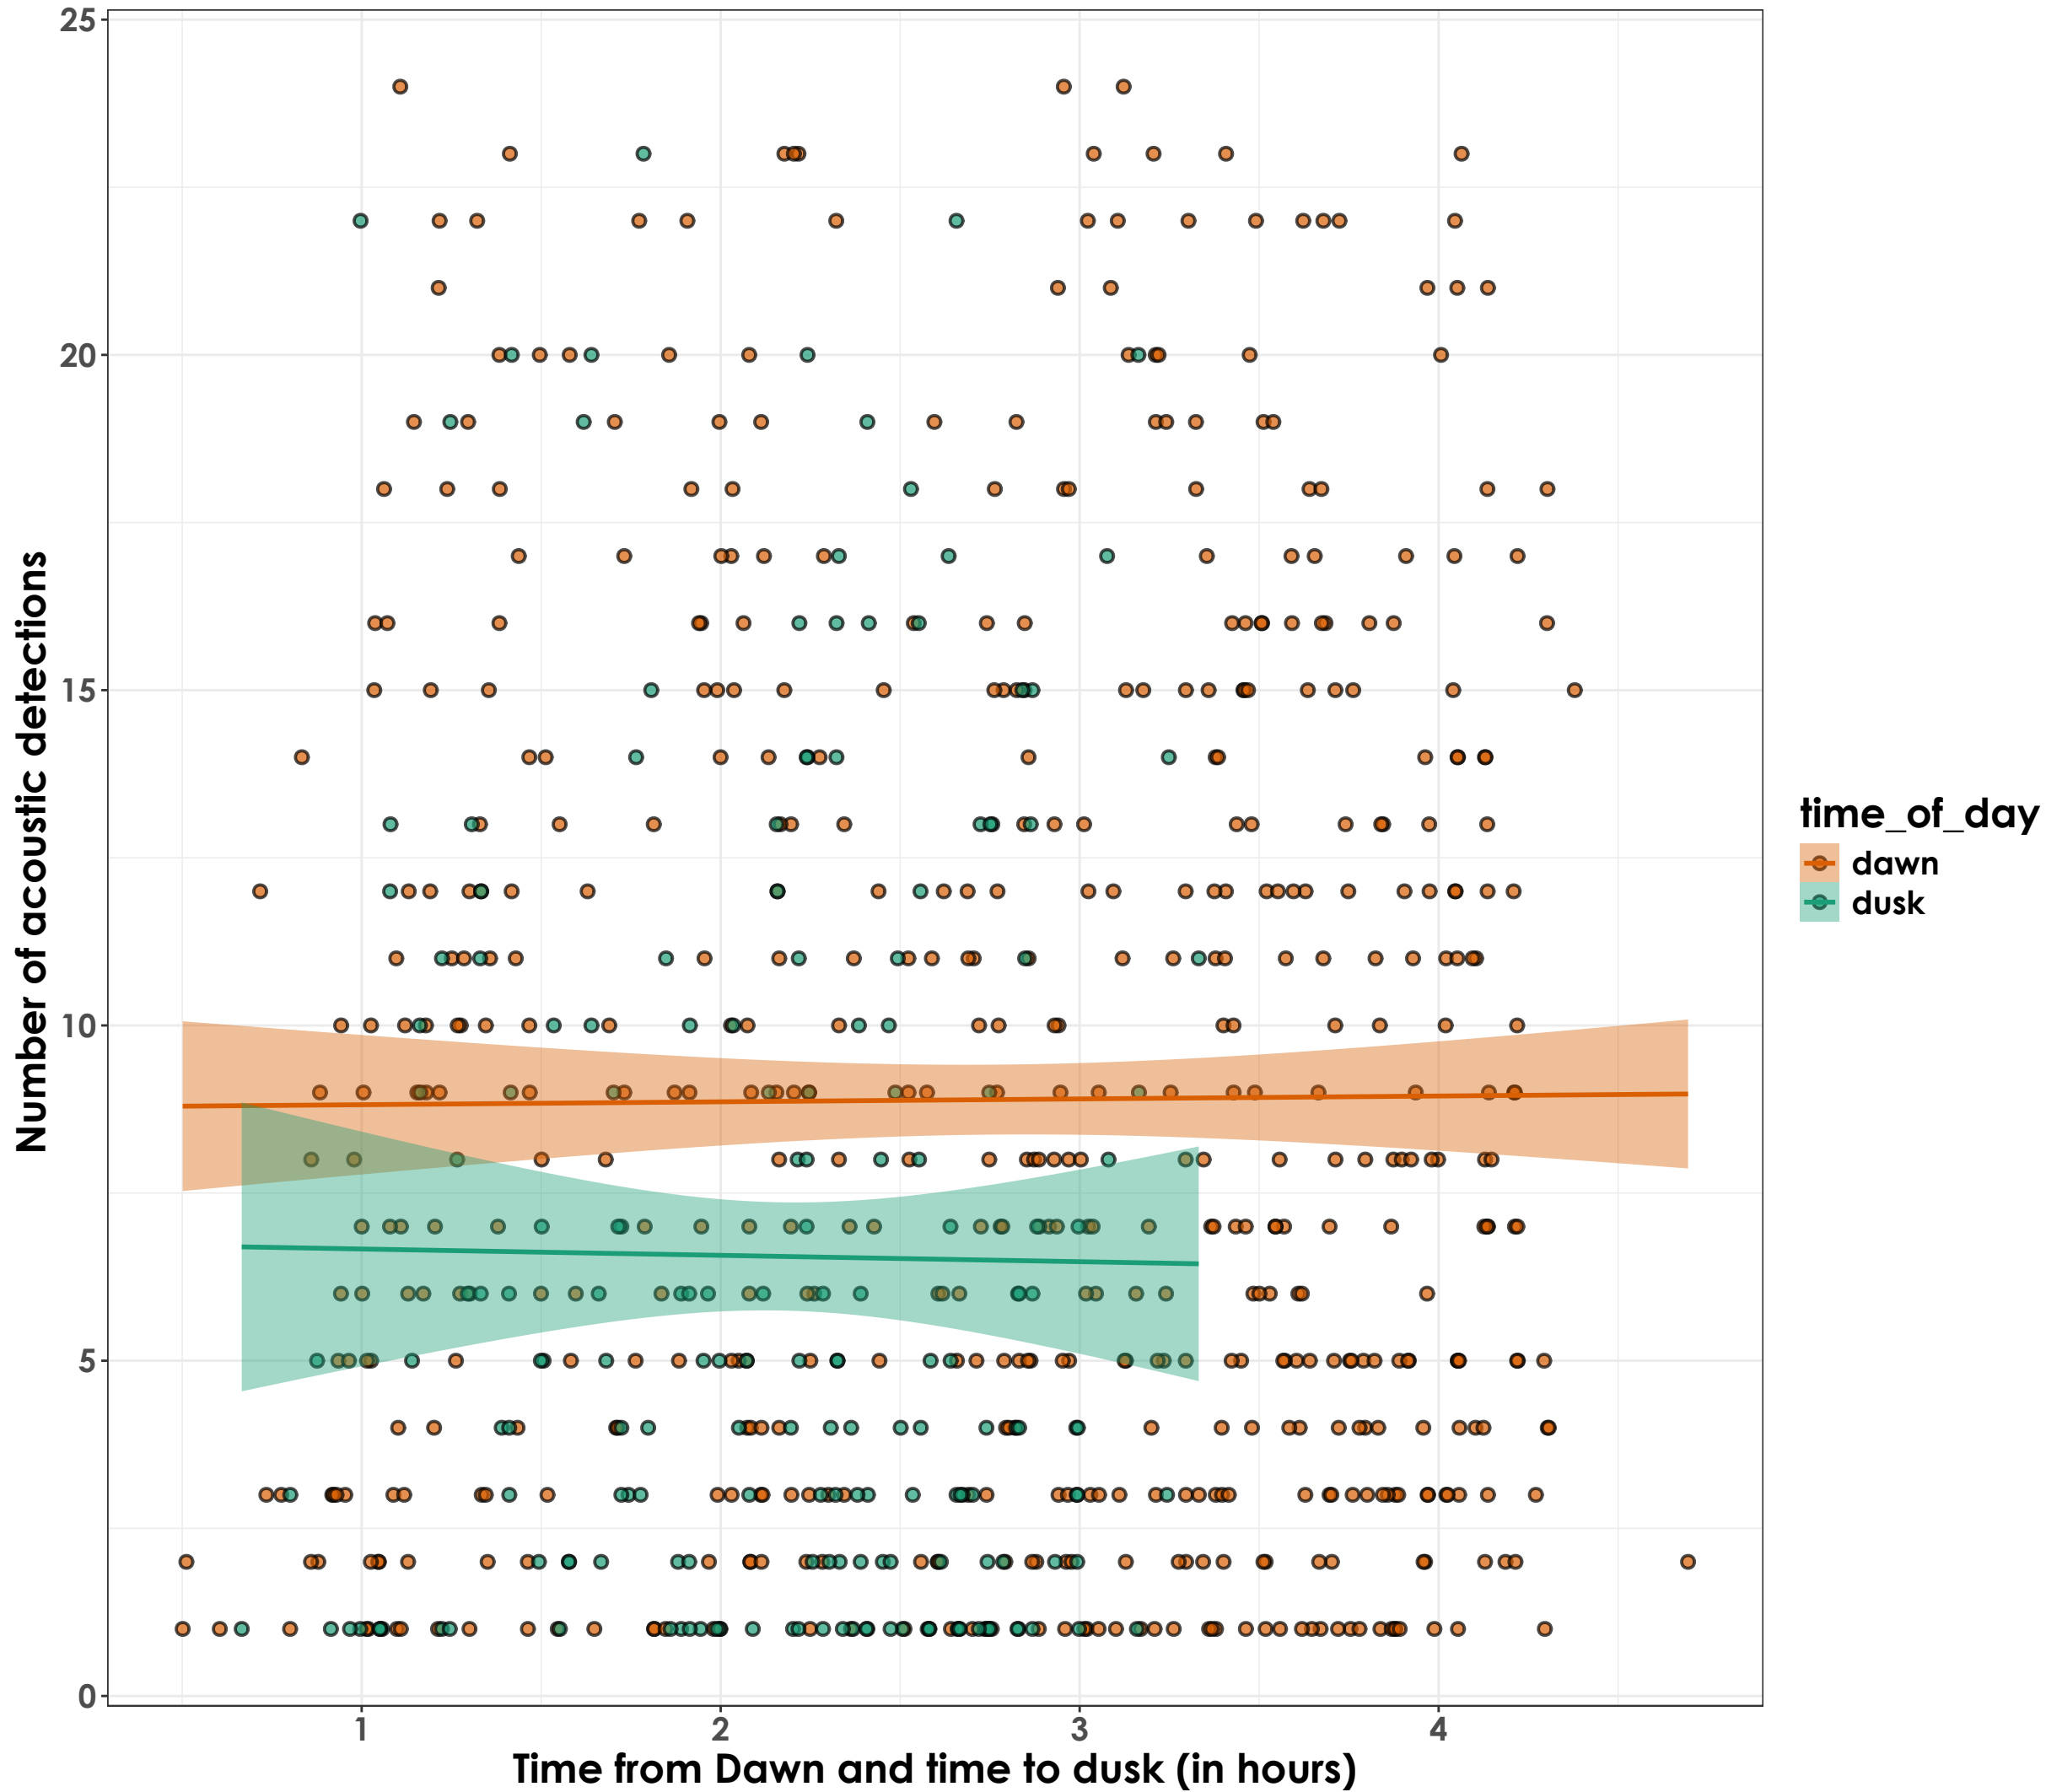

Greater Coucal

Each dot represents the total number of detections after dawn or before dusk (in hours)

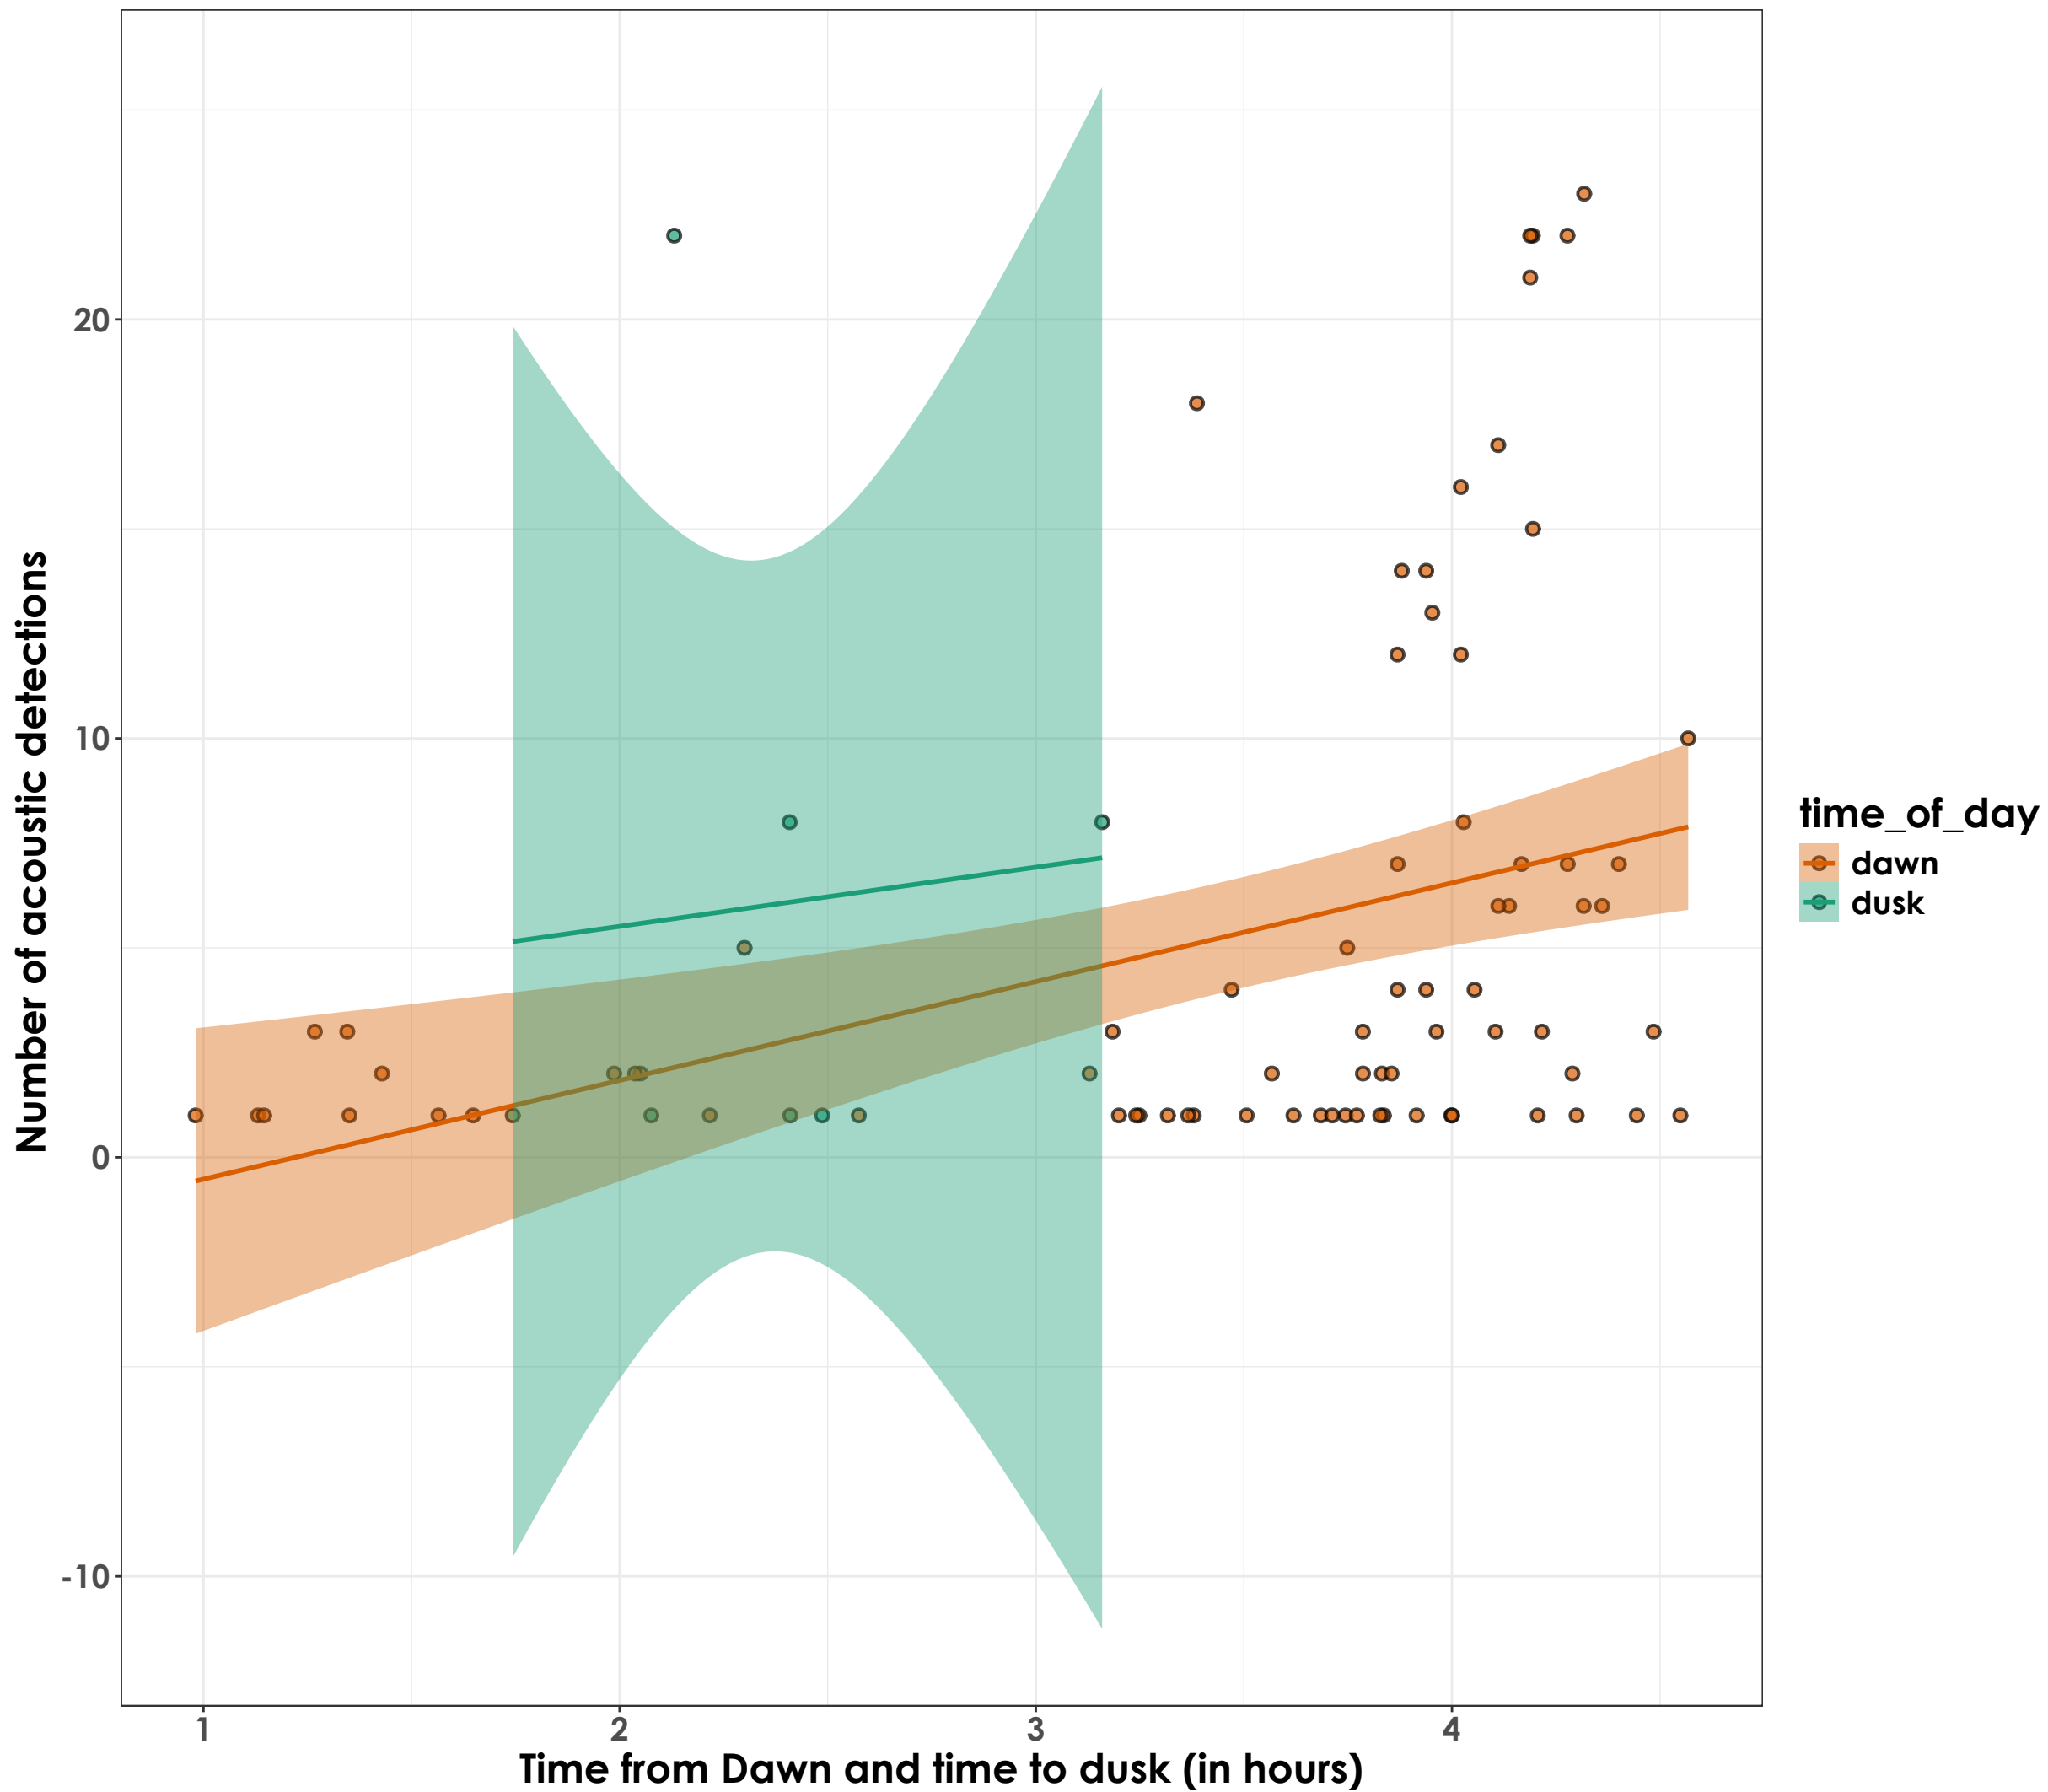

Greenish Warbler

Each dot represents the total number of detections after dawn or before dusk (in hours)

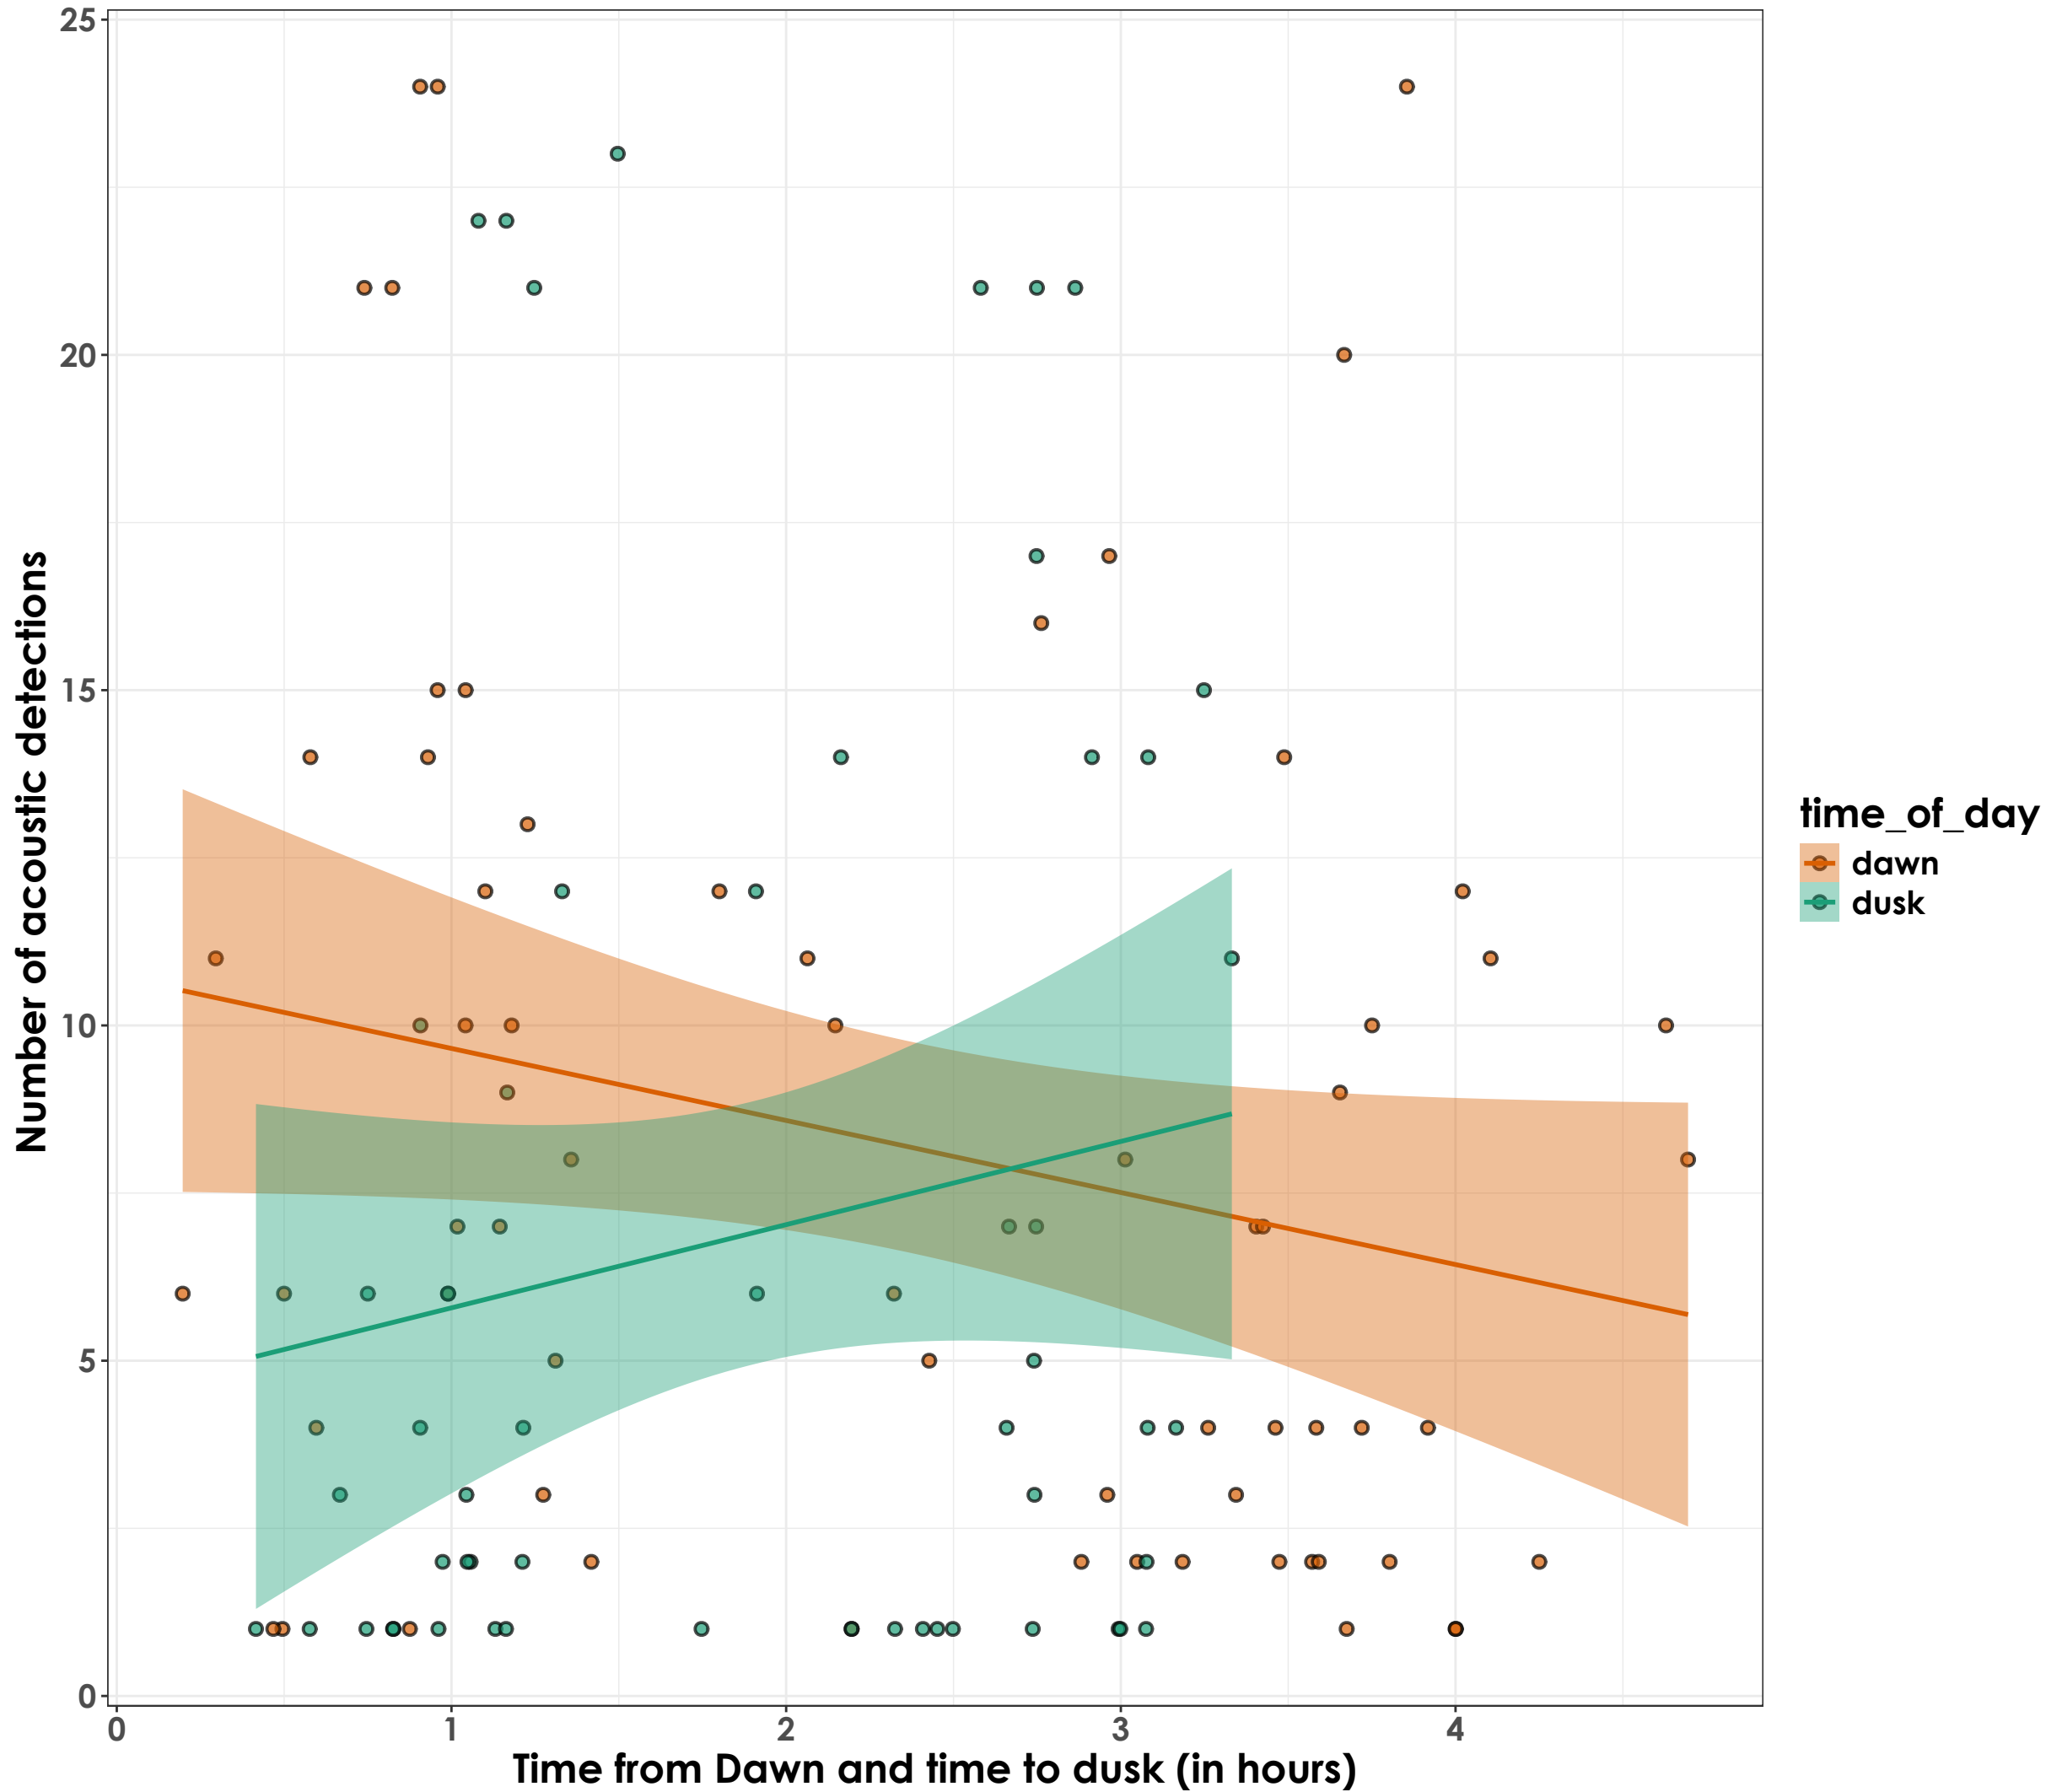

Crested Serpent-Eagle

Each dot represents the total number of detections after dawn or before dusk (in hours)

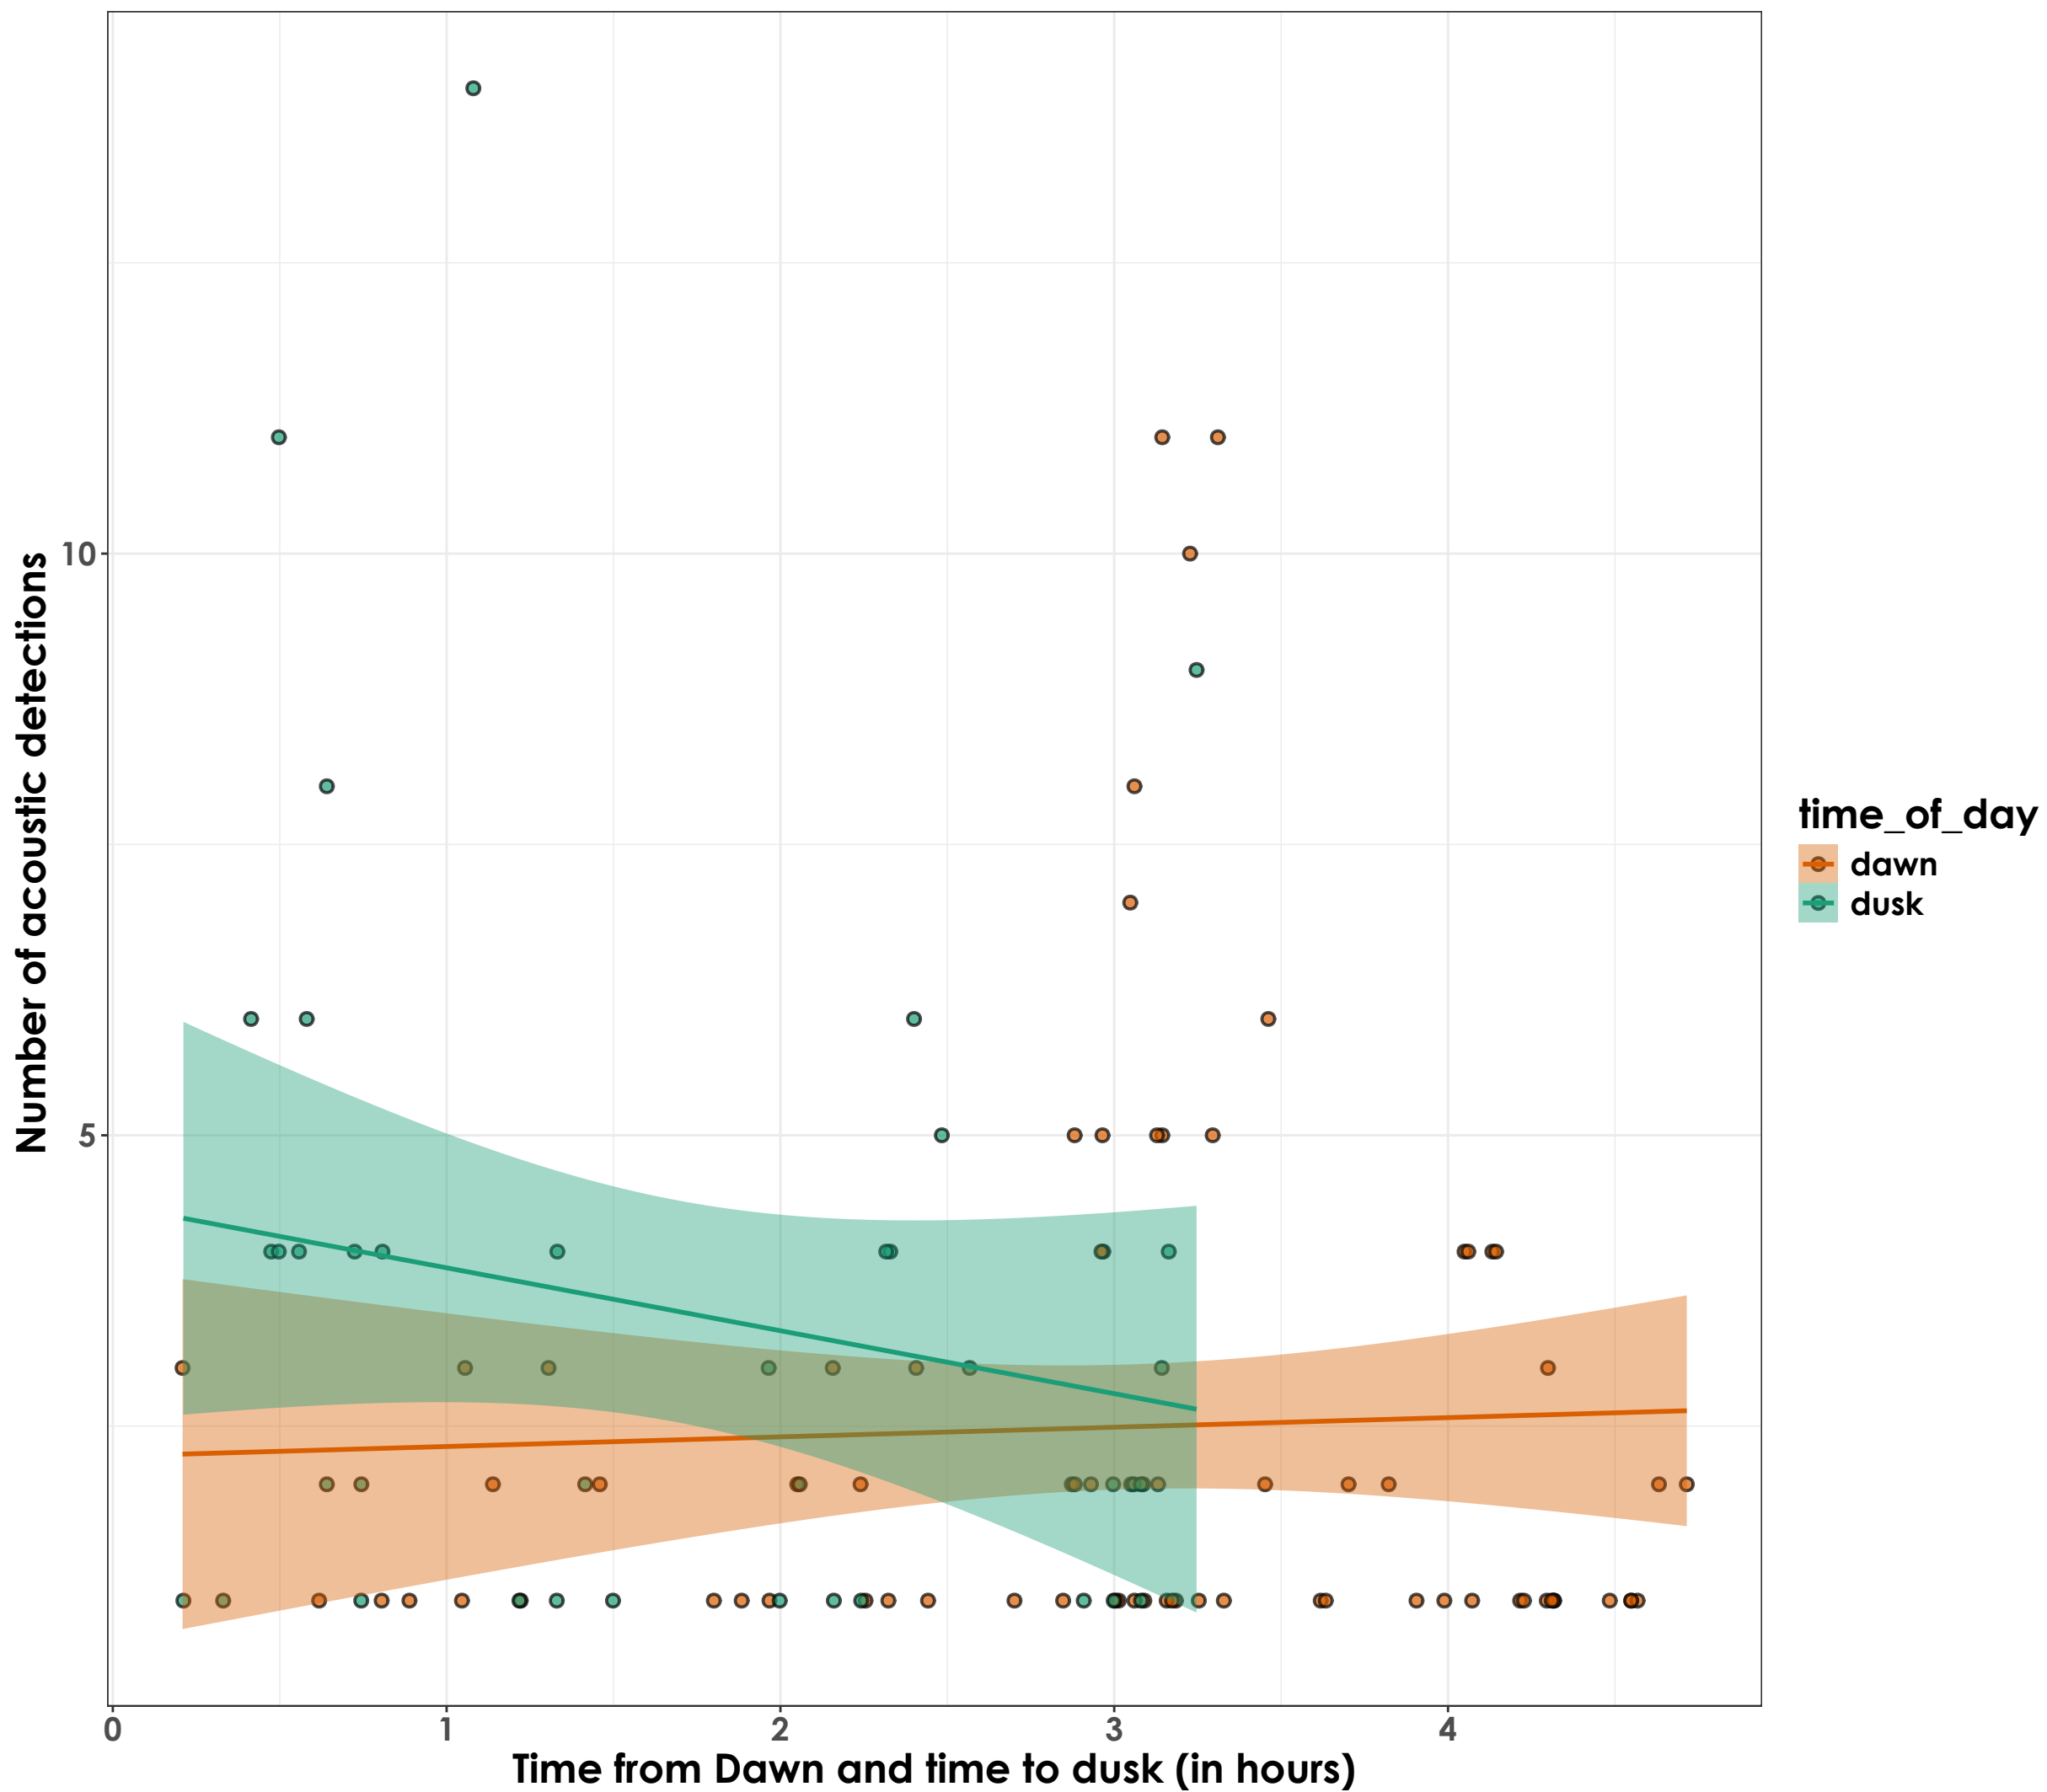

White-bellied Blue Flycatcher

Each dot represents the total number of detections after dawn or before dusk (in hours)

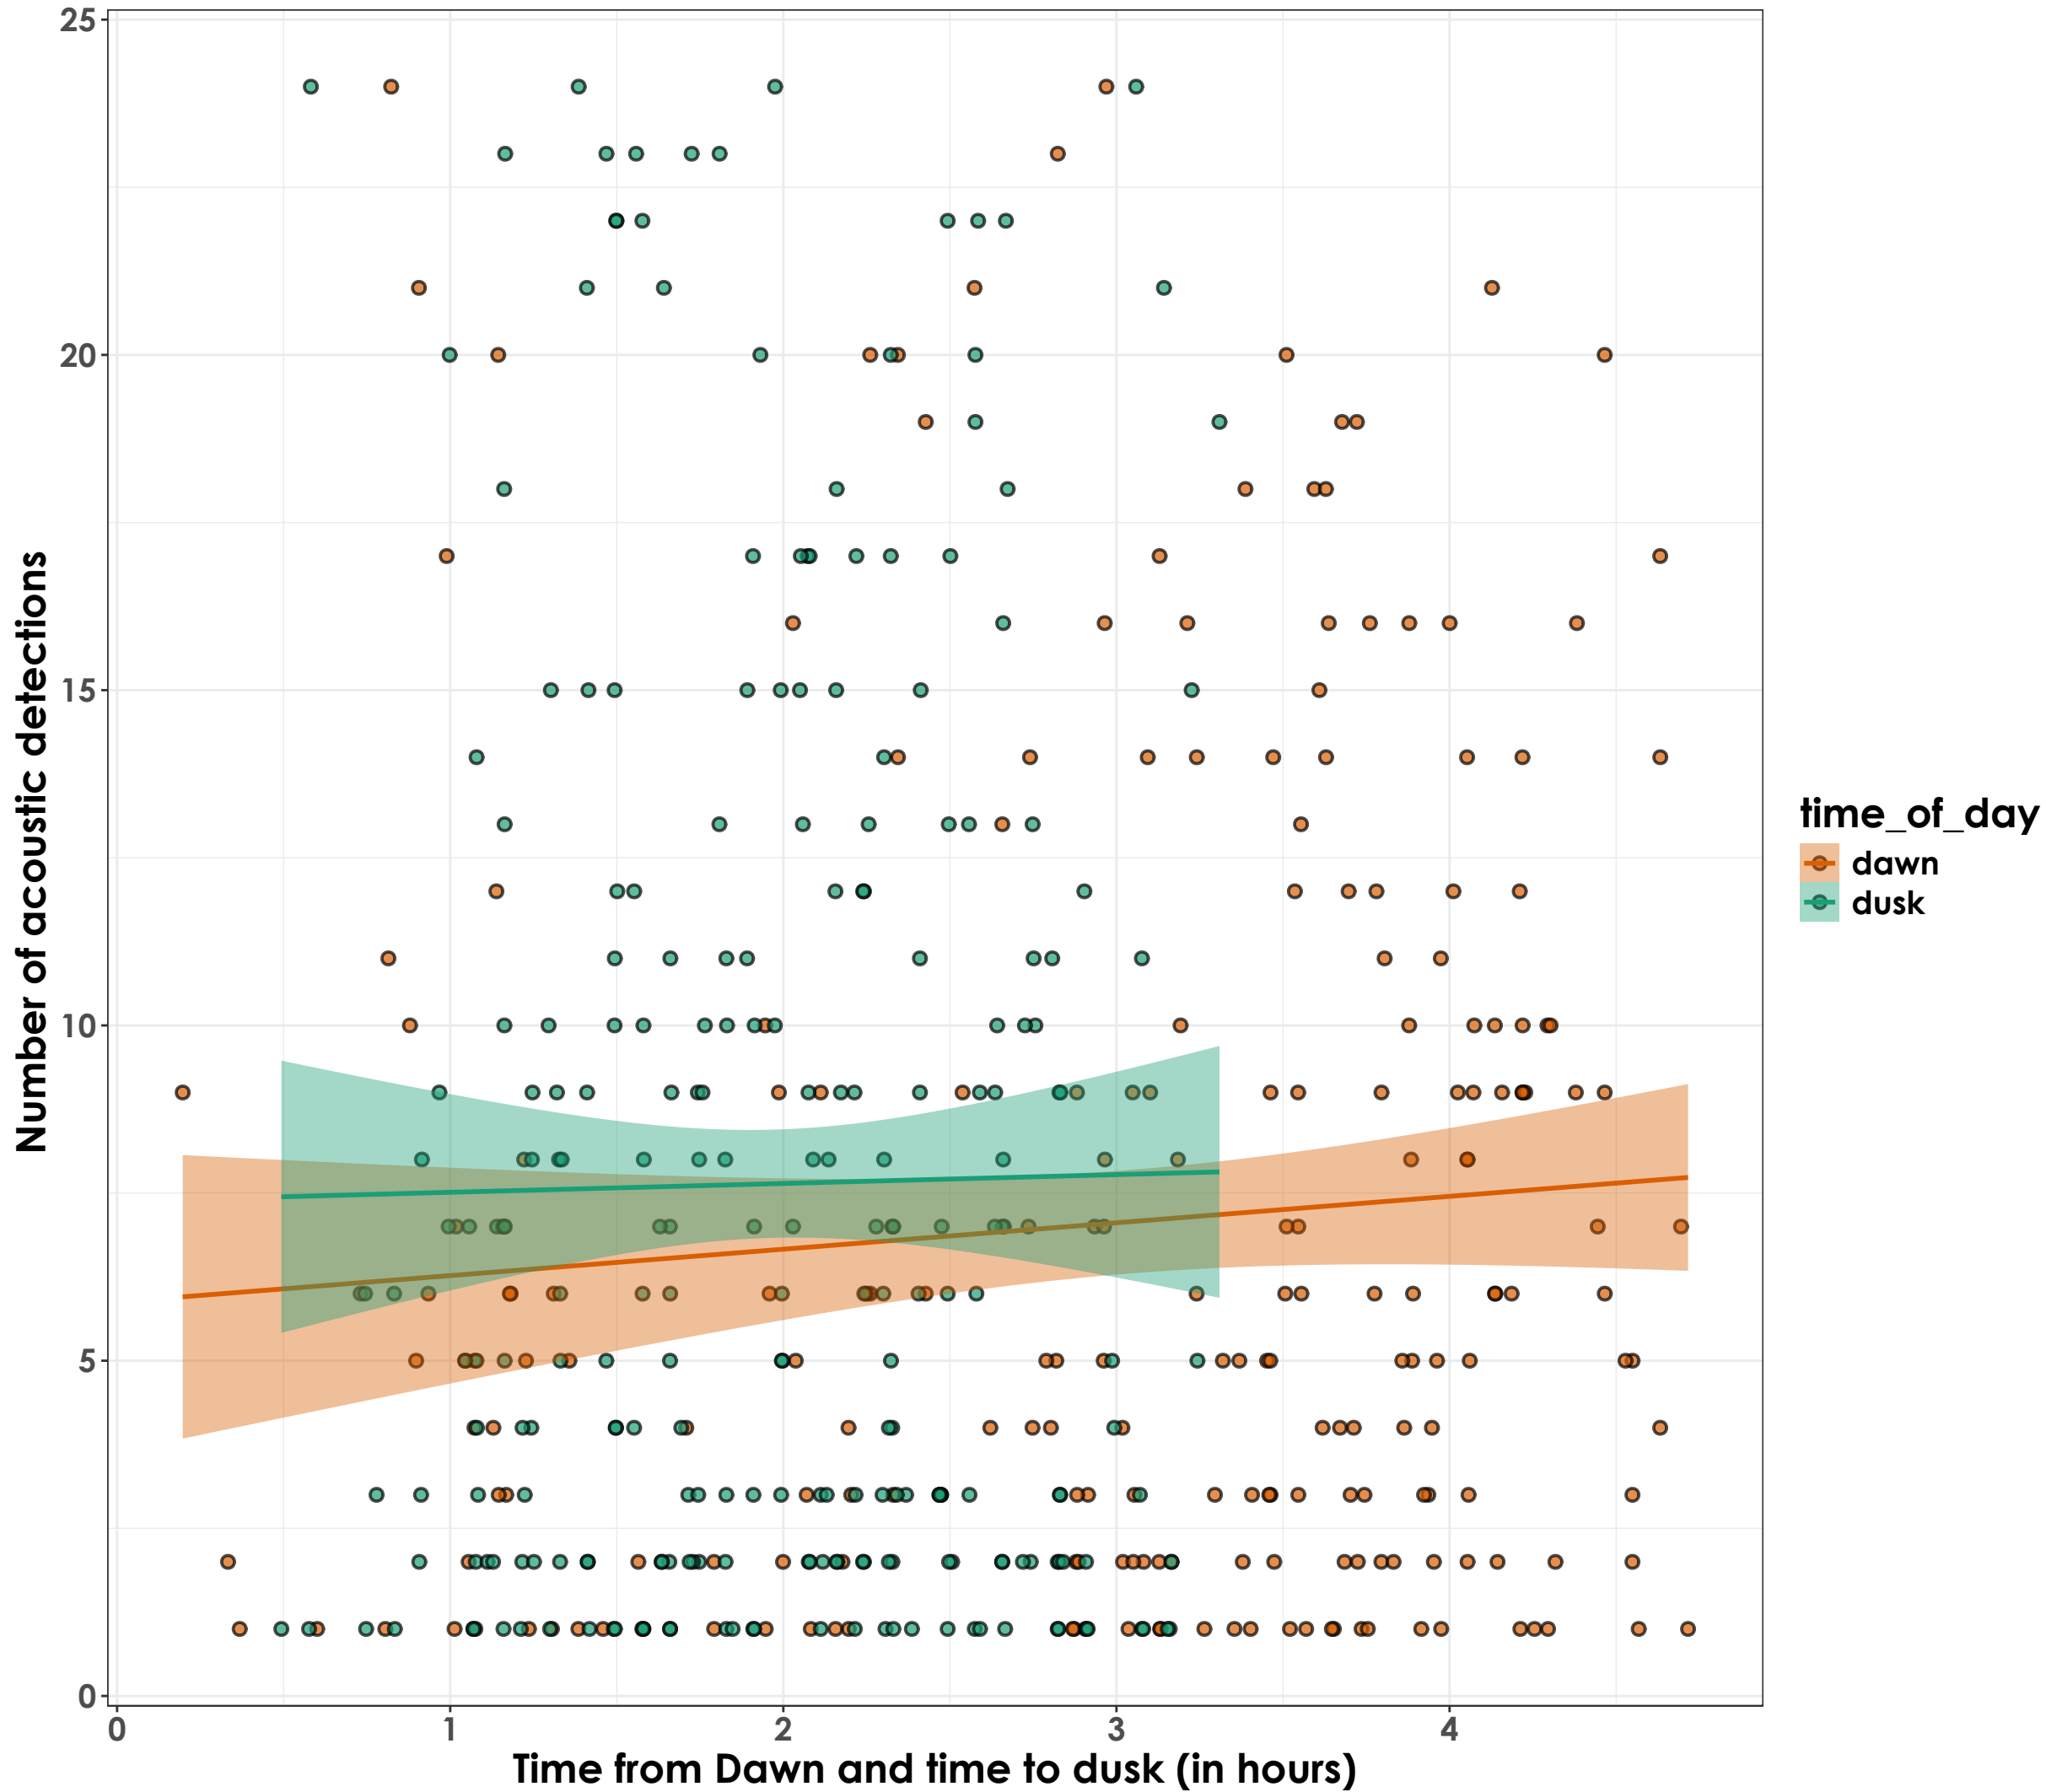

Indian Peafowl

Each dot represents the total number of detections after dawn or before dusk (in hours)

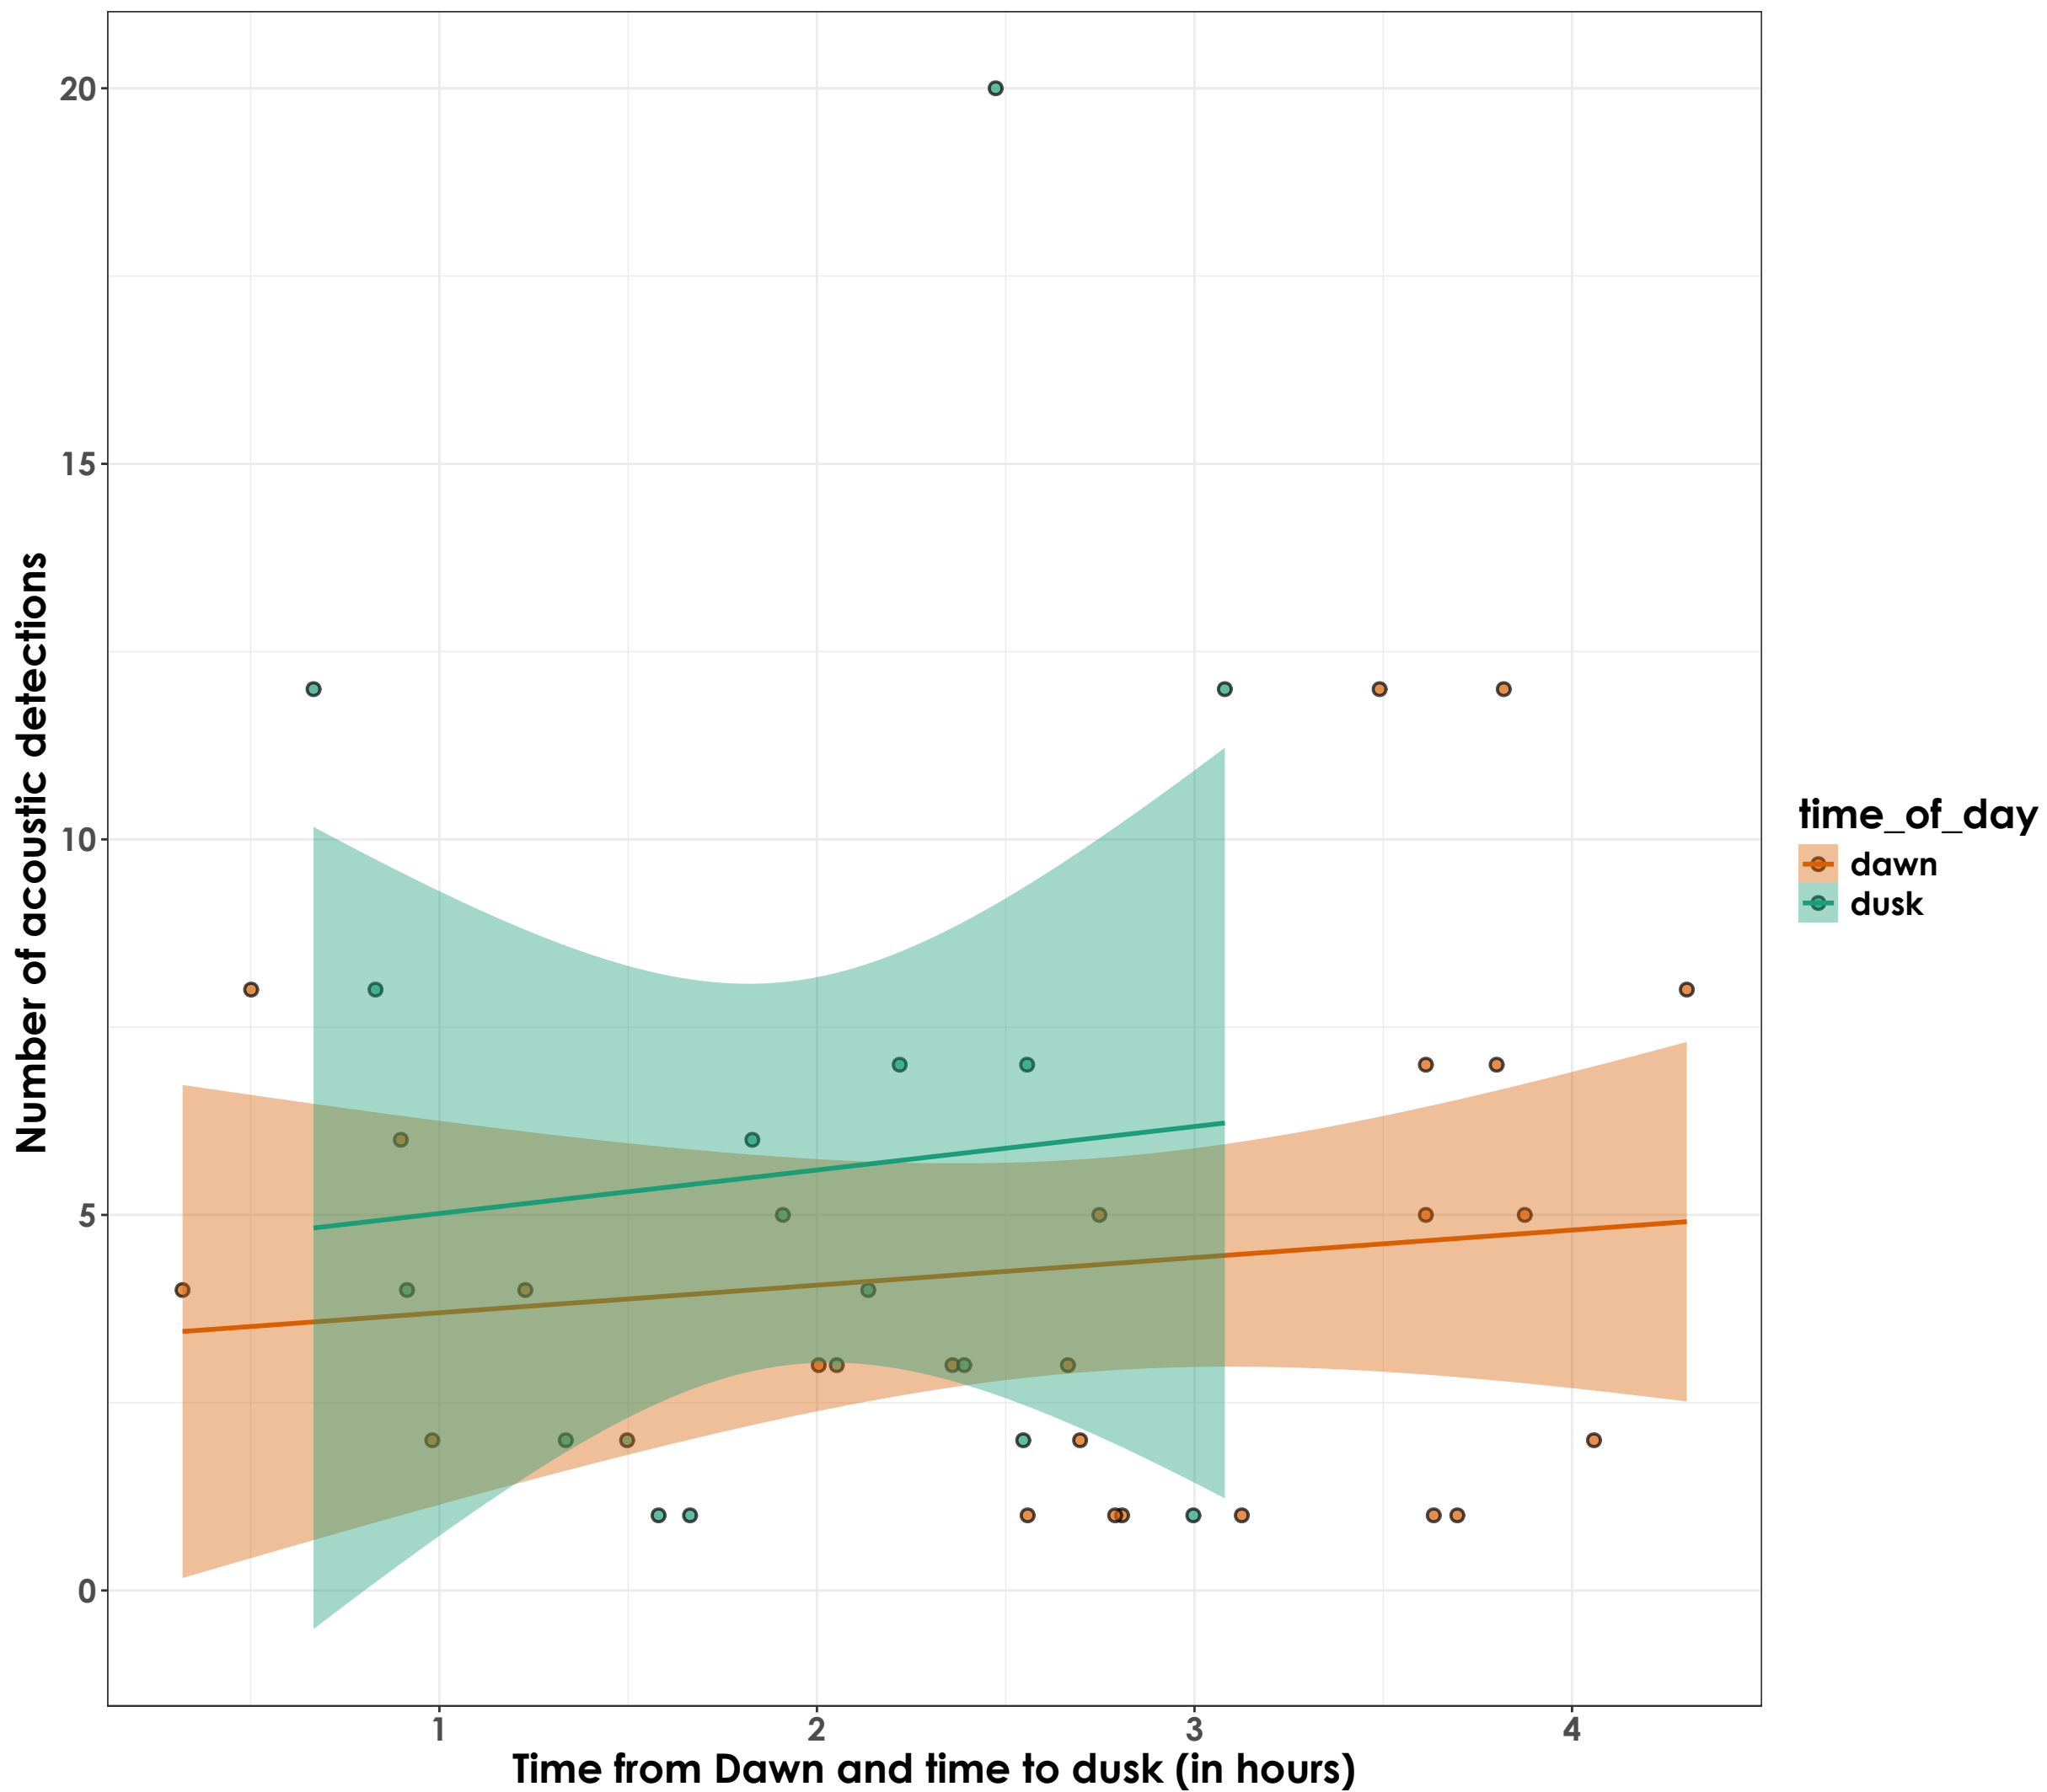

Malabar Barbet

Each dot represents the total number of detections after dawn or before dusk (in hours)

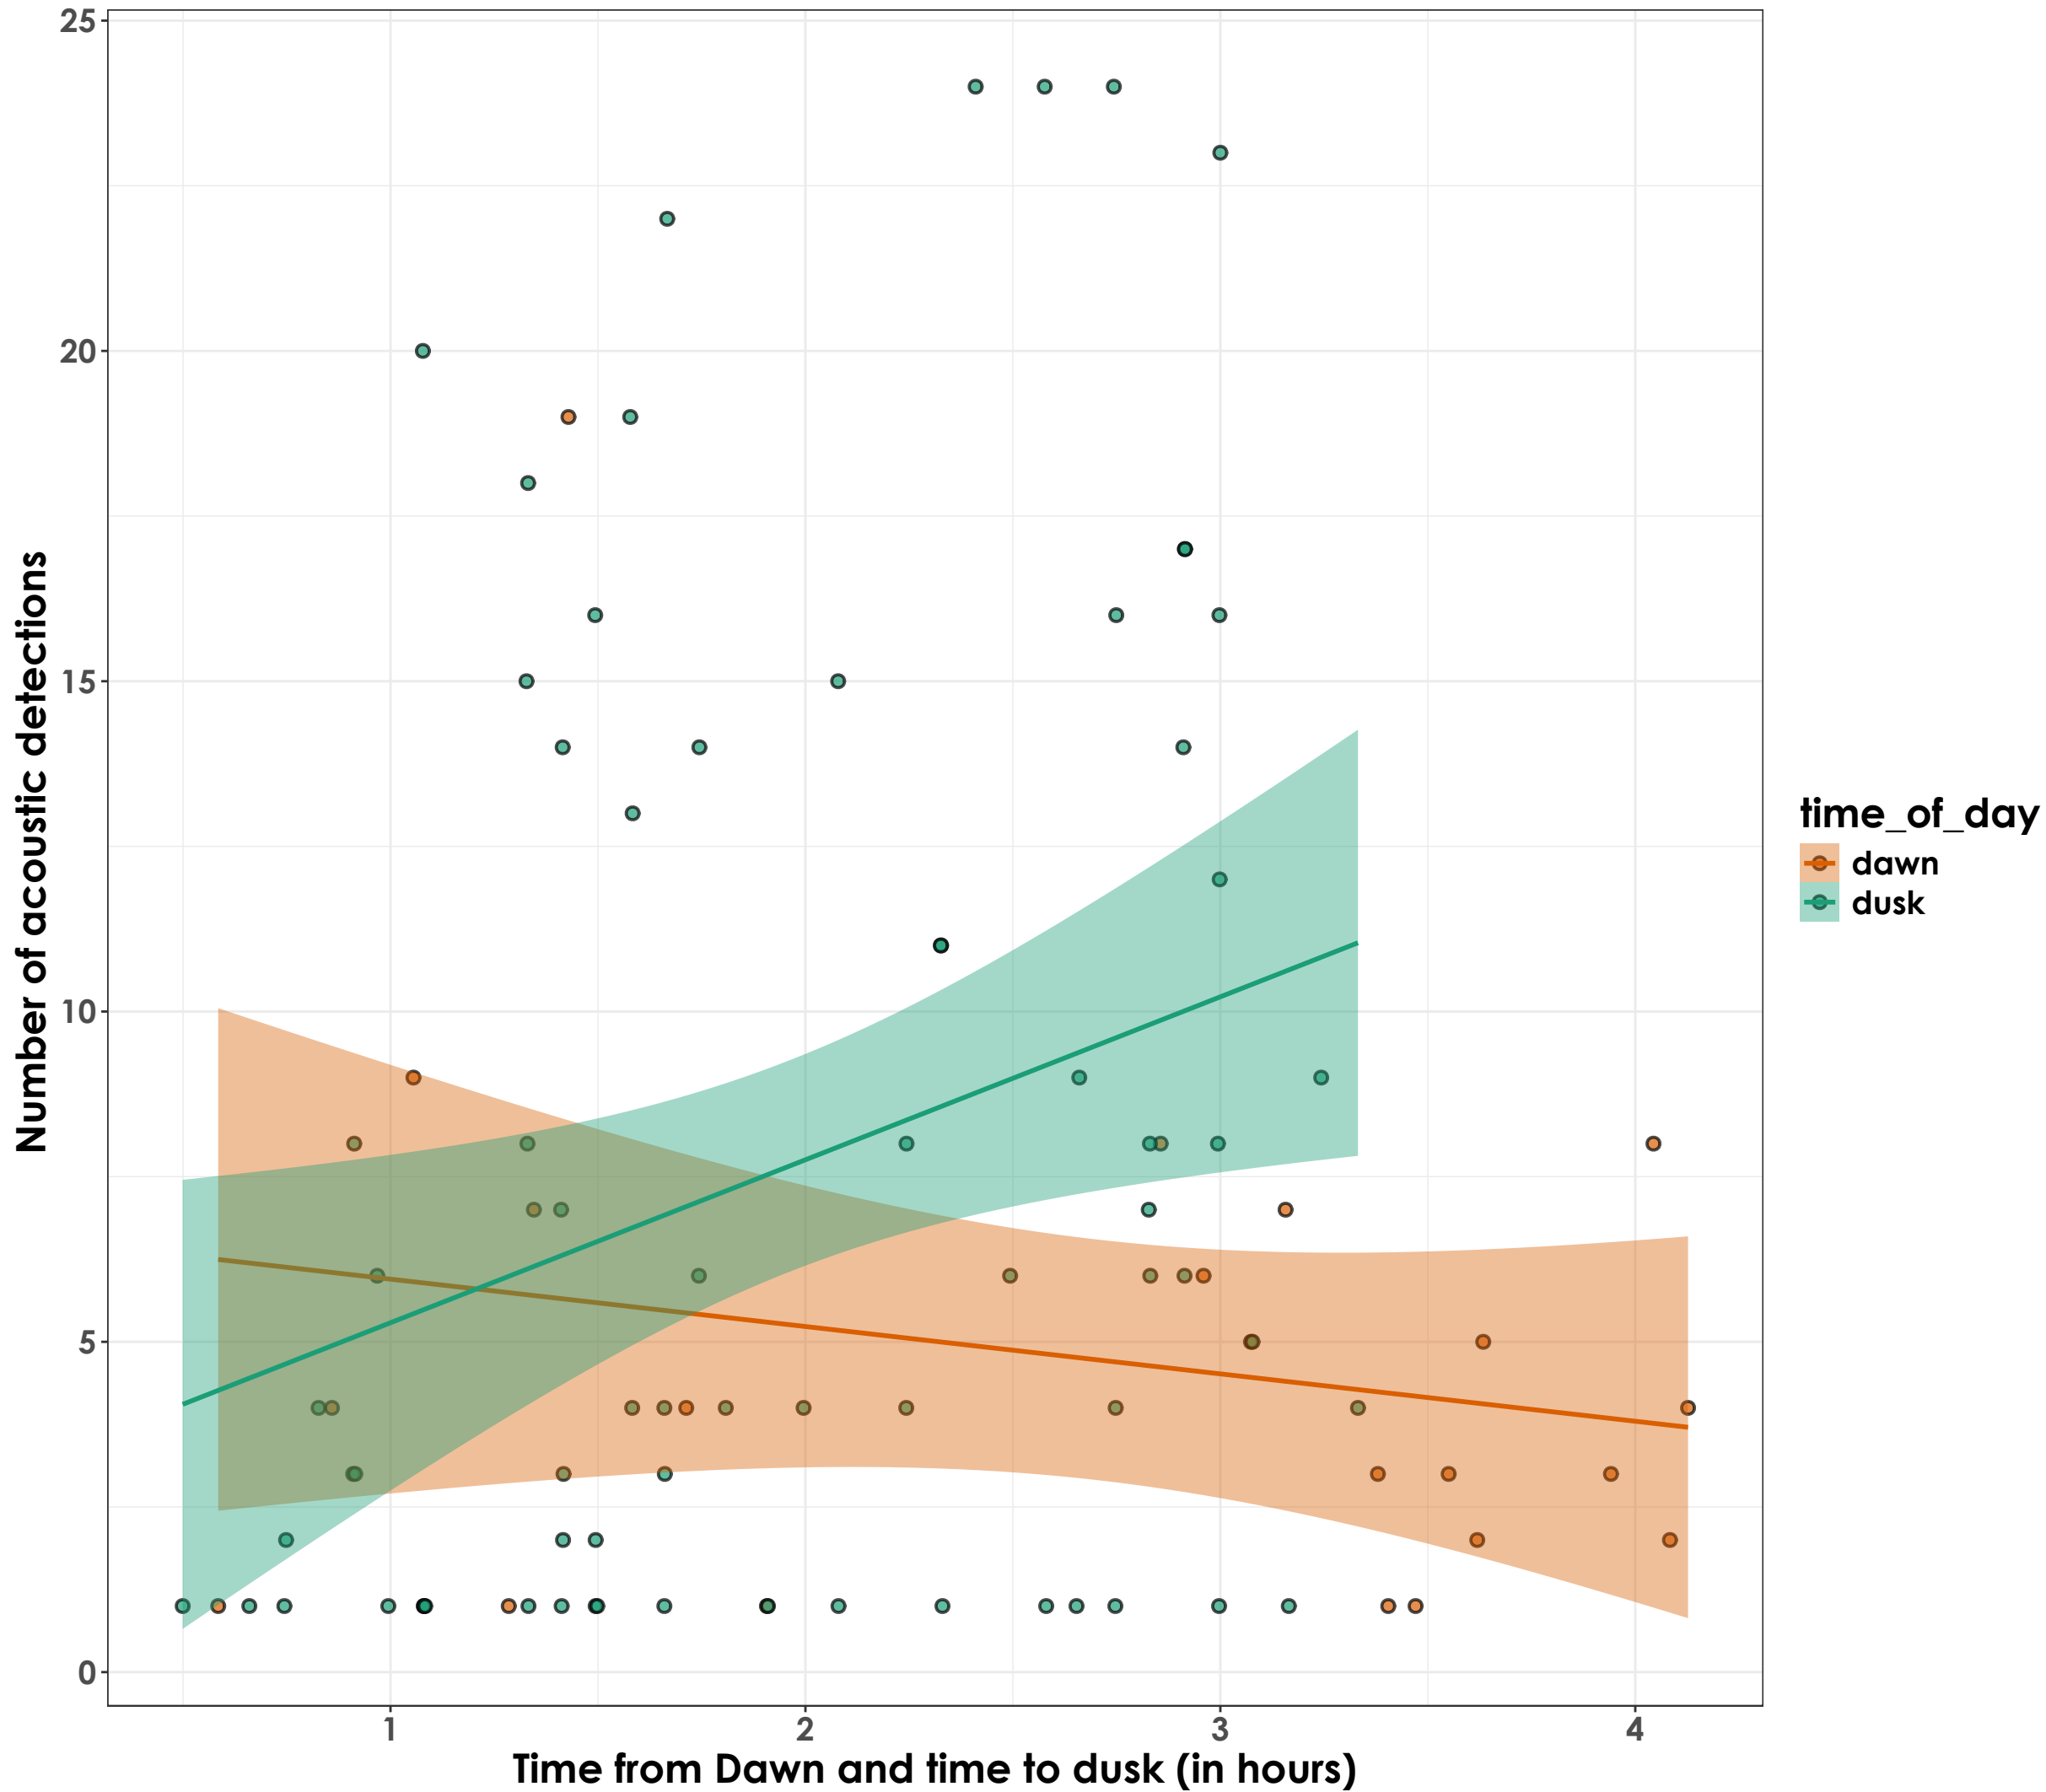

Bronzed Drongo

Each dot represents the total number of detections after dawn or before dusk (in hours)

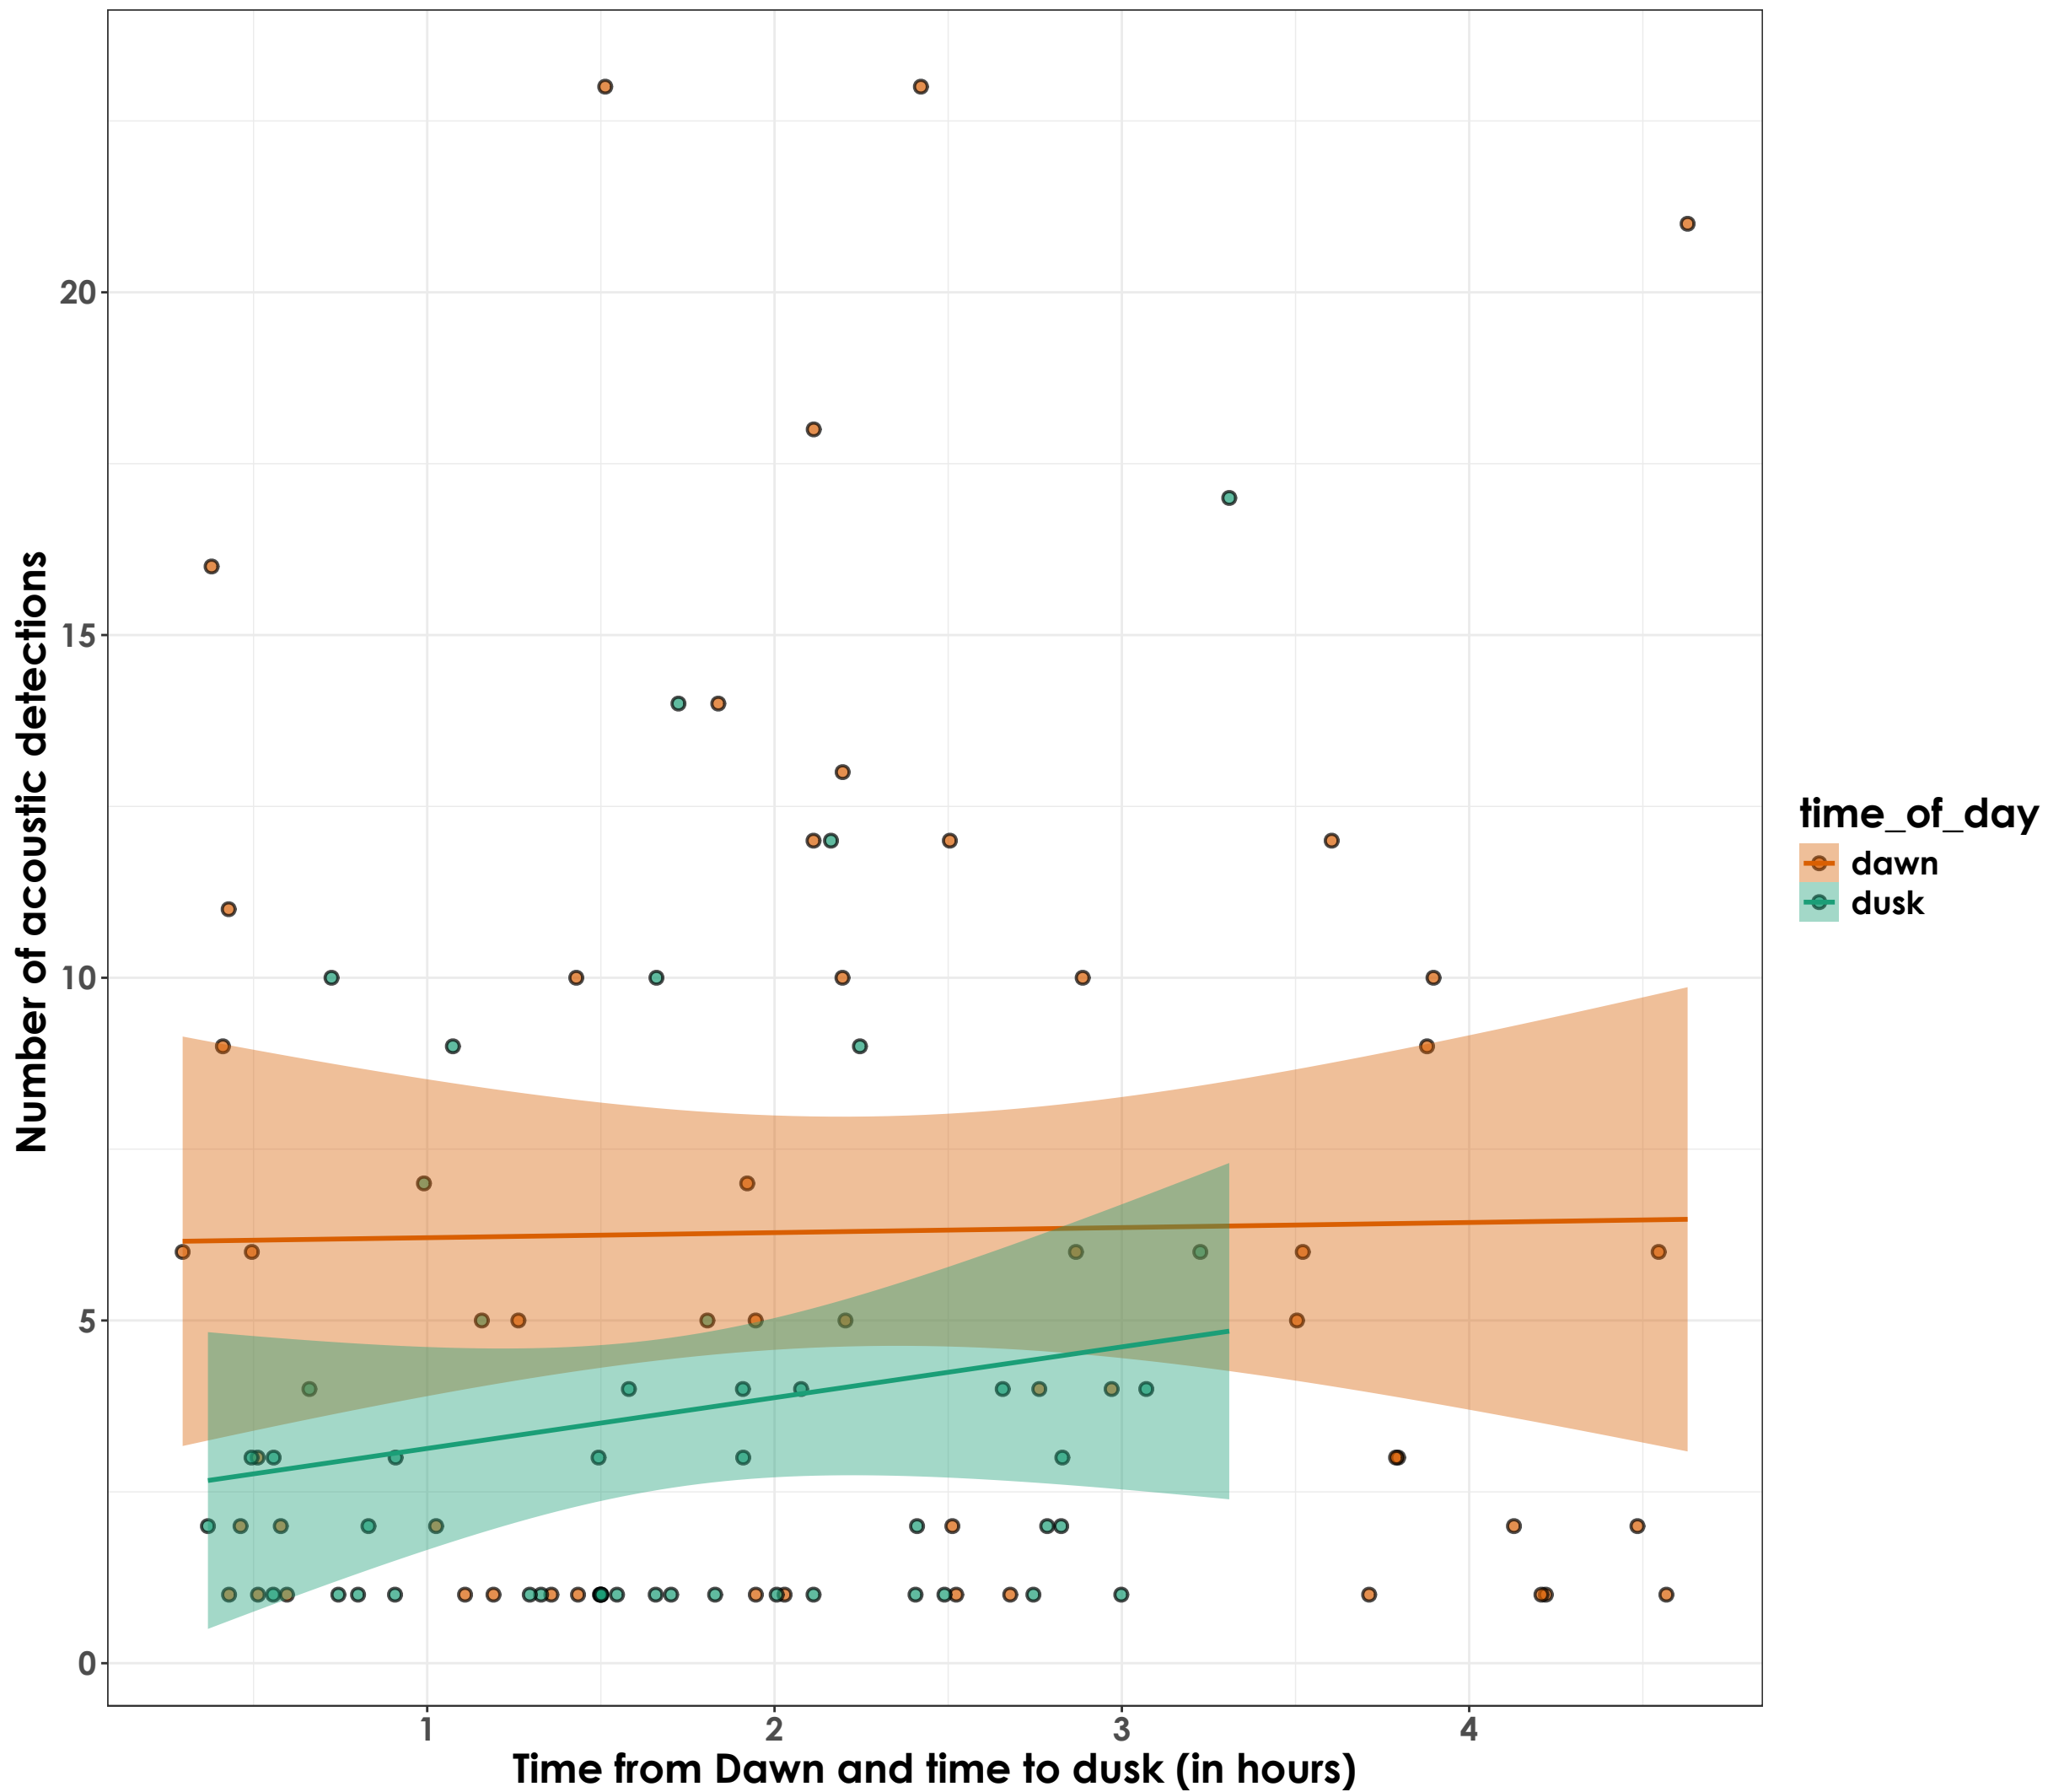

Dark-fronted Babbler

Each dot represents the total number of detections after dawn or before dusk (in hours)

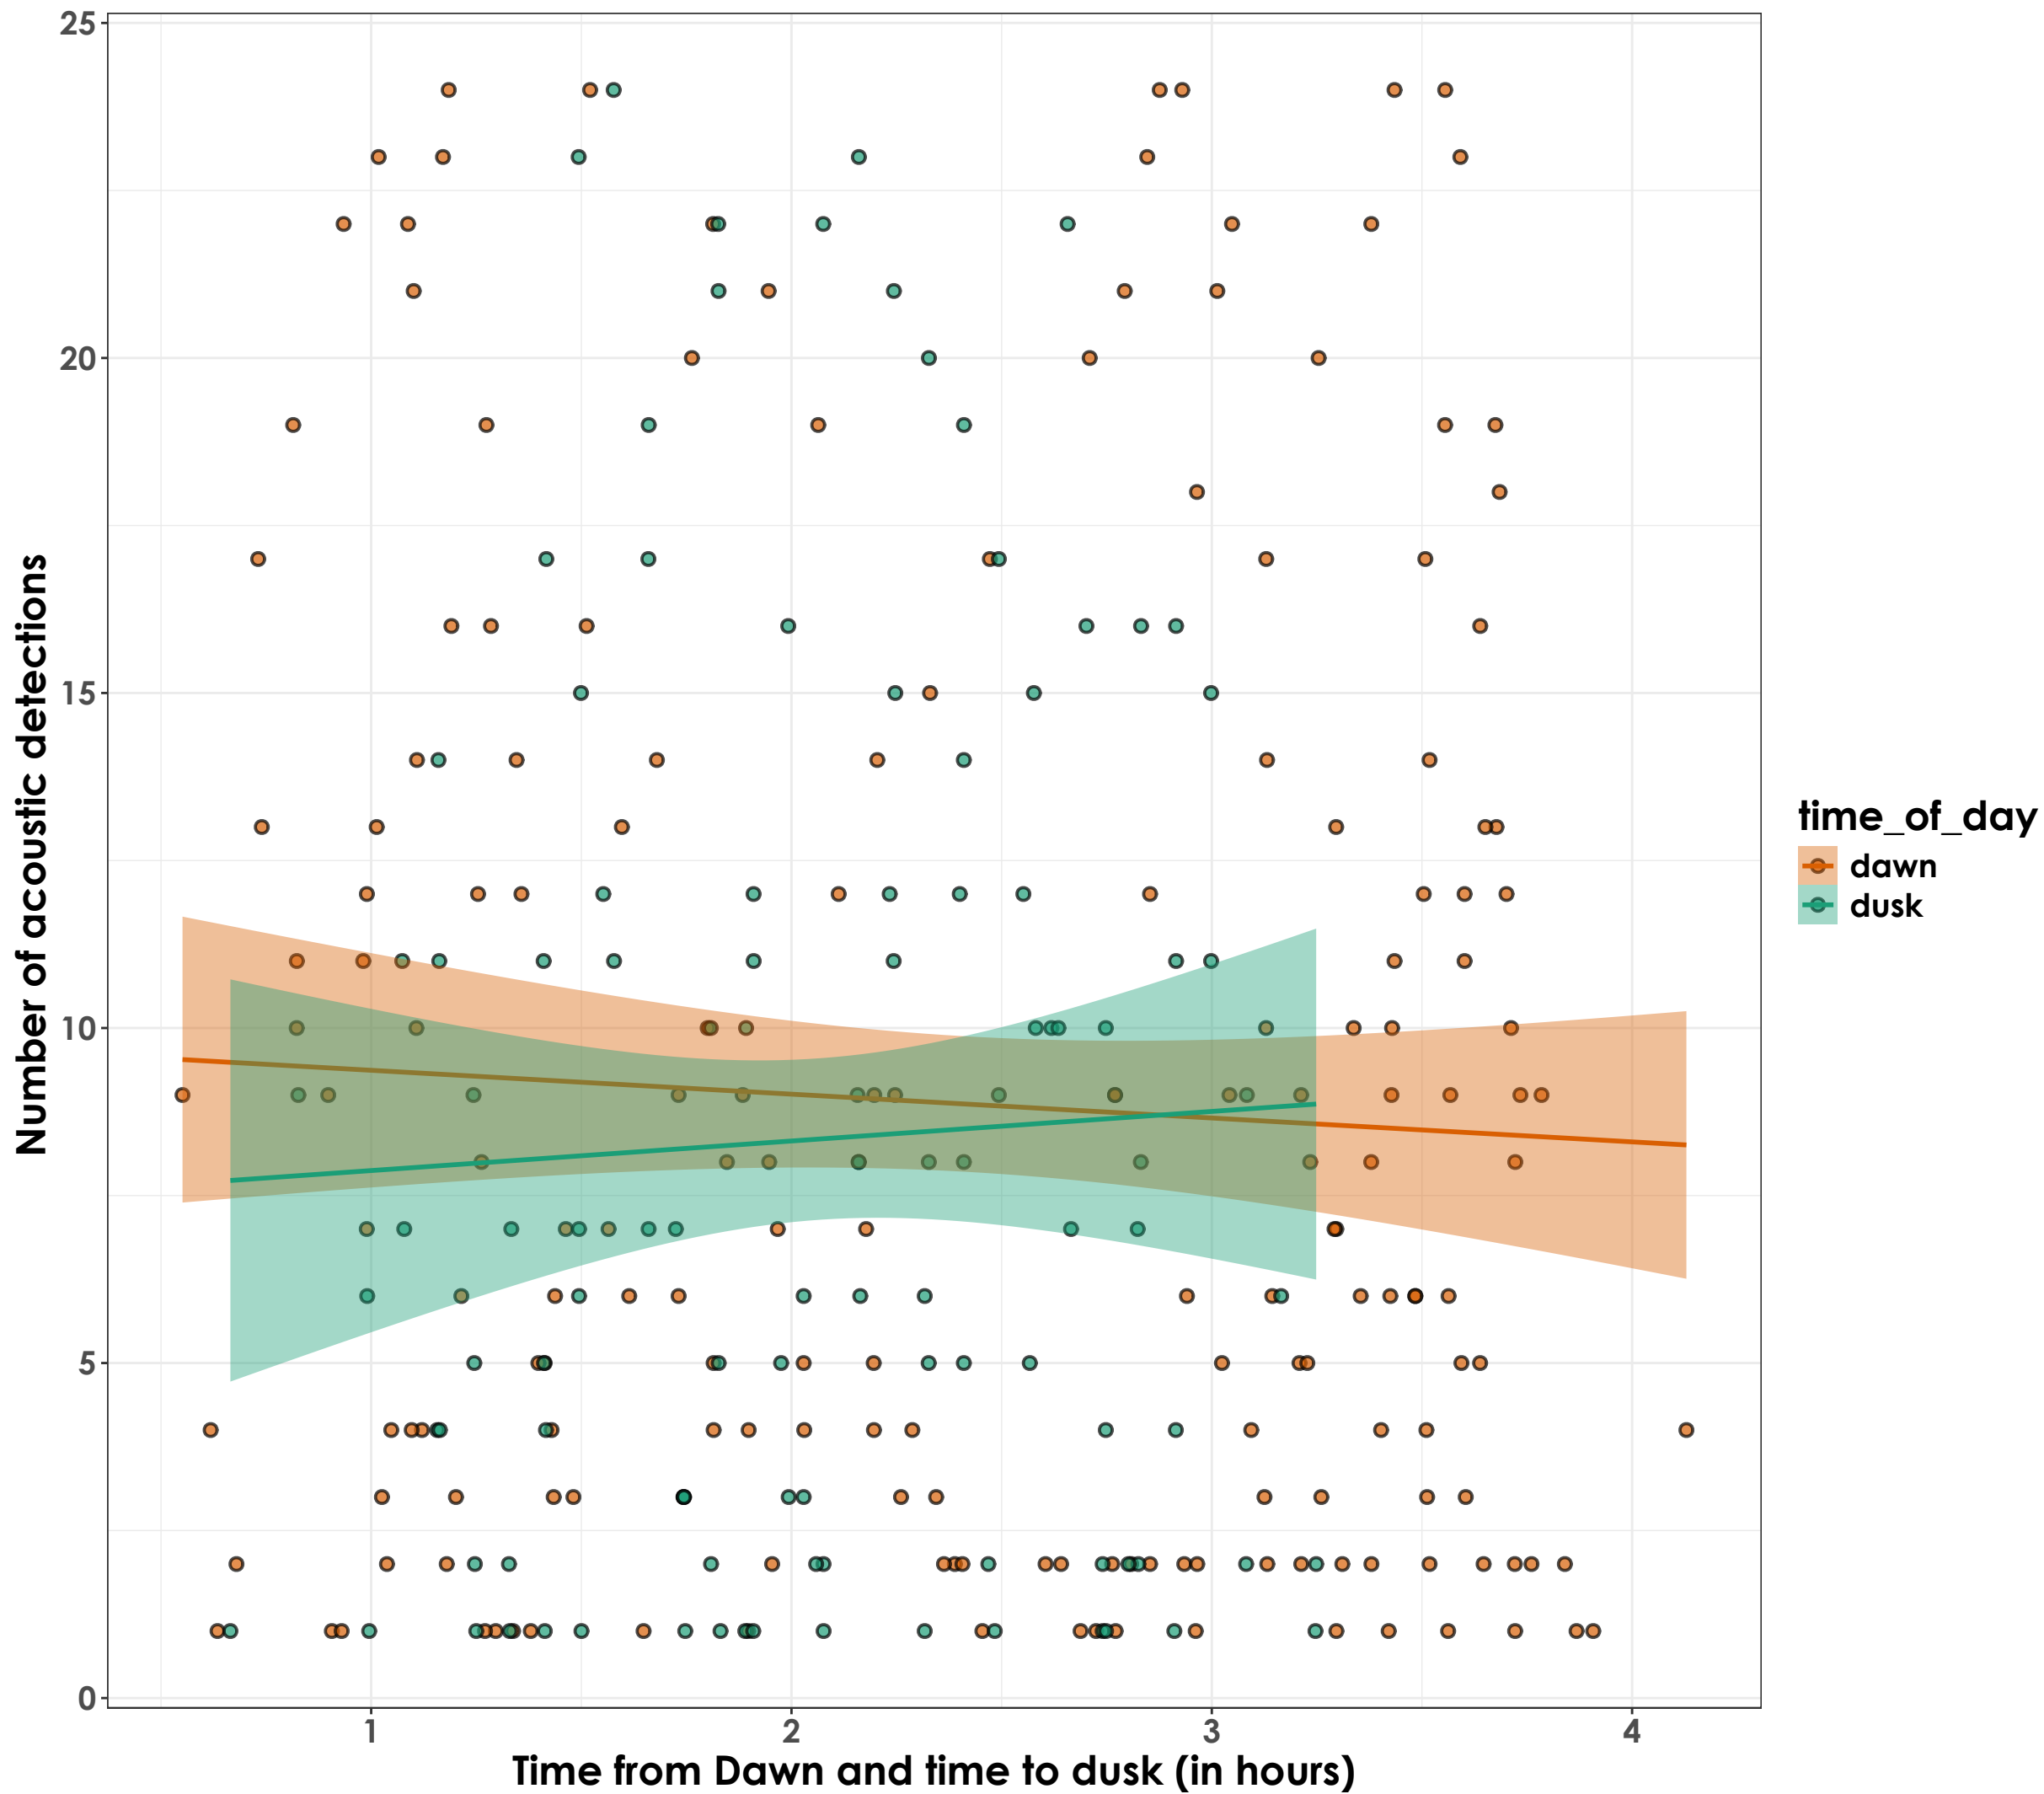

Great Hornbill

Each dot represents the total number of detections after dawn or before dusk (in hours)

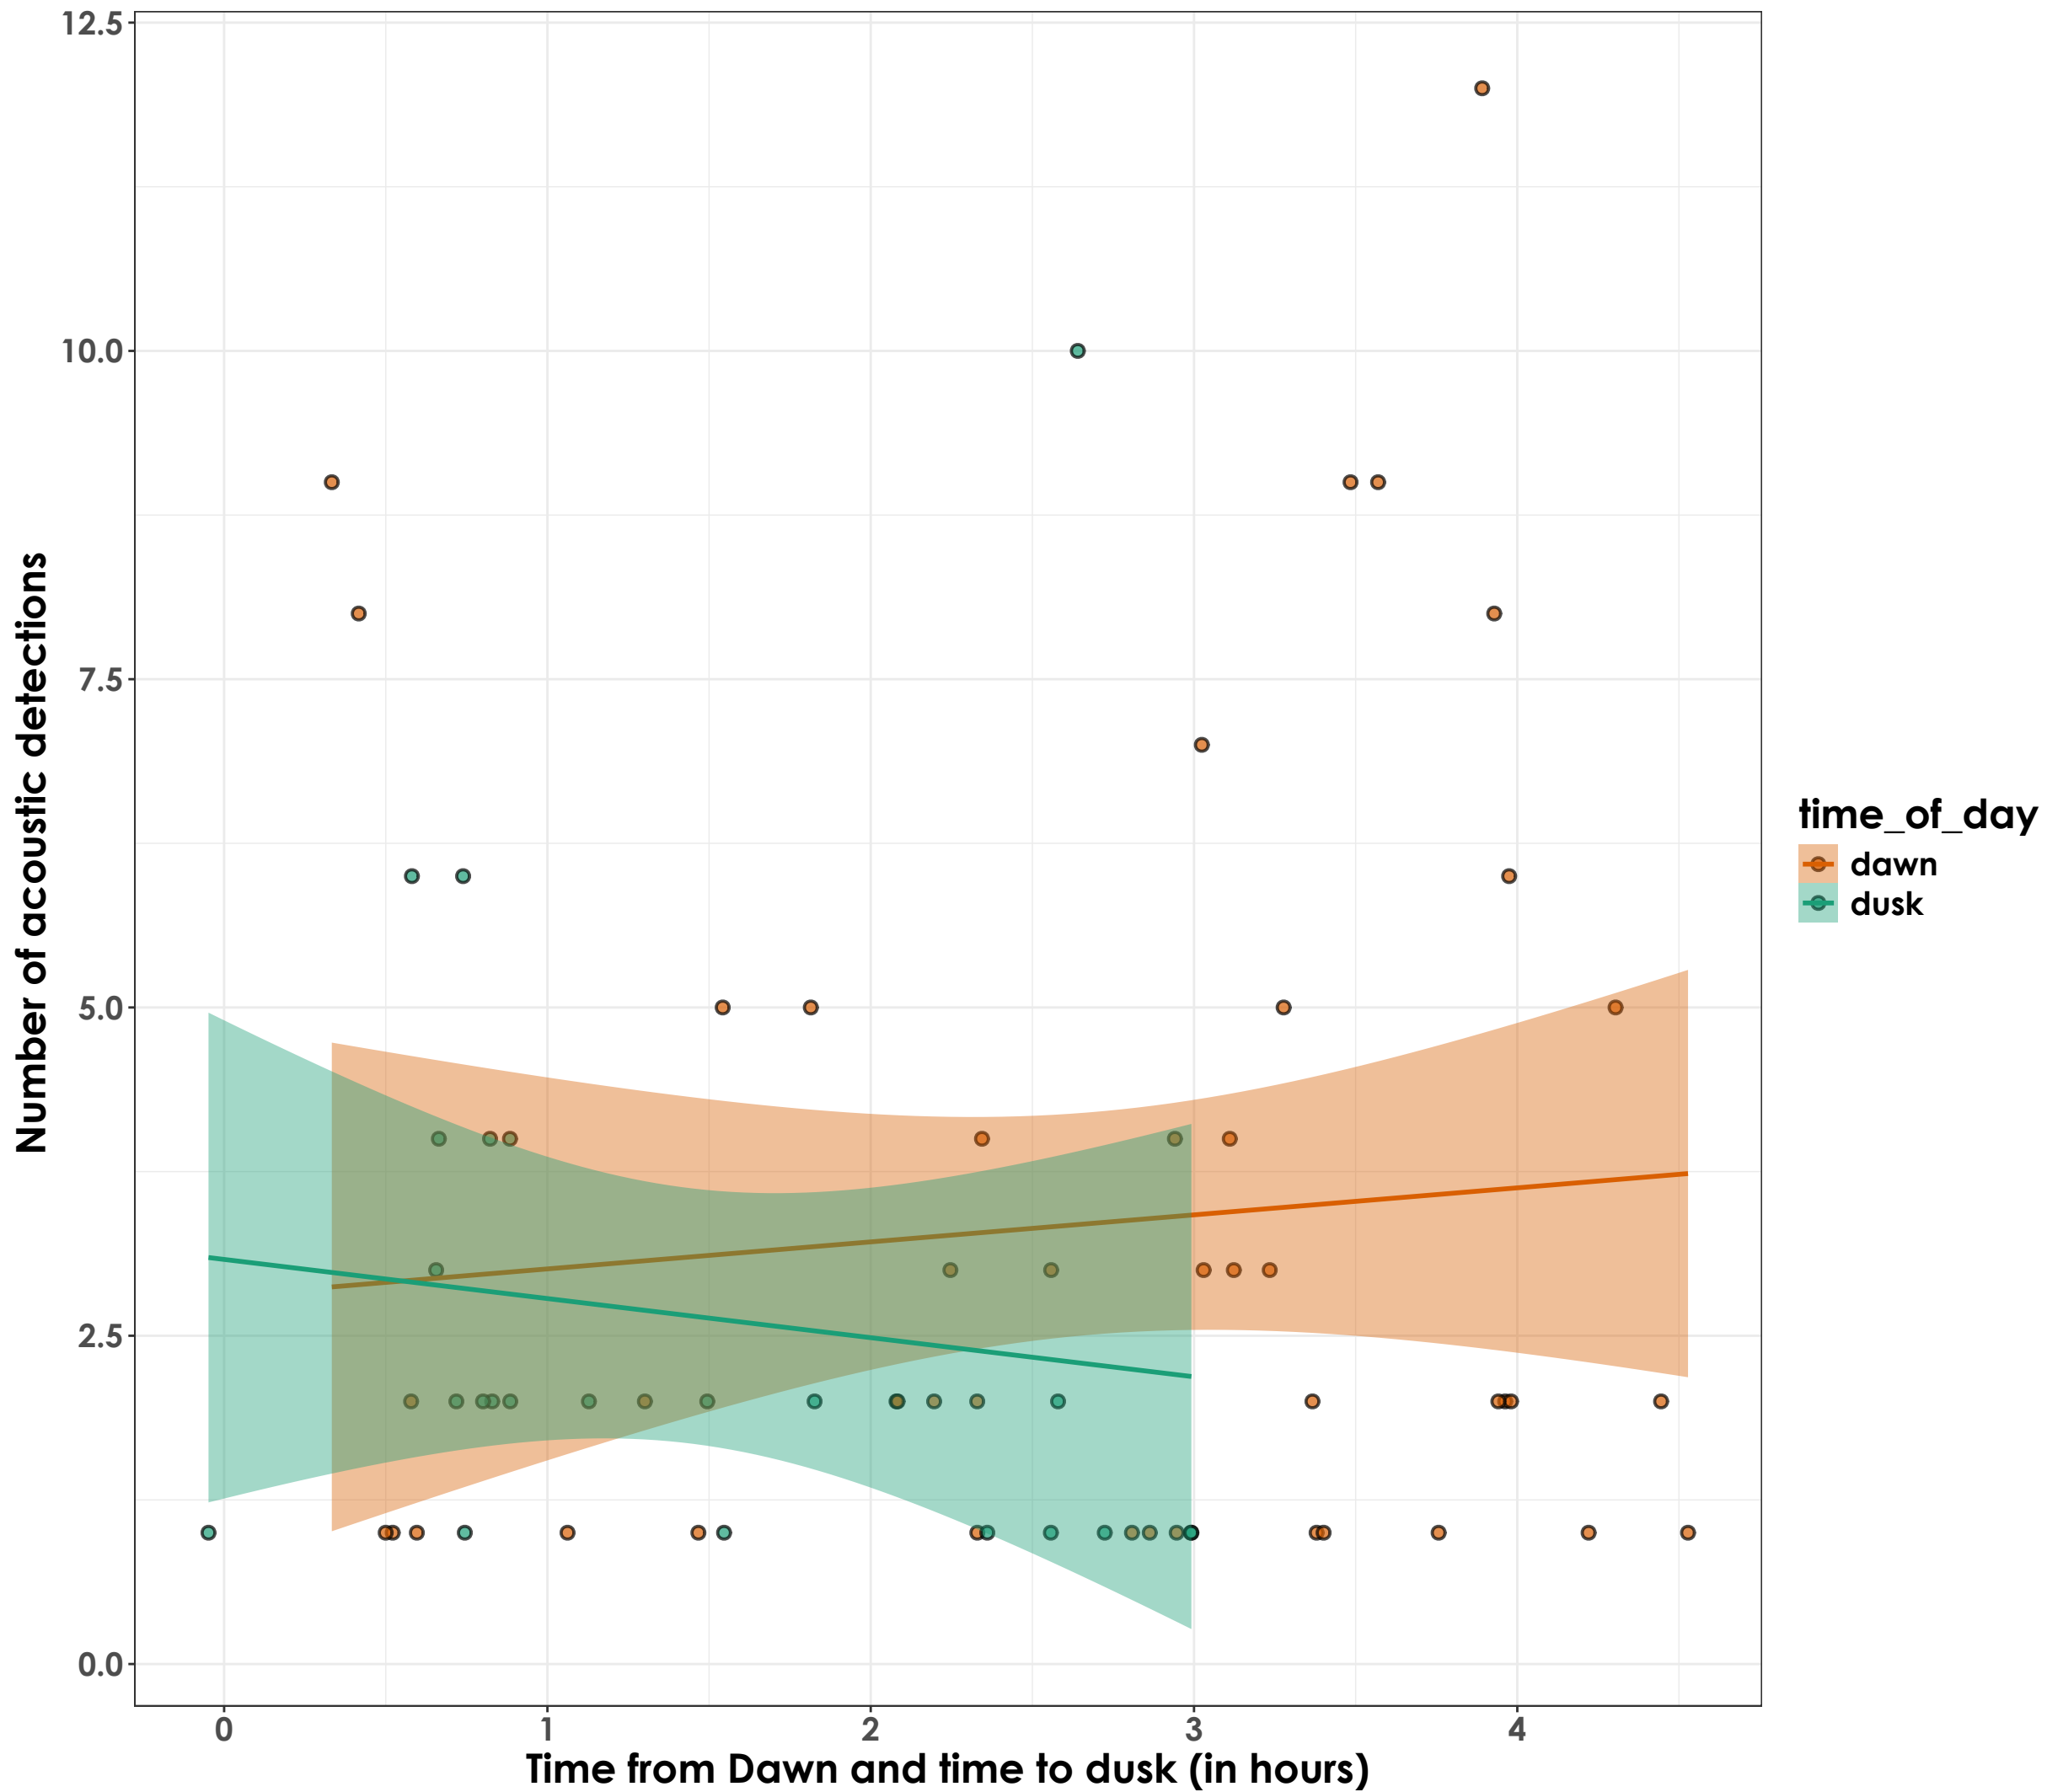

Mountain Imperial-Pigeon

Each dot represents the total number of detections after dawn or before dusk (in hours)

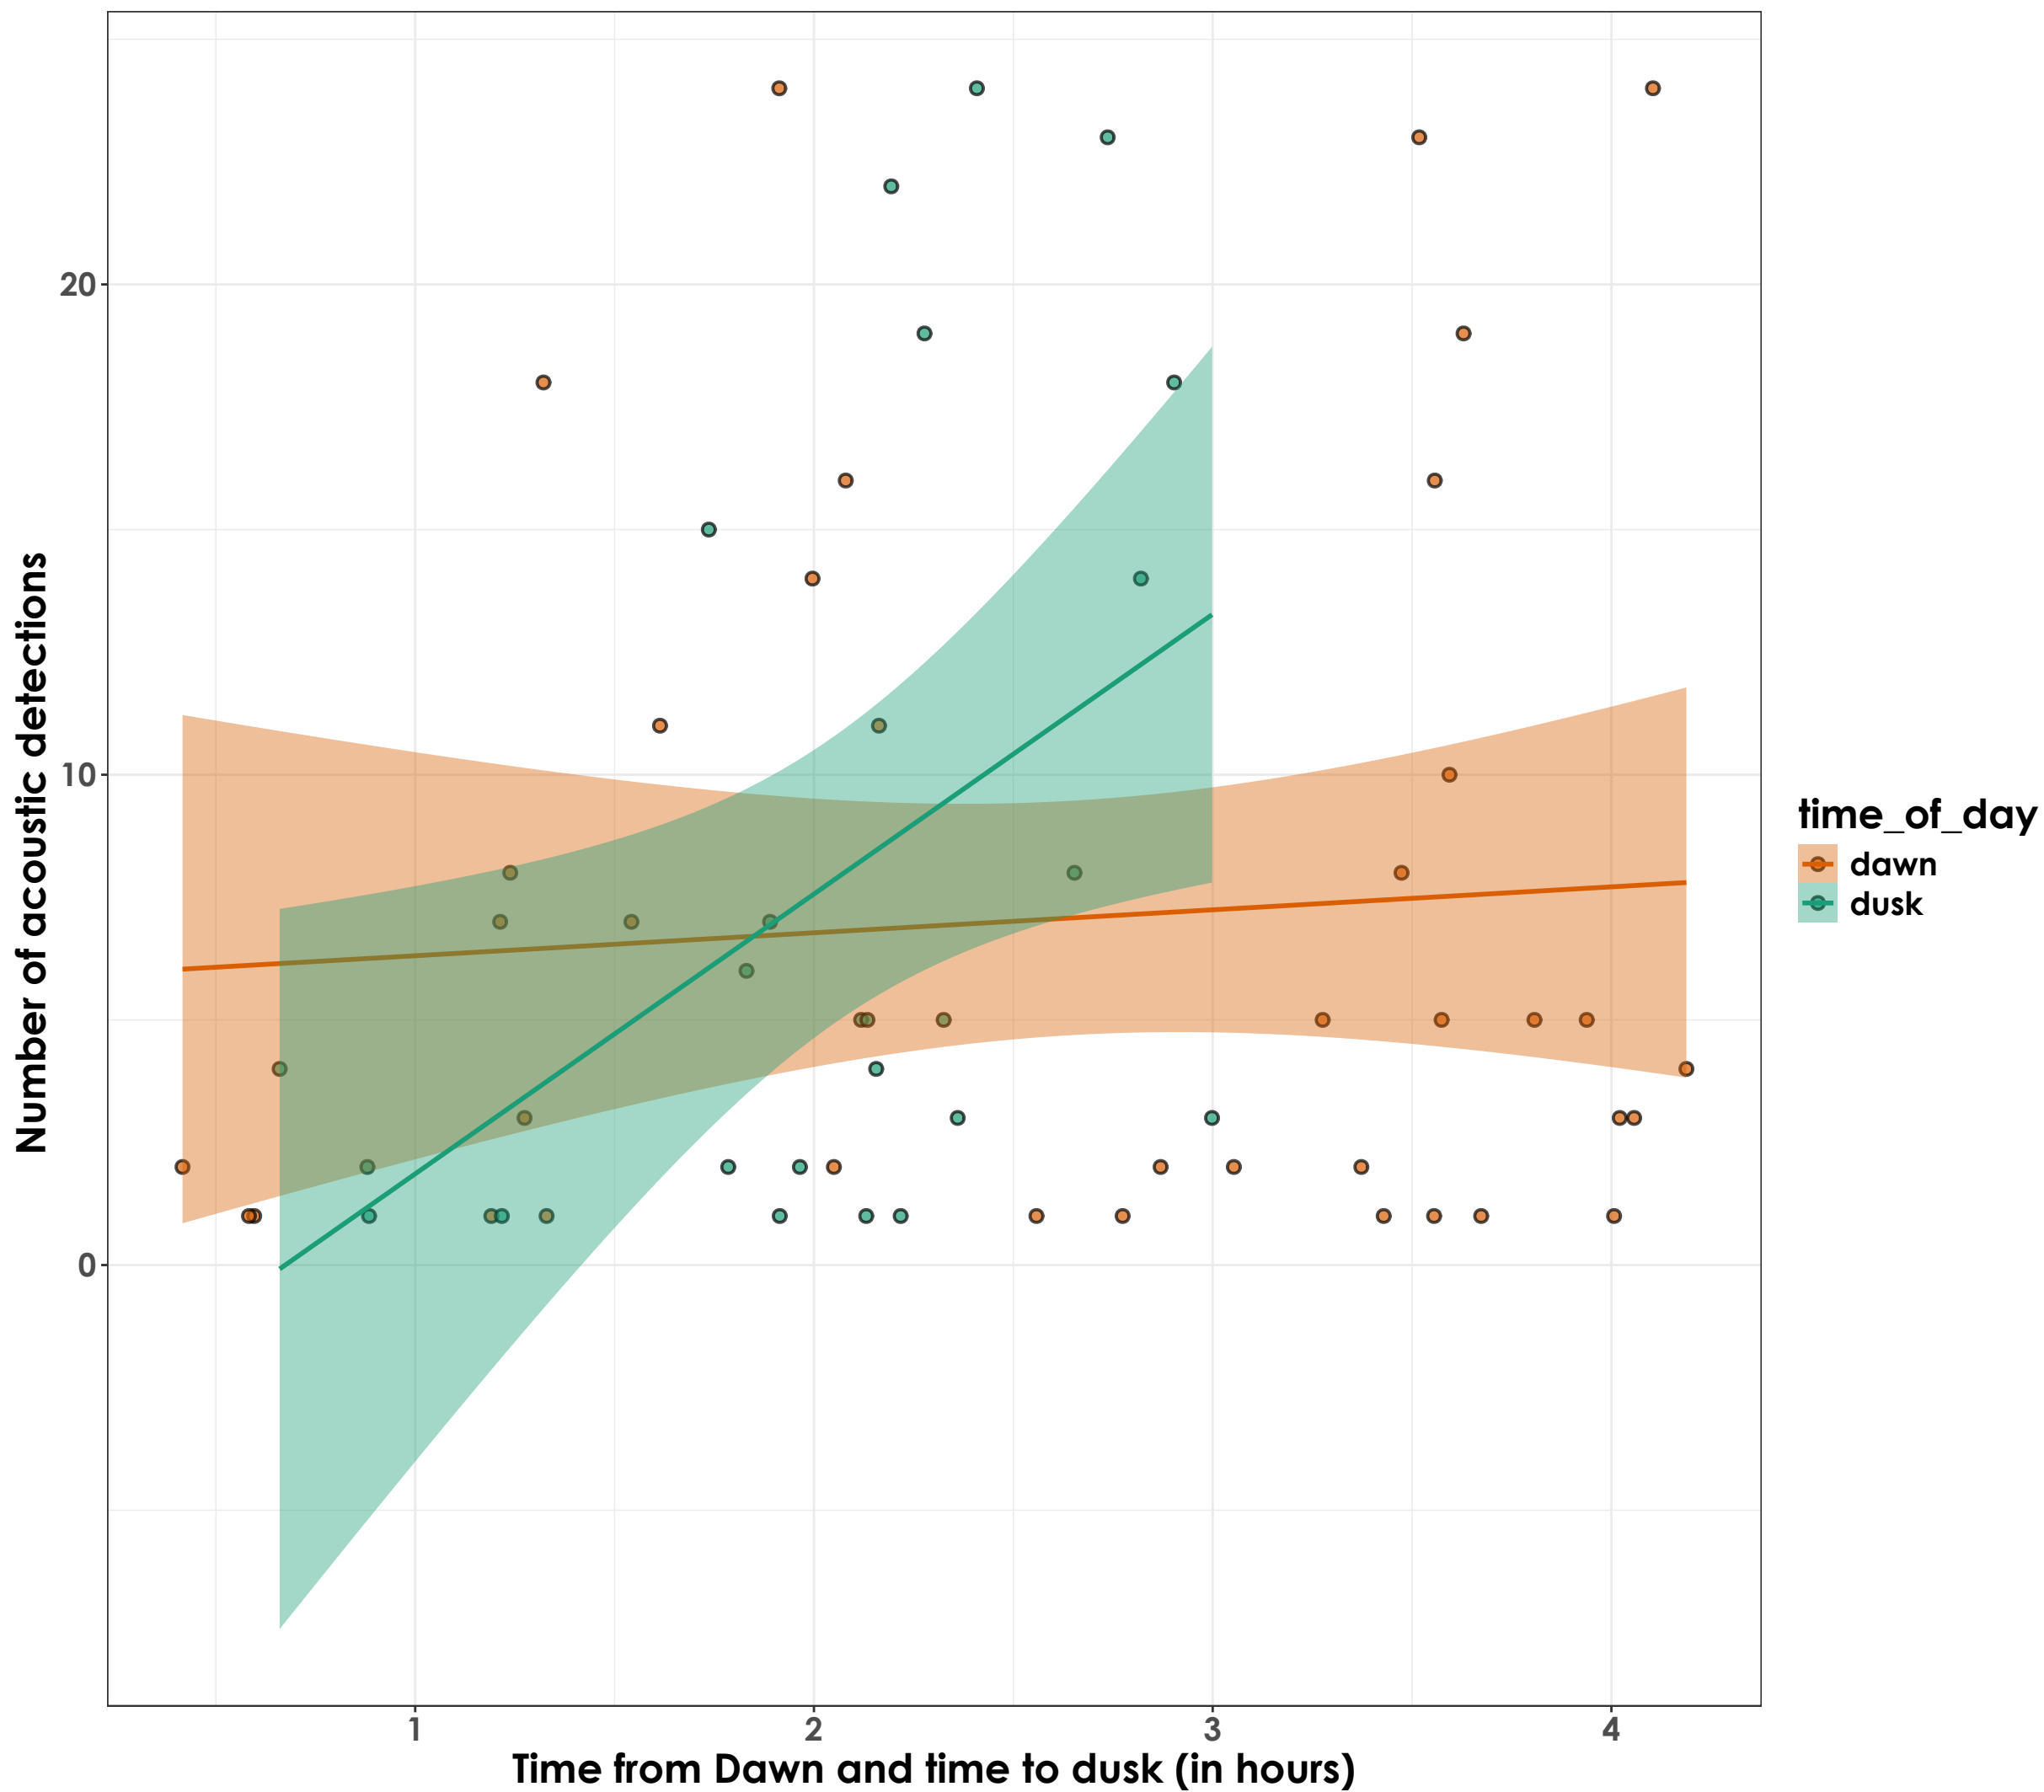

Each dot represents the total number of detections after dawn or before dusk (in hours)

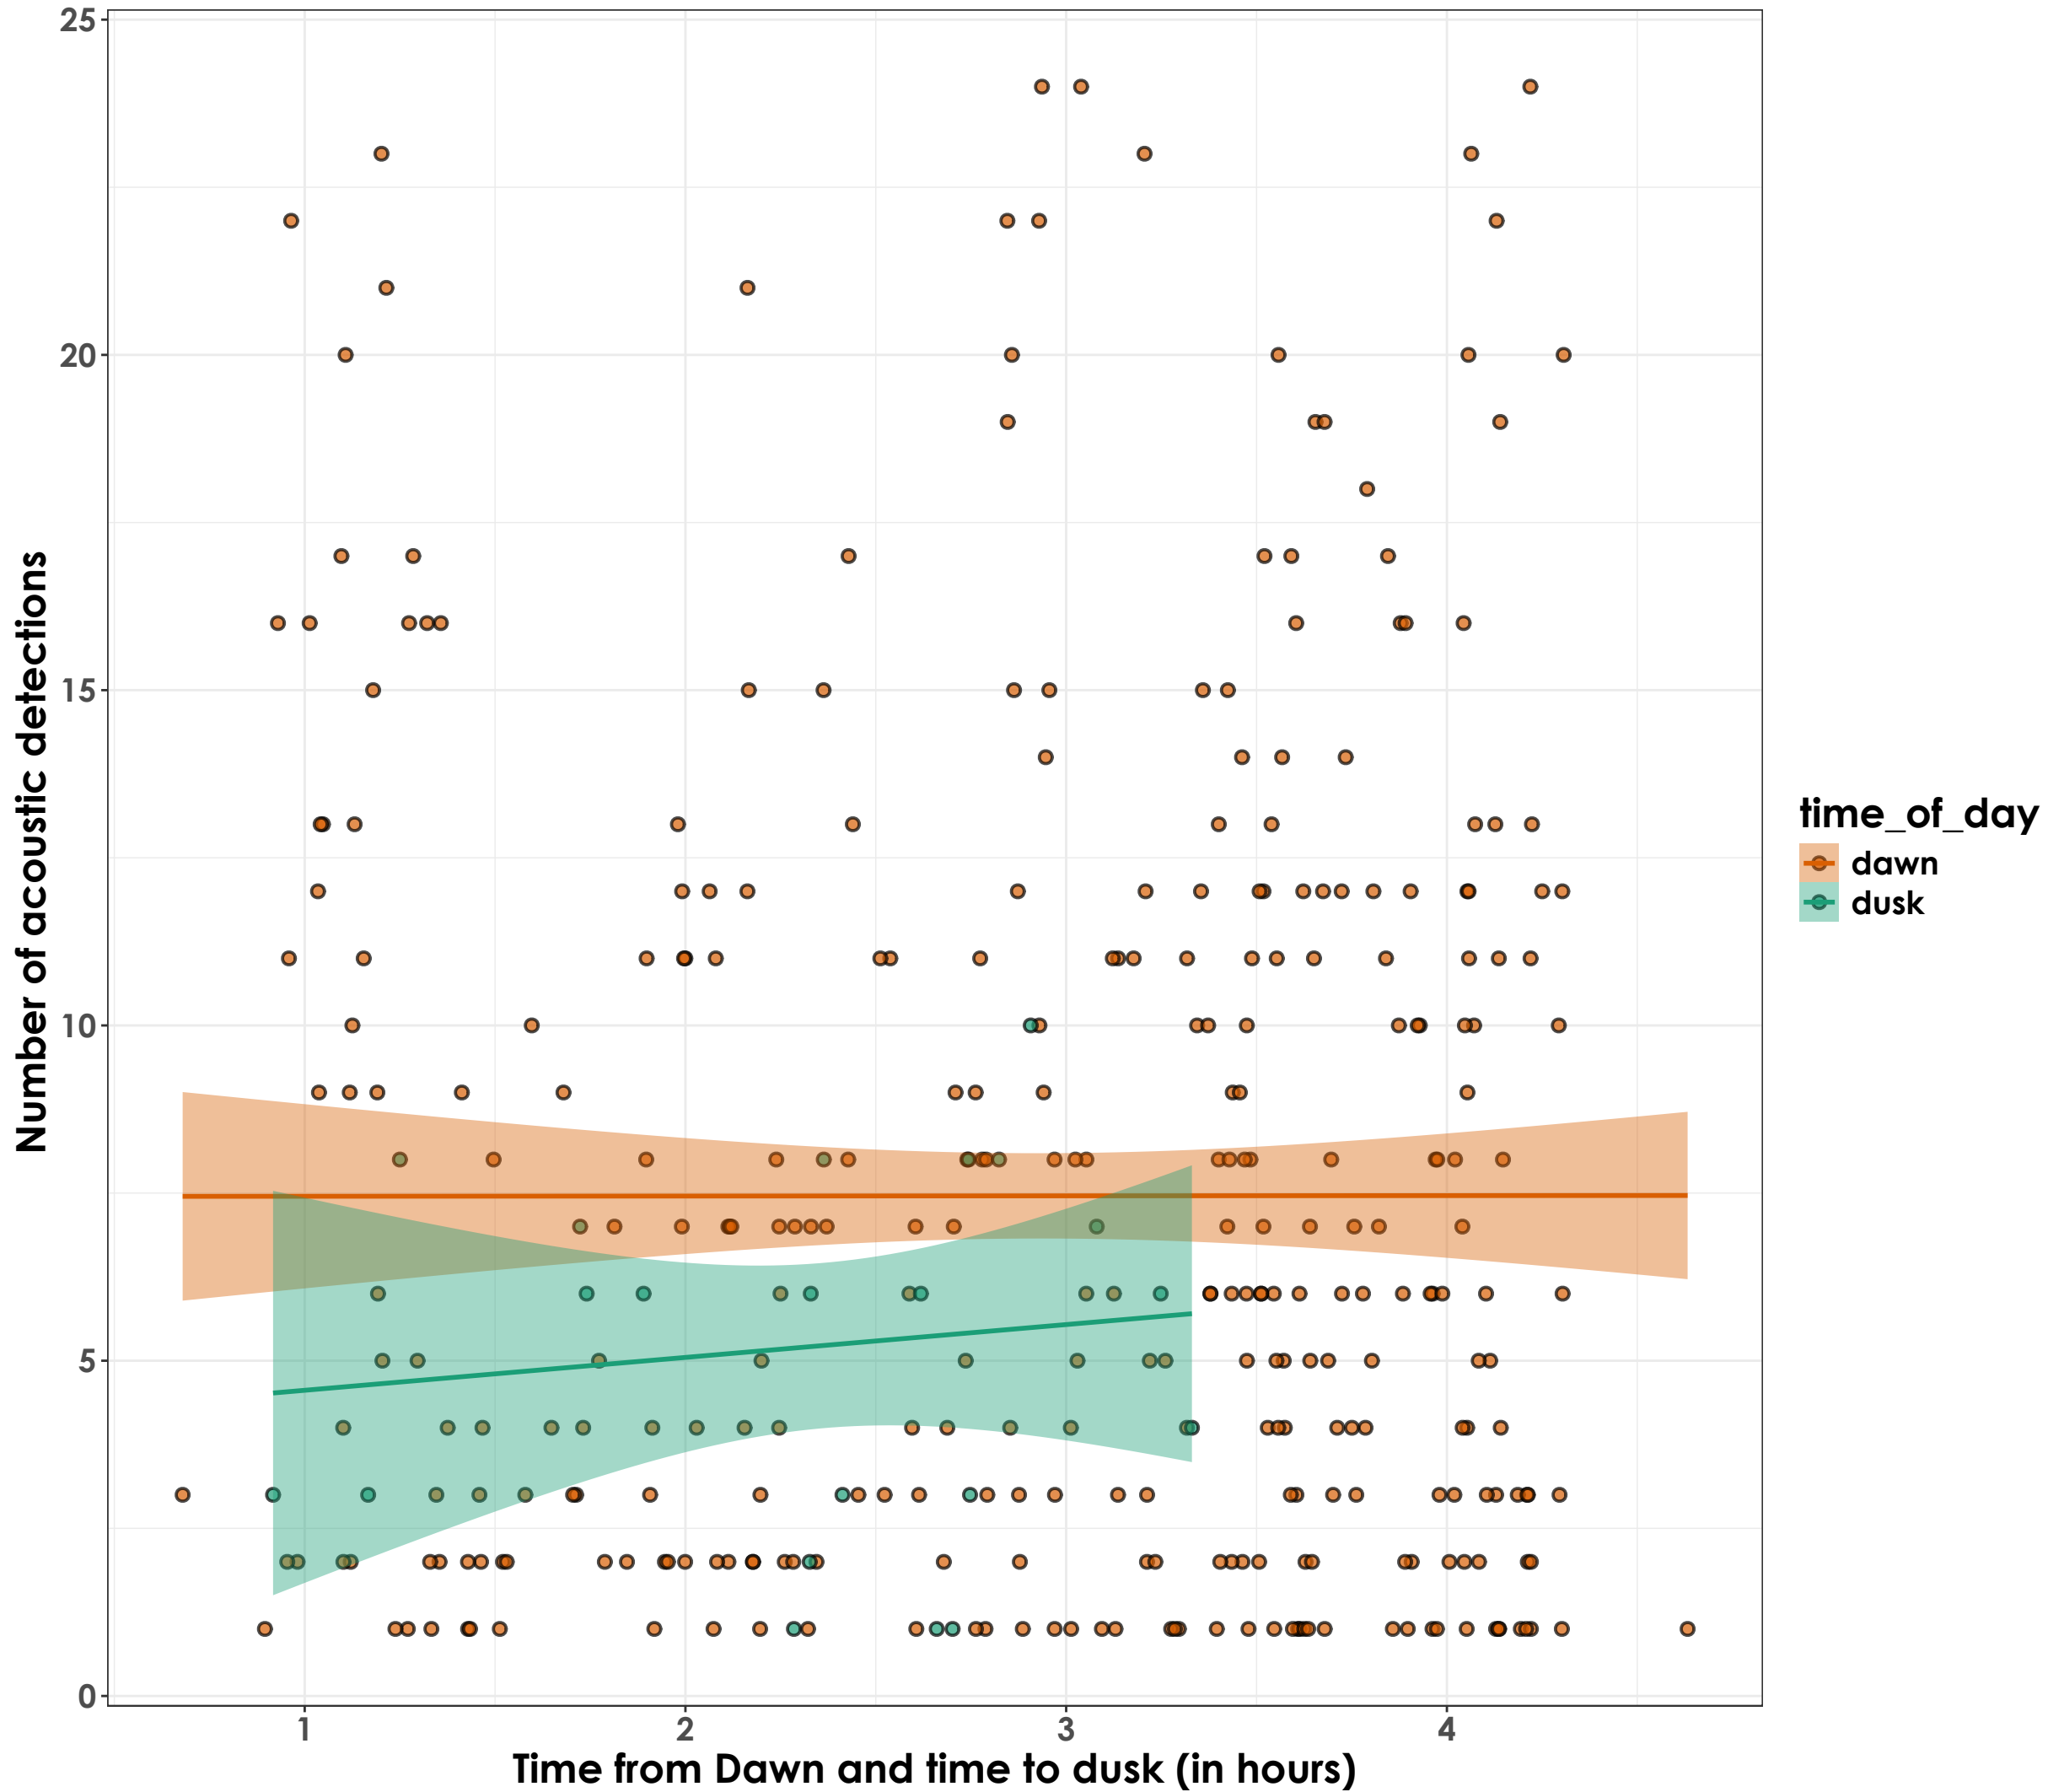

Brown-breasted Flycatcher

Each dot represents the total number of detections after dawn or before dusk (in hours)

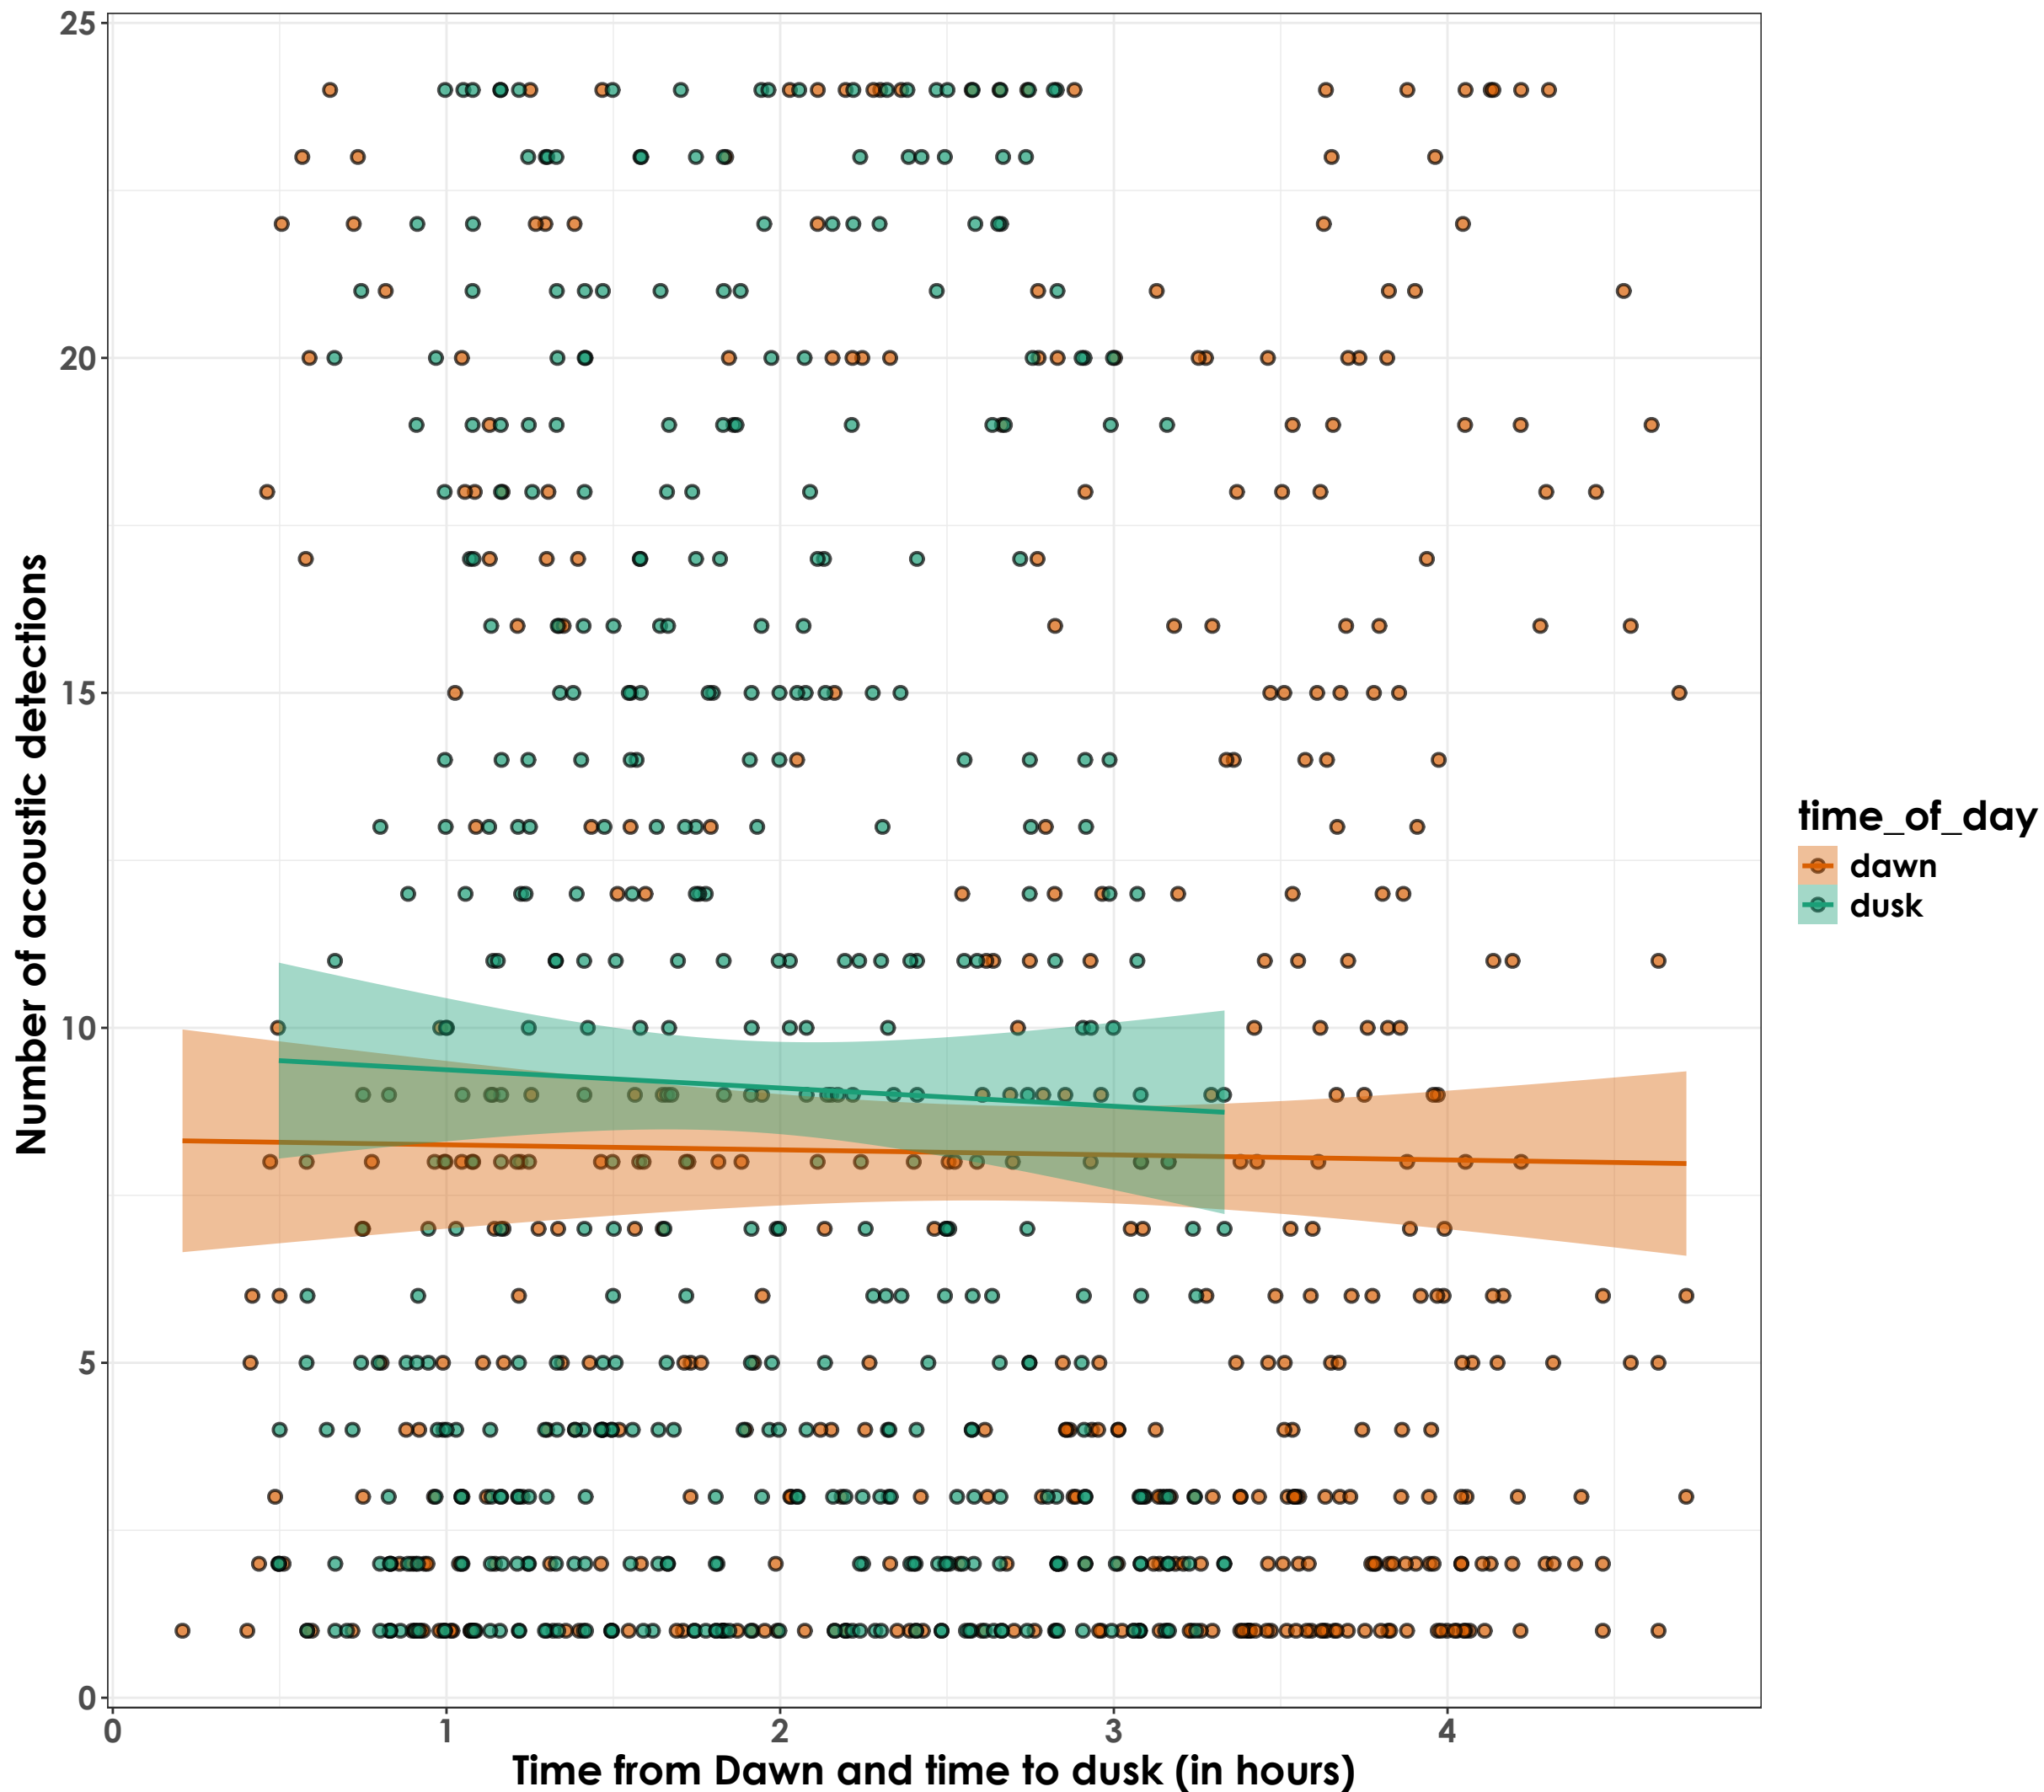

Large-billed Leaf Warbler

Each dot represents the total number of detections after dawn or before dusk (in hours)

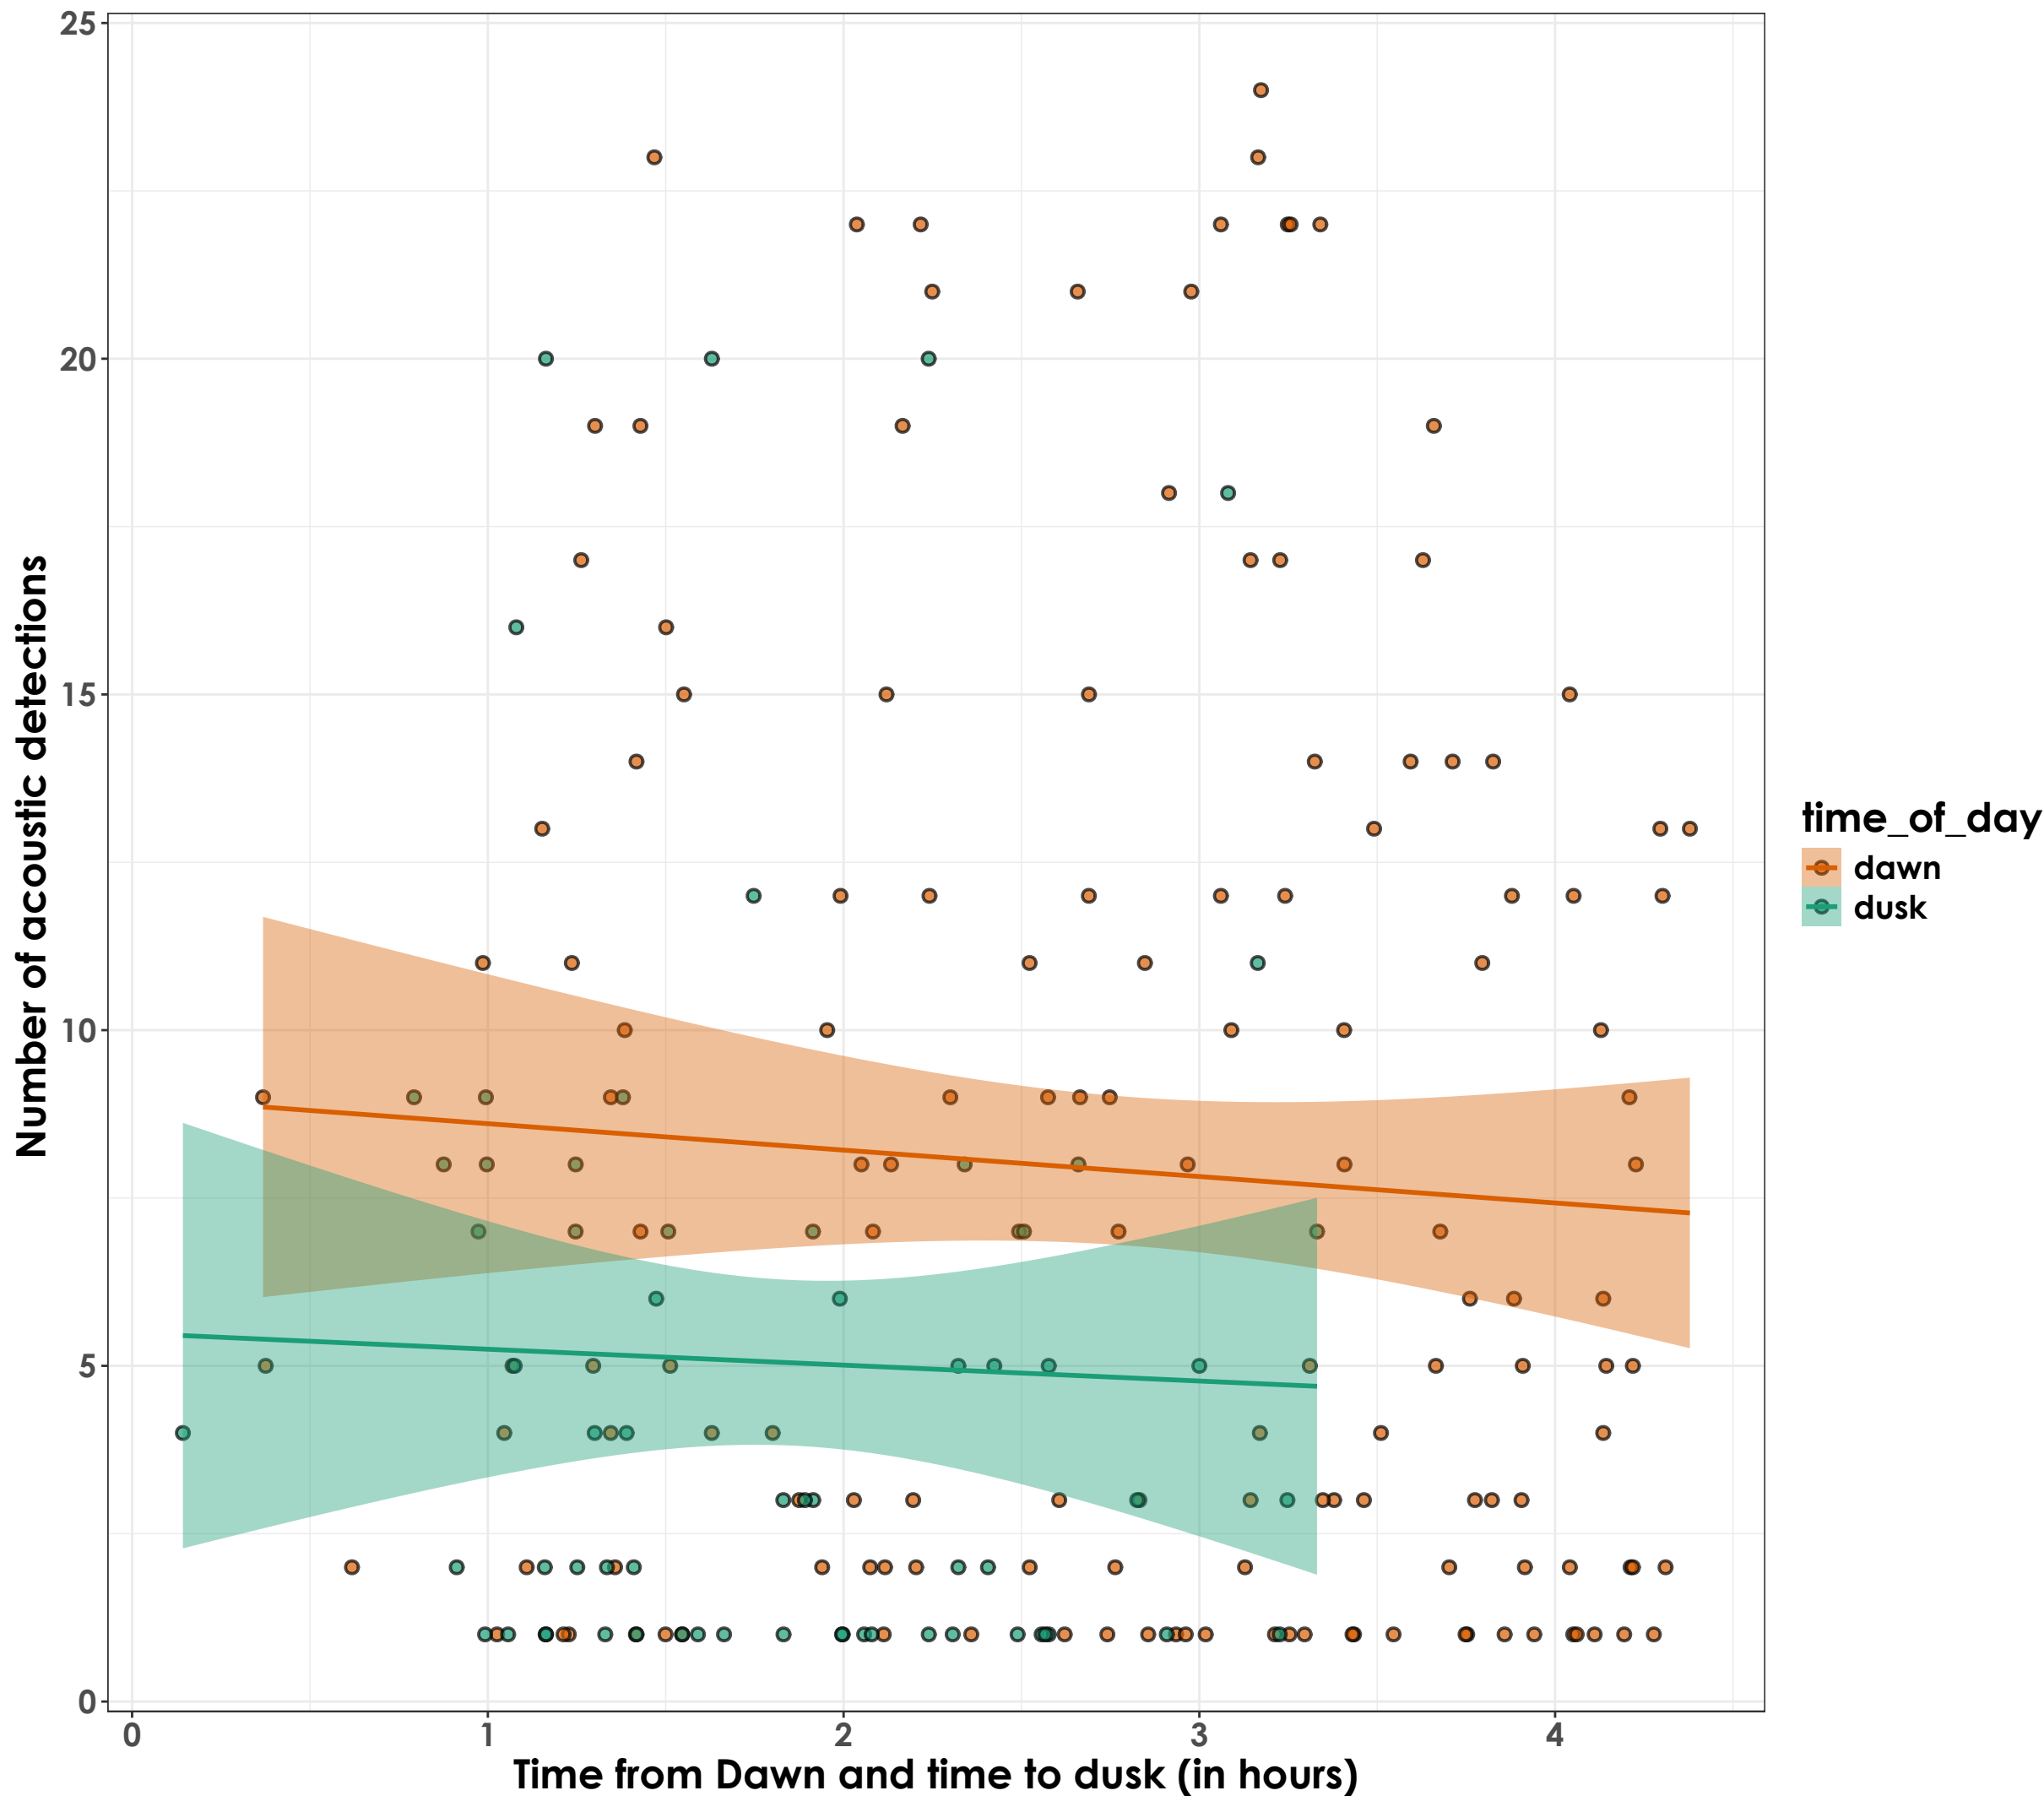

Southern Hill Myna

Each dot represents the total number of detections after dawn or before dusk (in hours)

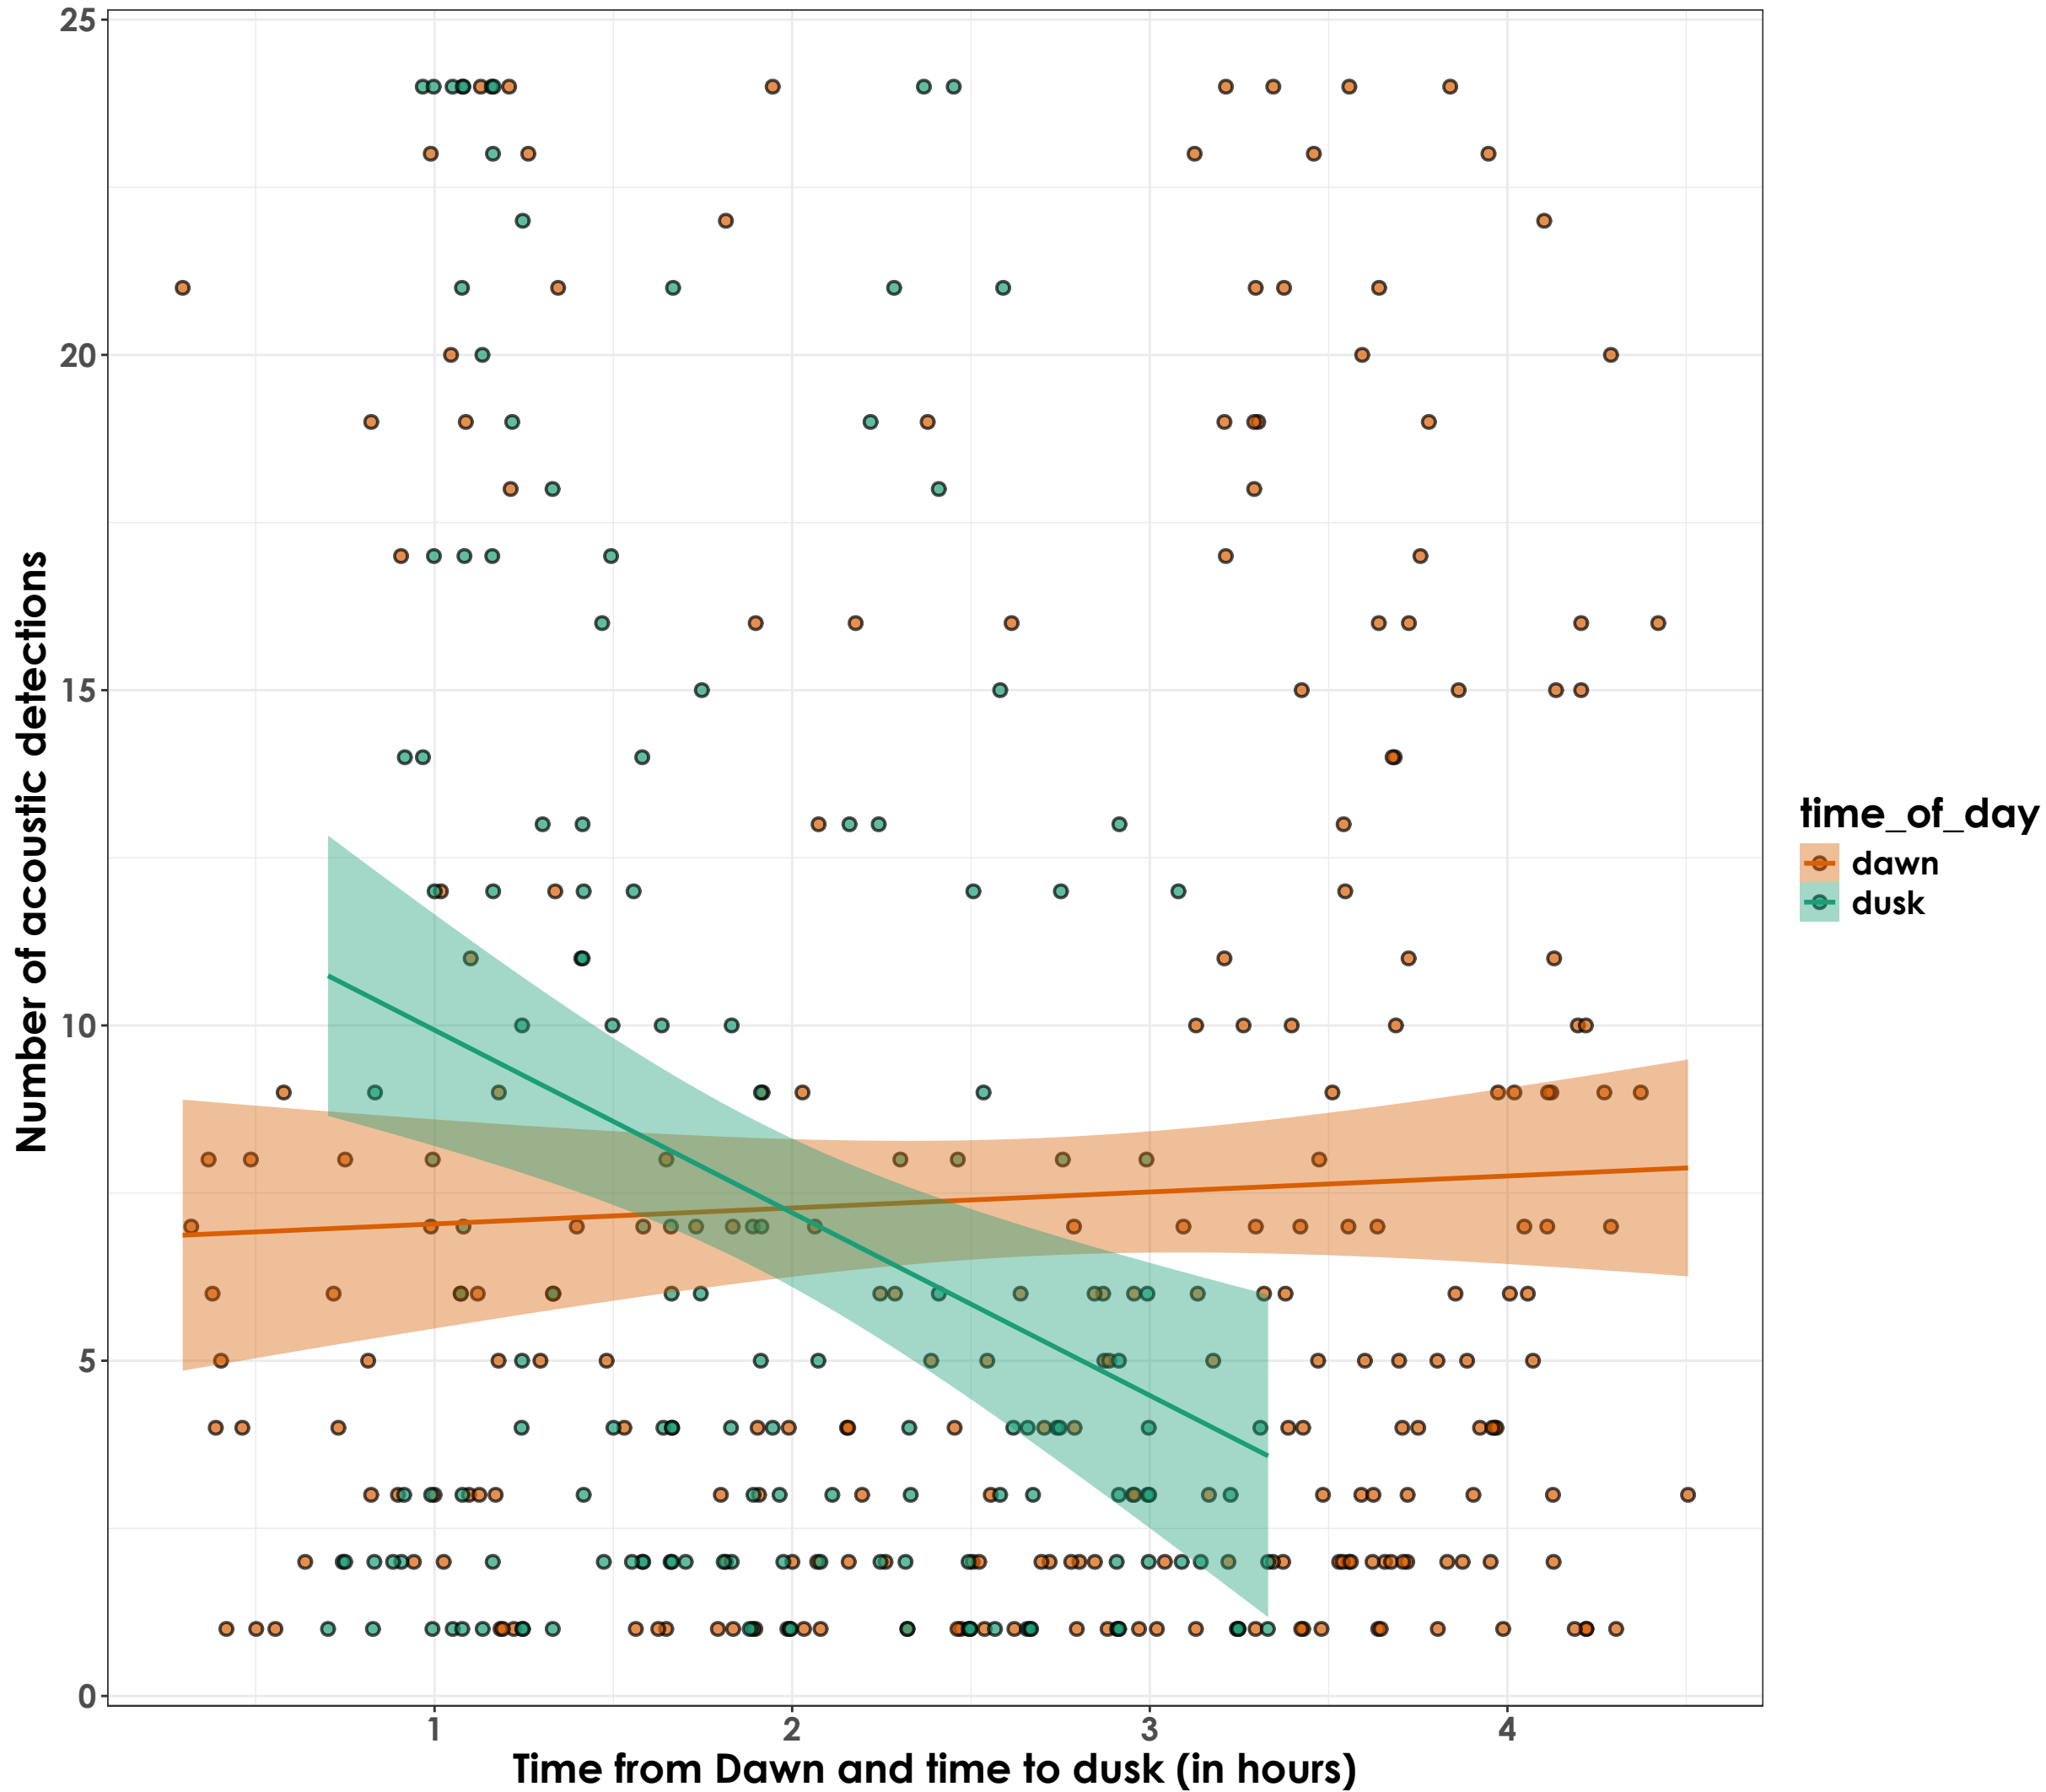

Spotted Dove

Each dot represents the total number of detections after dawn or before dusk (in hours)

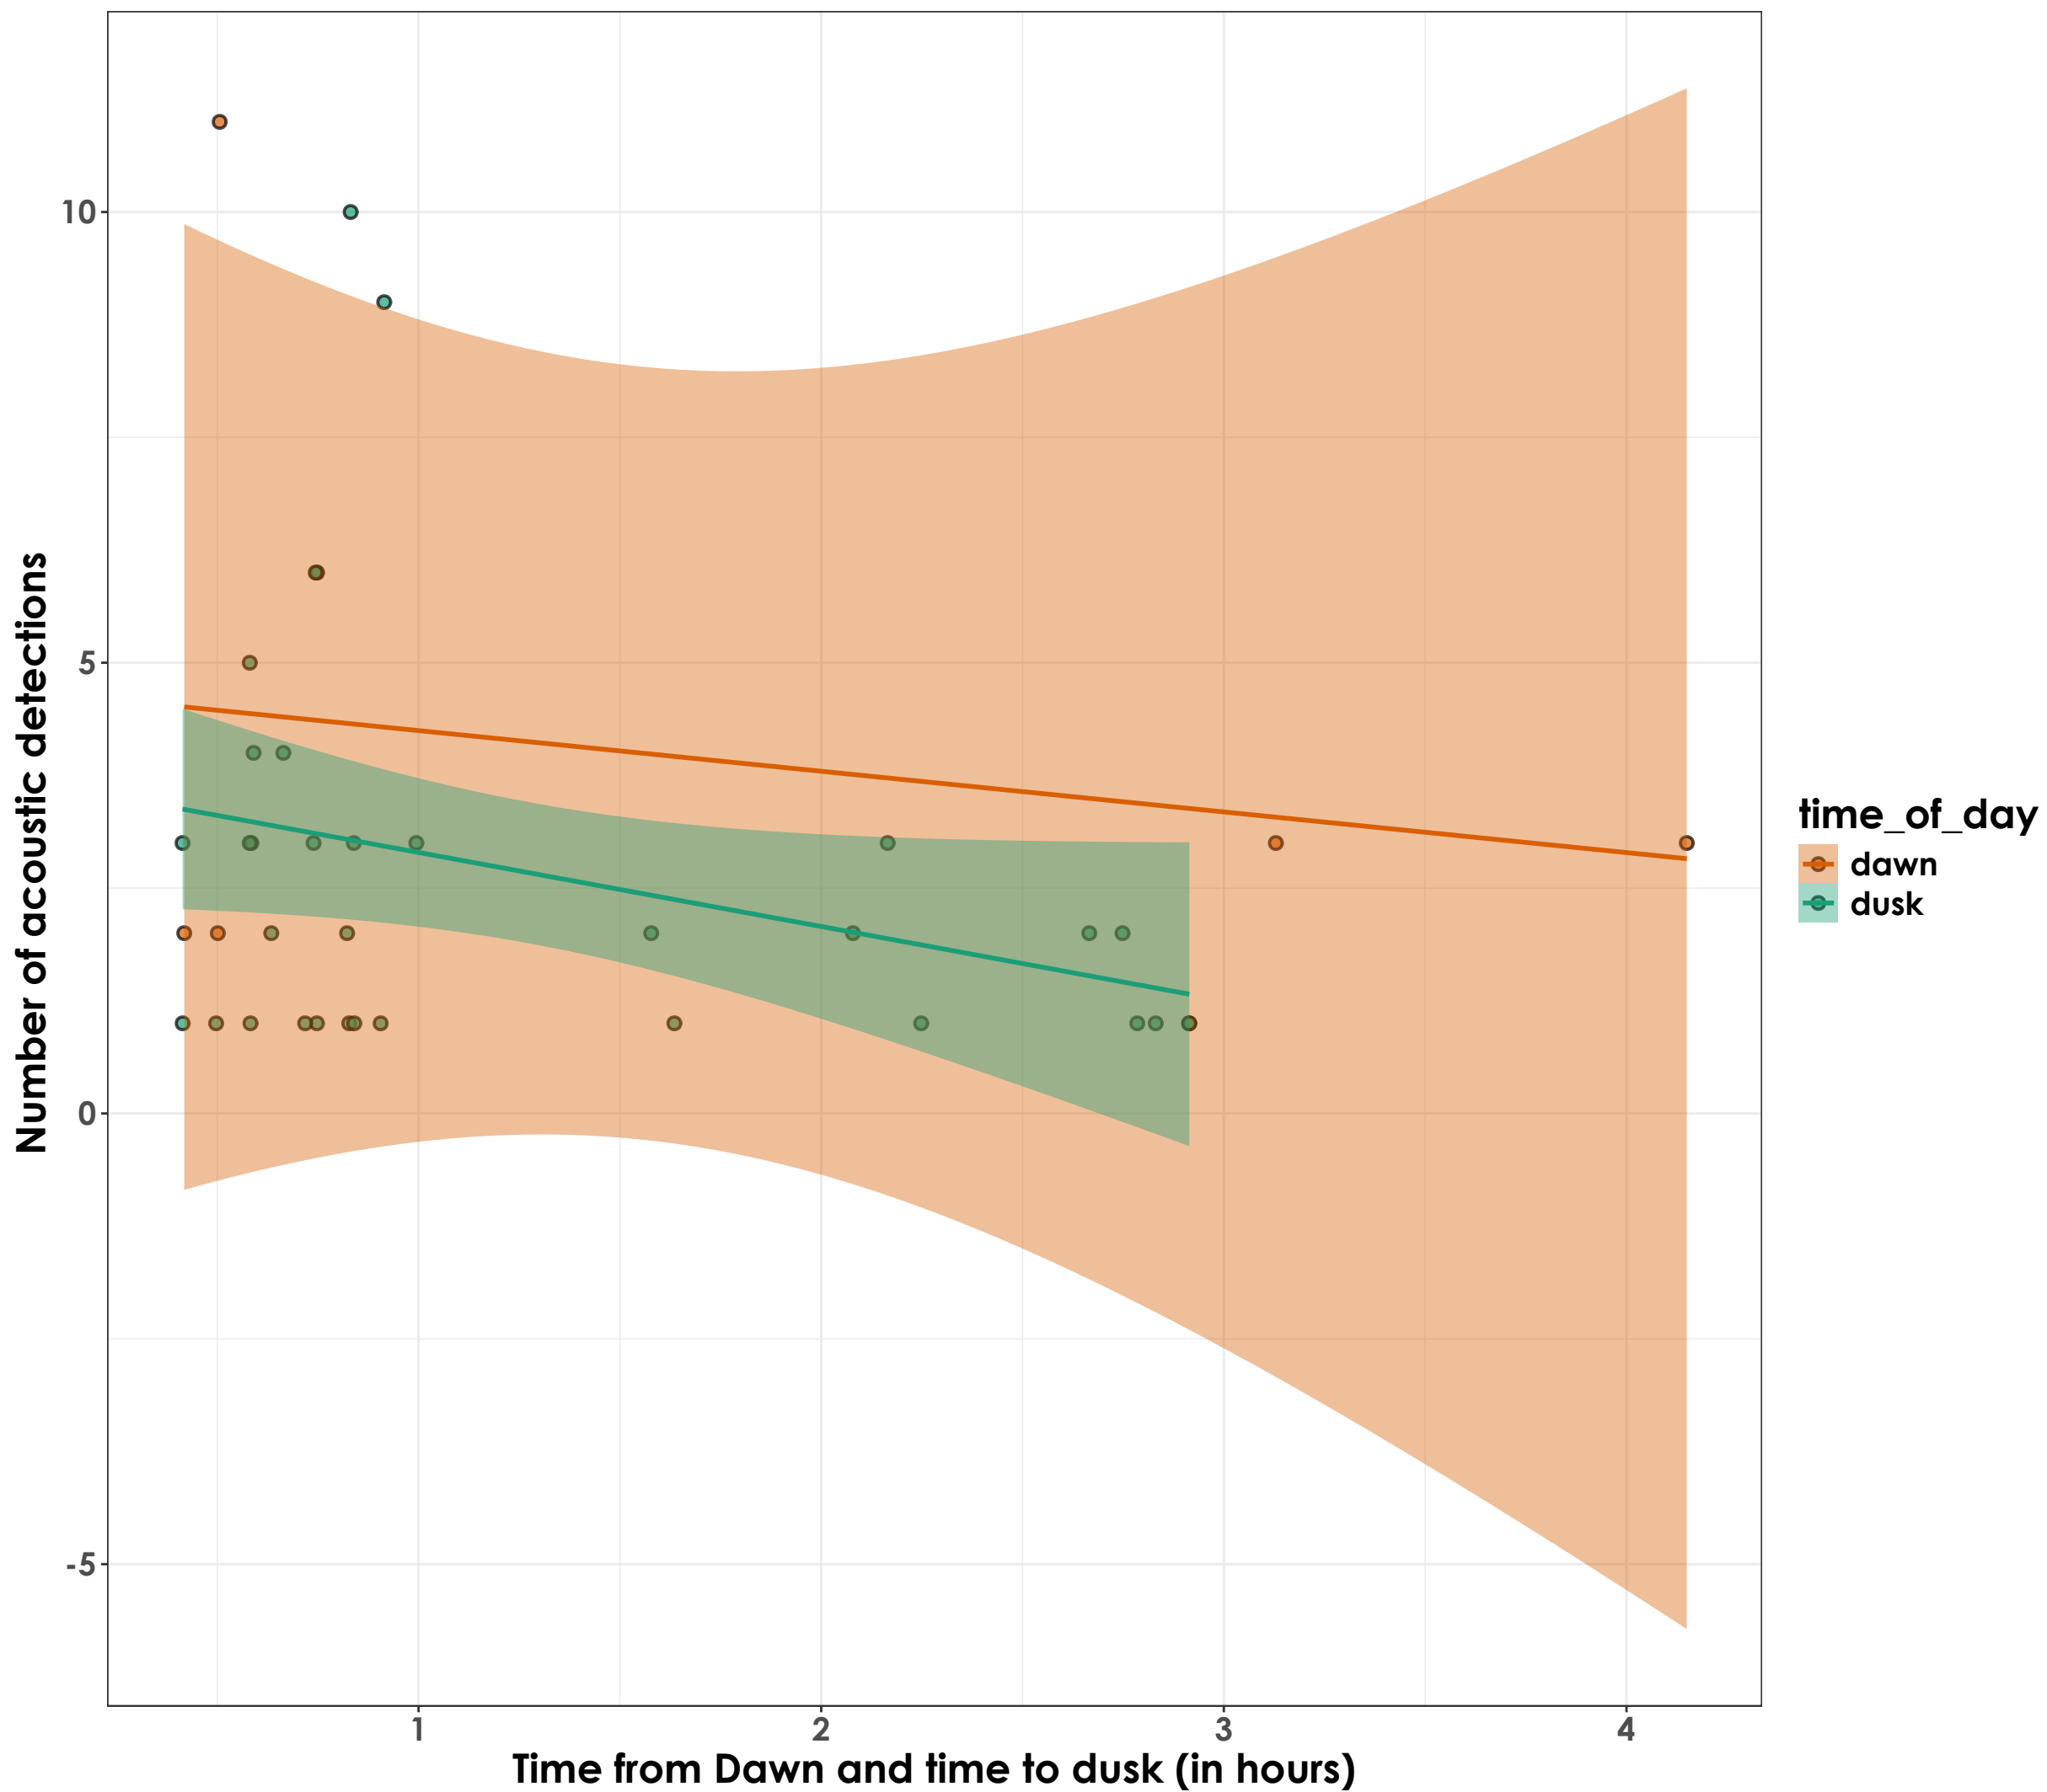

Asian Fairy-bluebird

Each dot represents the total number of detections after dawn or before dusk (in hours)

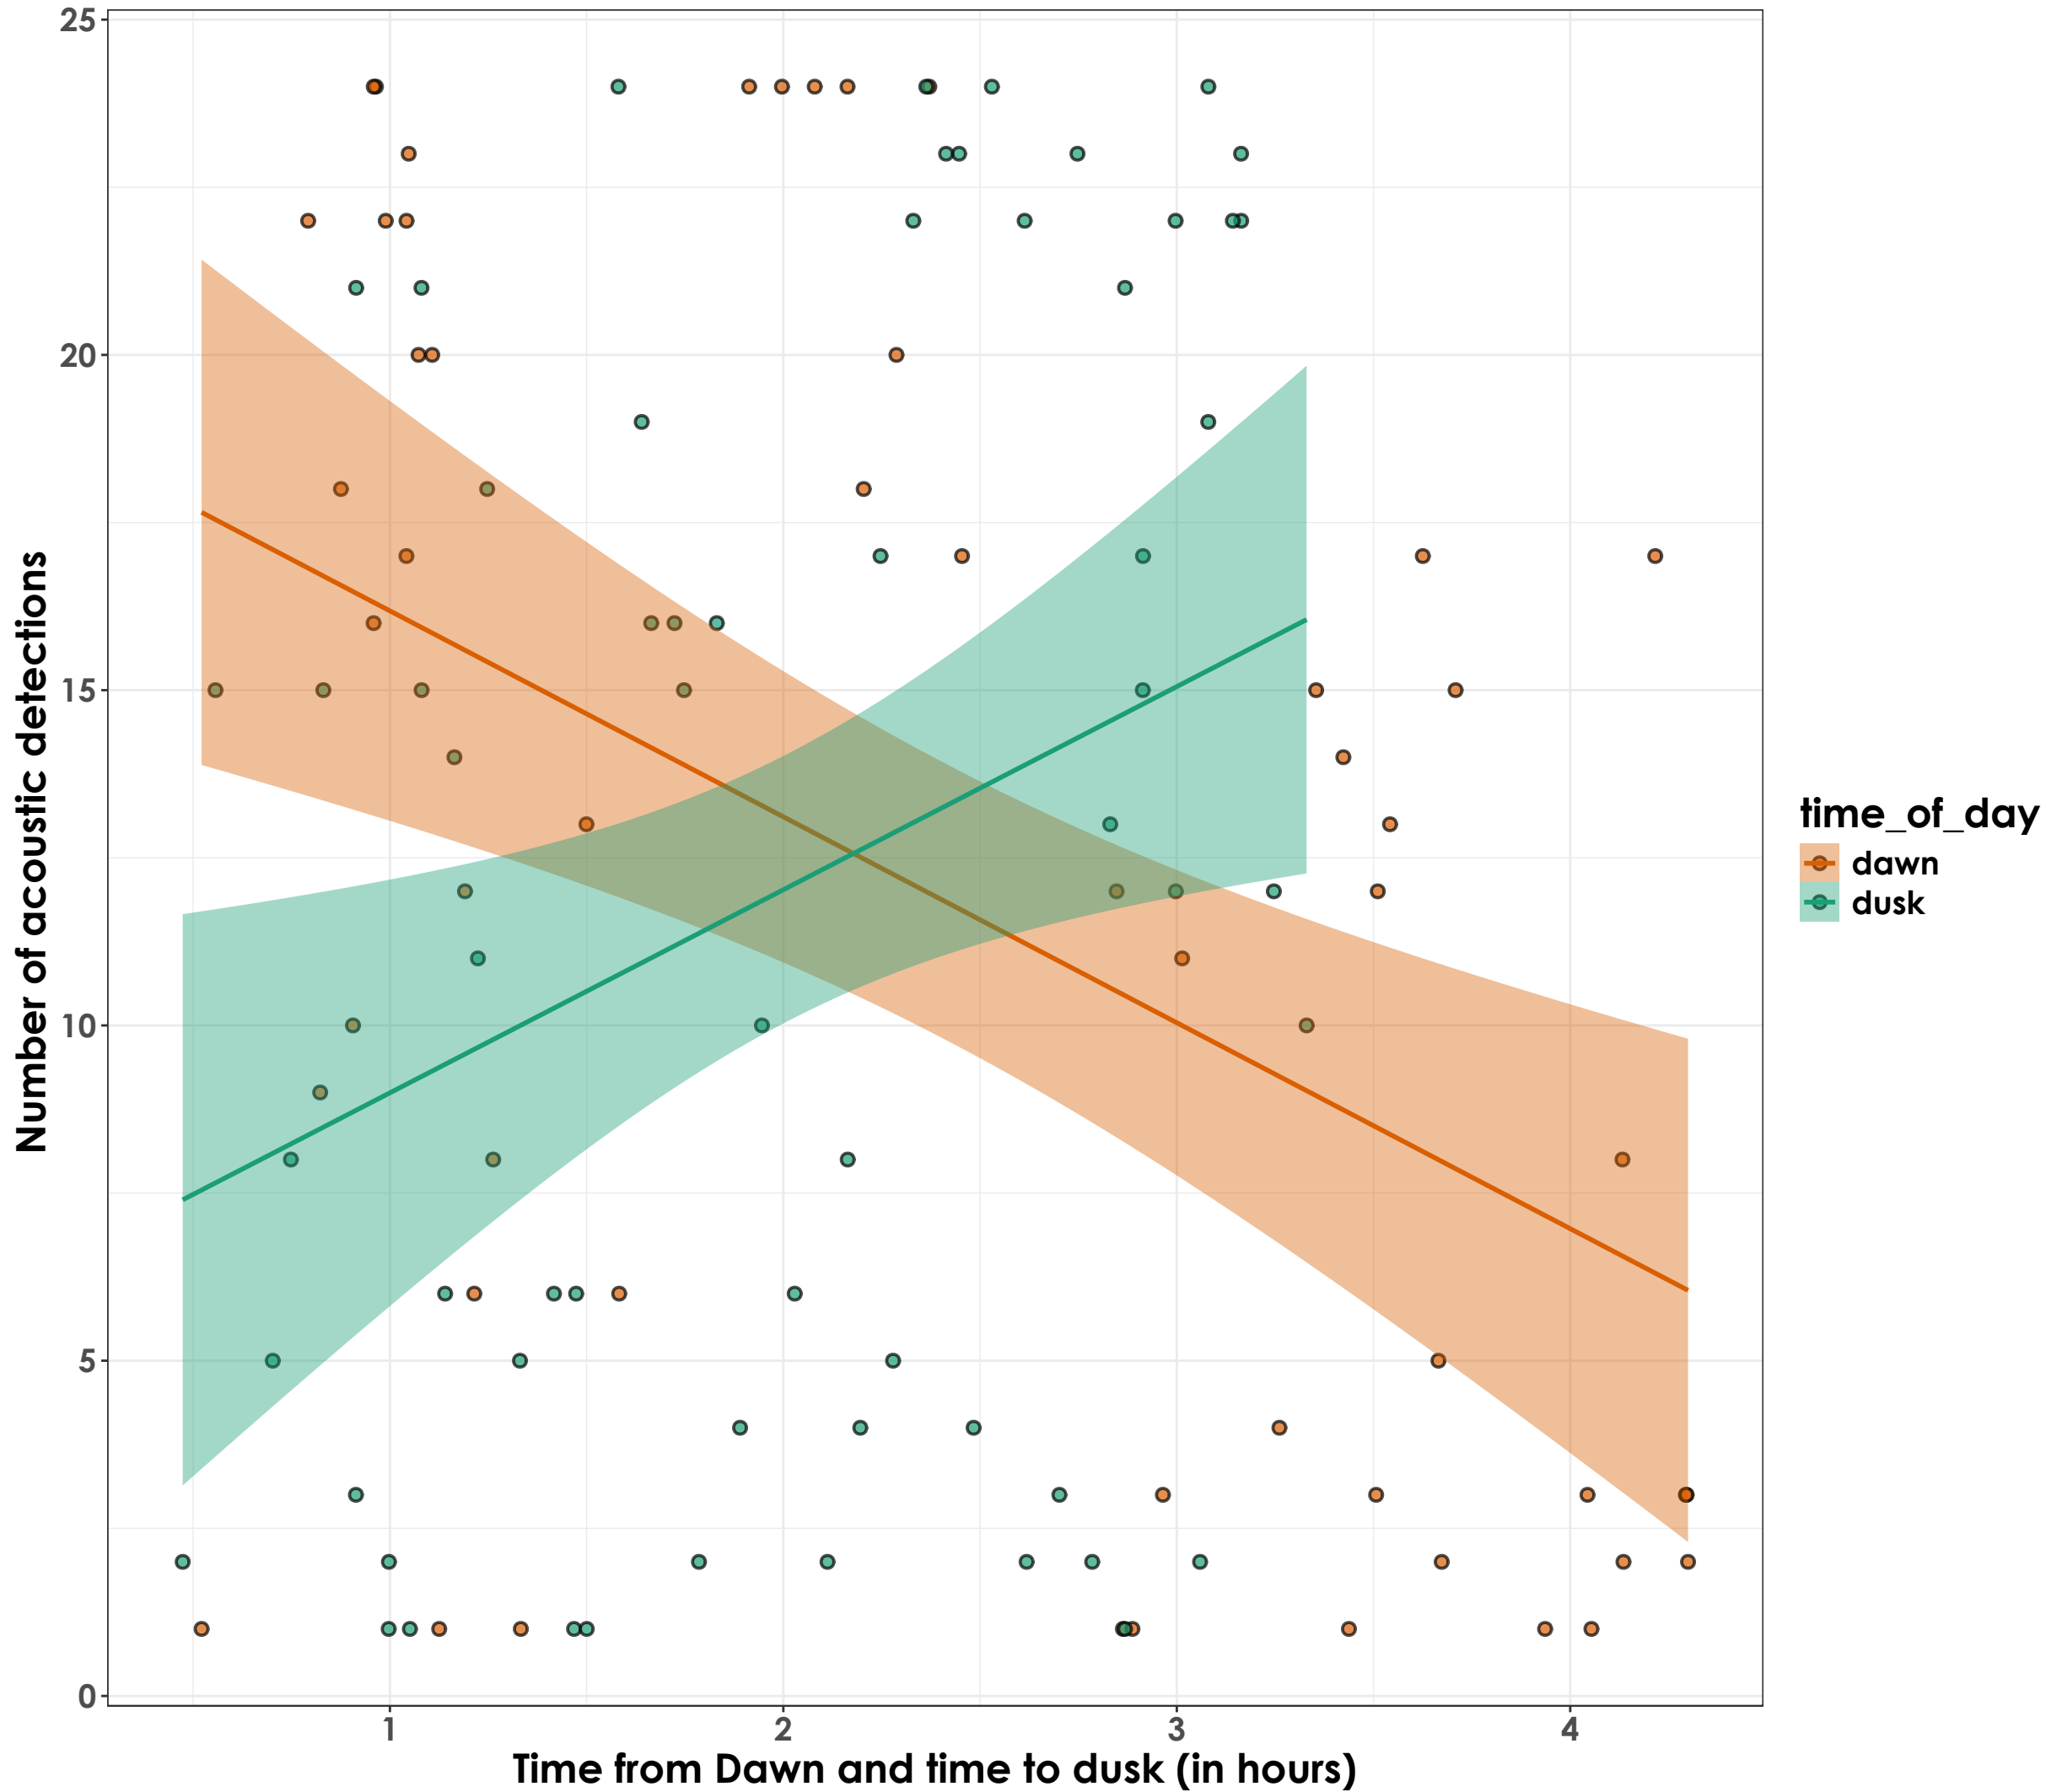

Indian Pitta

Each dot represents the total number of detections after dawn or before dusk (in hours)

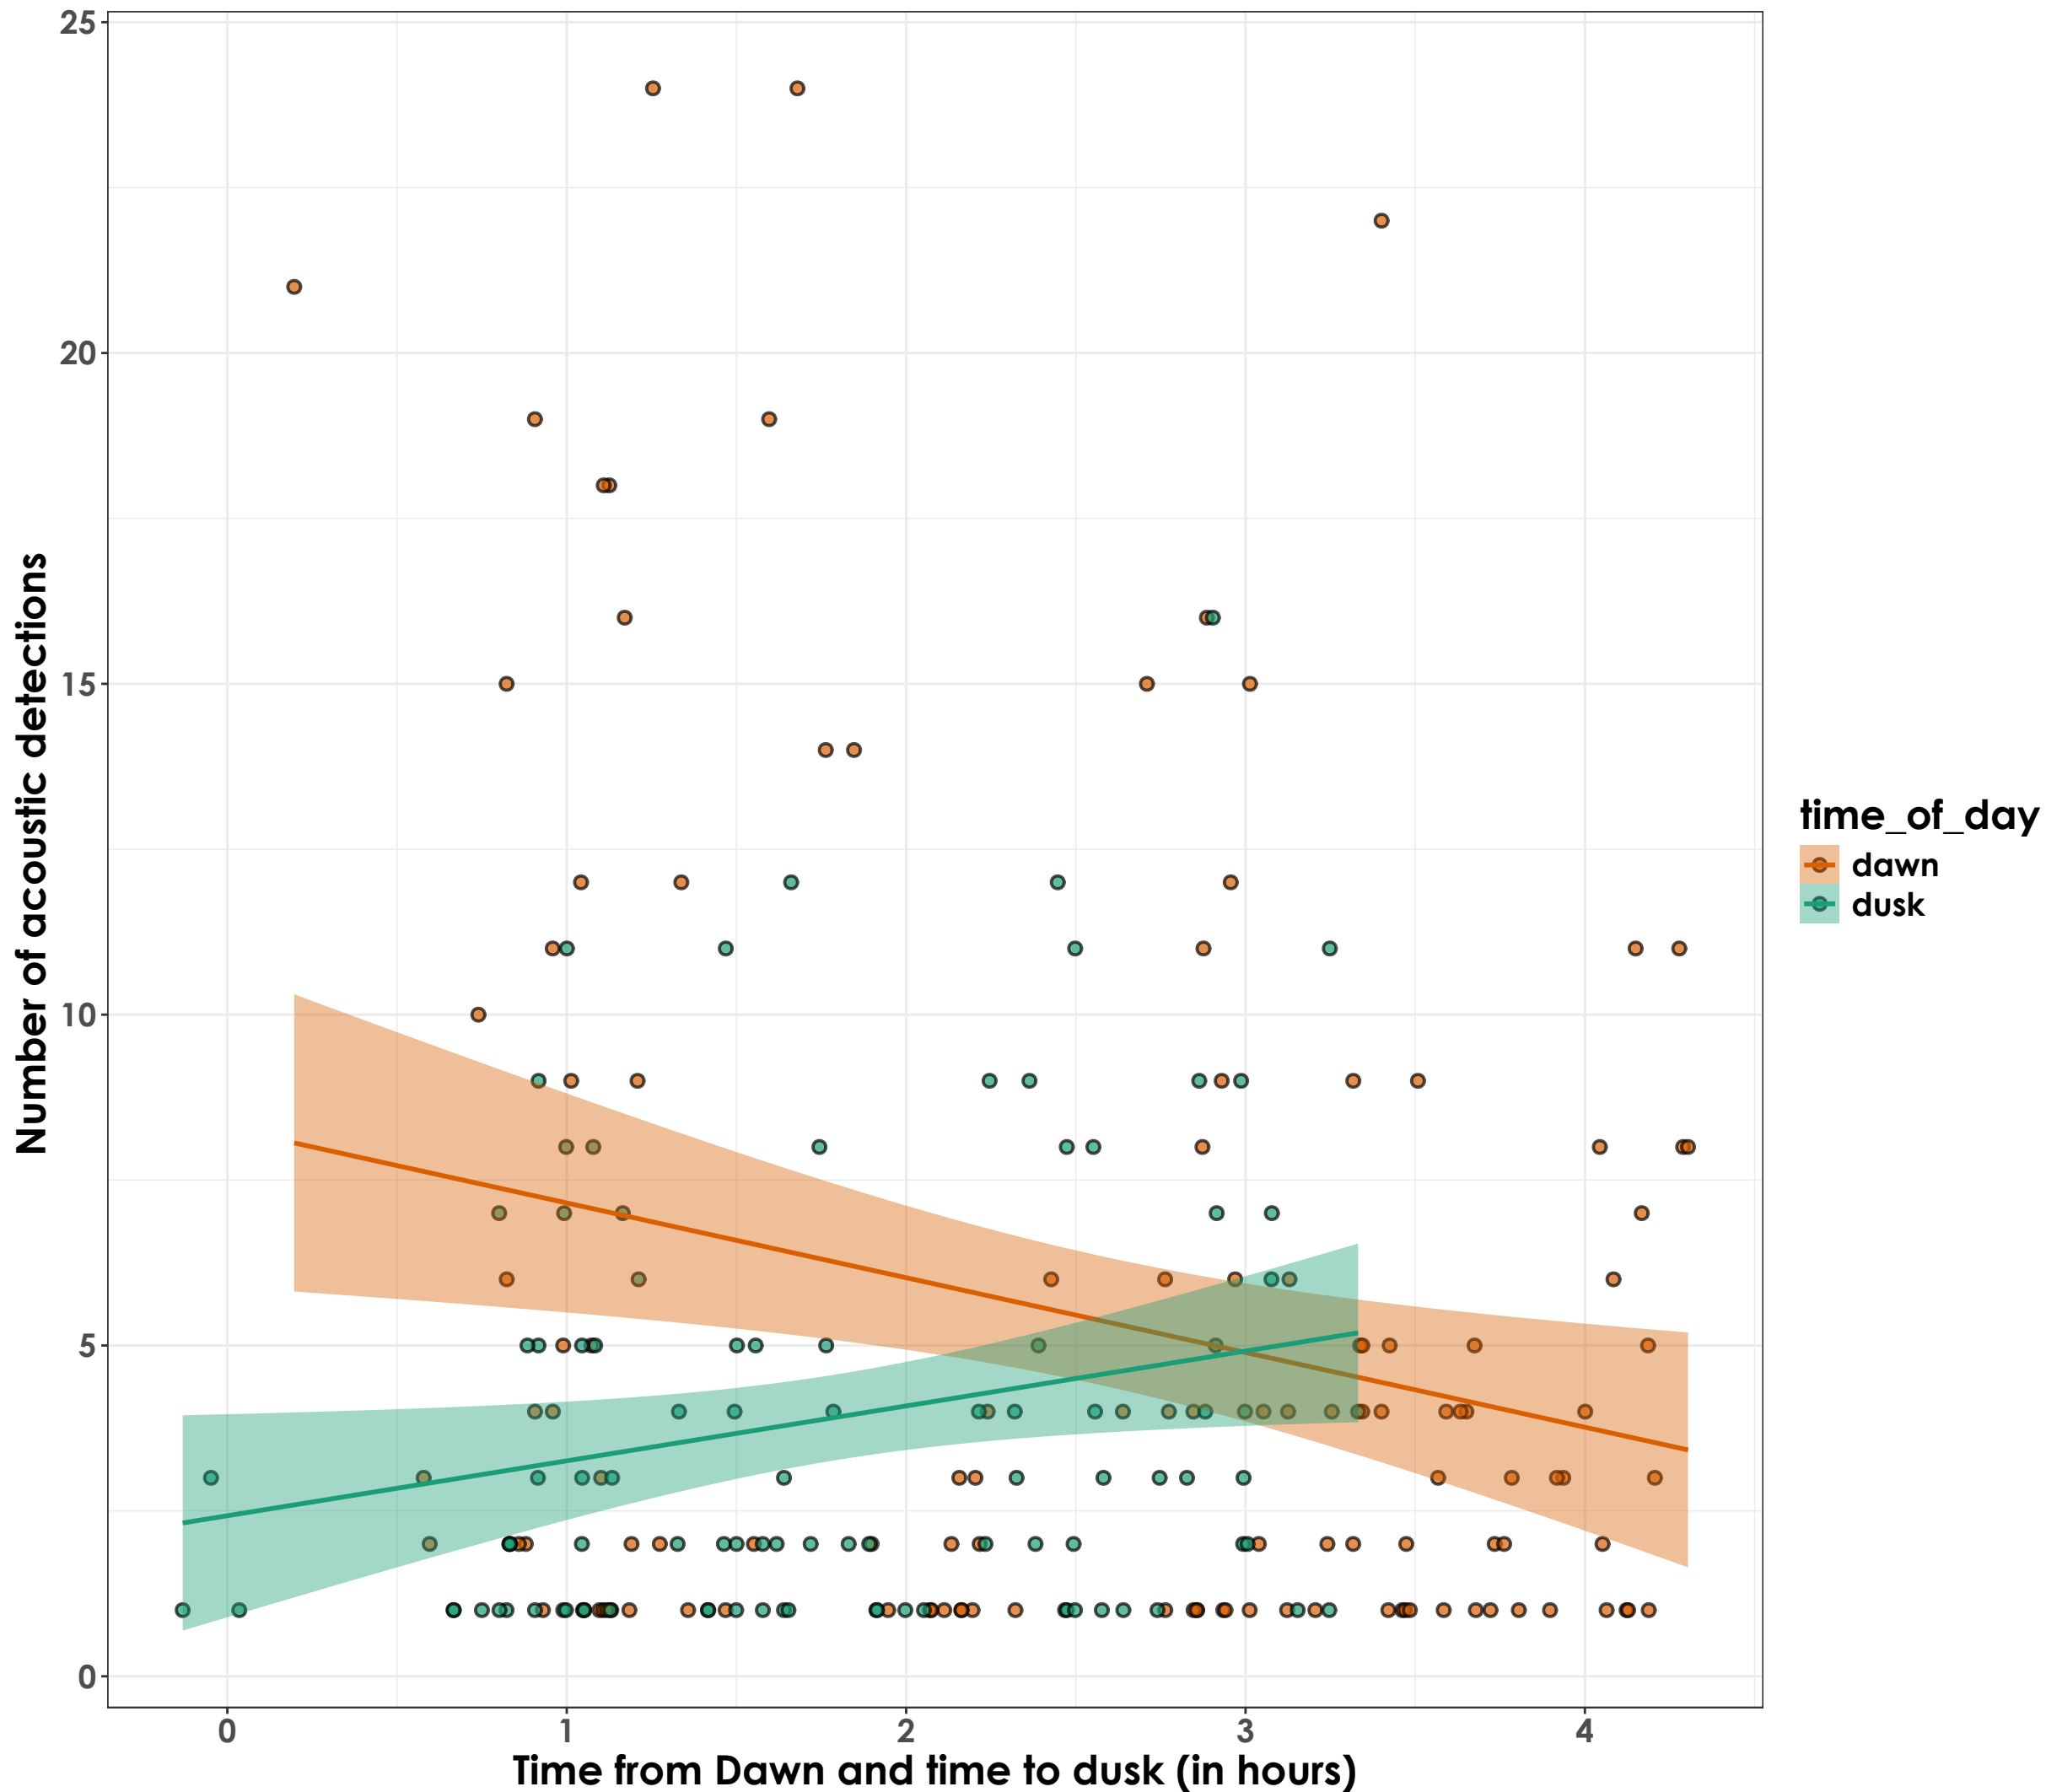

Asian Emerald Dove

Each dot represents the total number of detections after dawn or before dusk (in hours)

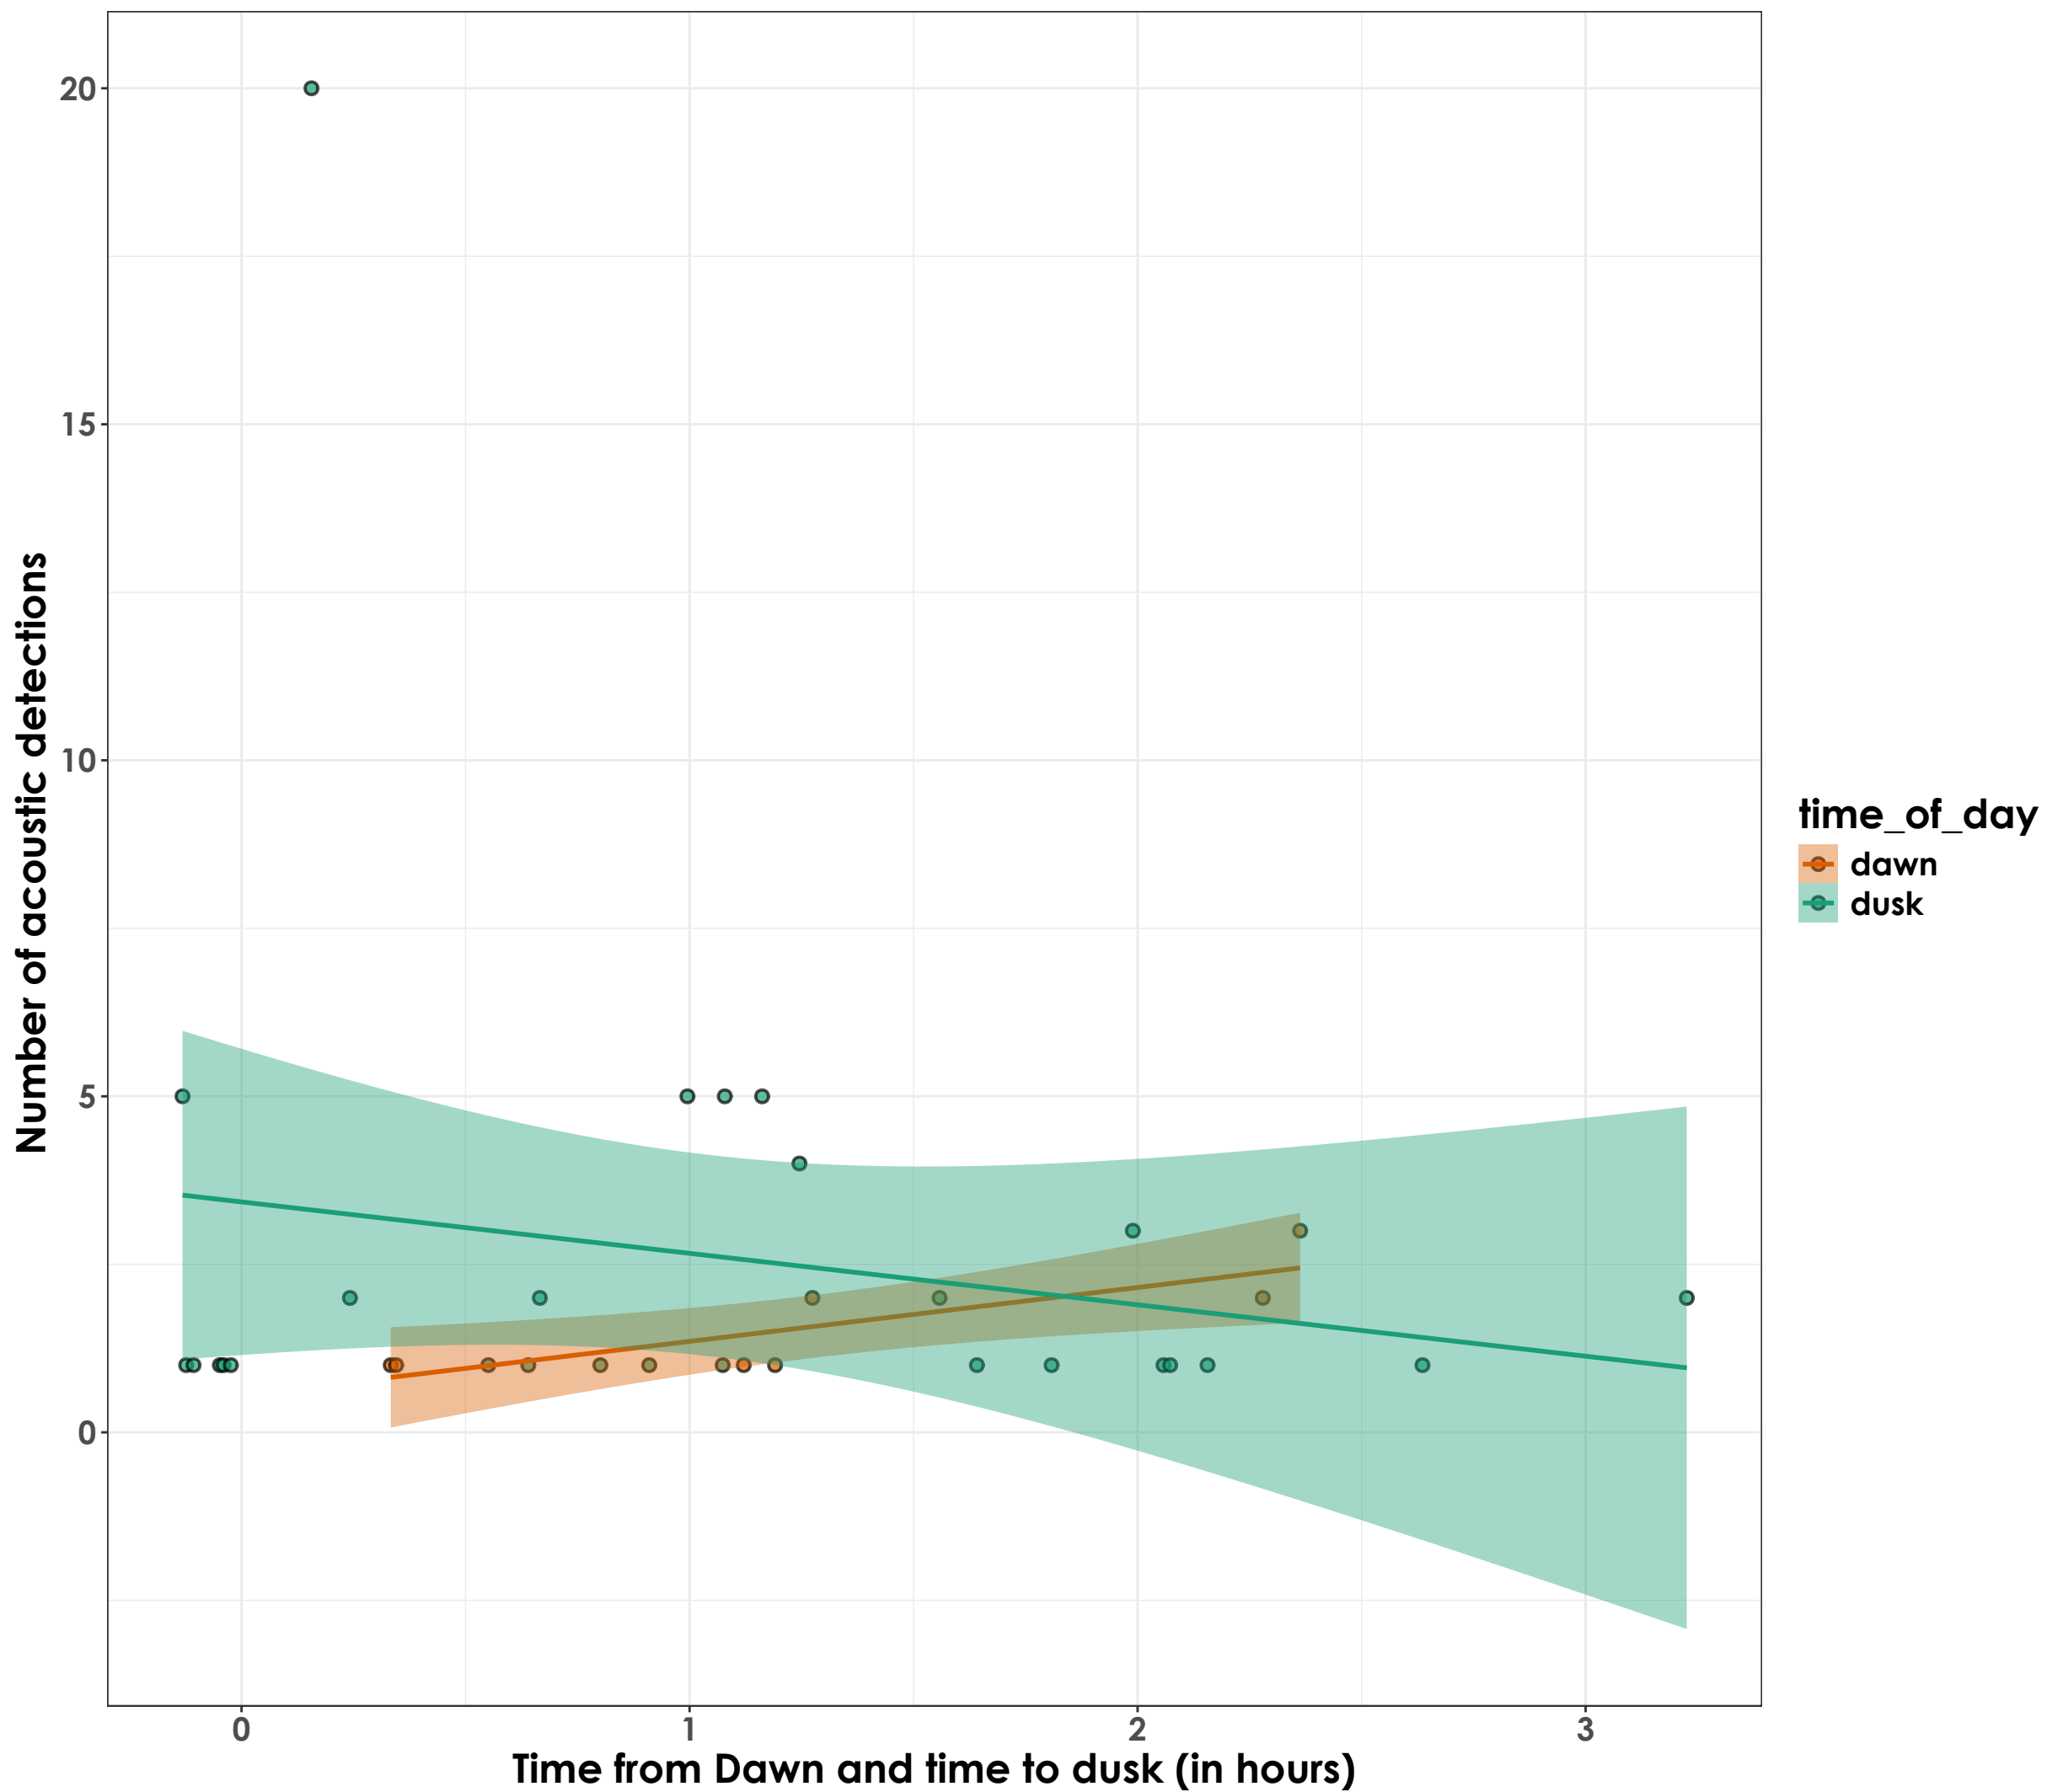

Black-naped Monarch

Each dot represents the total number of detections after dawn or before dusk (in hours)

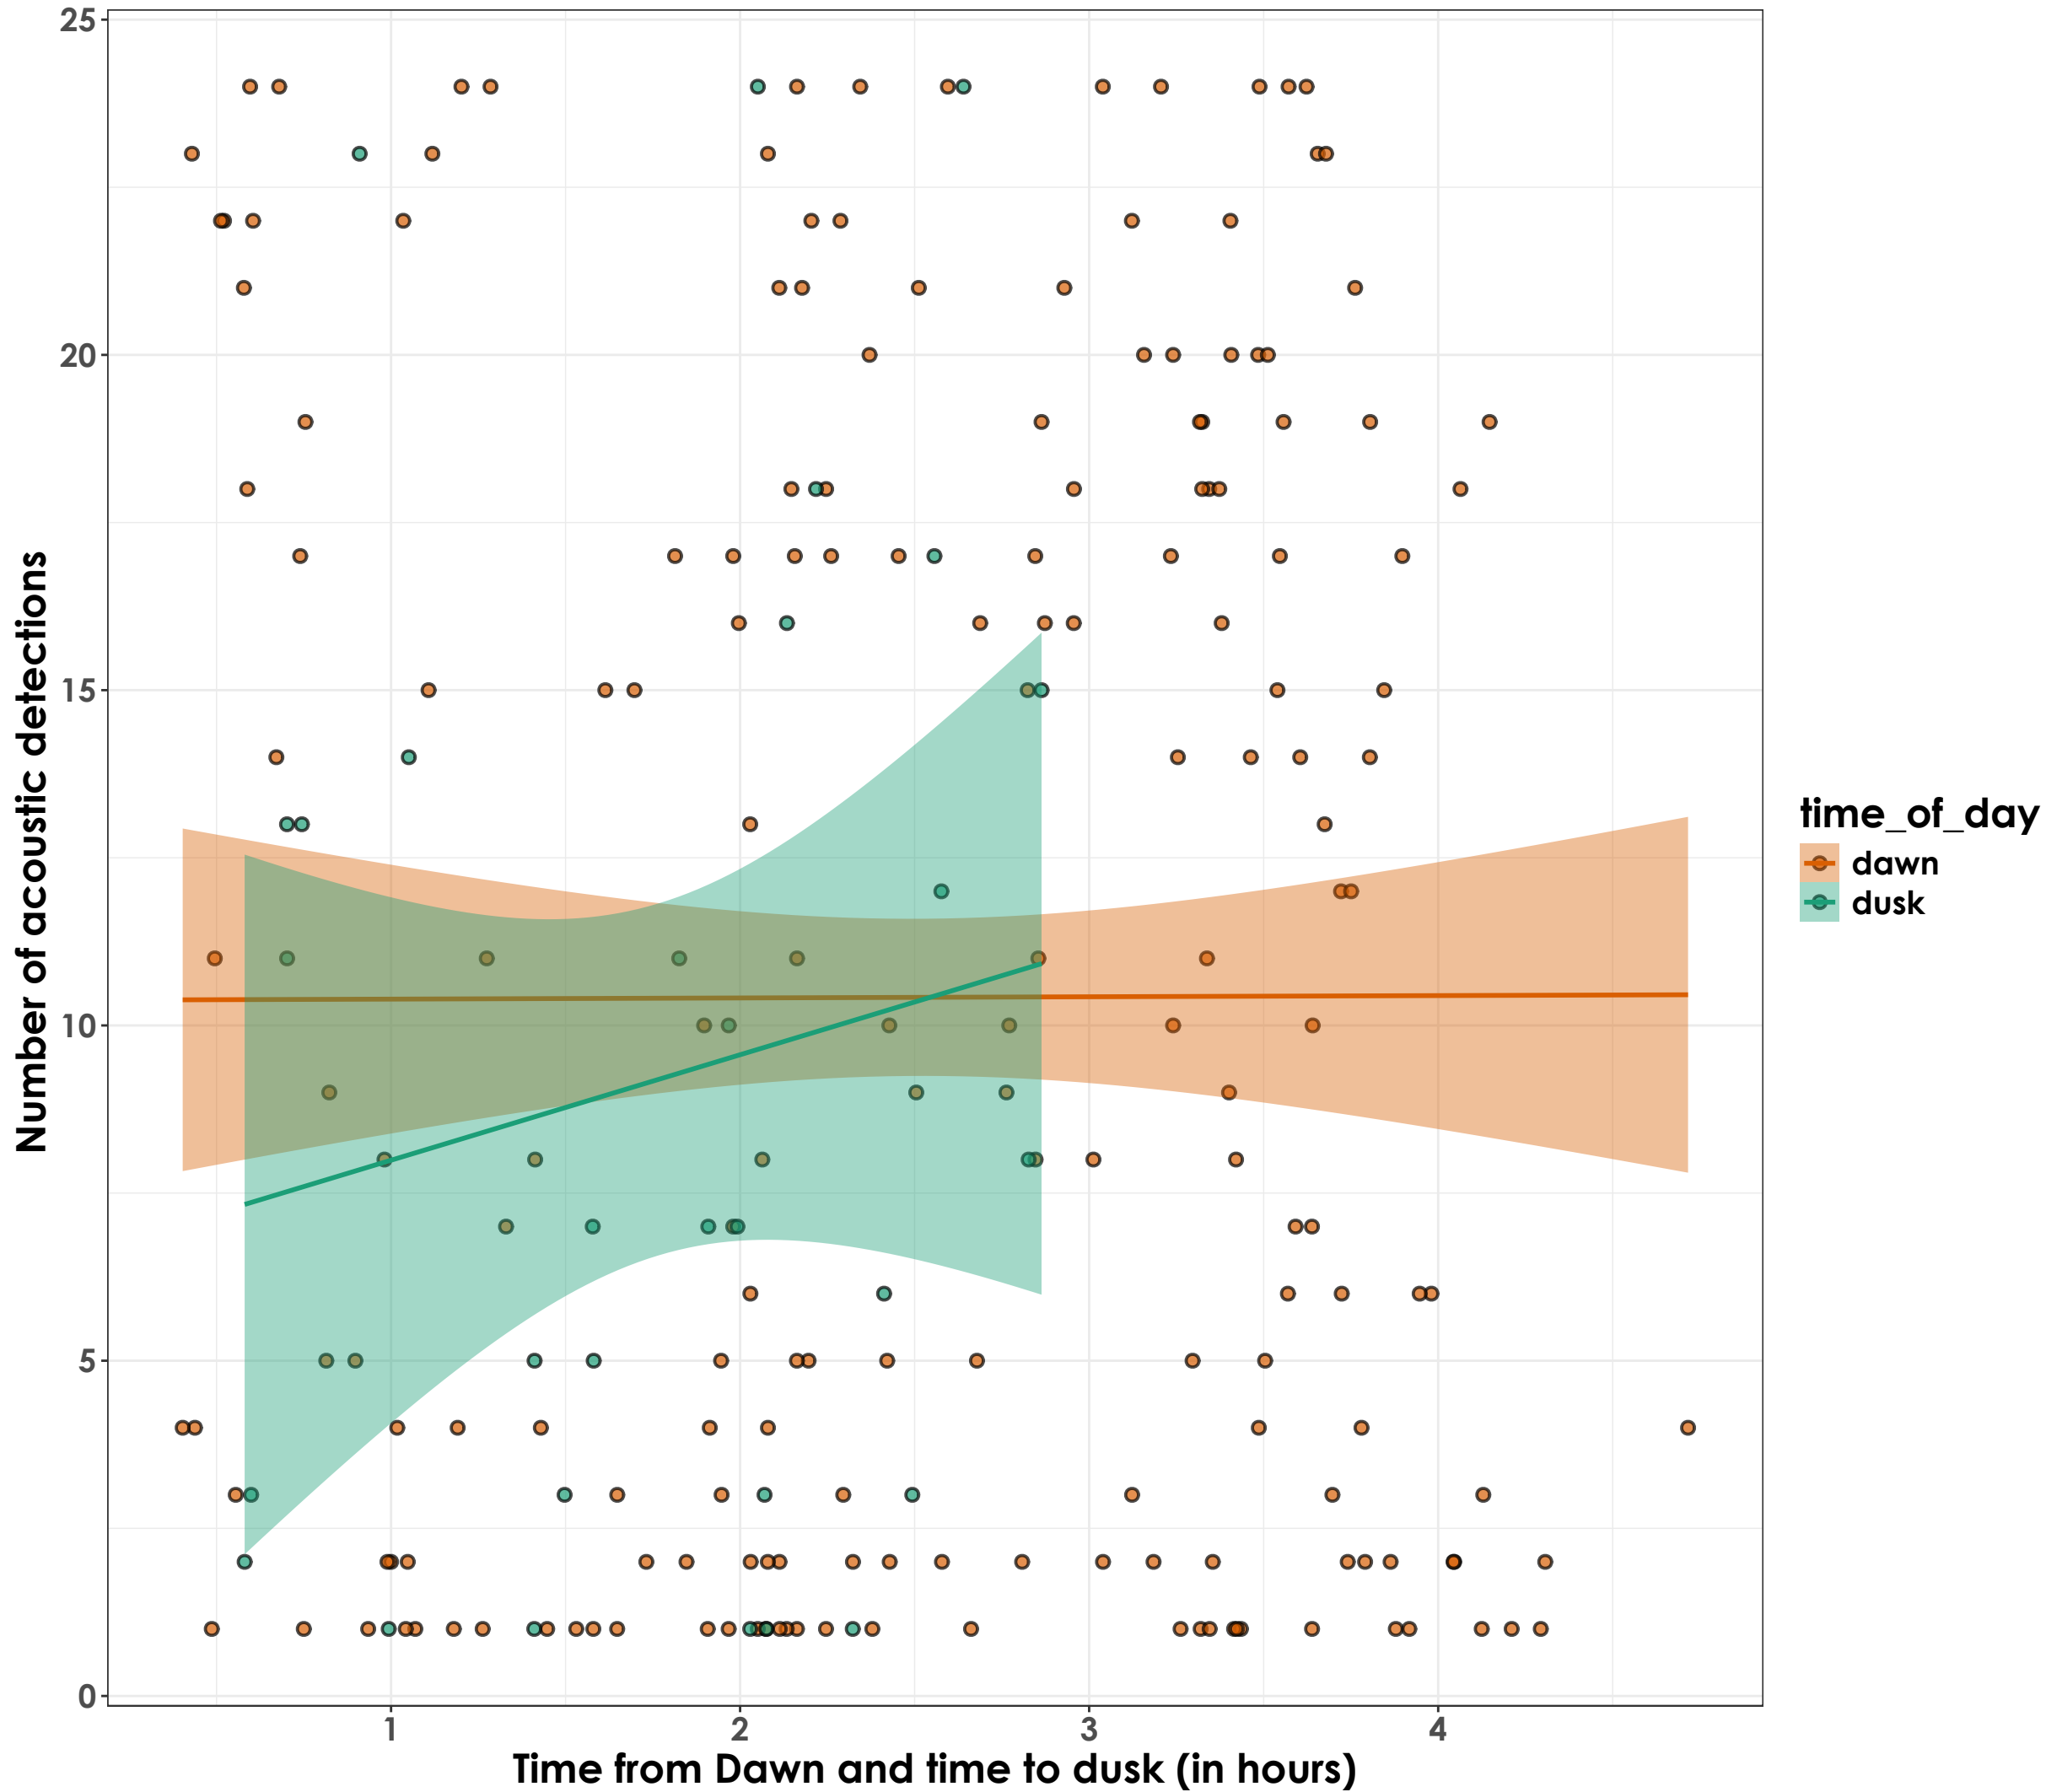

Spot-bellied Eagle-Owl

Each dot represents the total number of detections after dawn or before dusk (in hours)

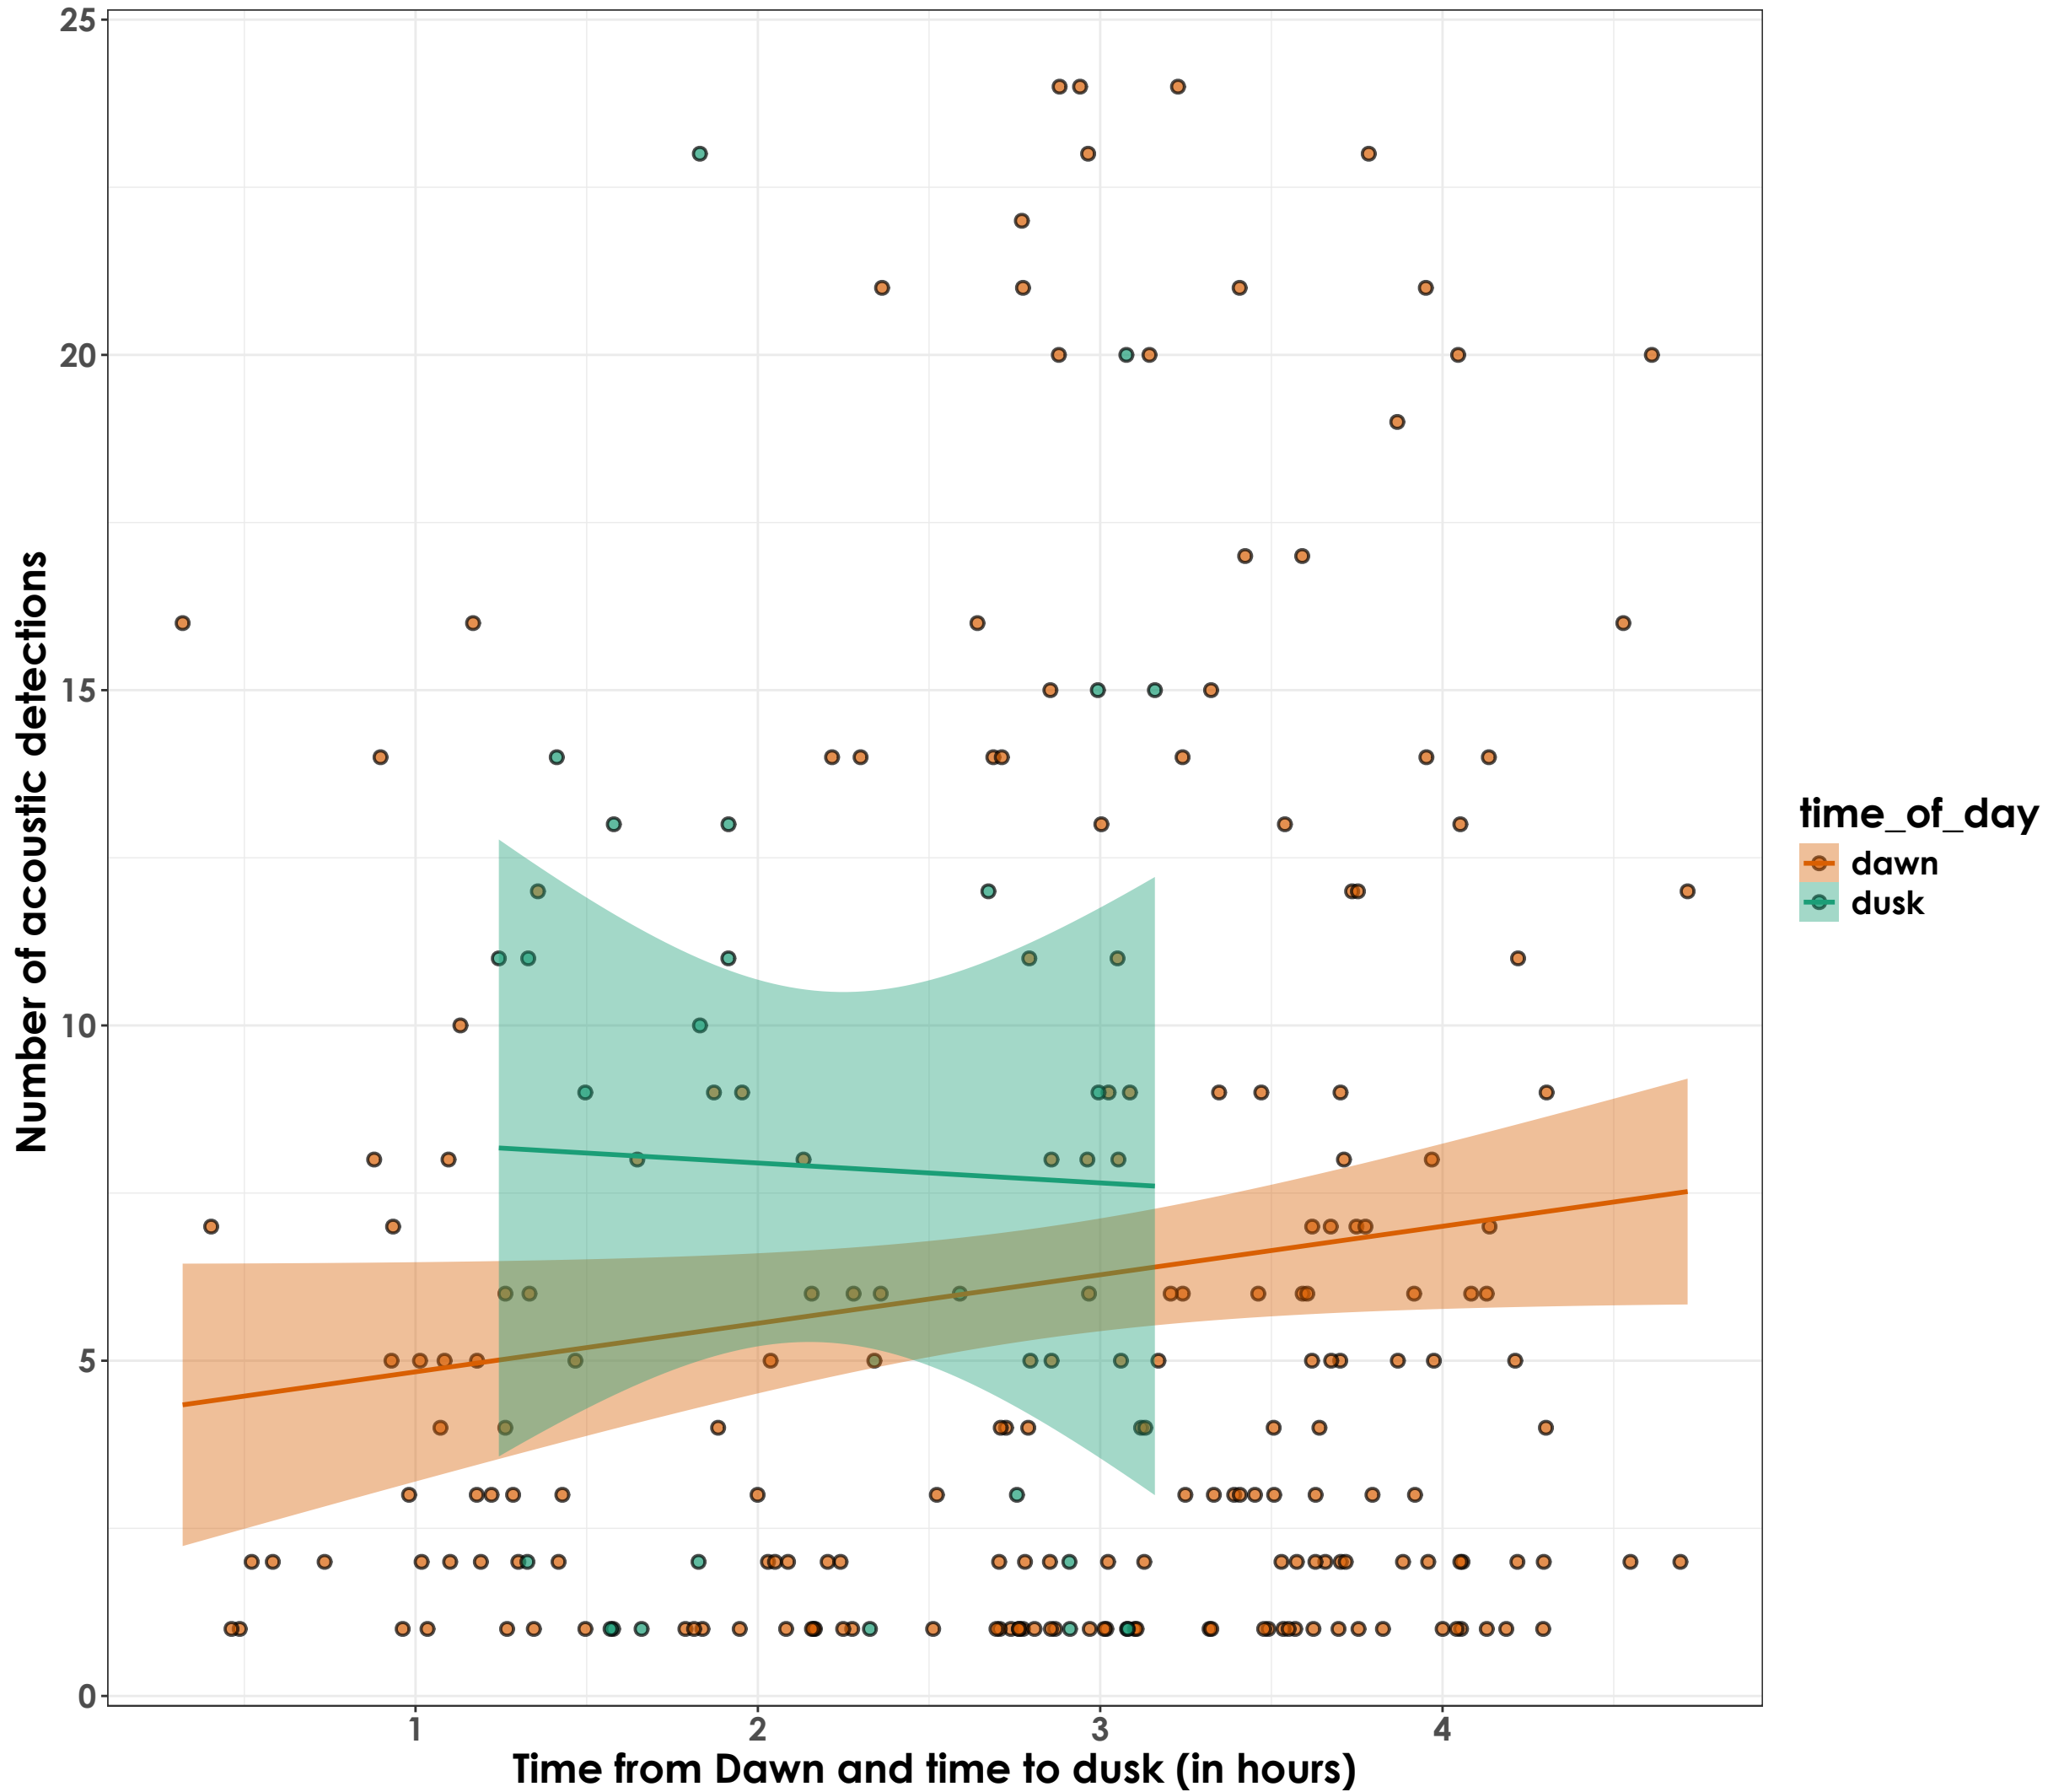

Brown-cheeked Fulvetta

Each dot represents the total number of detections after dawn or before dusk (in hours)

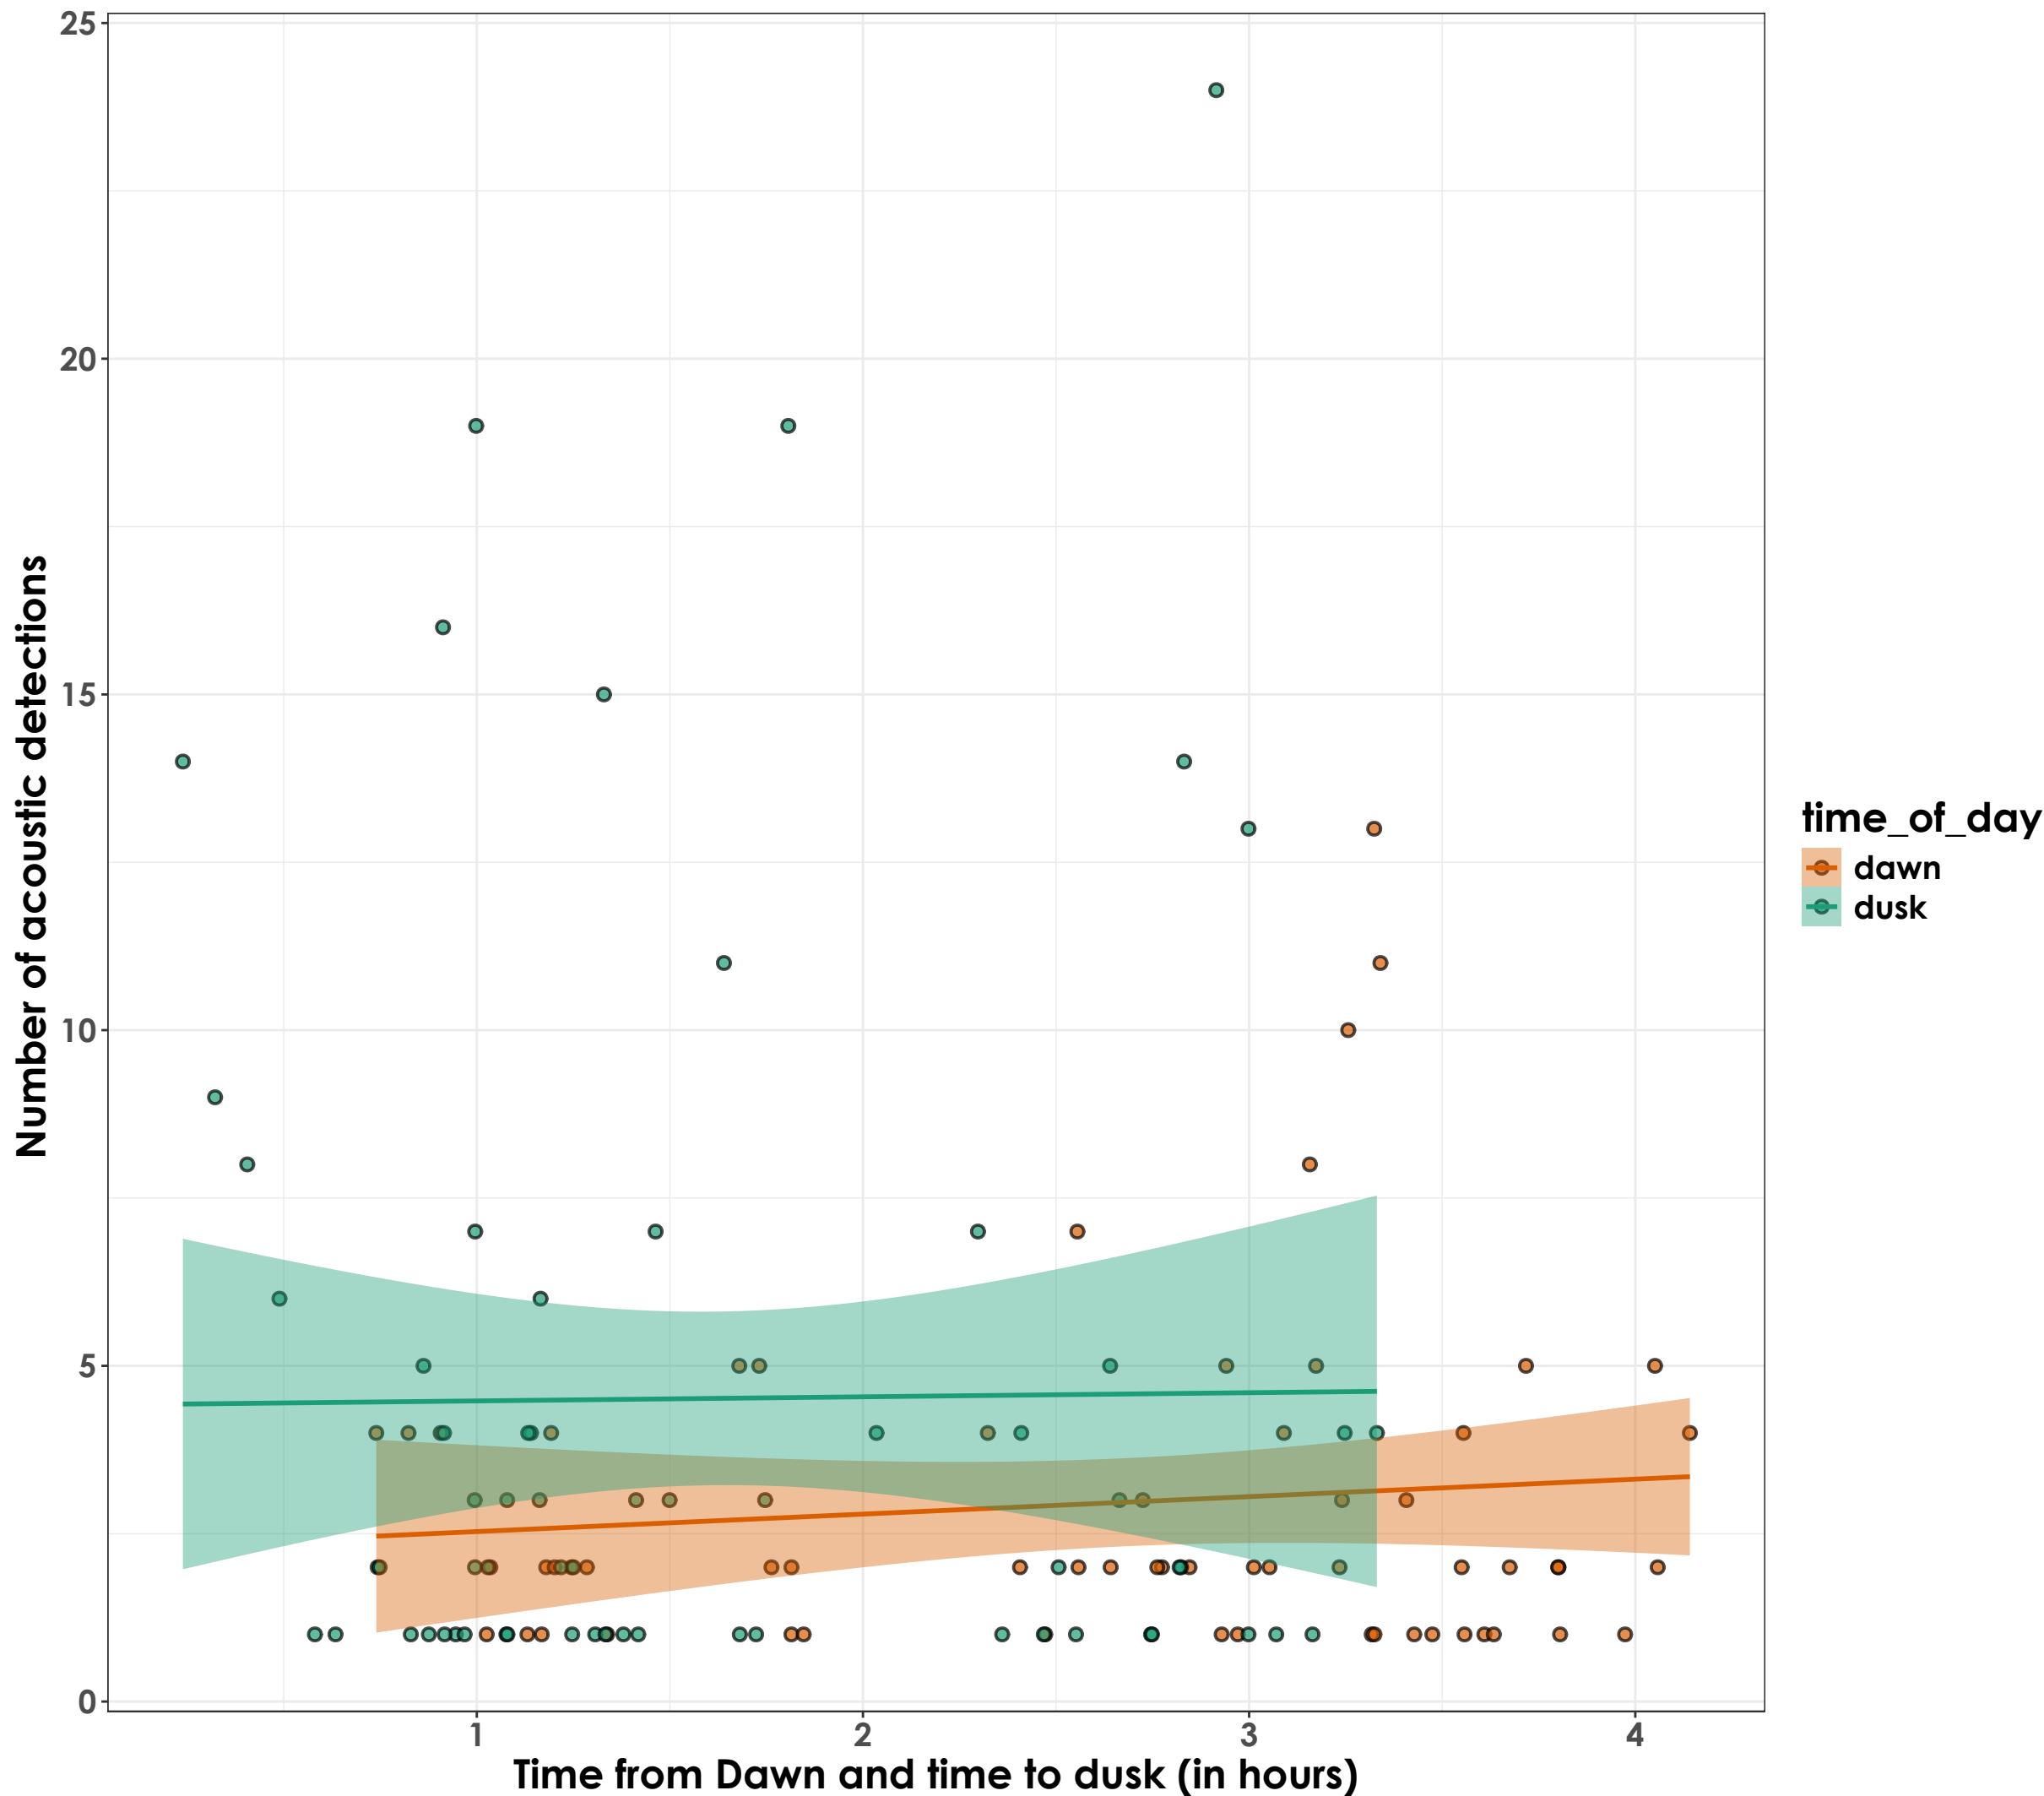

Orange Minivet

Each dot represents the total number of detections after dawn or before dusk (in hours)

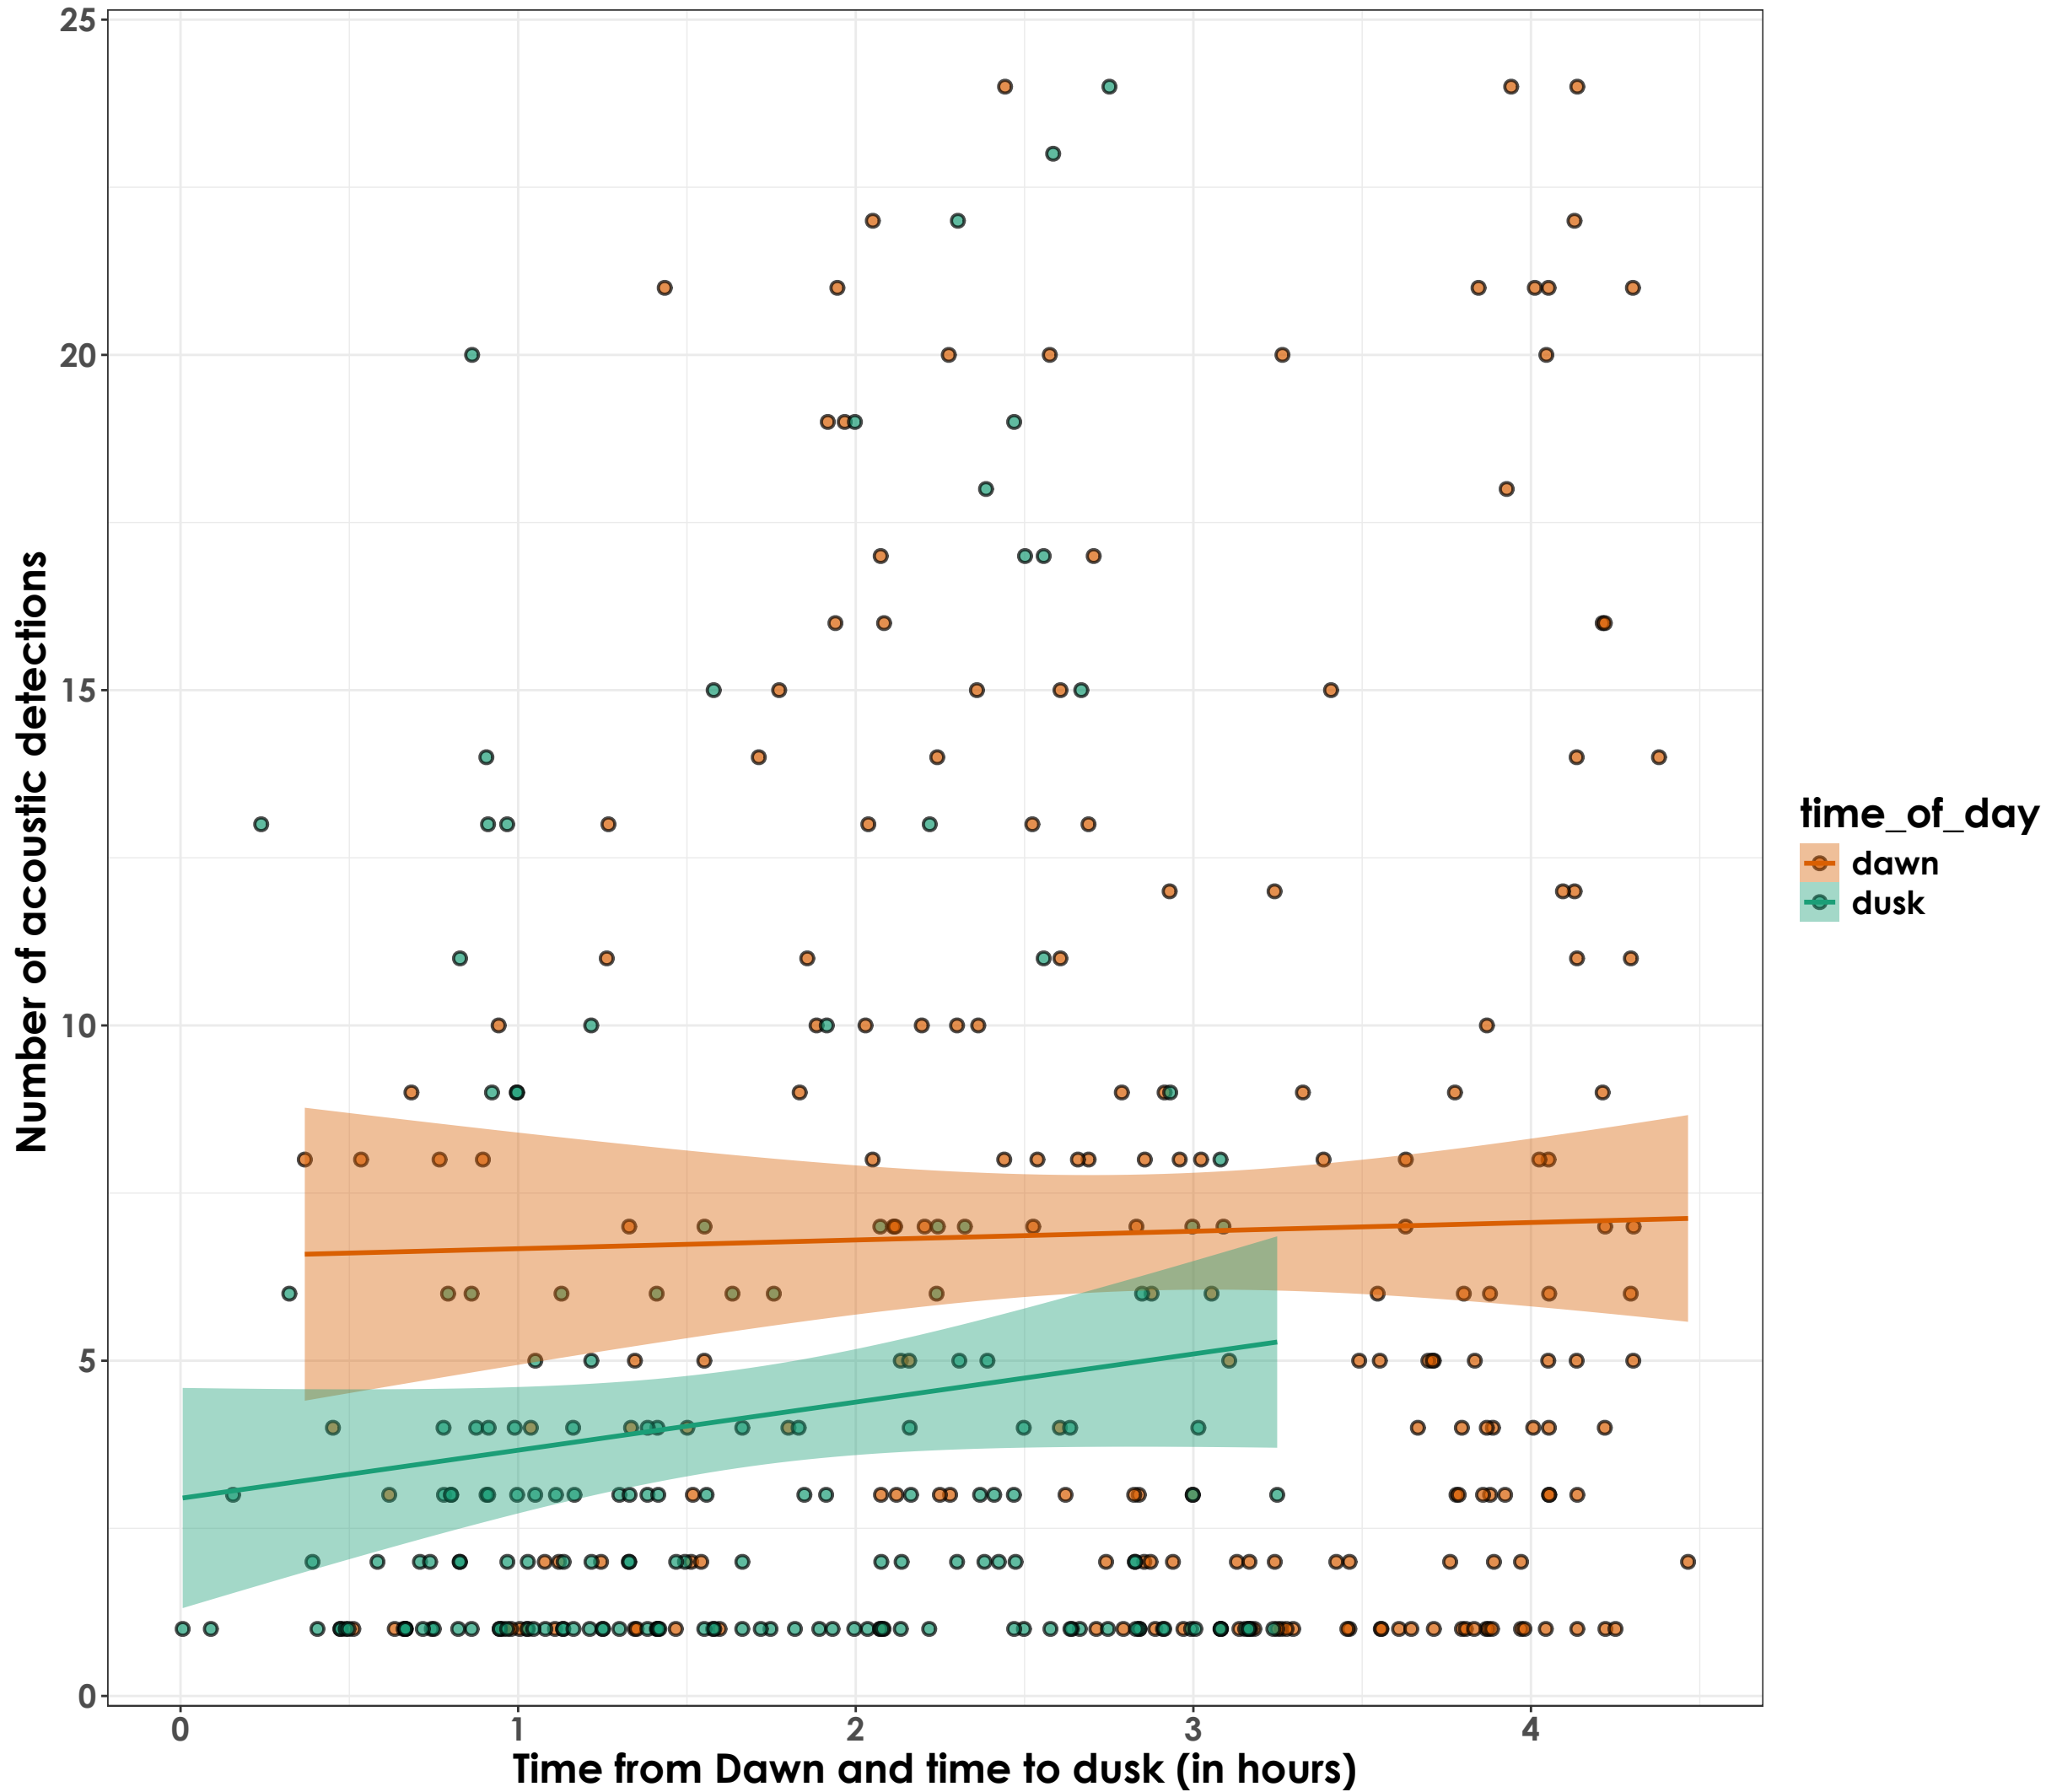

Greater Flameback

Each dot represents the total number of detections after dawn or before dusk (in hours)

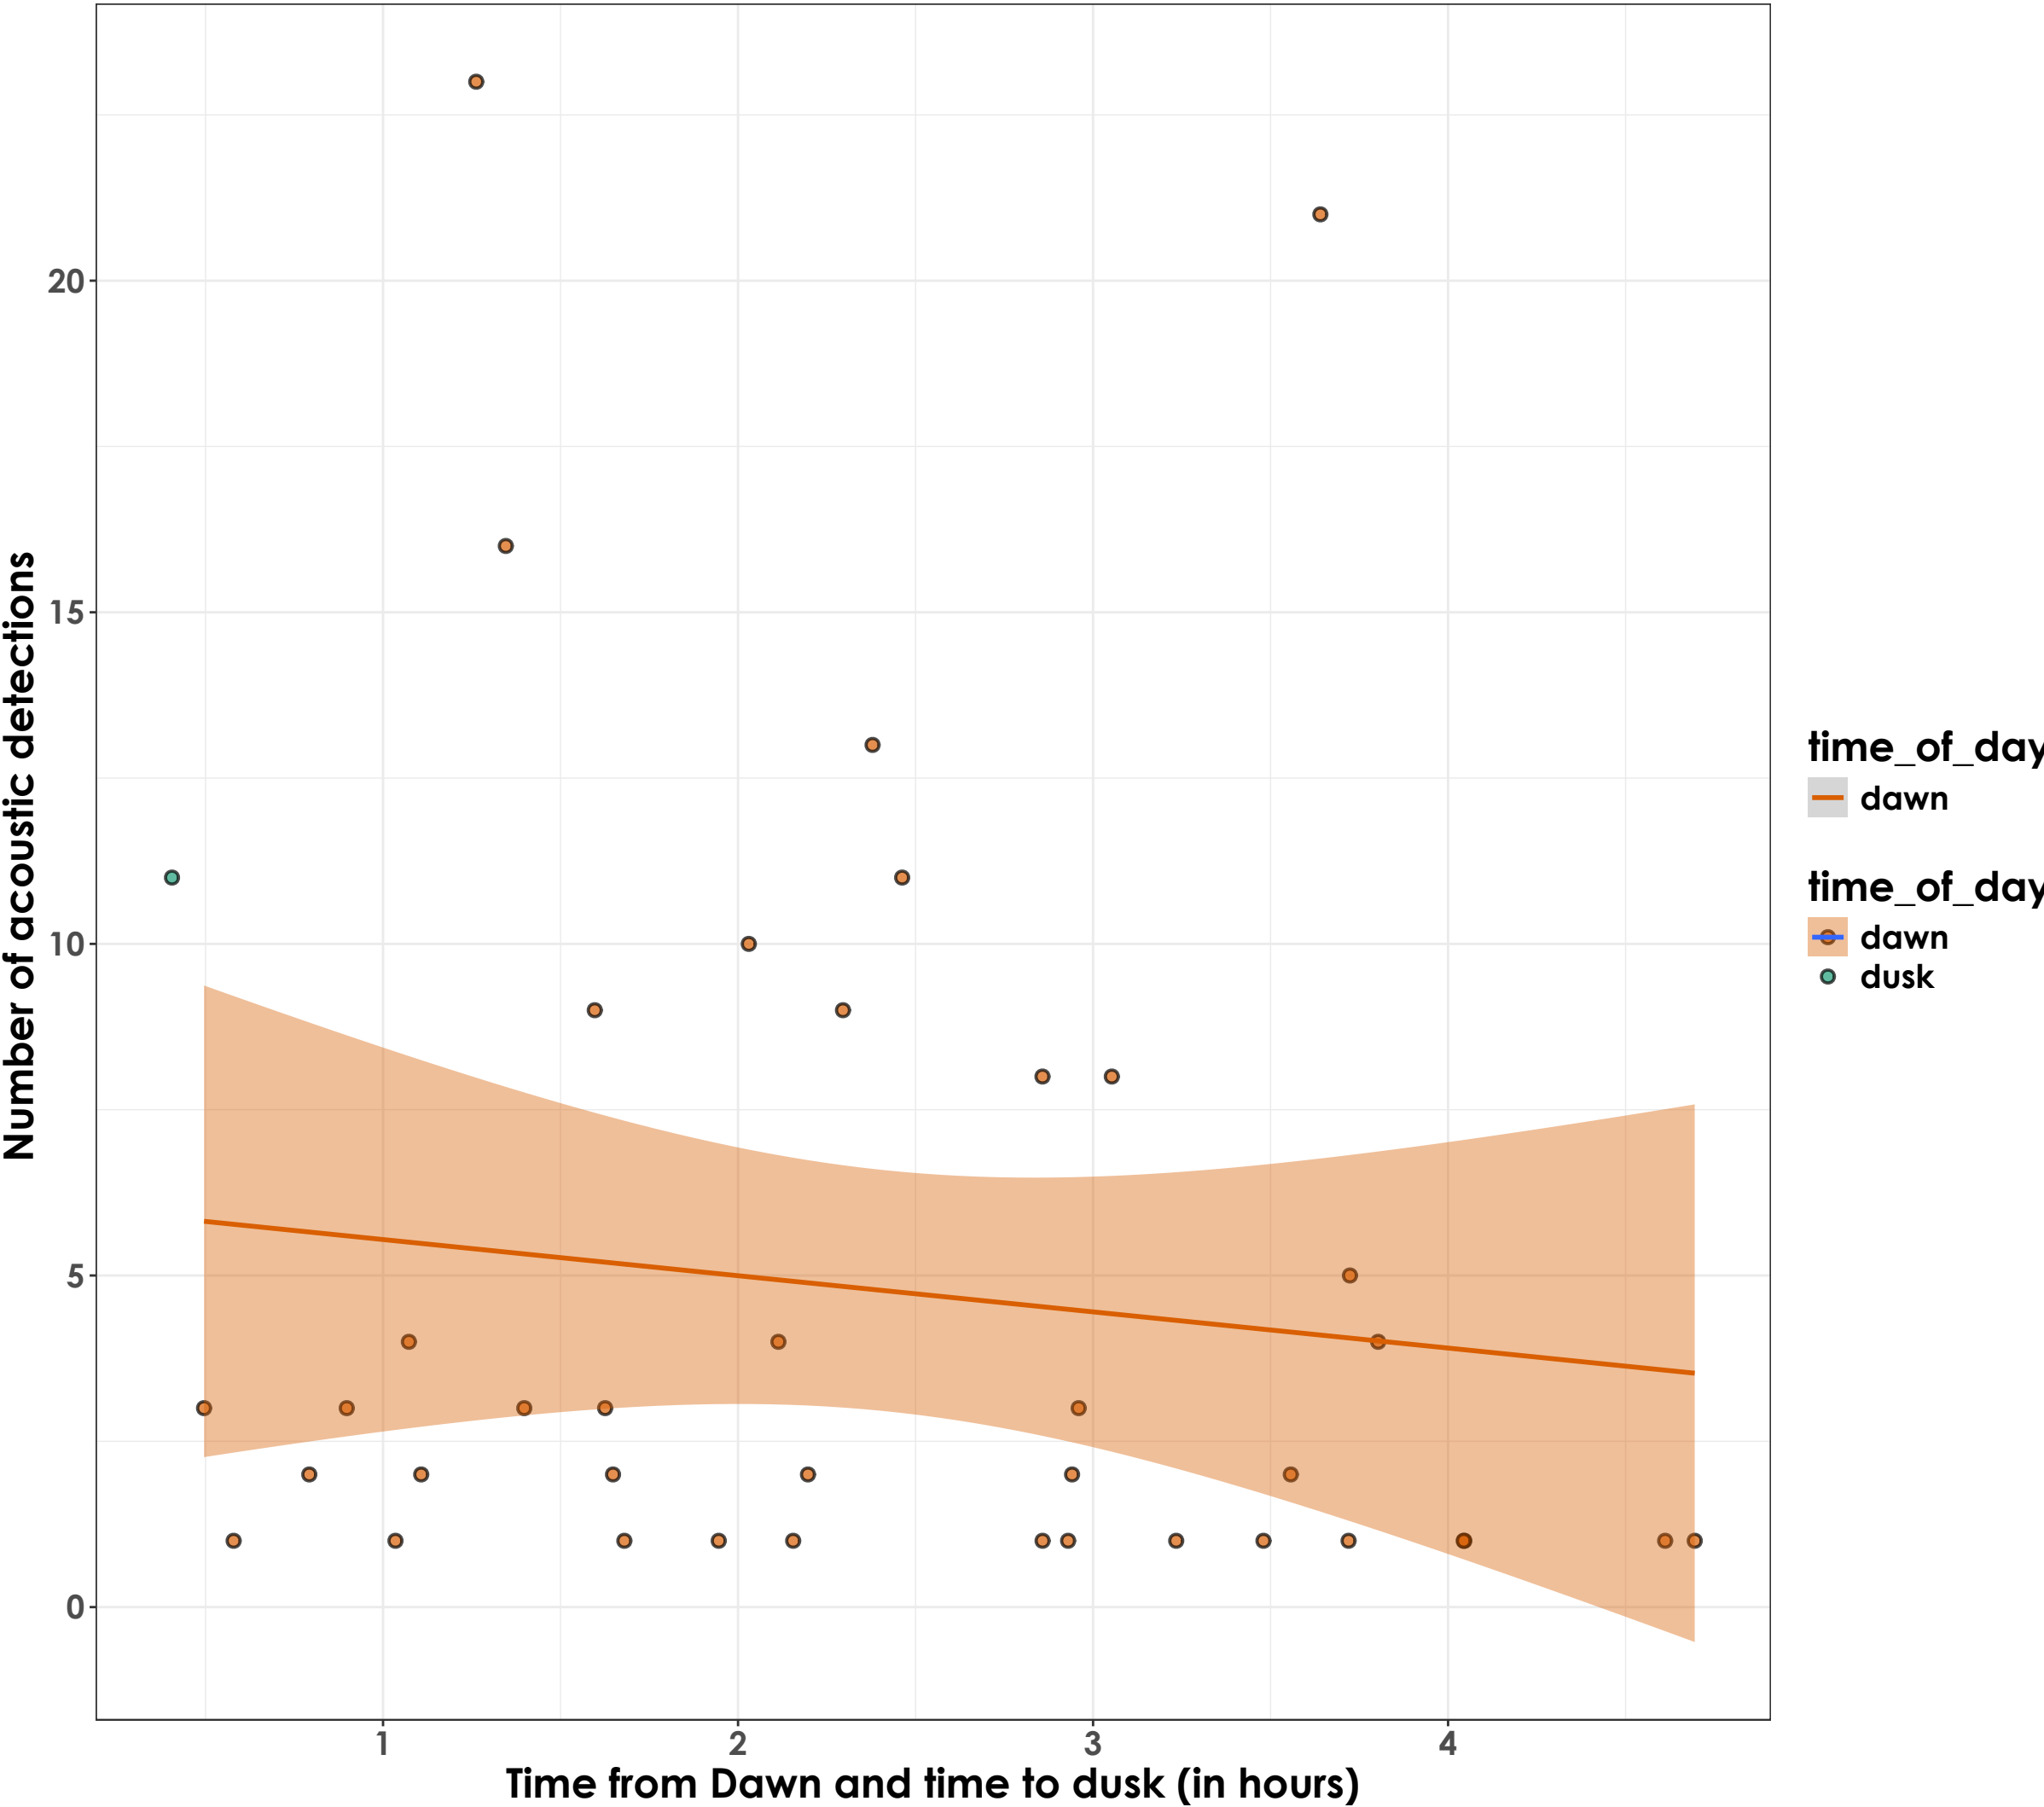

Blyth's Reed Warbler

Each dot represents the total number of detections after dawn or before dusk (in hours)

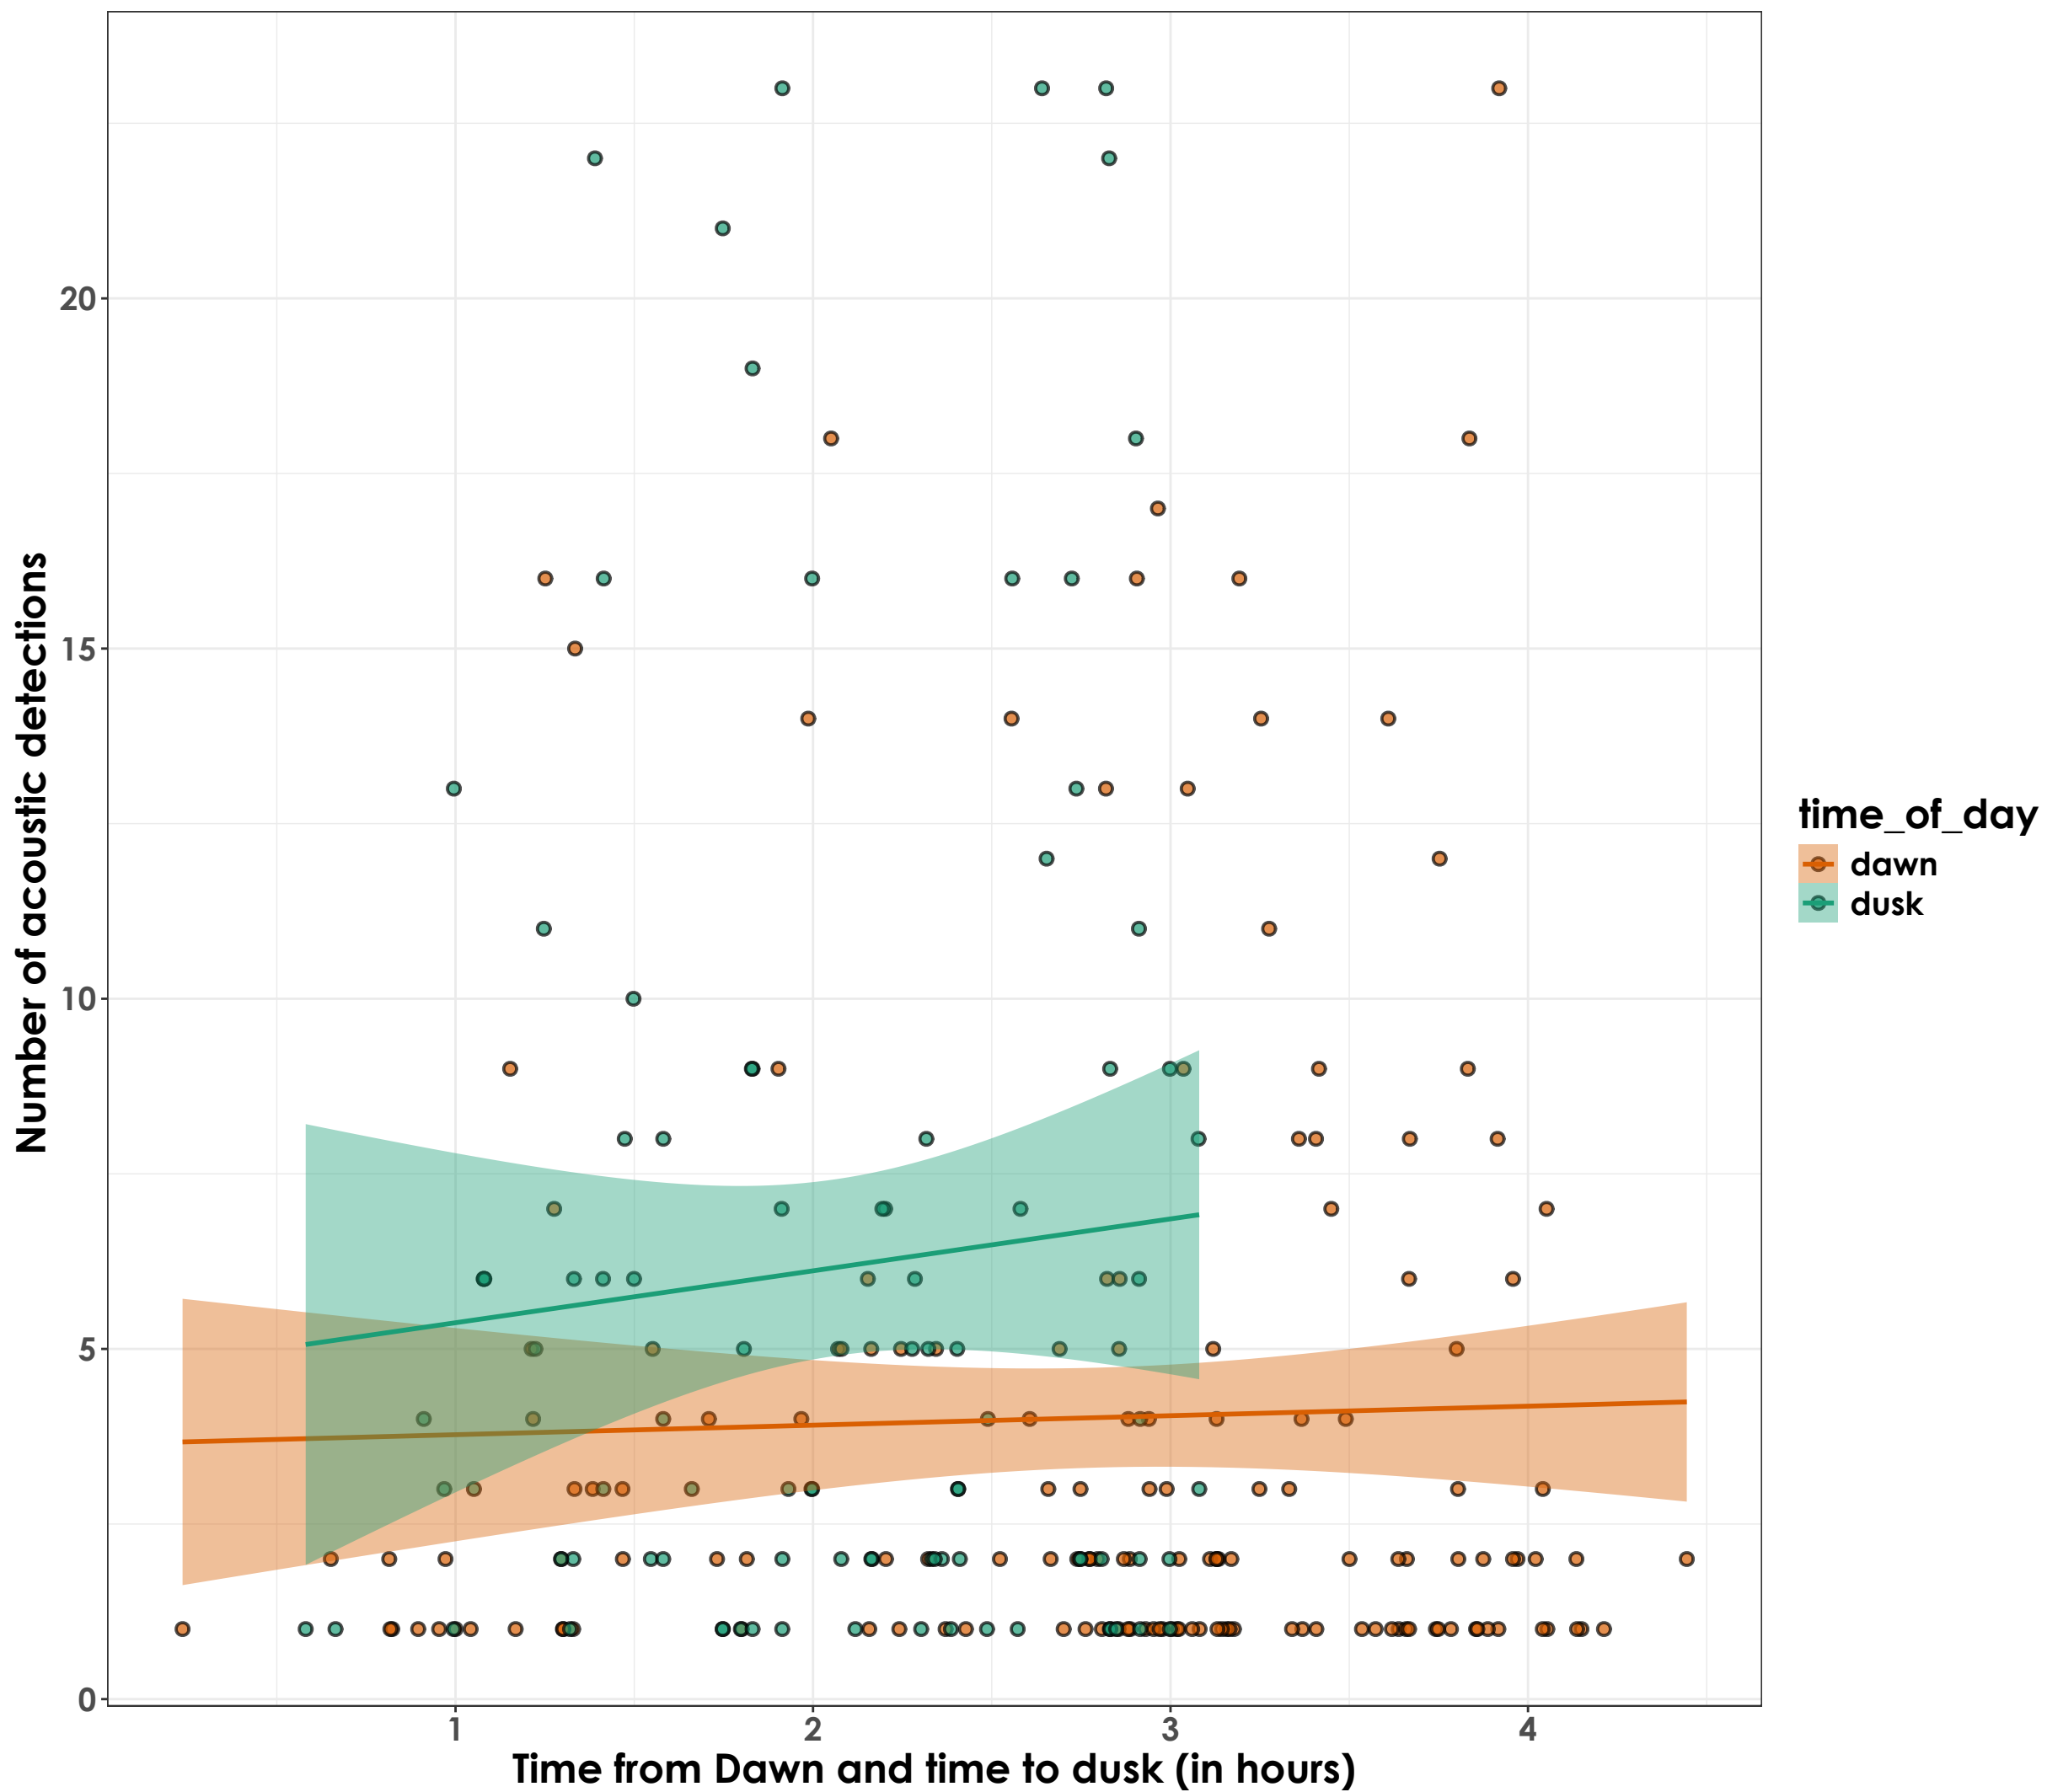

Malabar Trogon

Each dot represents the total number of detections after dawn or before dusk (in hours)

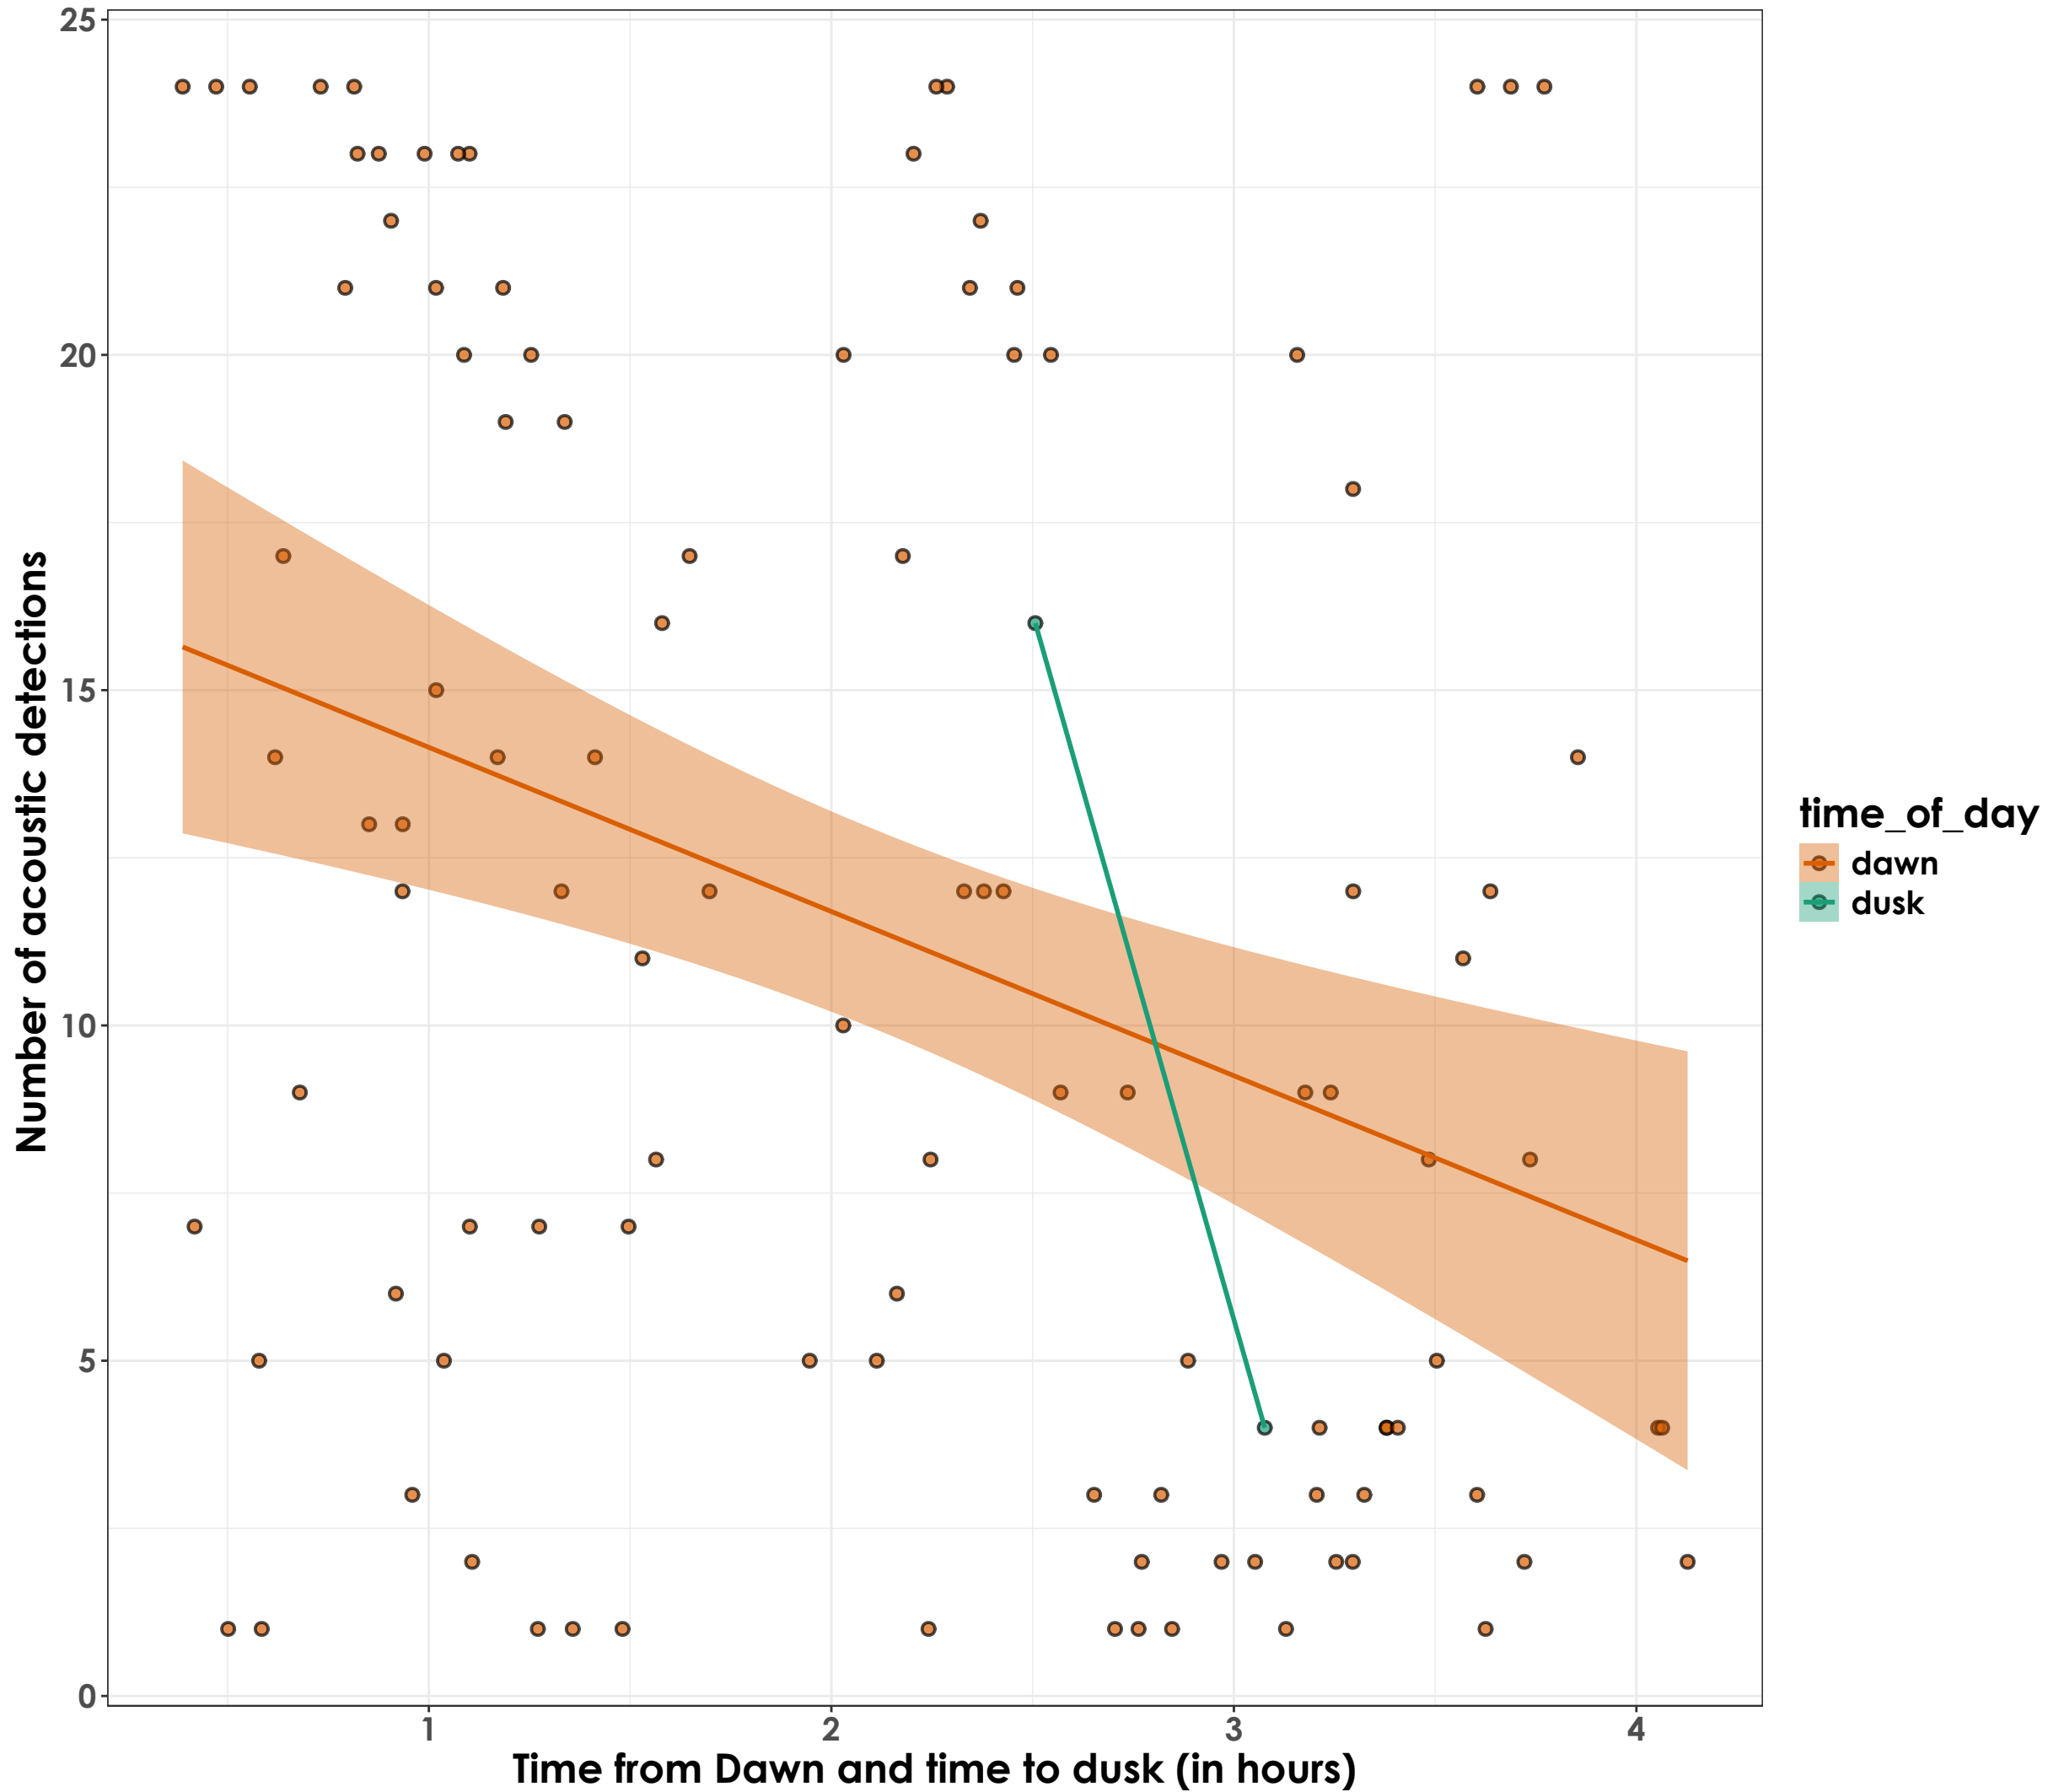

Plum-headed Parakeet

Each dot represents the total number of detections after dawn or before dusk (in hours)

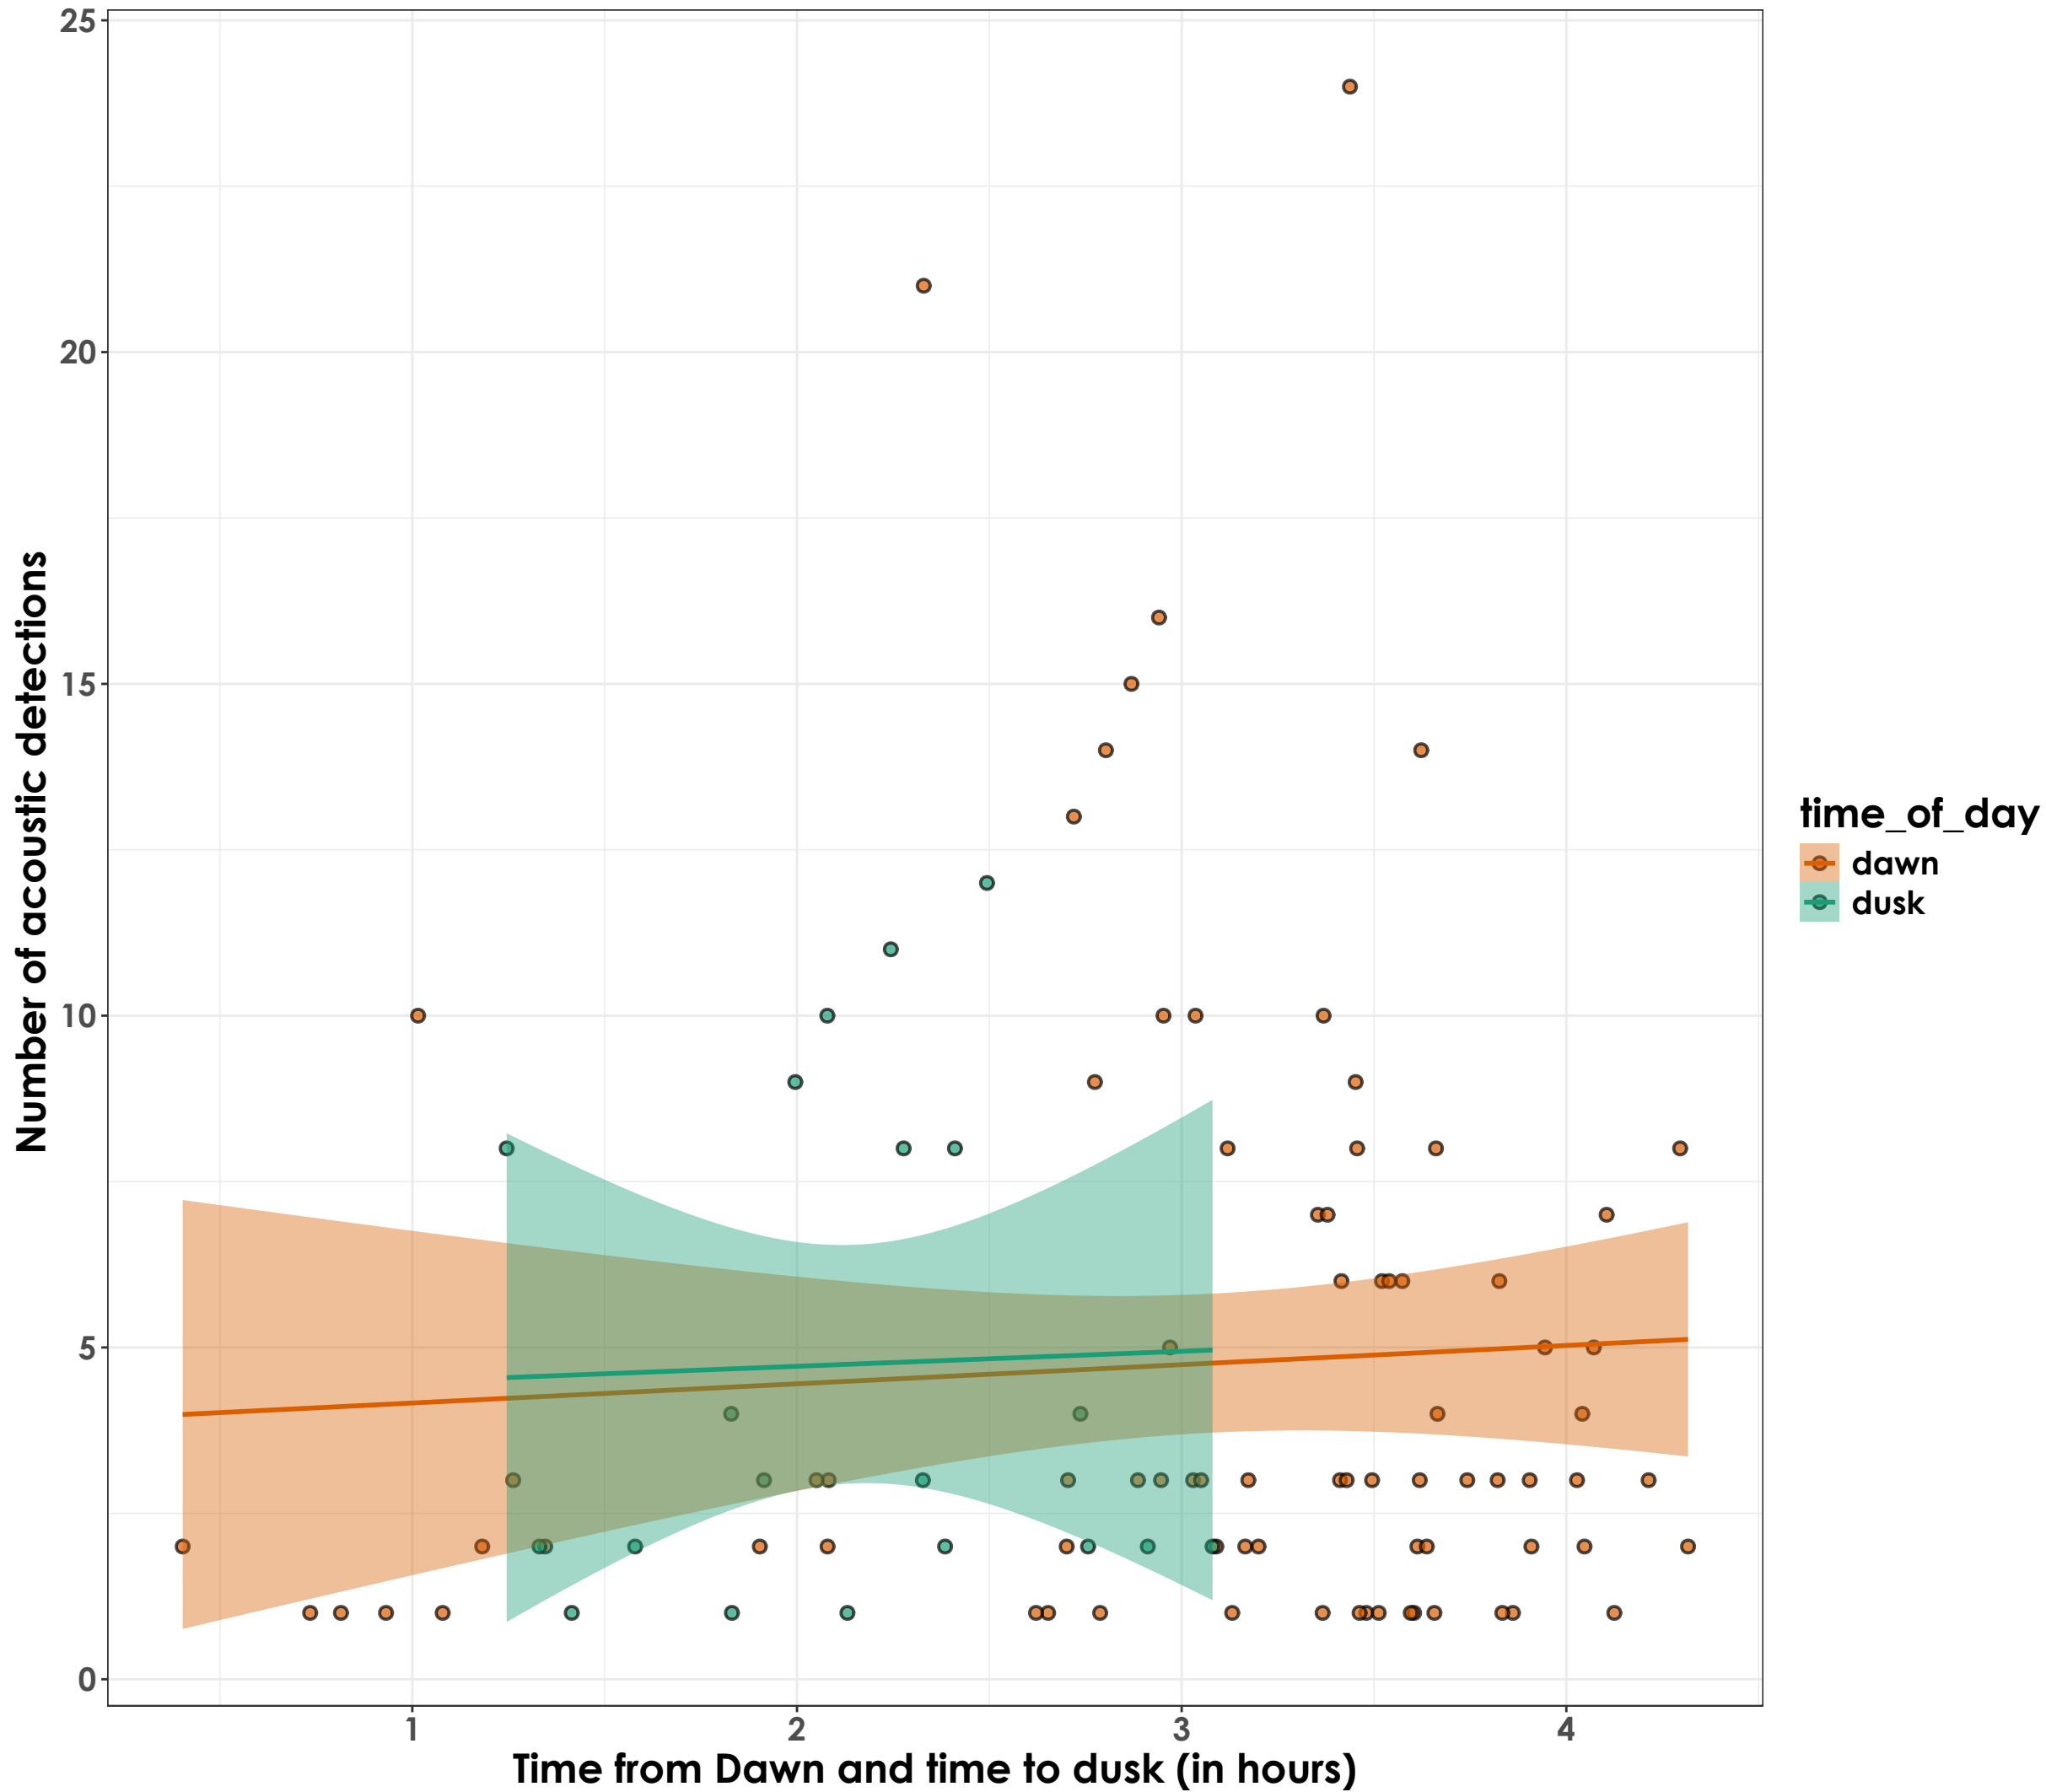

Gray-headed Canary-Flycatcher

Each dot represents the total number of detections after dawn or before dusk (in hours)

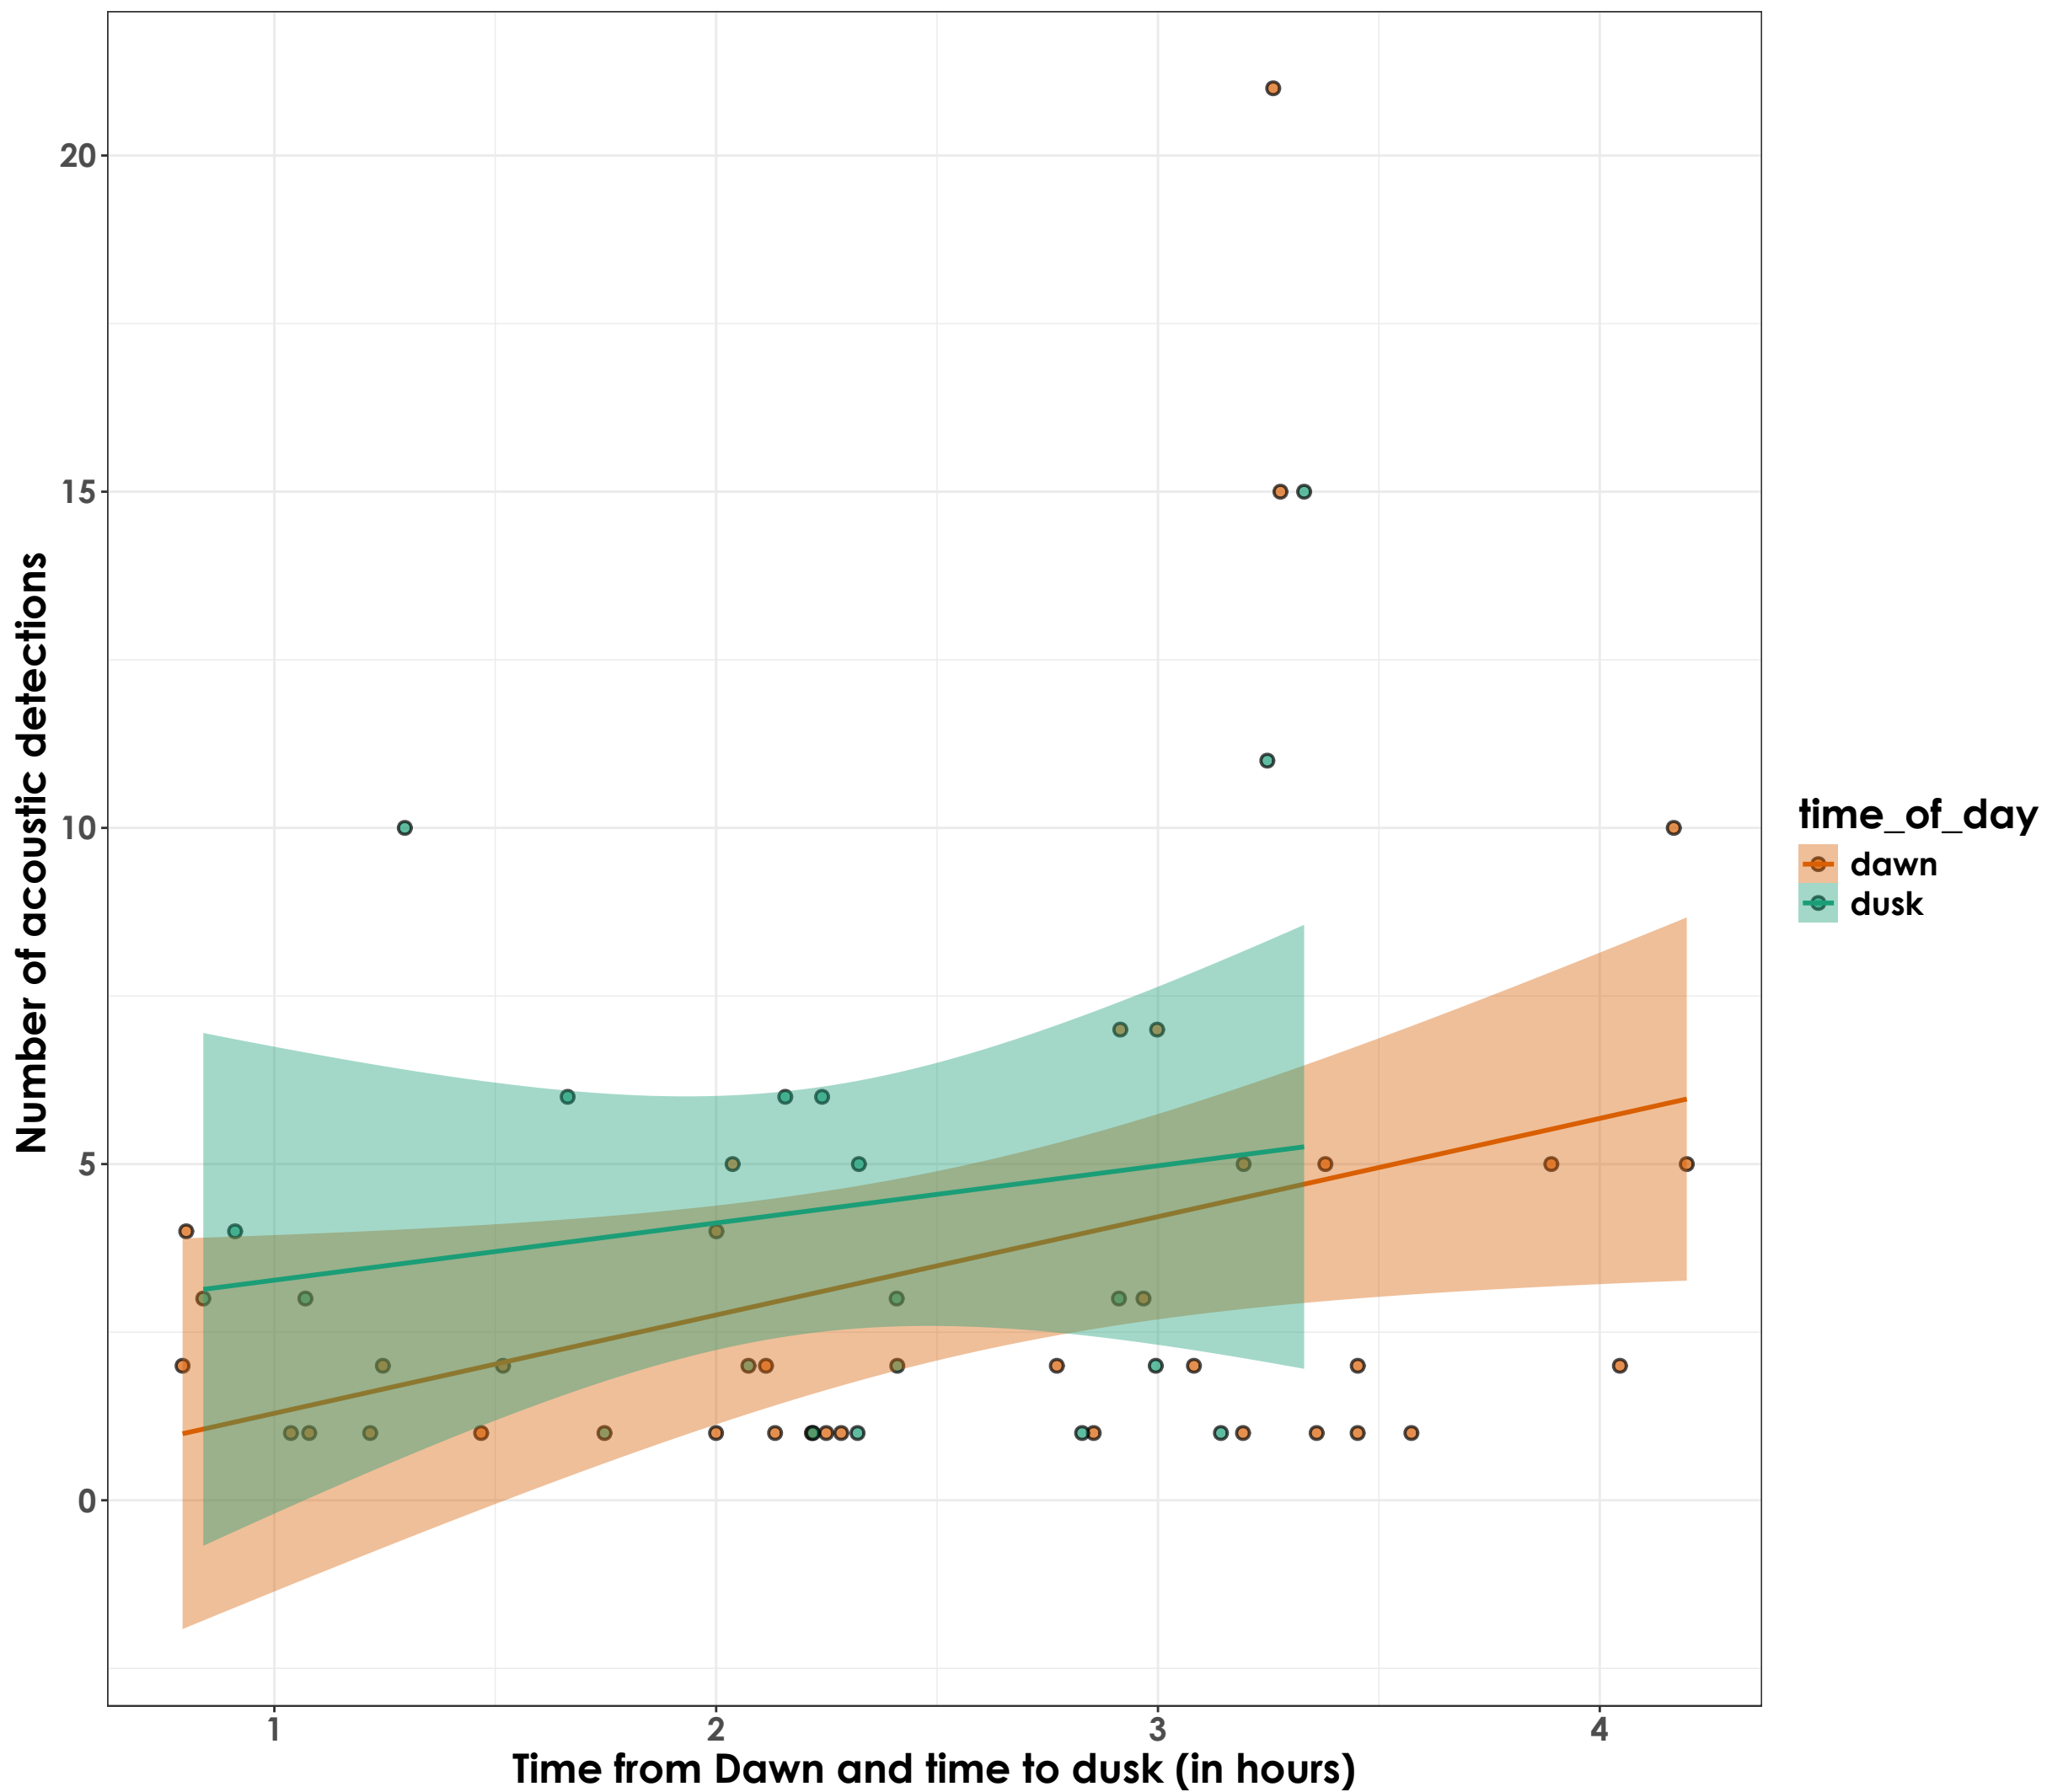

Malabar Parakeet

Each dot represents the total number of detections after dawn or before dusk (in hours)

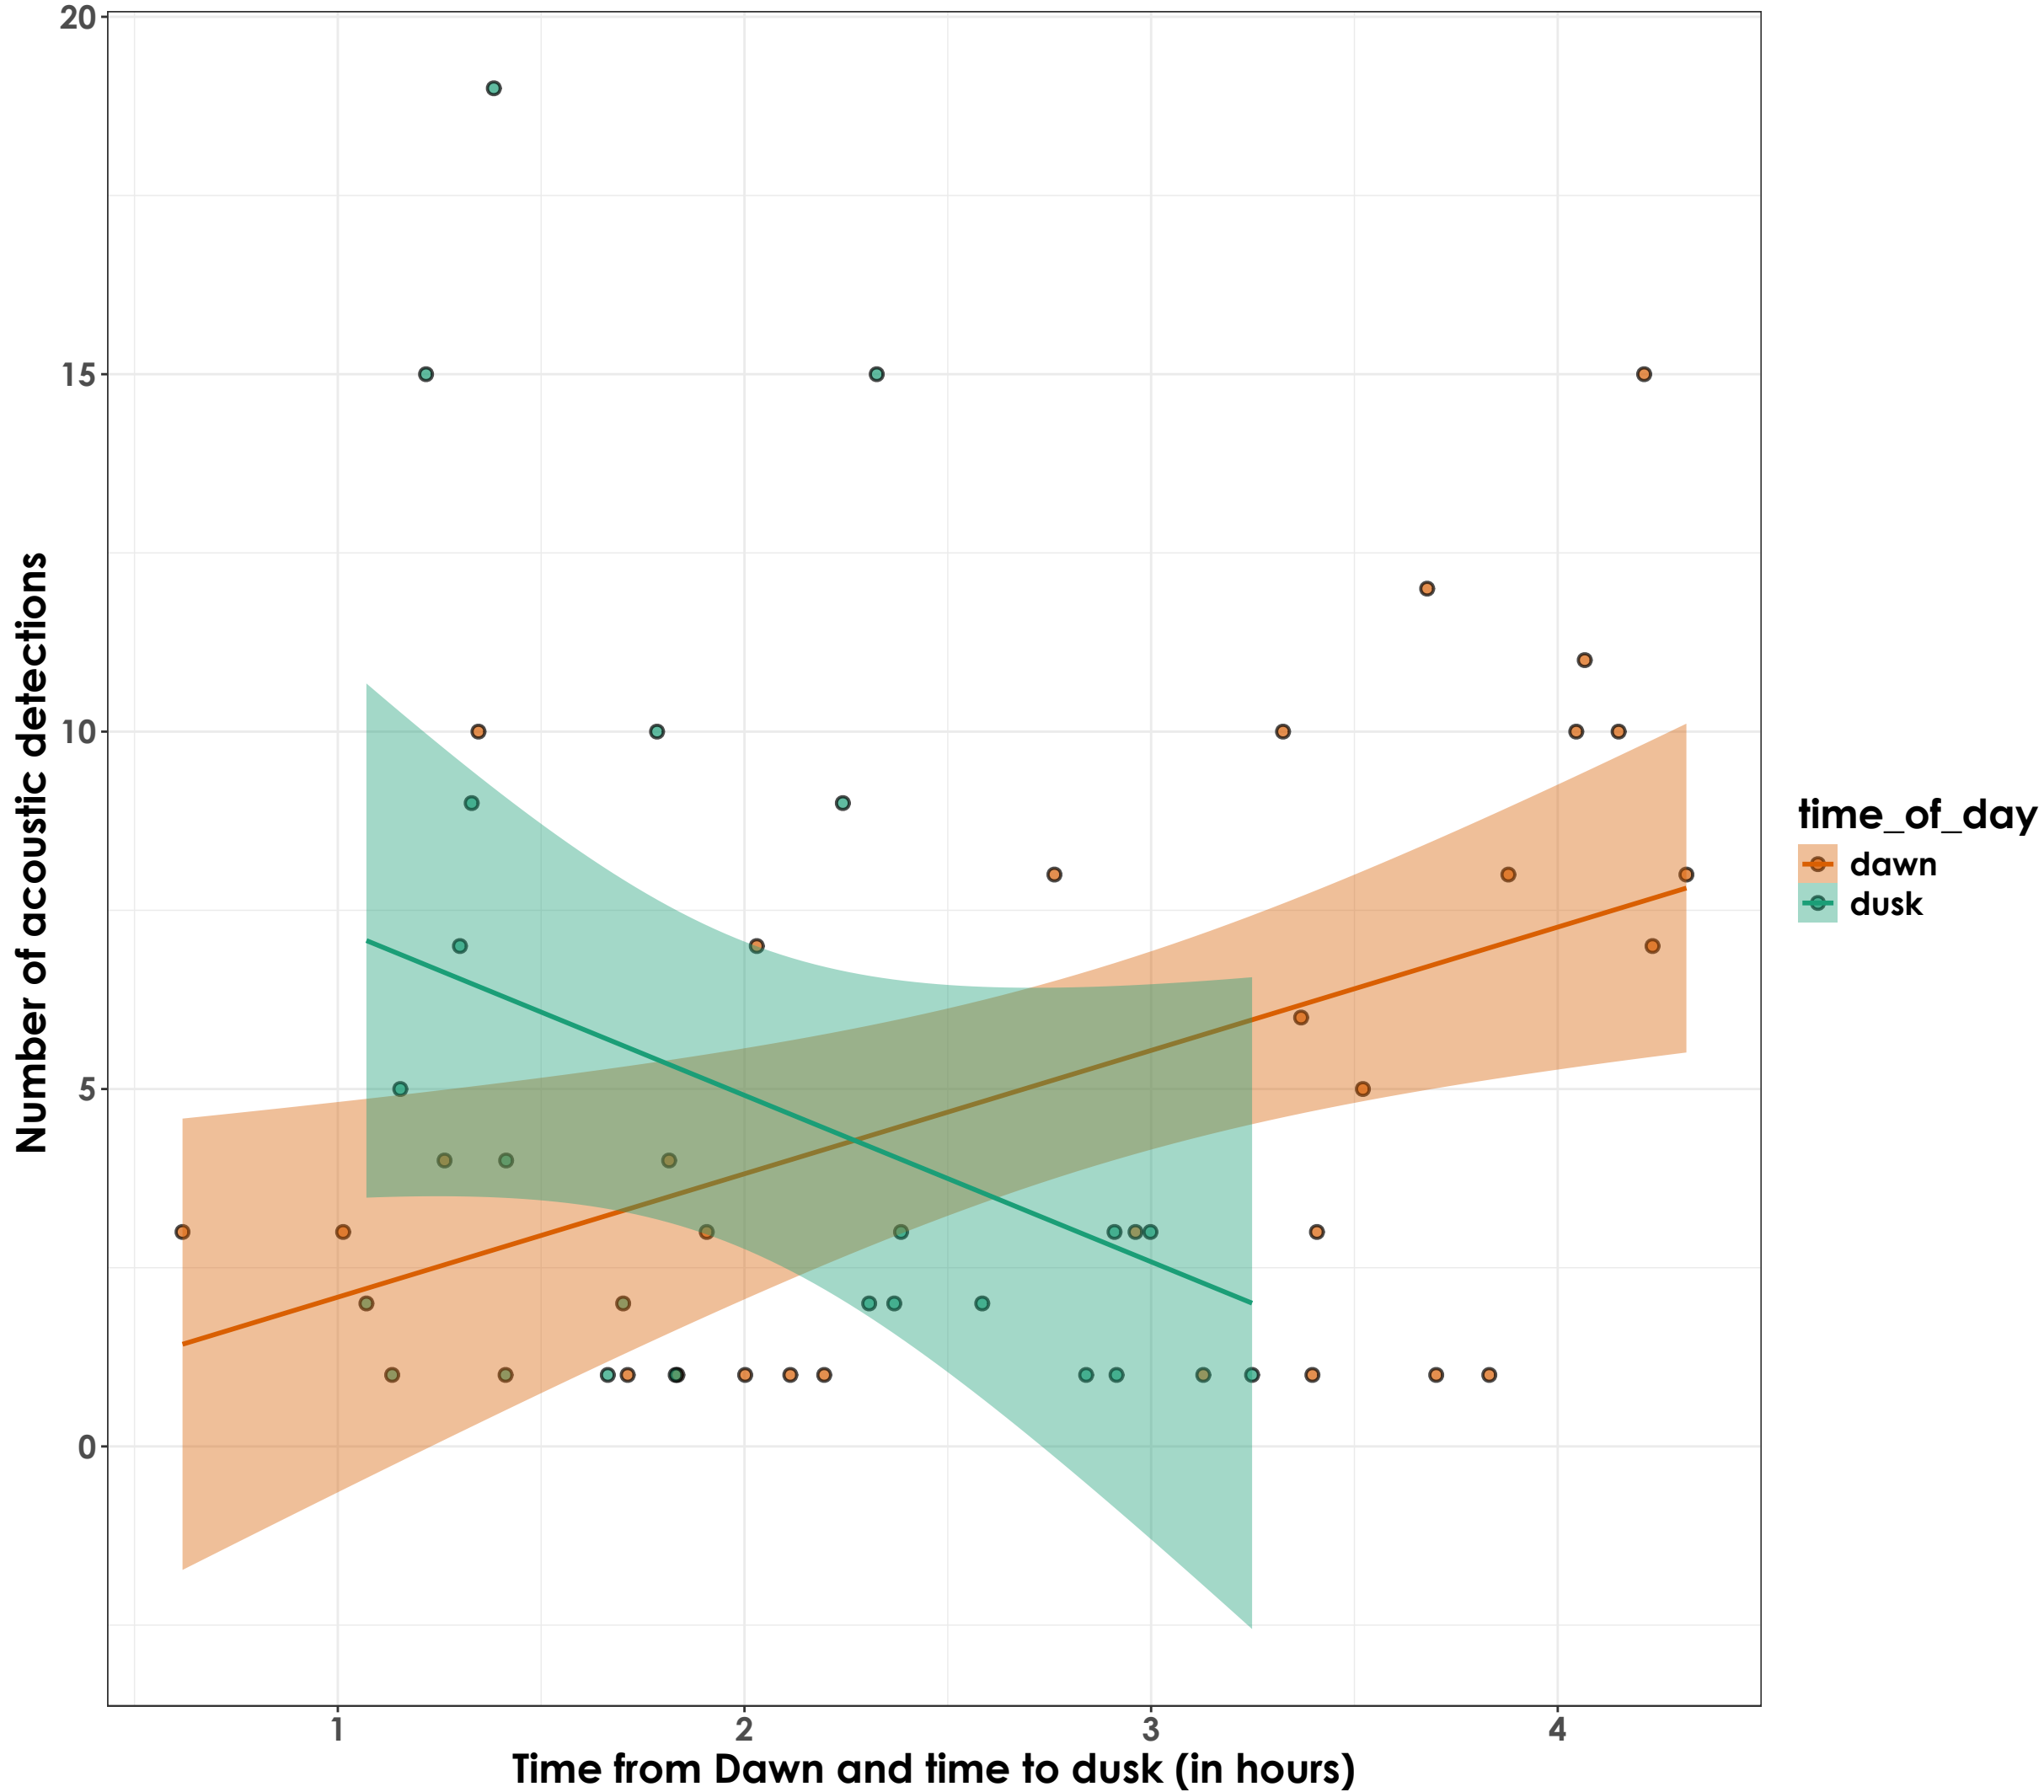

Streak-throated Woodpecker

Each dot represents the total number of detections after dawn or before dusk (in hours)

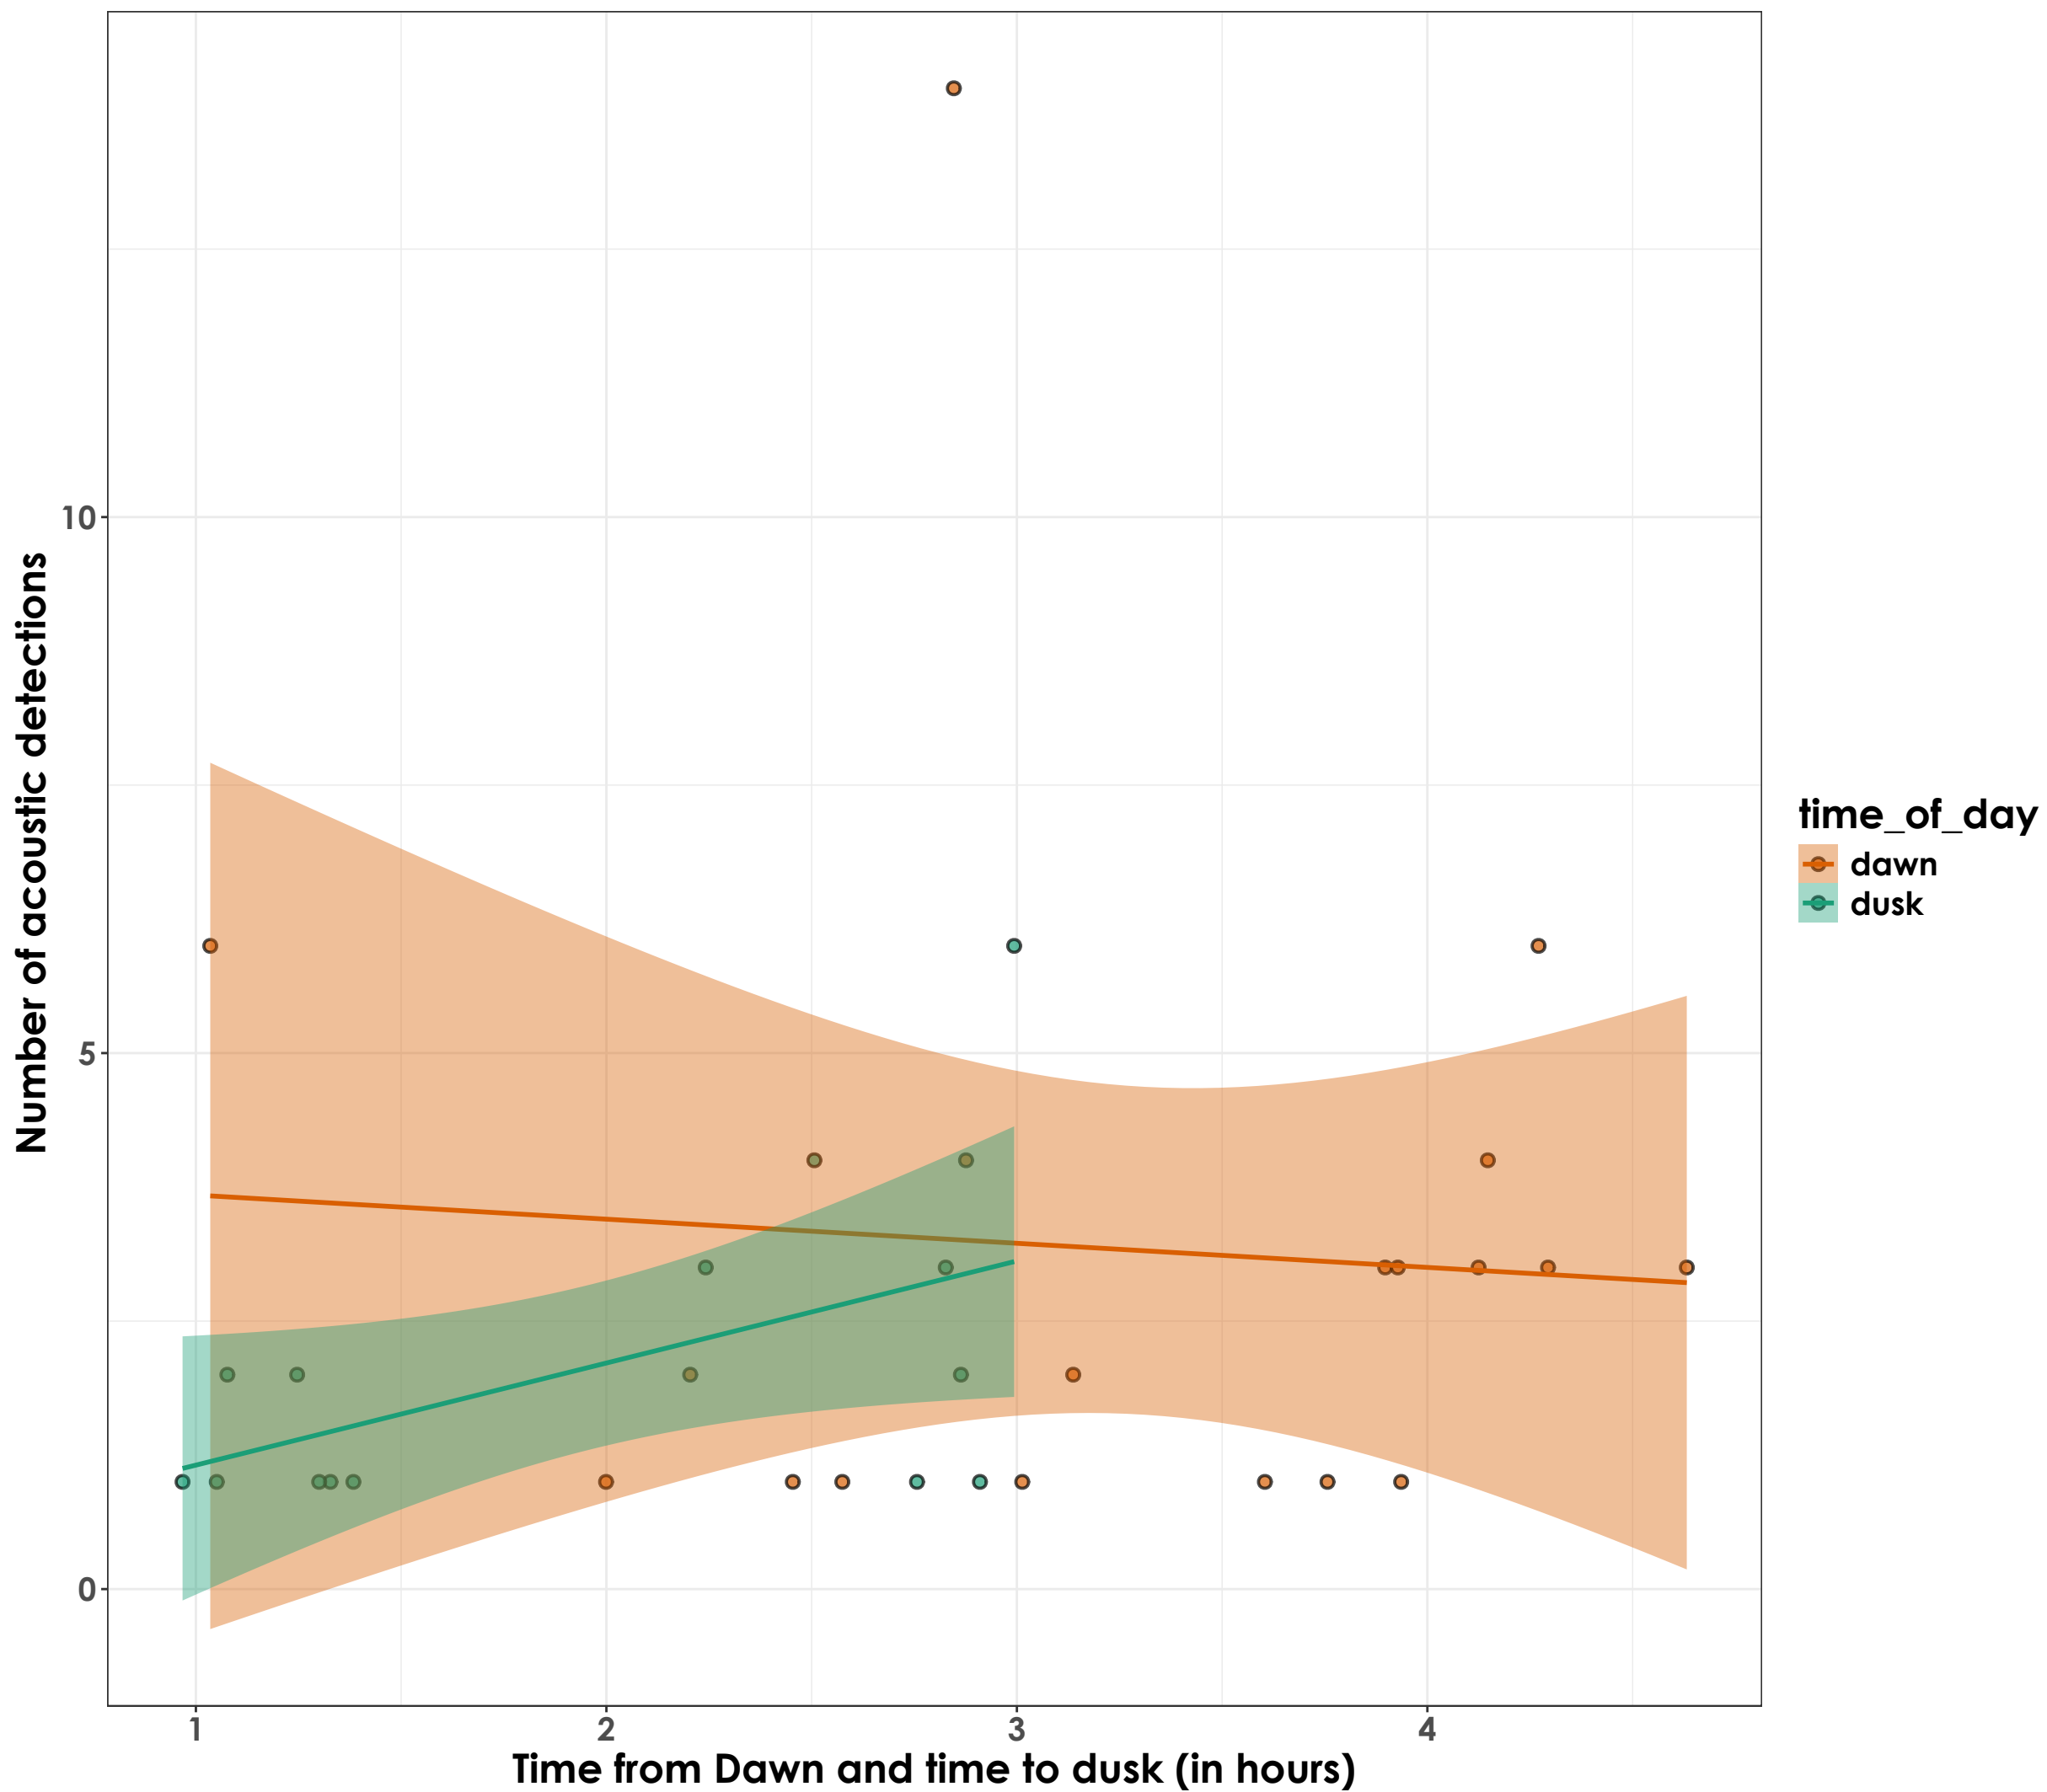

Indian Yellow Tit

Each dot represents the total number of detections after dawn or before dusk (in hours)

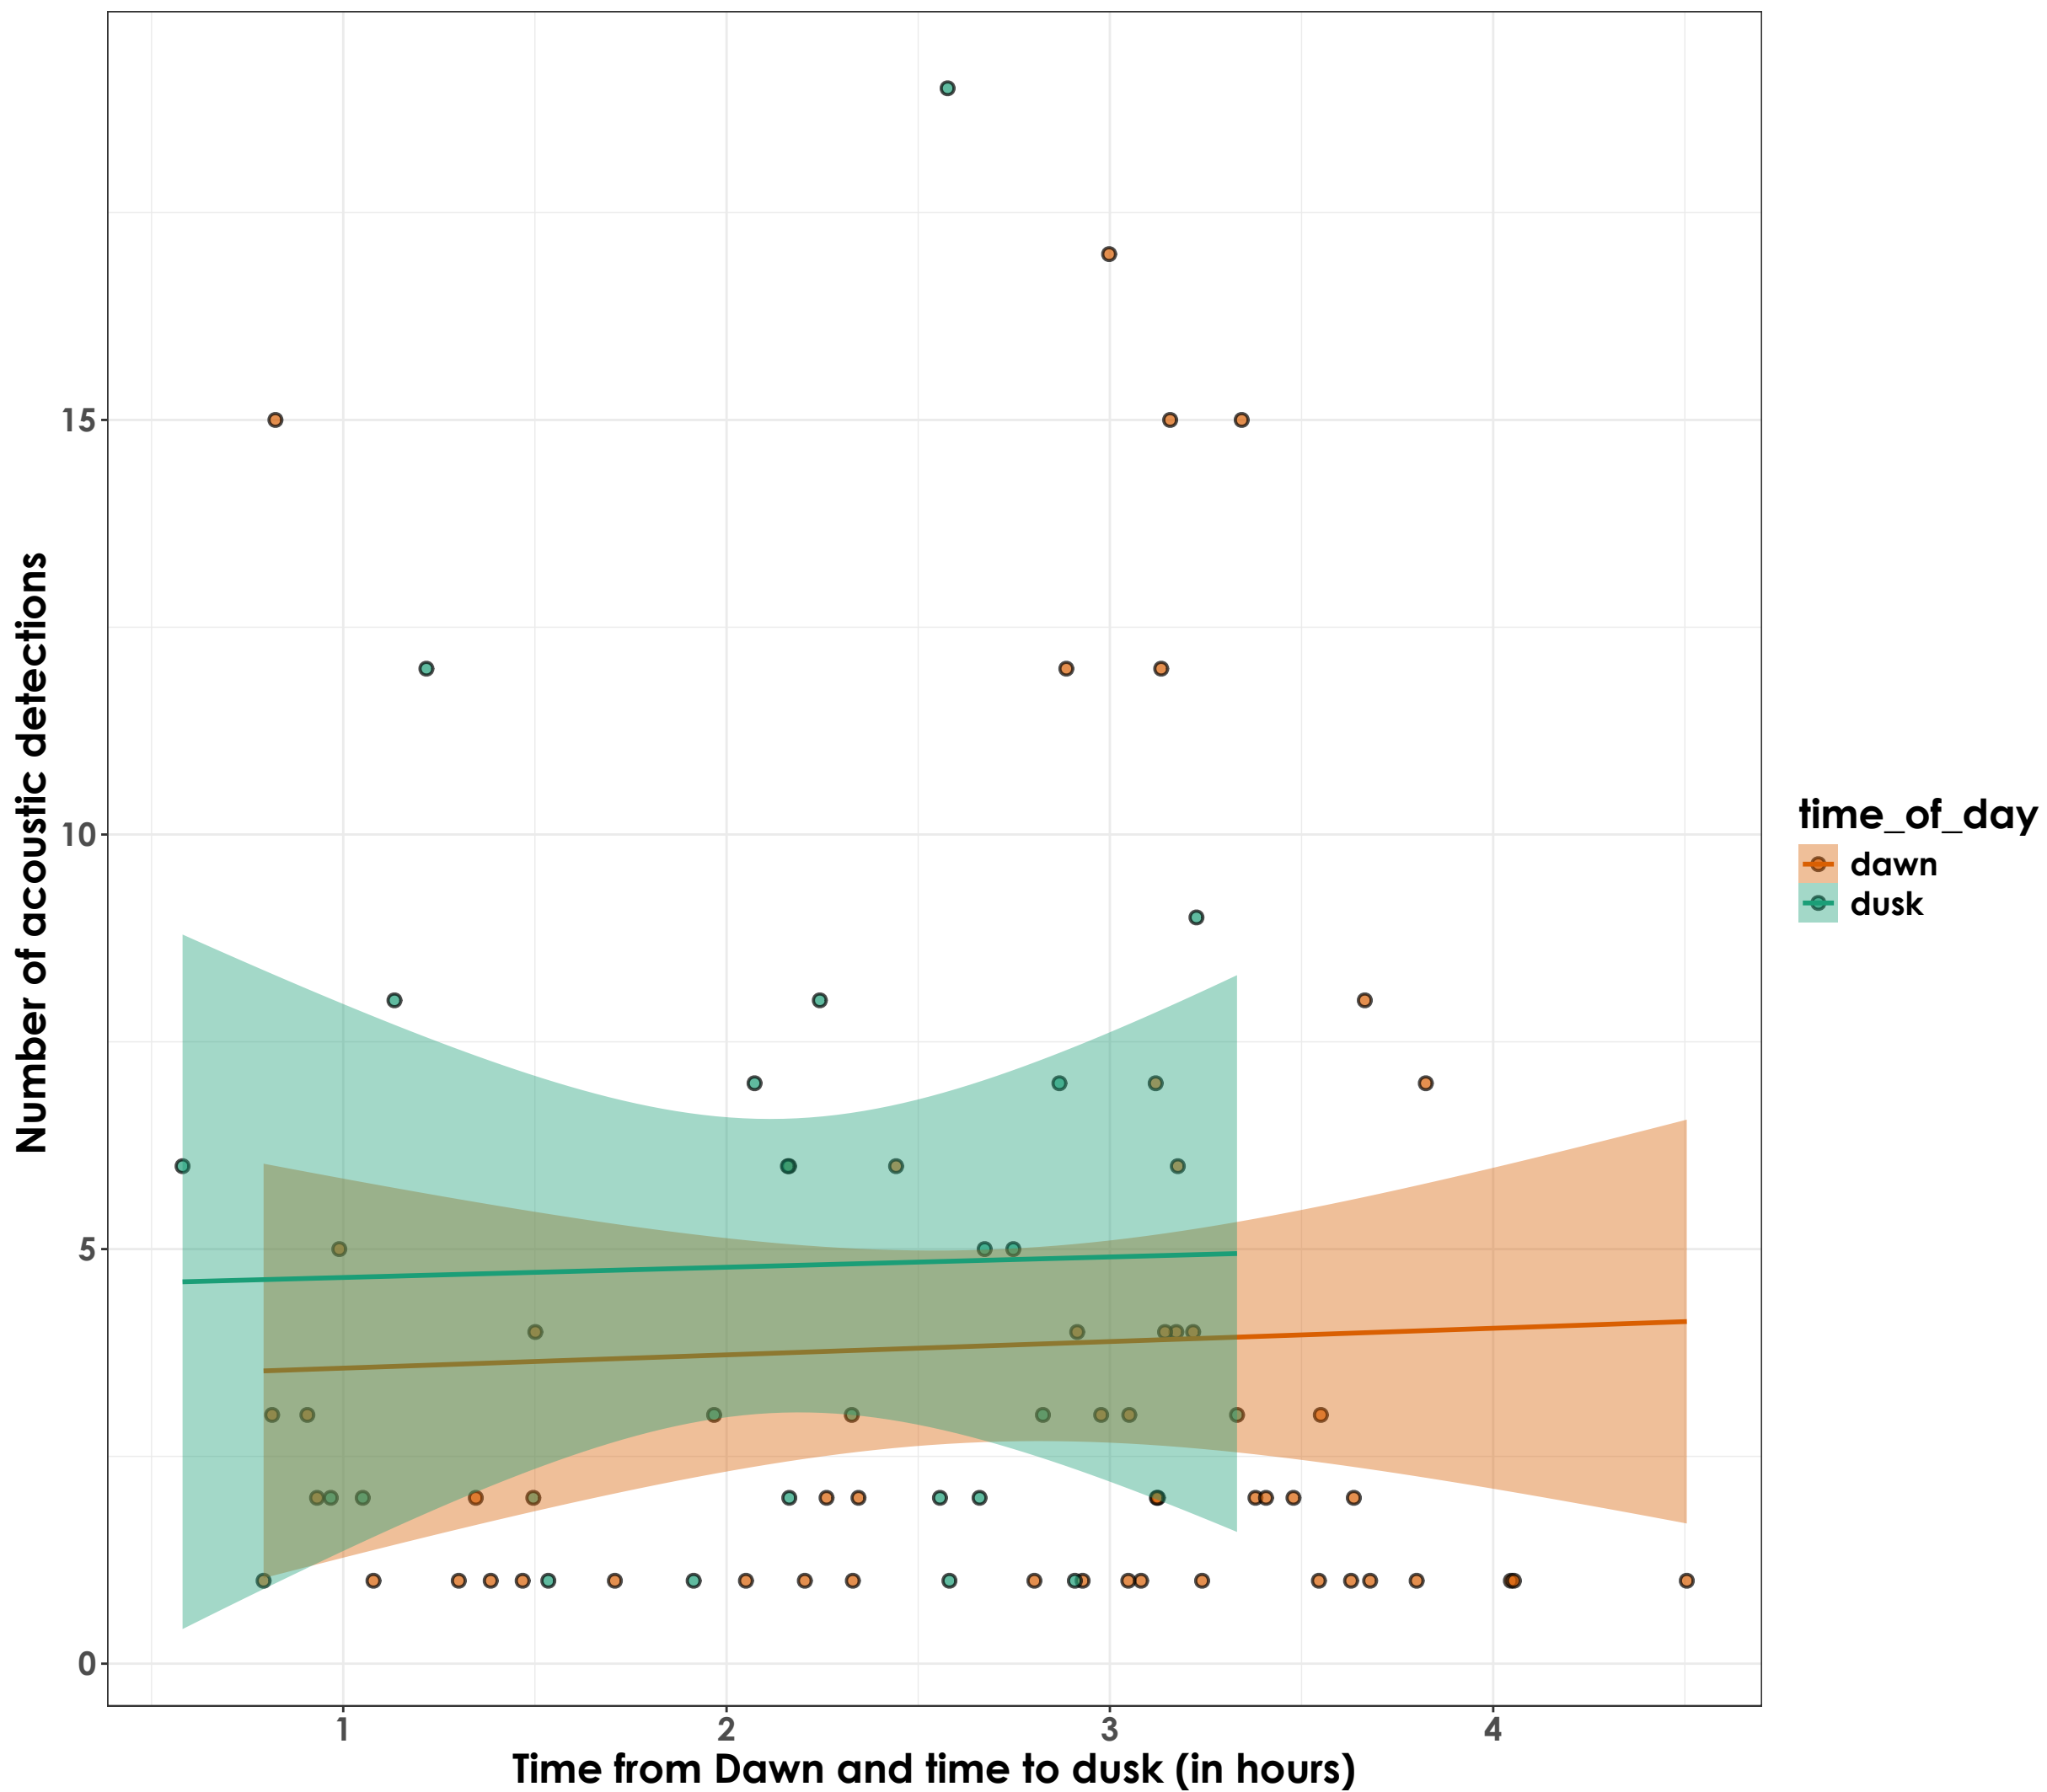

Indian Paradise-Flycatcher

Each dot represents the total number of detections after dawn or before dusk (in hours)

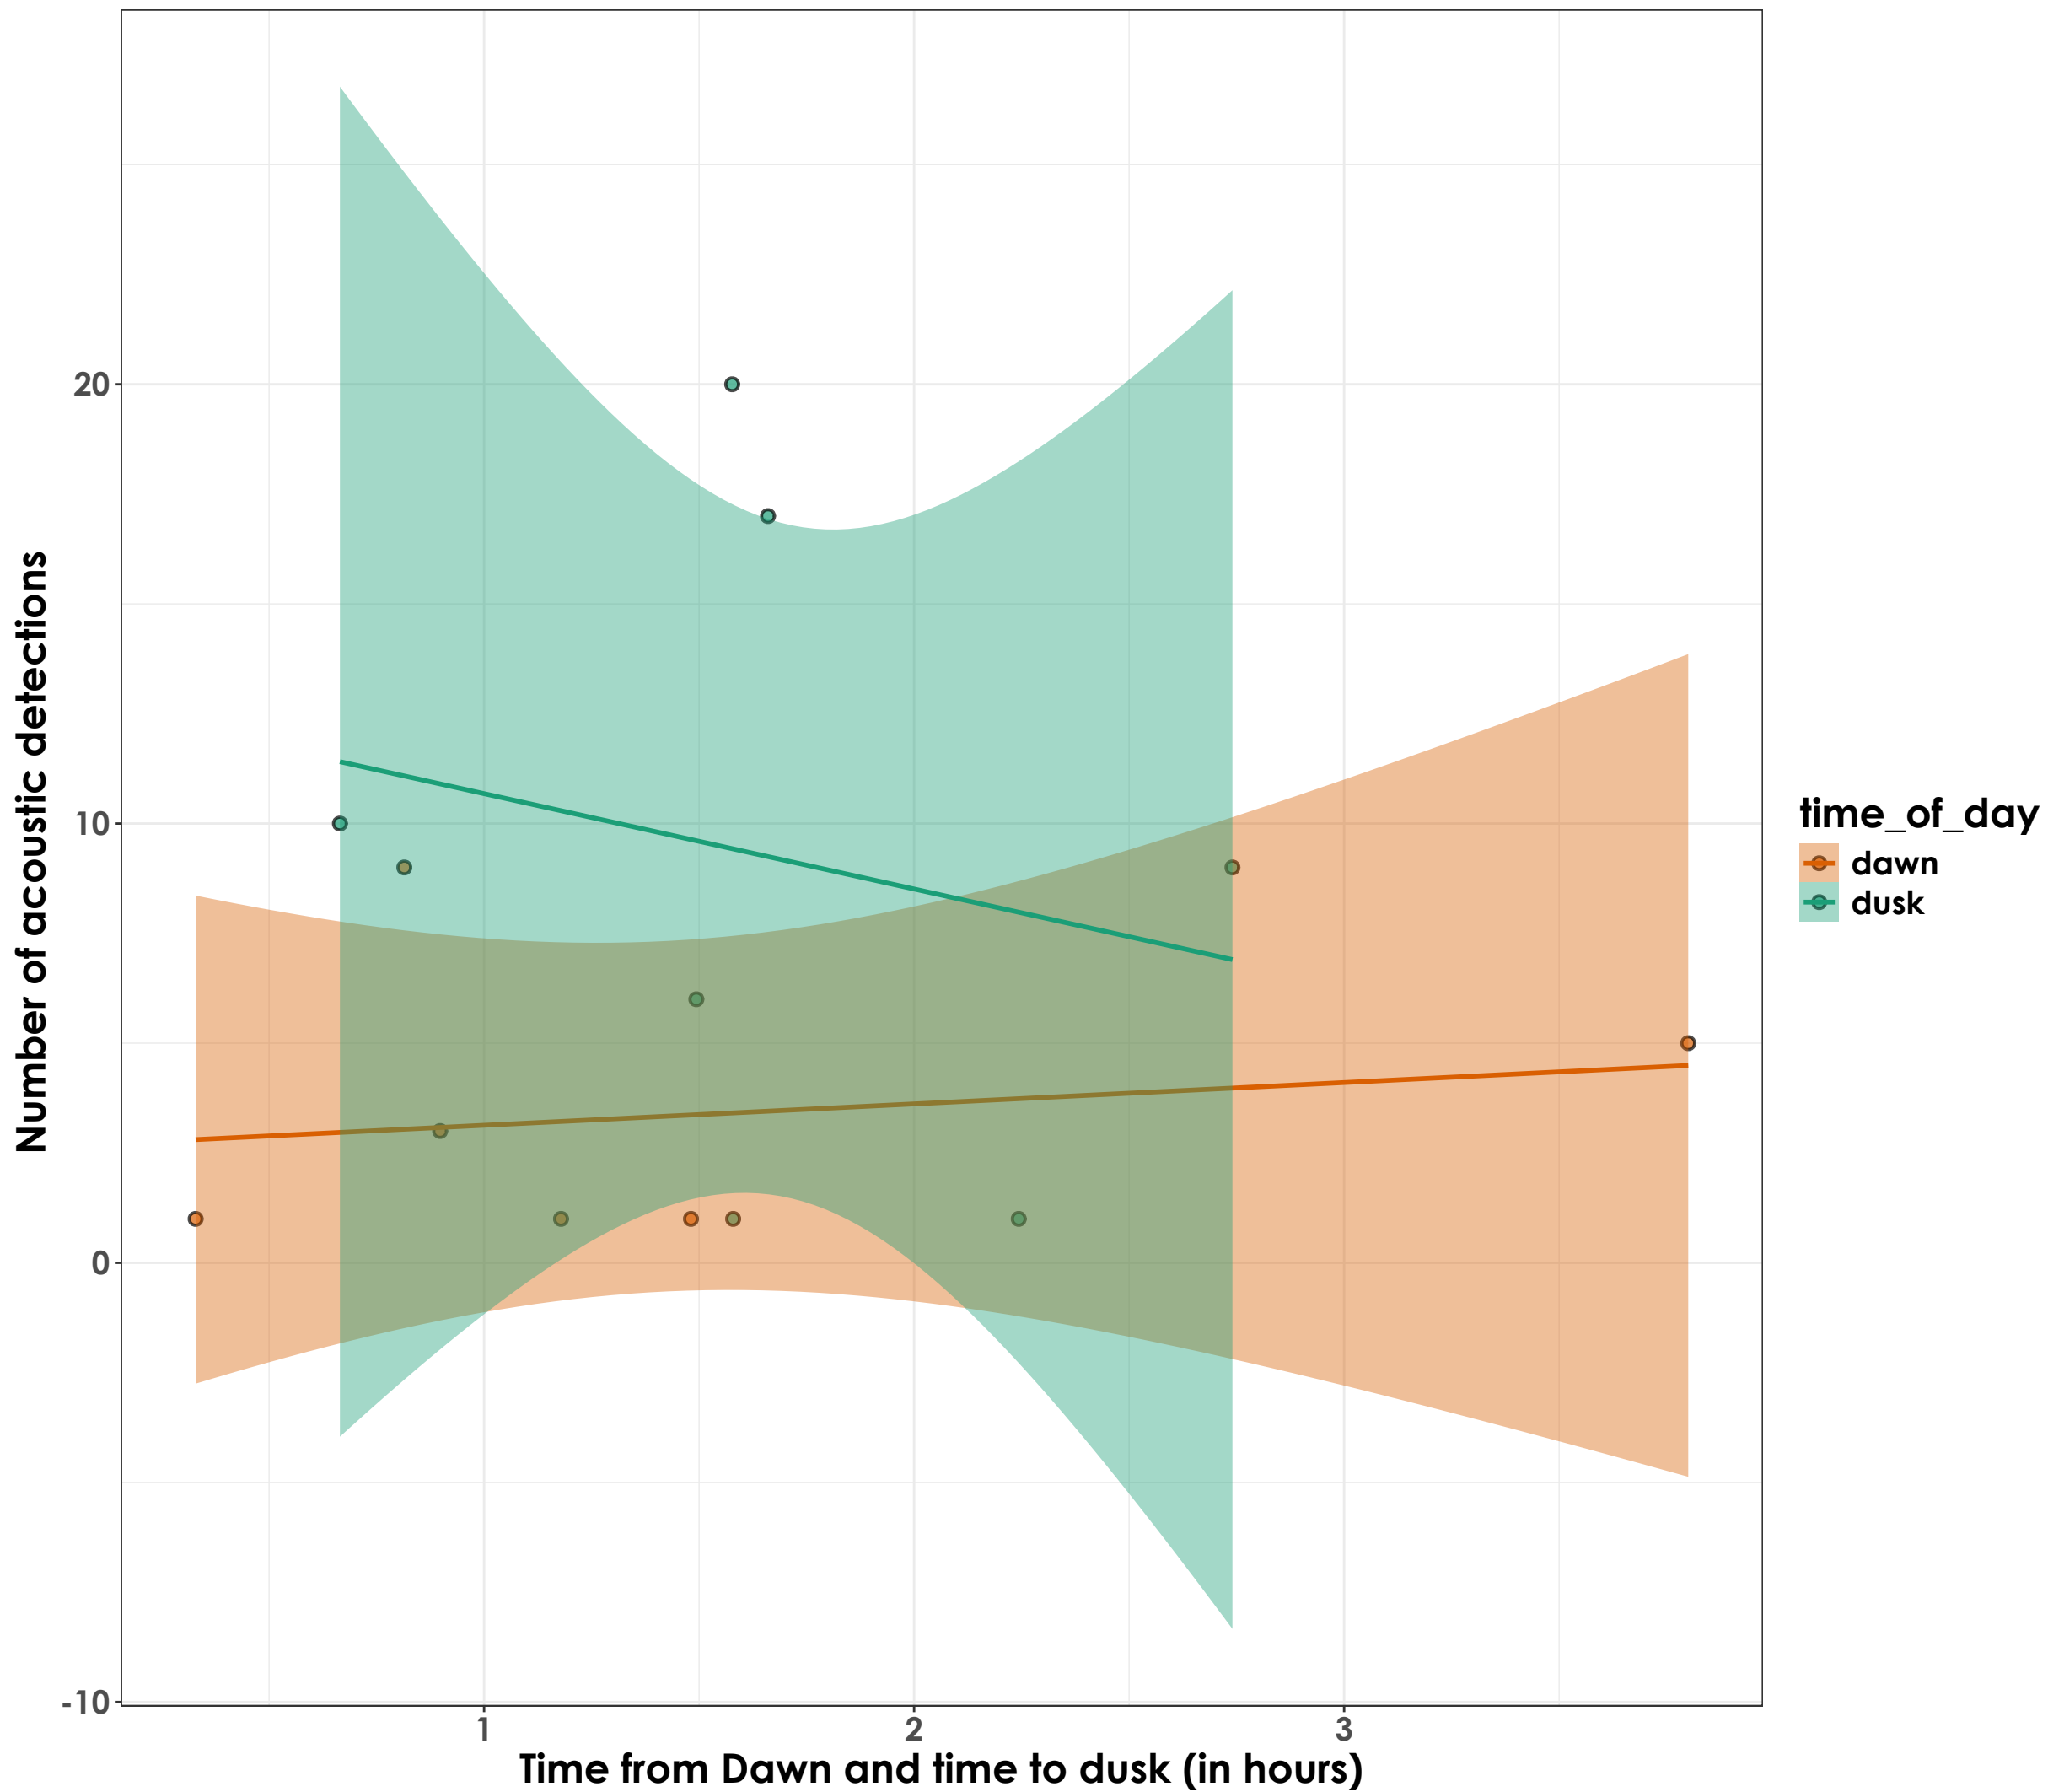

Bar-winged Flycatcher-shrike

Each dot represents the total number of detections after dawn or before dusk (in hours)

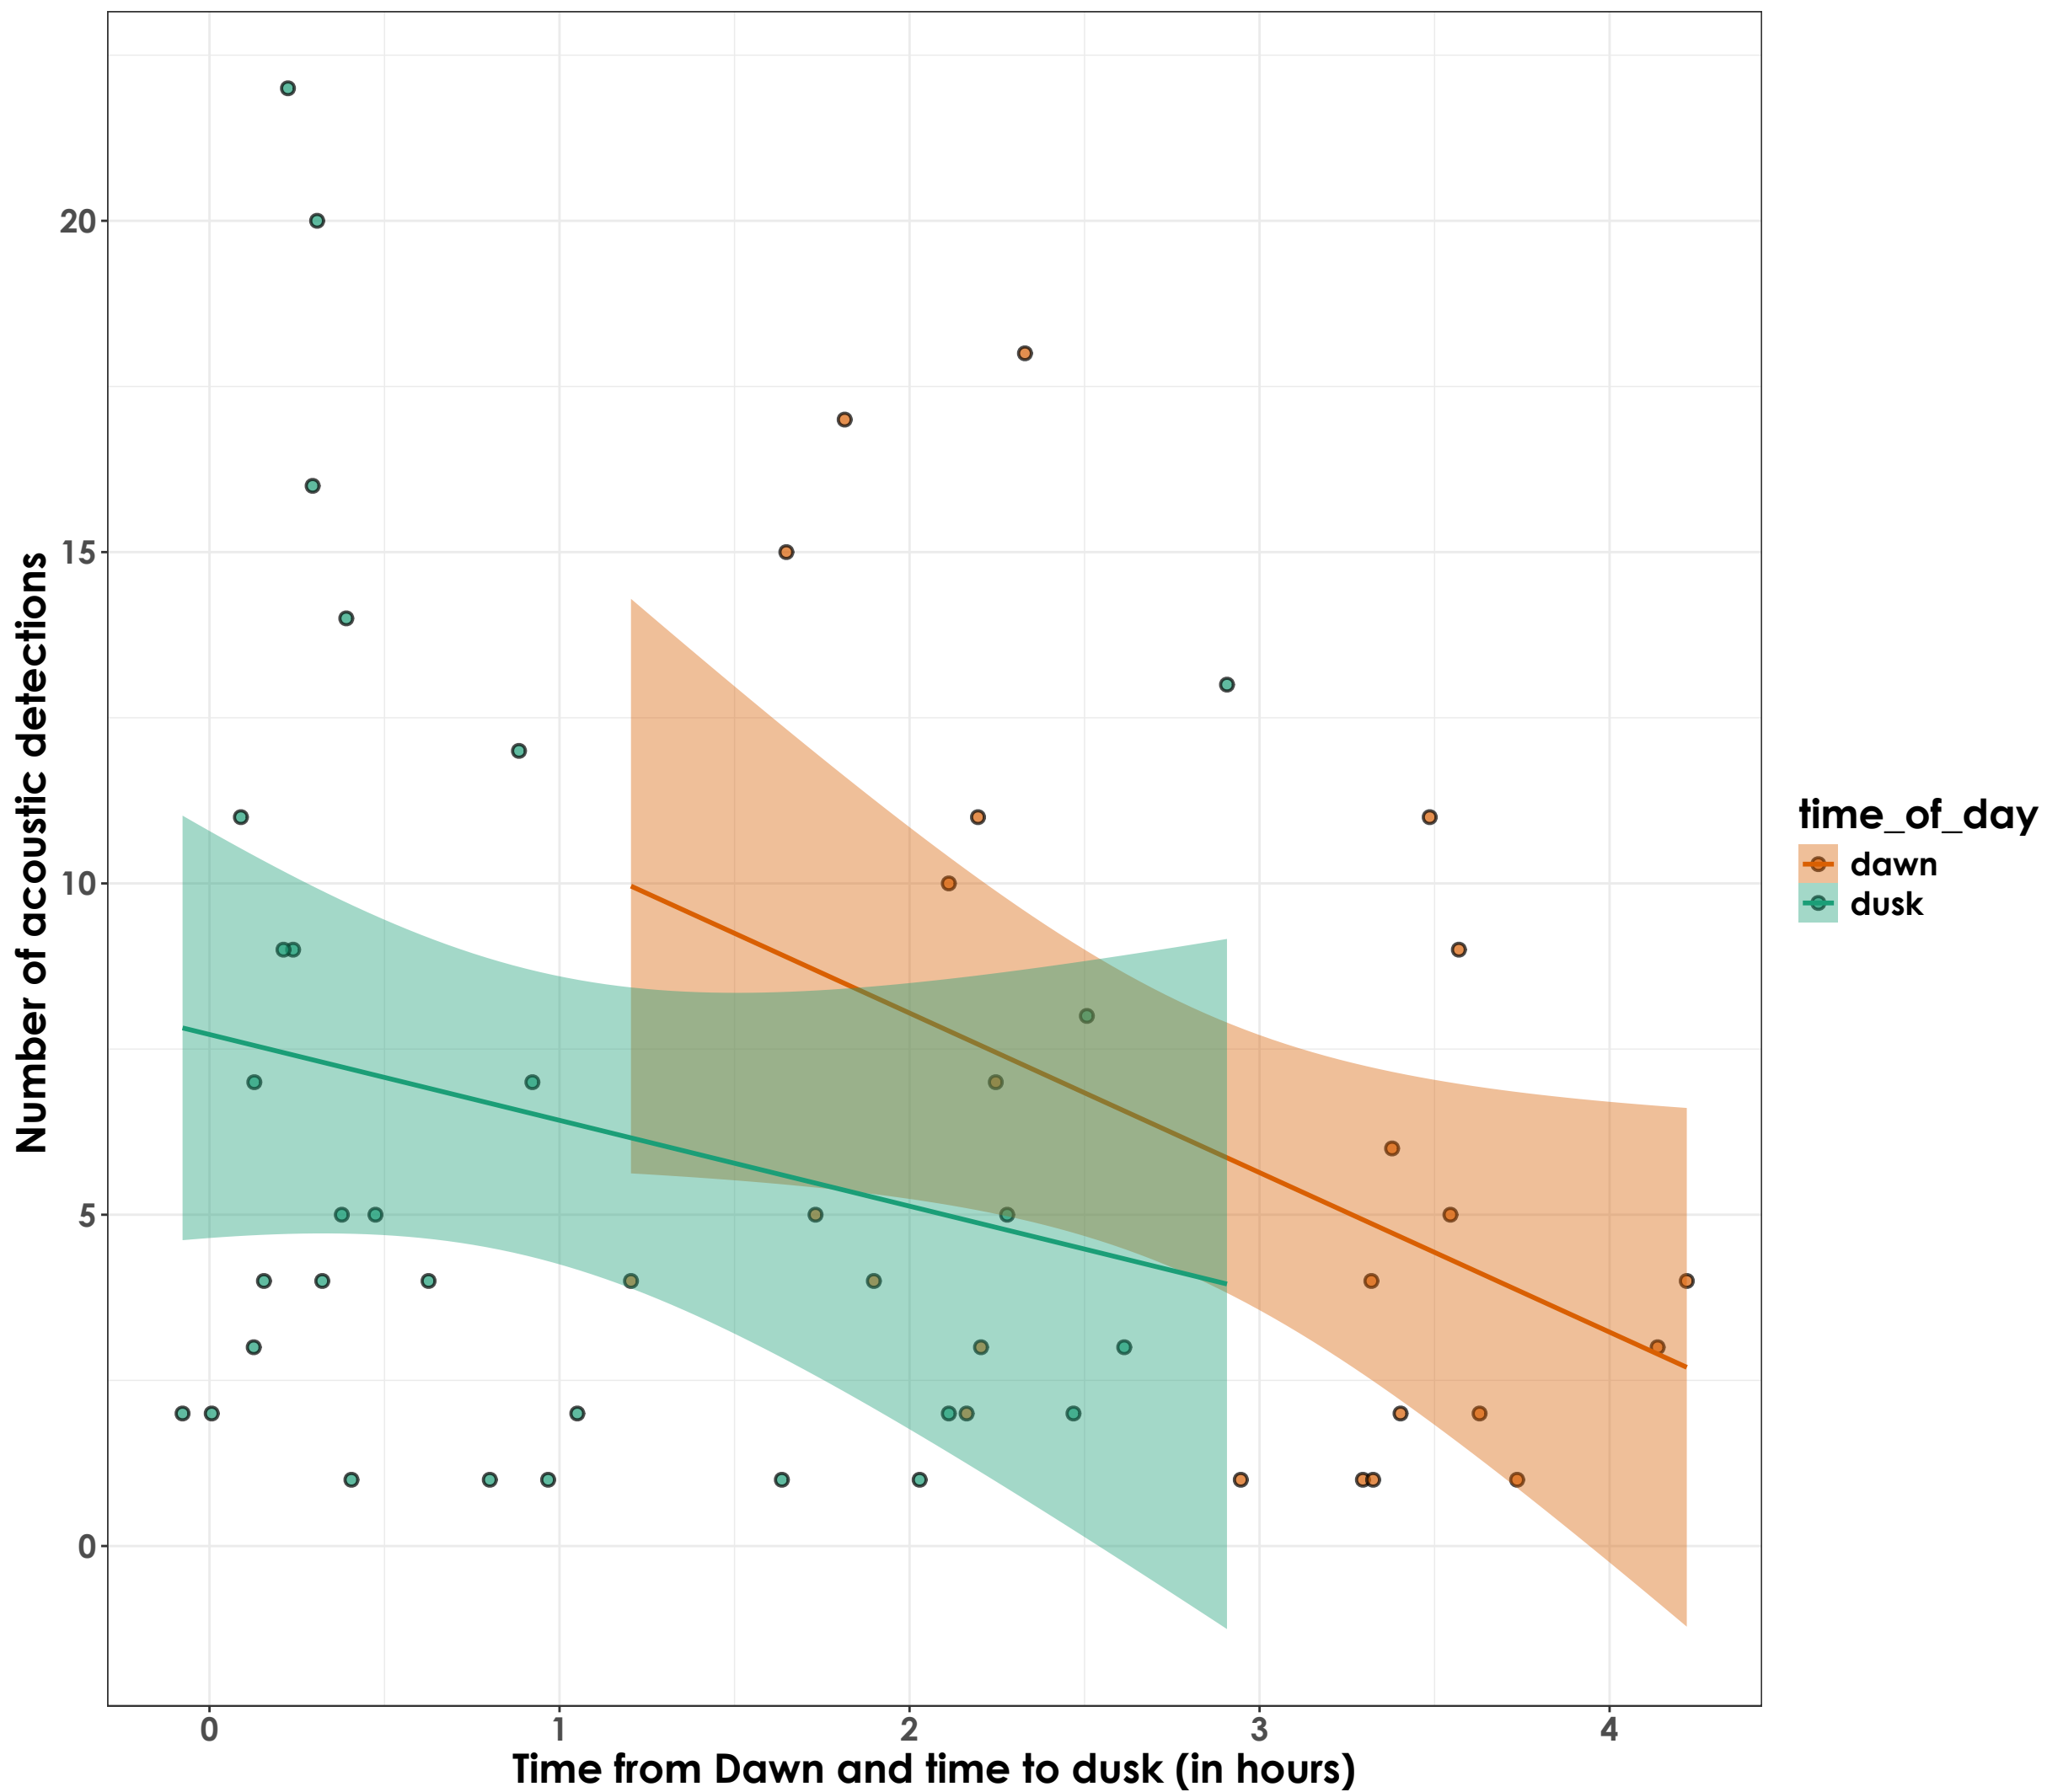

Wayanad Laughingthrush

Each dot represents the total number of detections after dawn or before dusk (in hours)

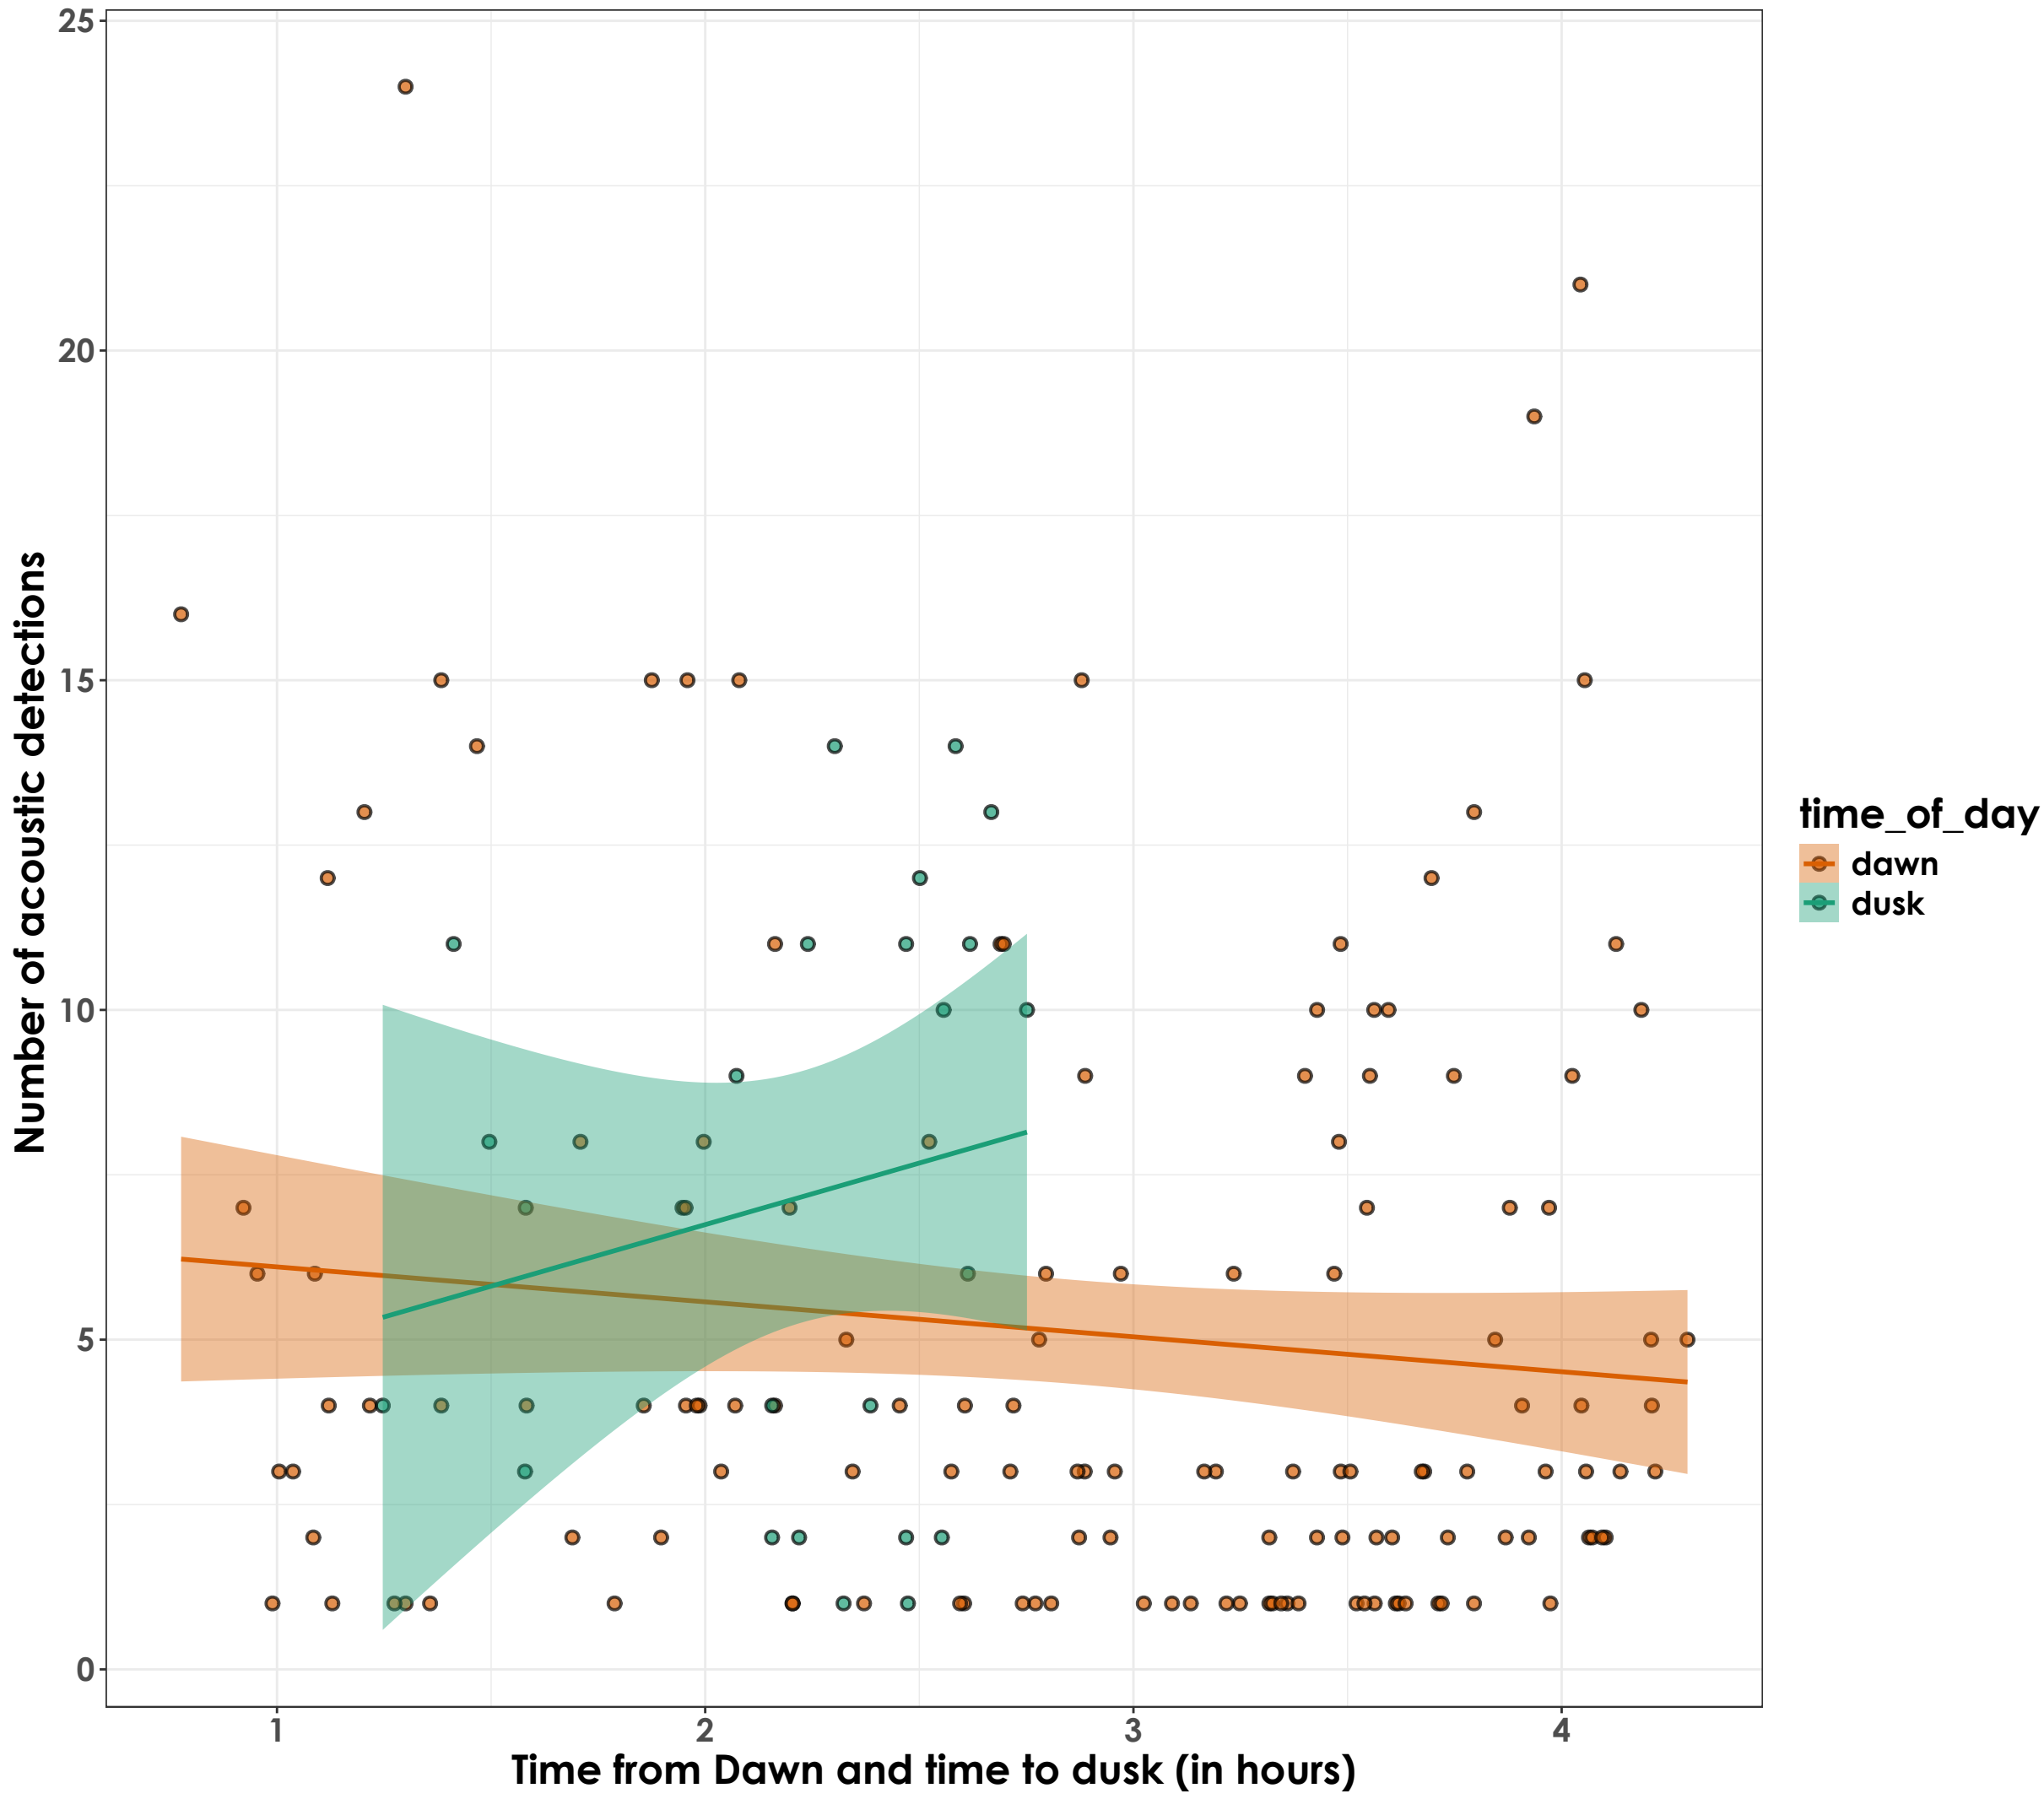

Black-and-orange Flycatcher

Each dot represents the total number of detections after dawn or before dusk (in hours)

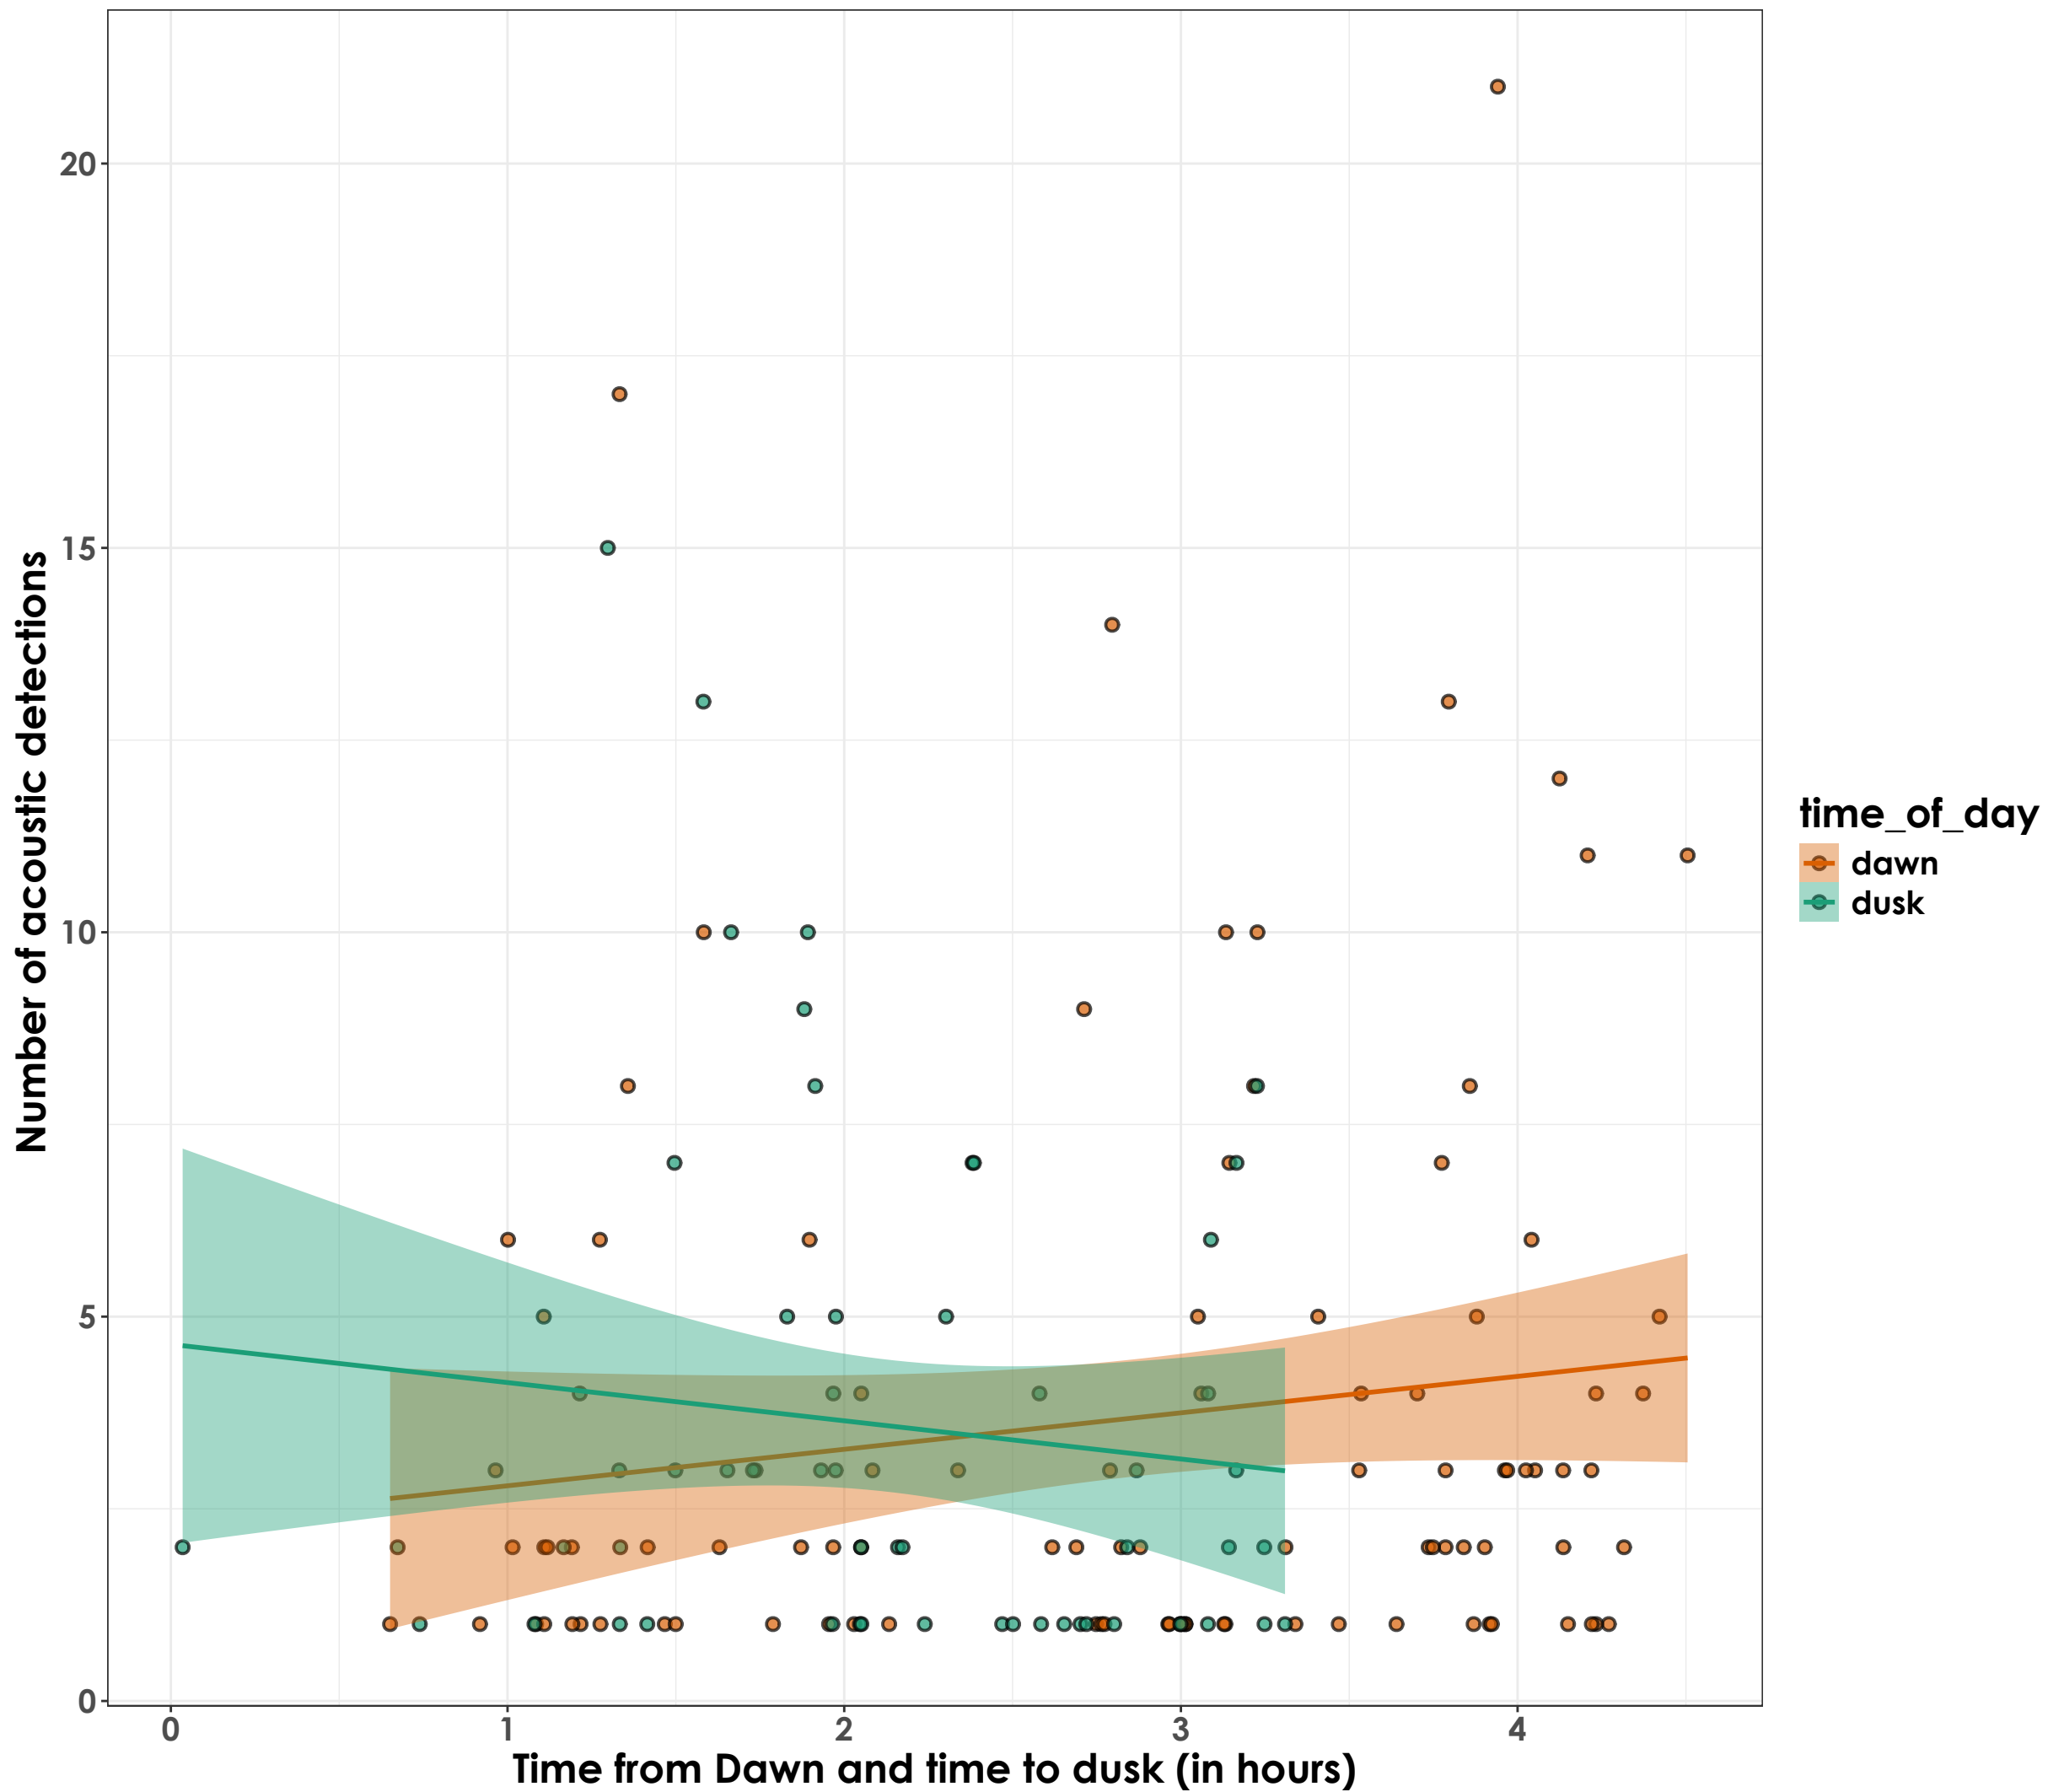

Green Warbler

Each dot represents the total number of detections after dawn or before dusk (in hours)

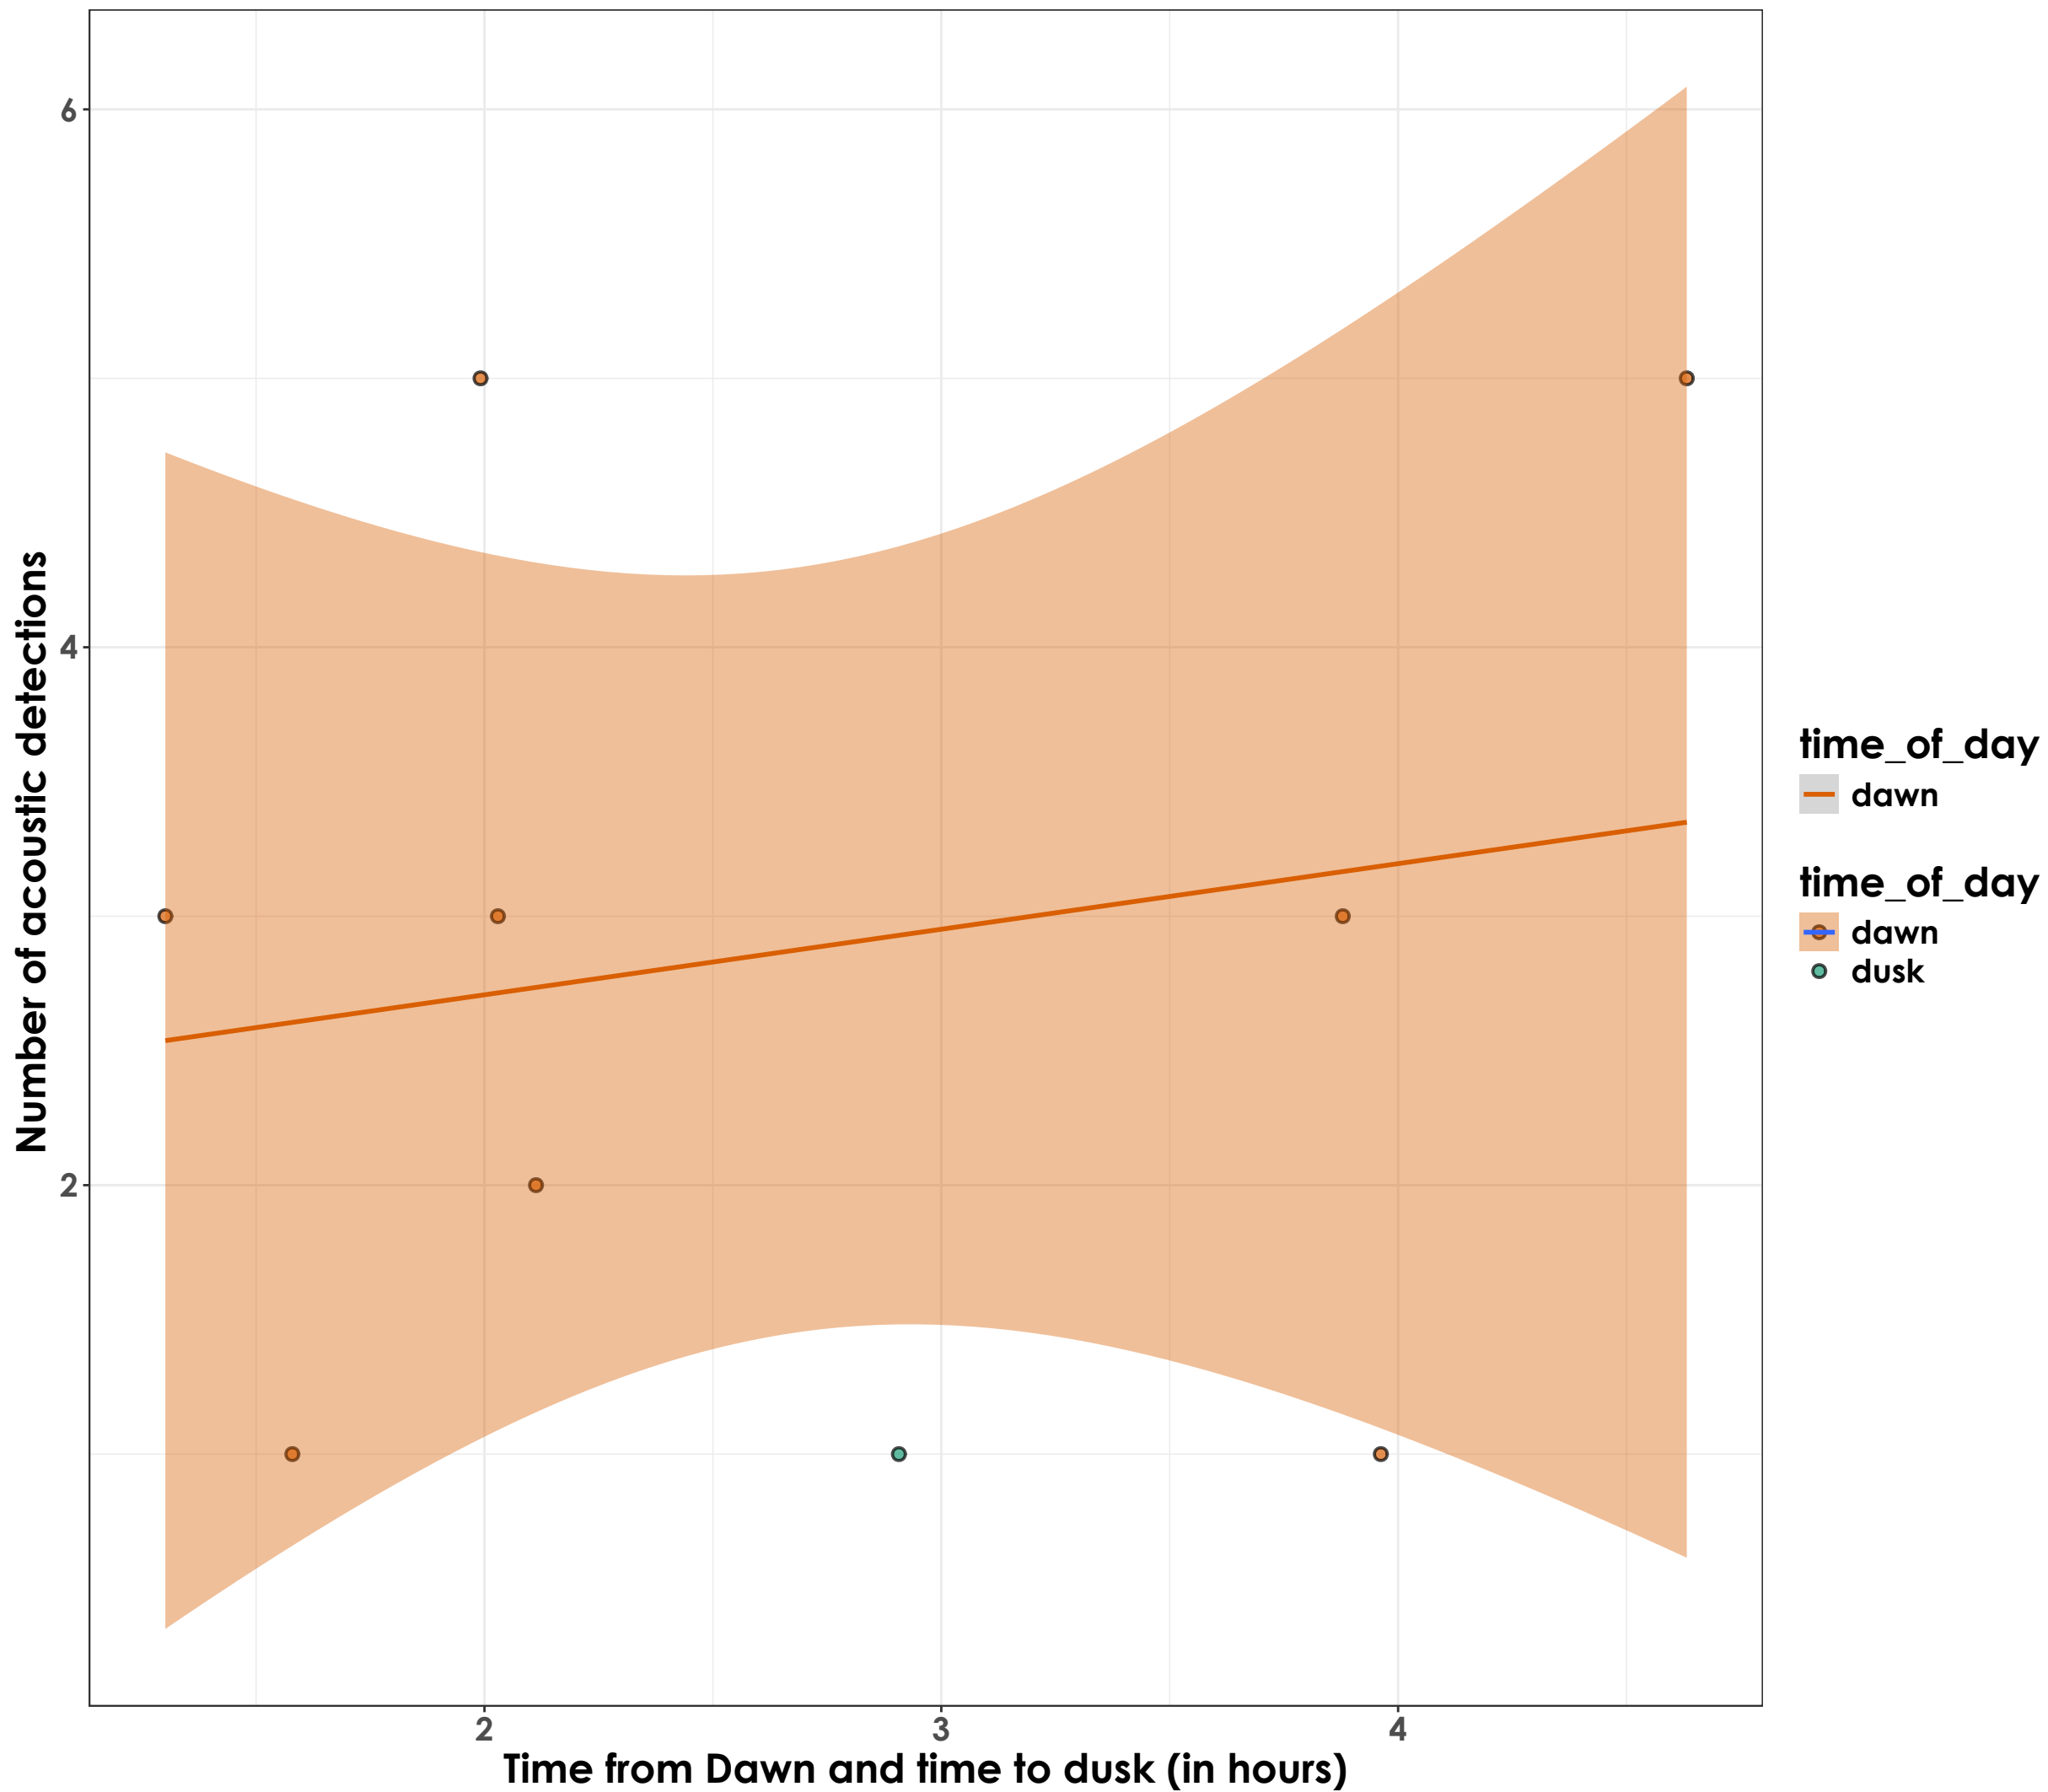

Chestnut-headed Bee-eater

Each dot represents the total number of detections after dawn or before dusk (in hours)

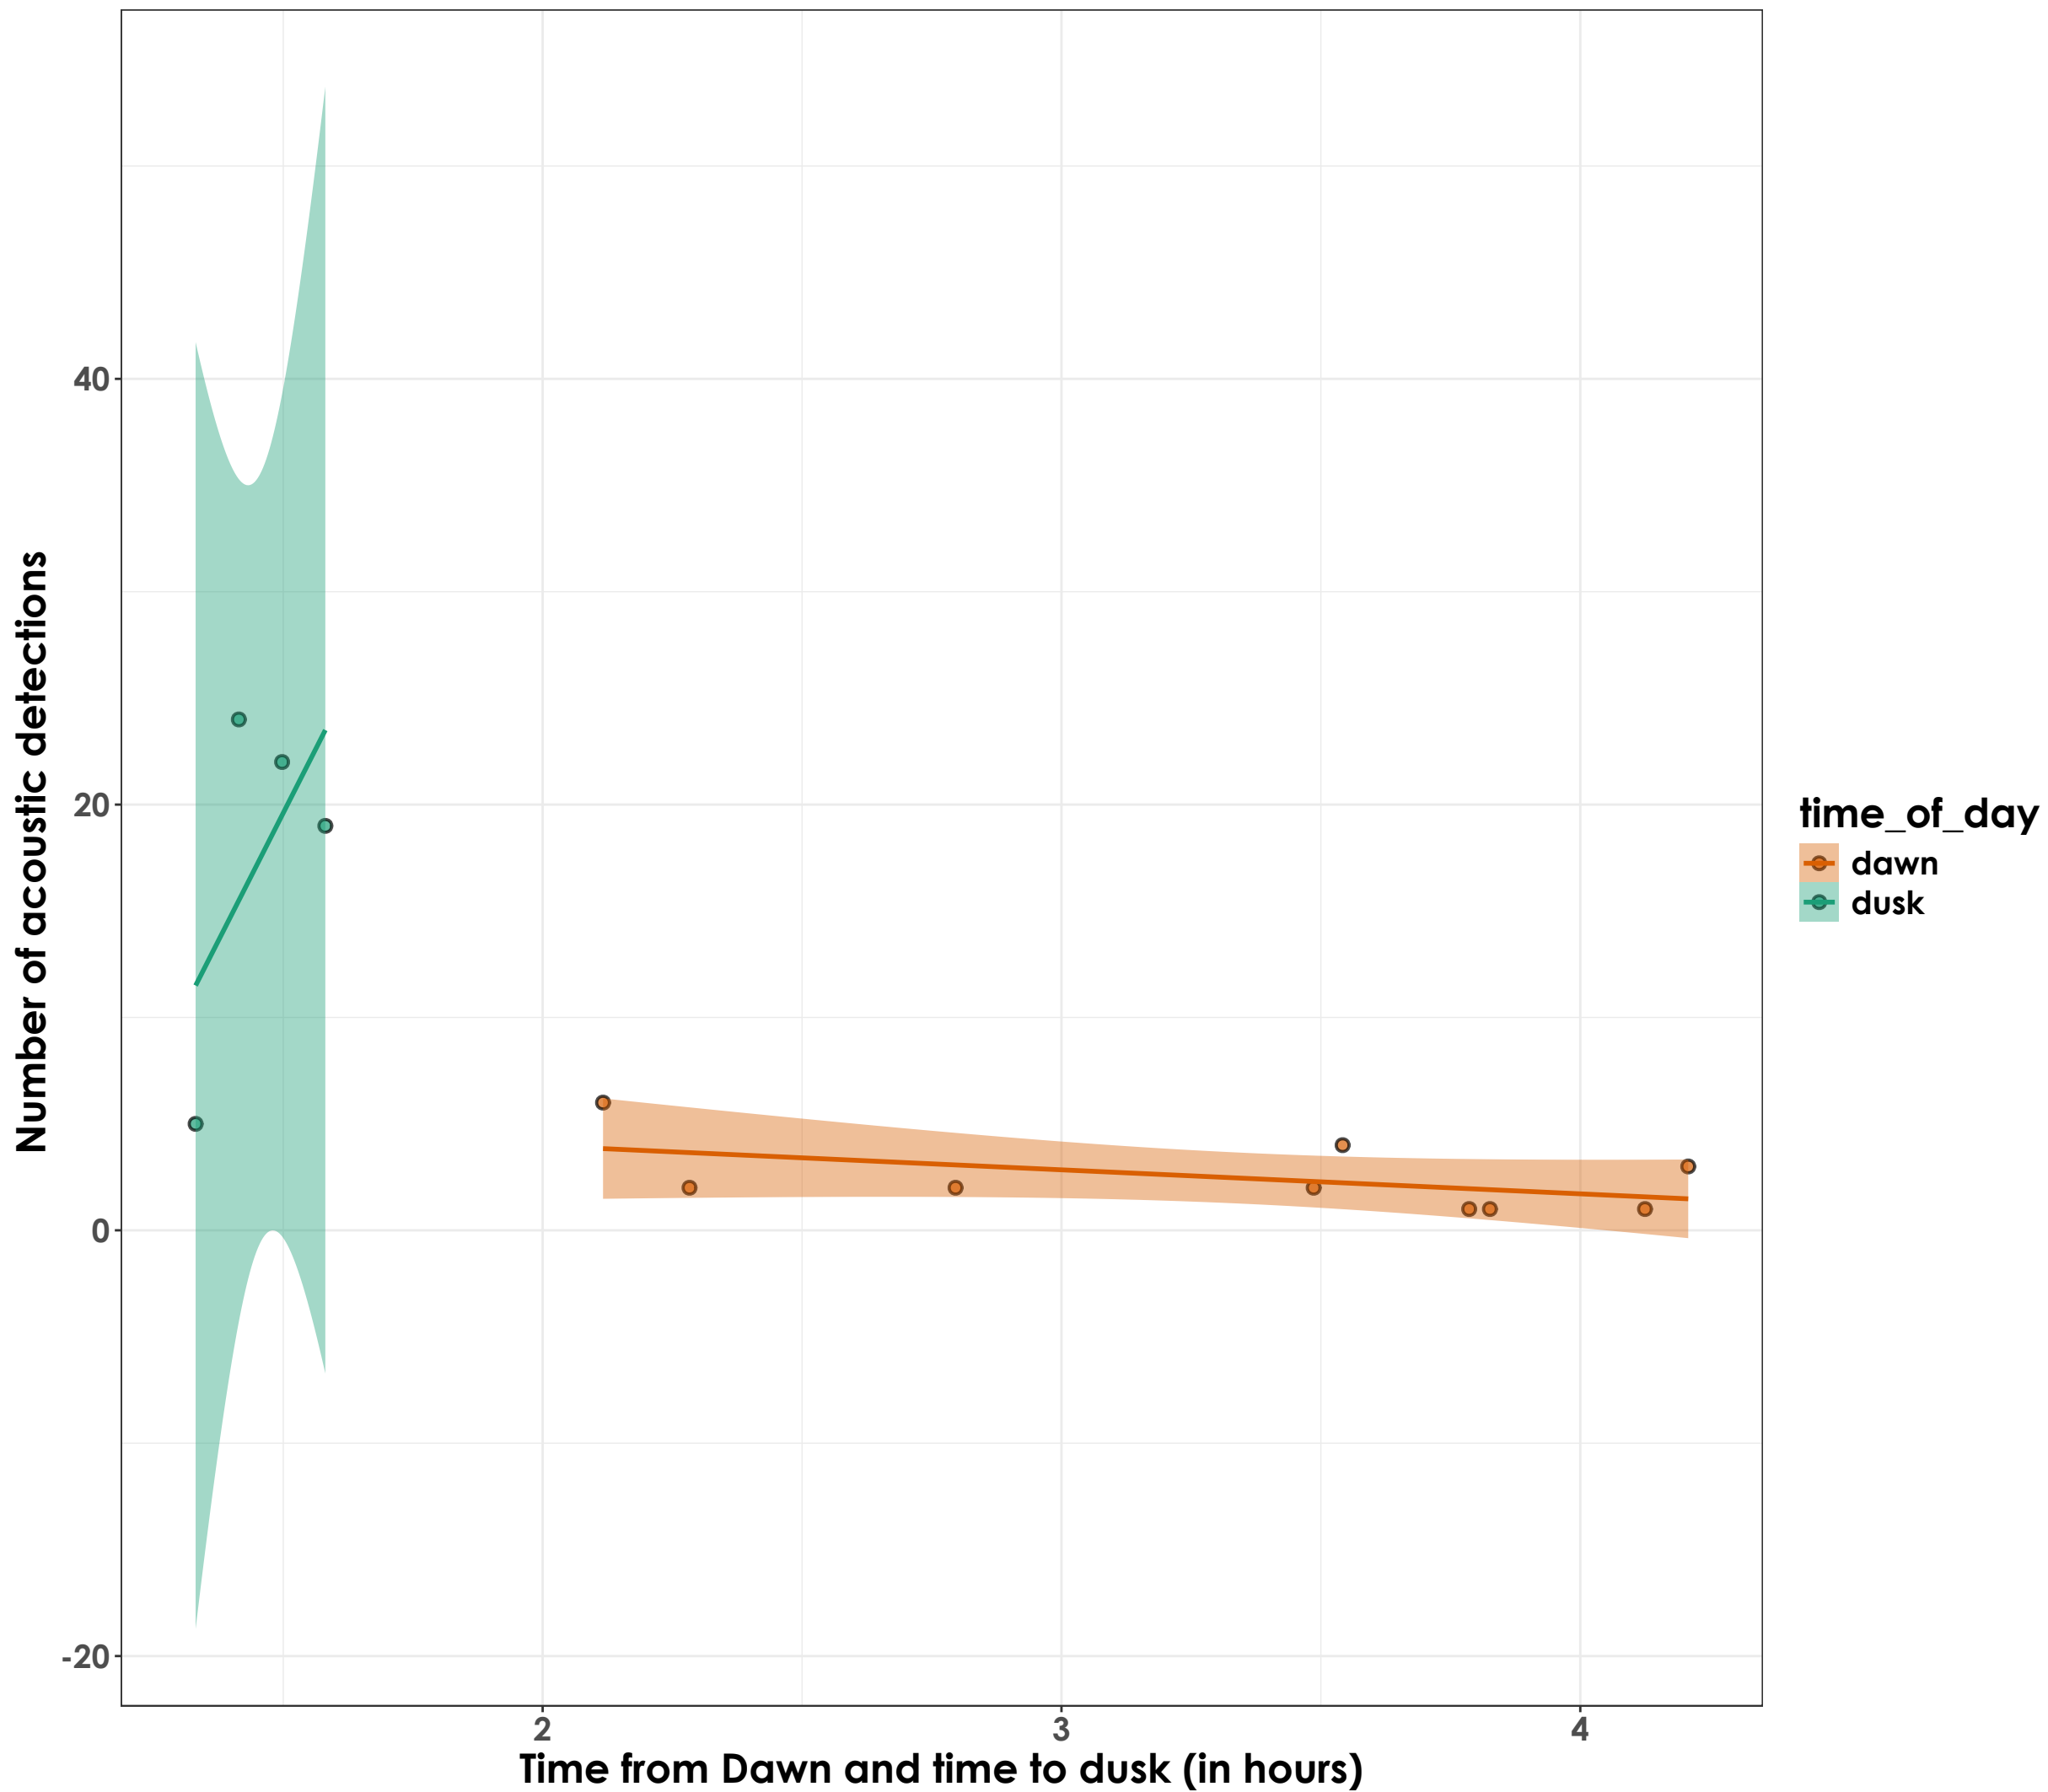

Tickell's Blue Flycatcher

Each dot represents the total number of detections after dawn or before dusk (in hours)

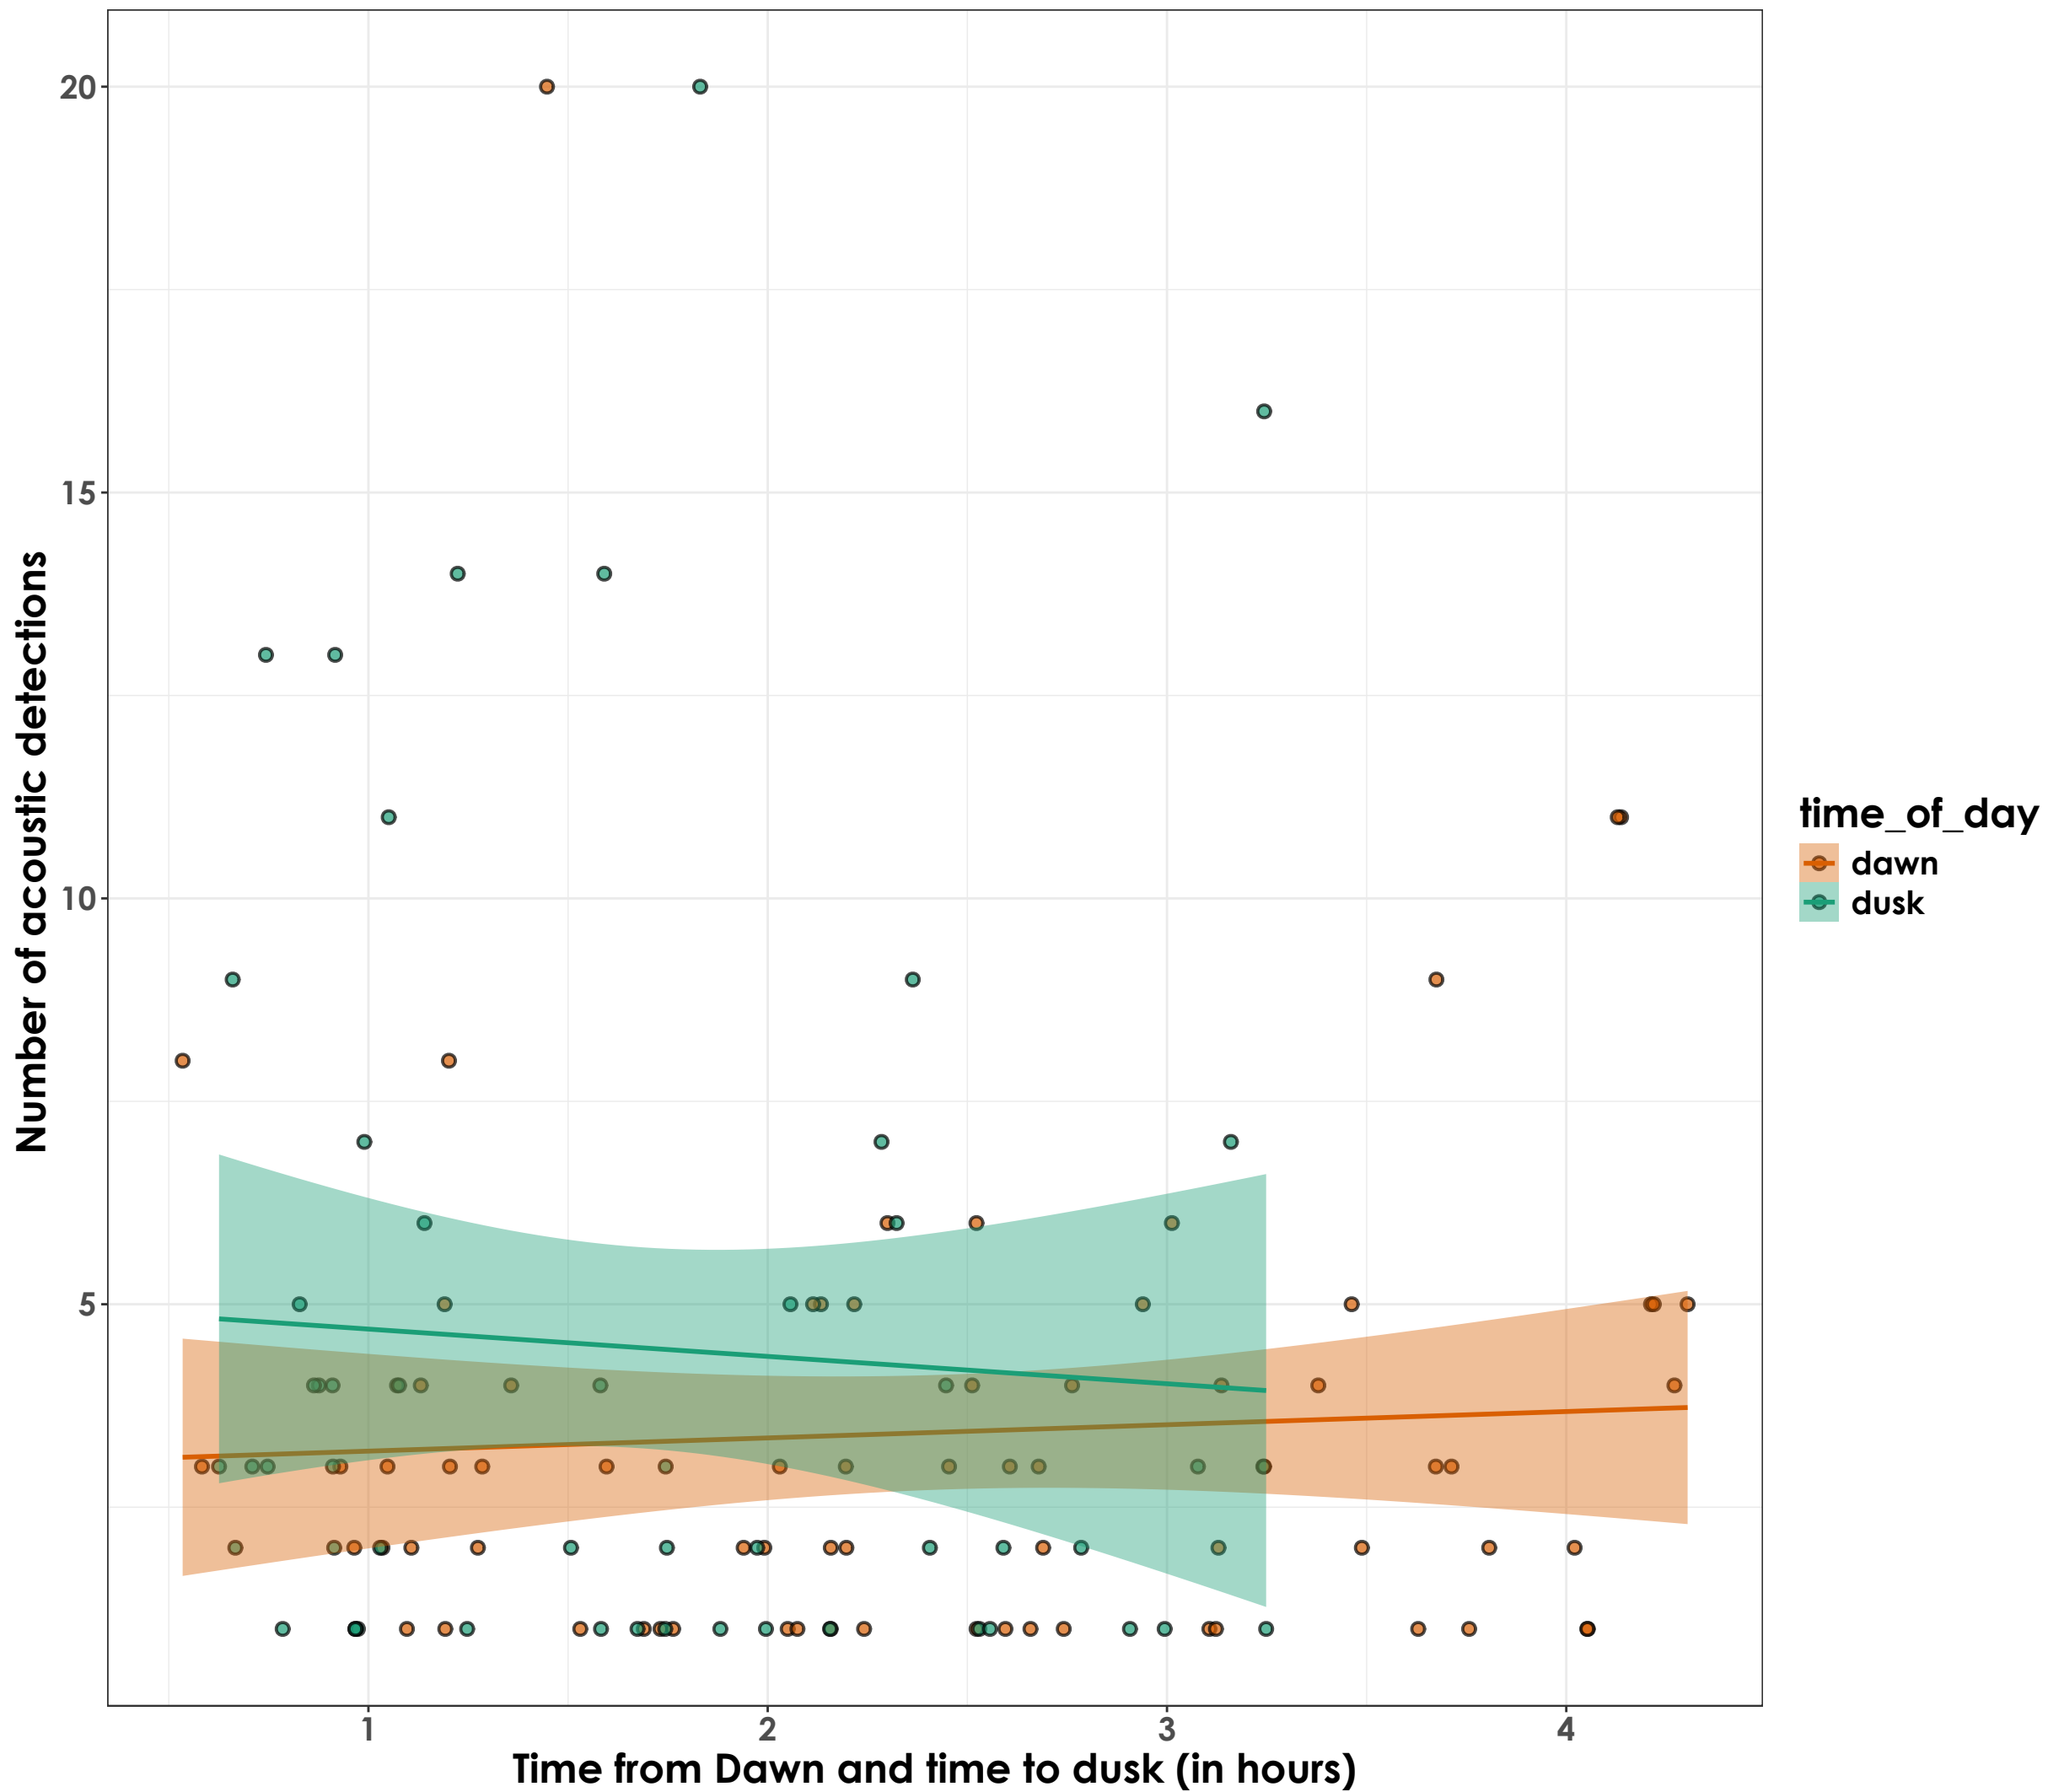

Brown-capped Pygmy Woodpecker

Each dot represents the total number of detections after dawn or before dusk (in hours)

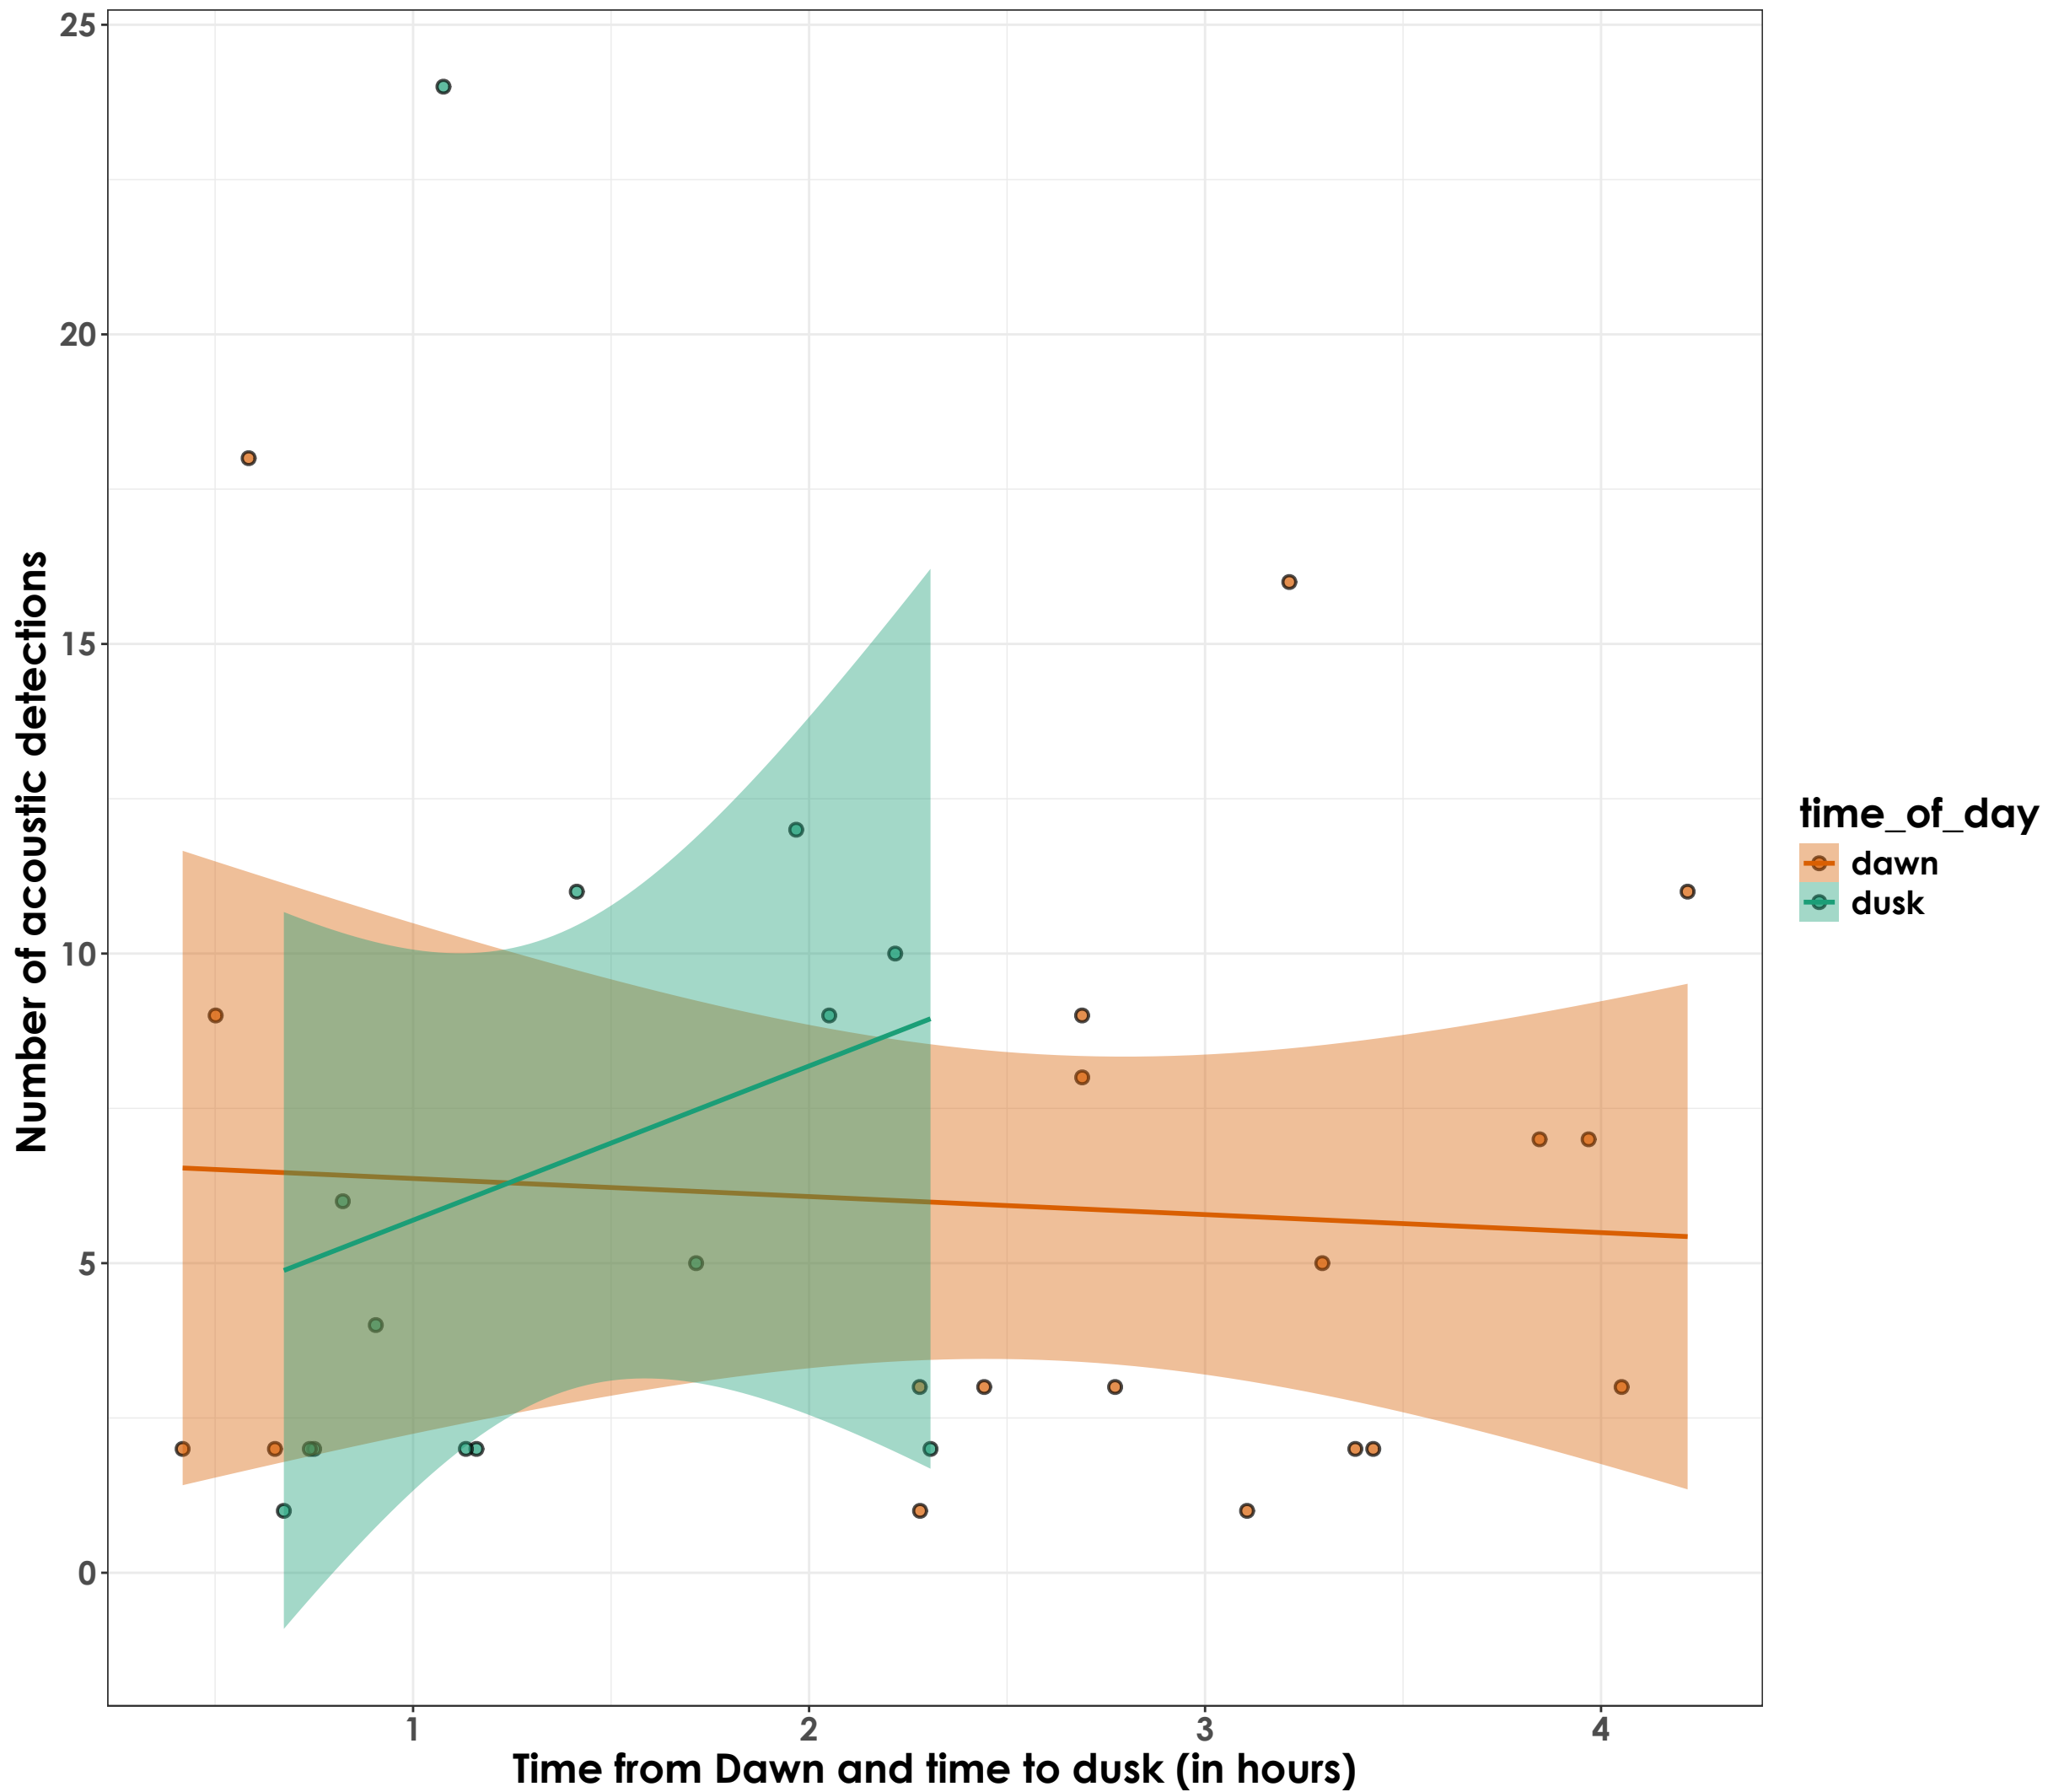

Indian Blue Robin

Each dot represents the total number of detections after dawn or before dusk (in hours)

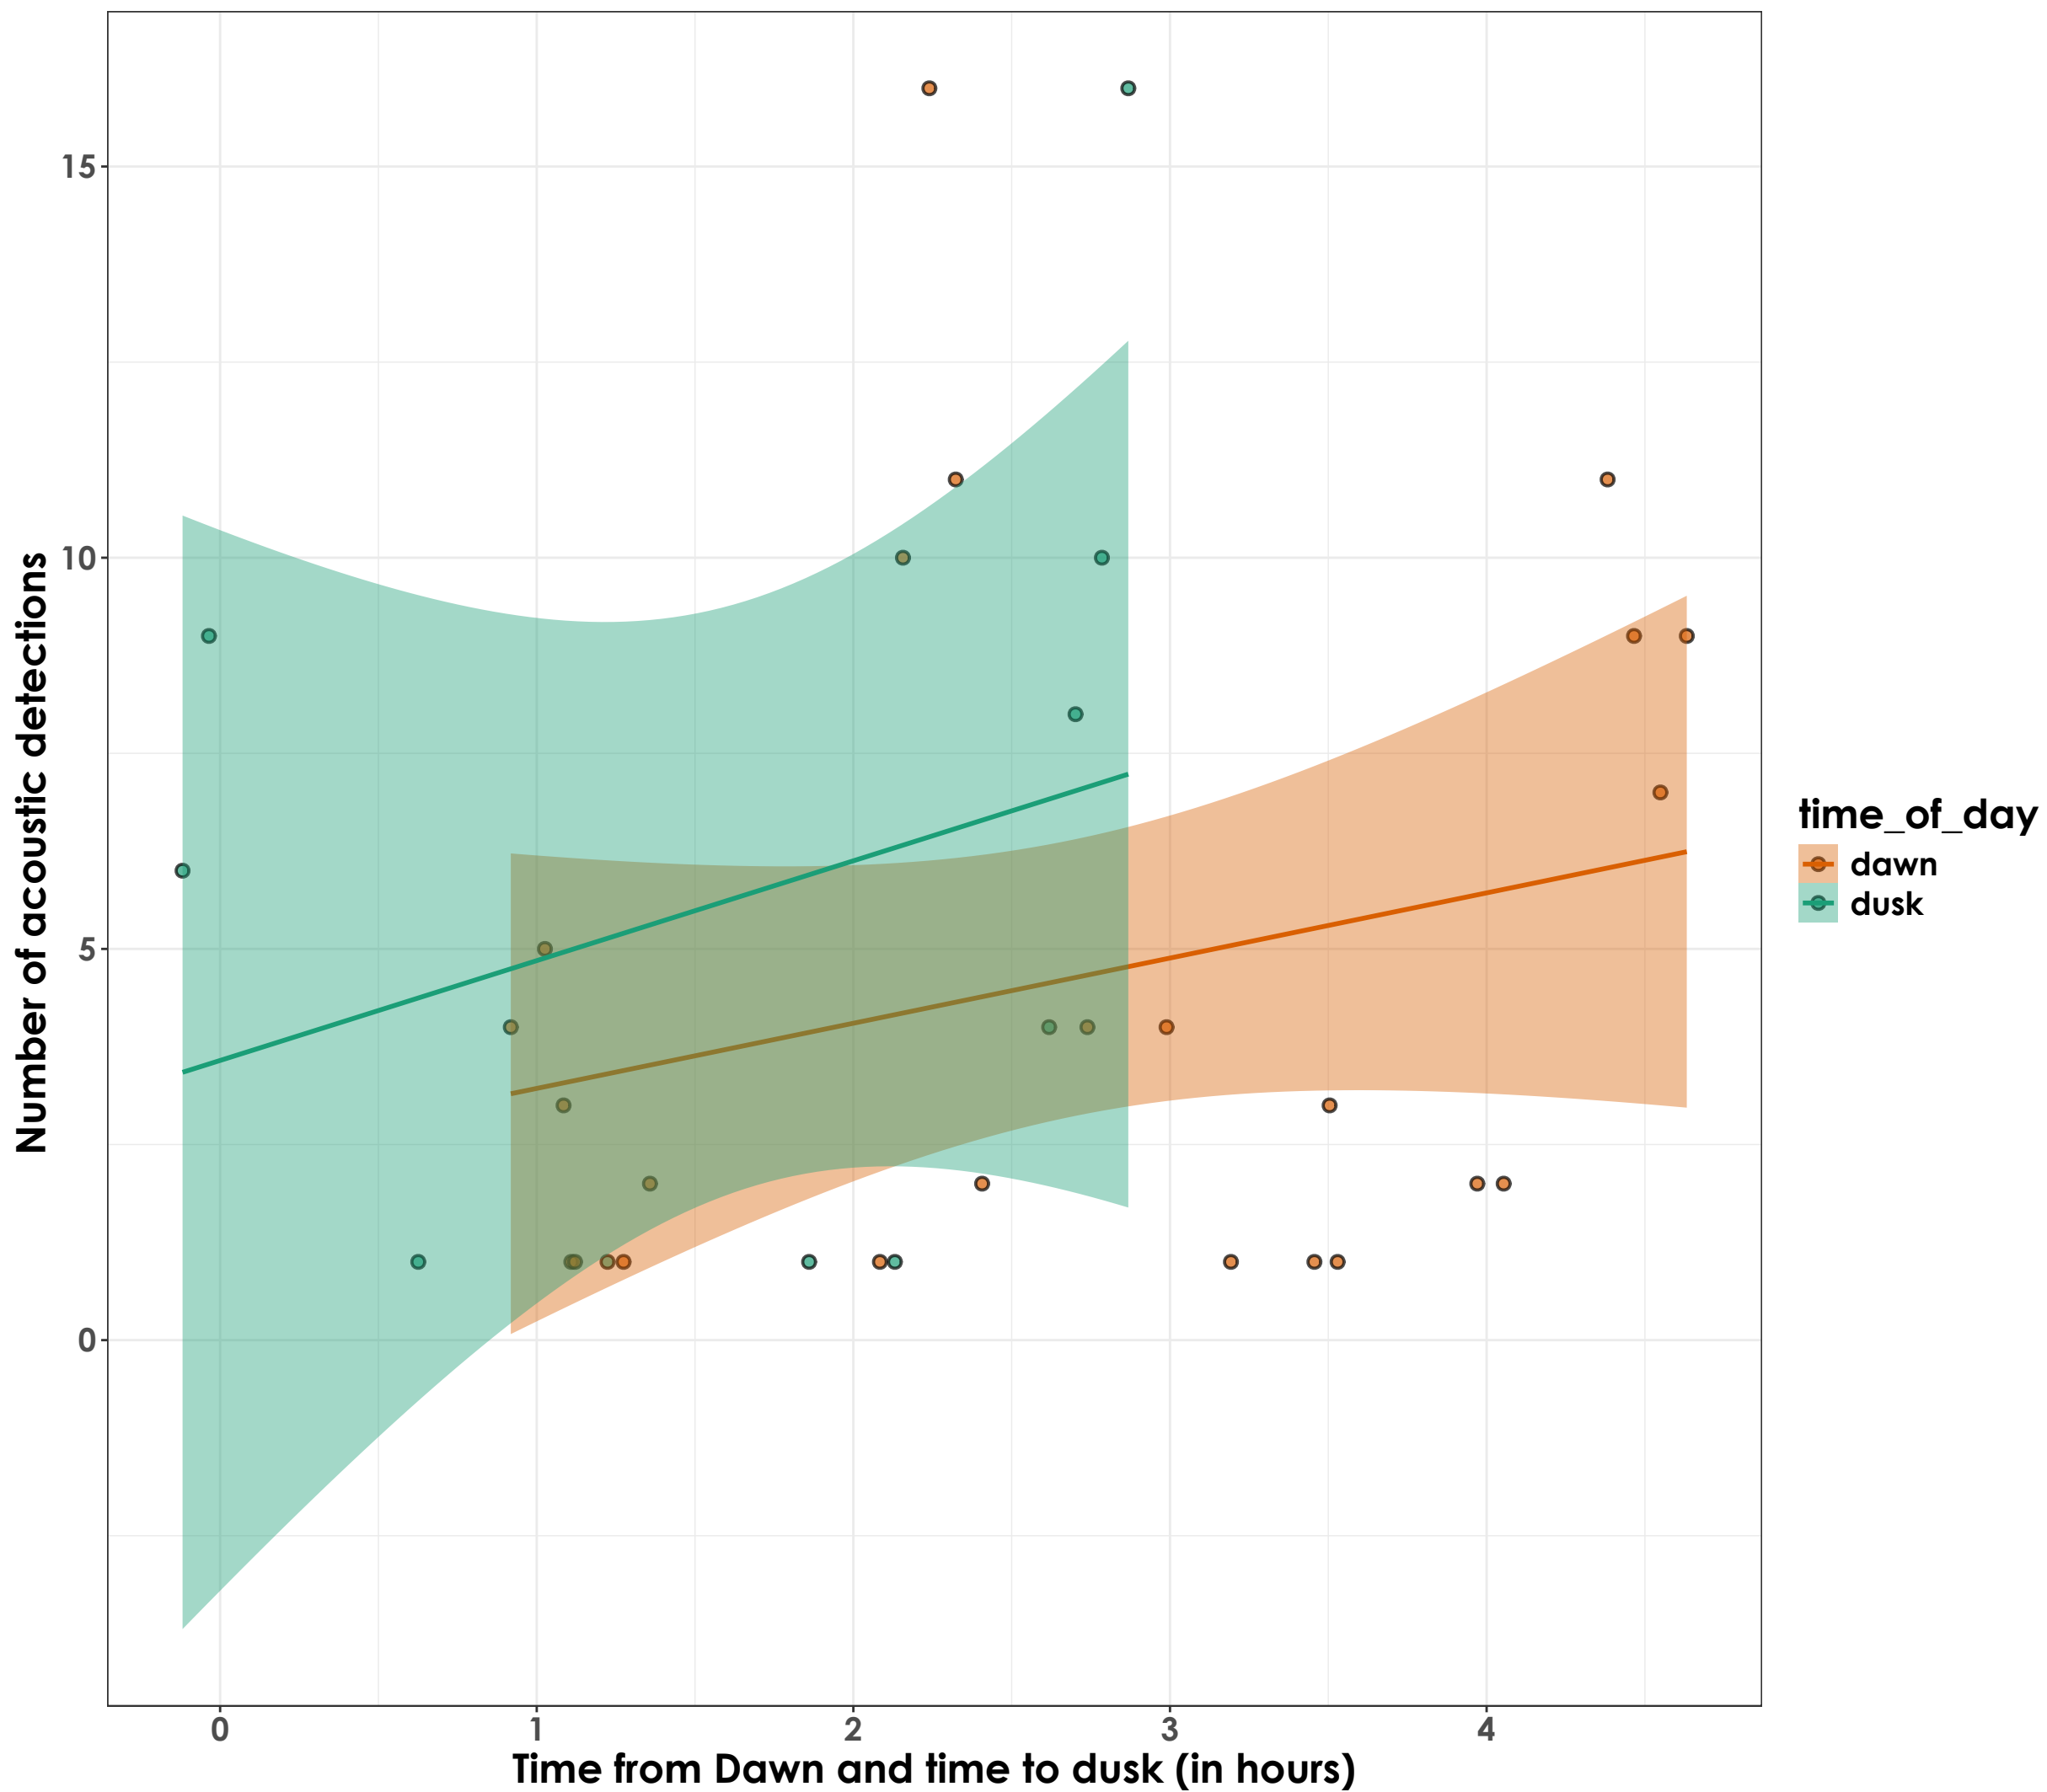

Asian Brown Flycatcher

Each dot represents the total number of detections after dawn or before dusk (in hours)

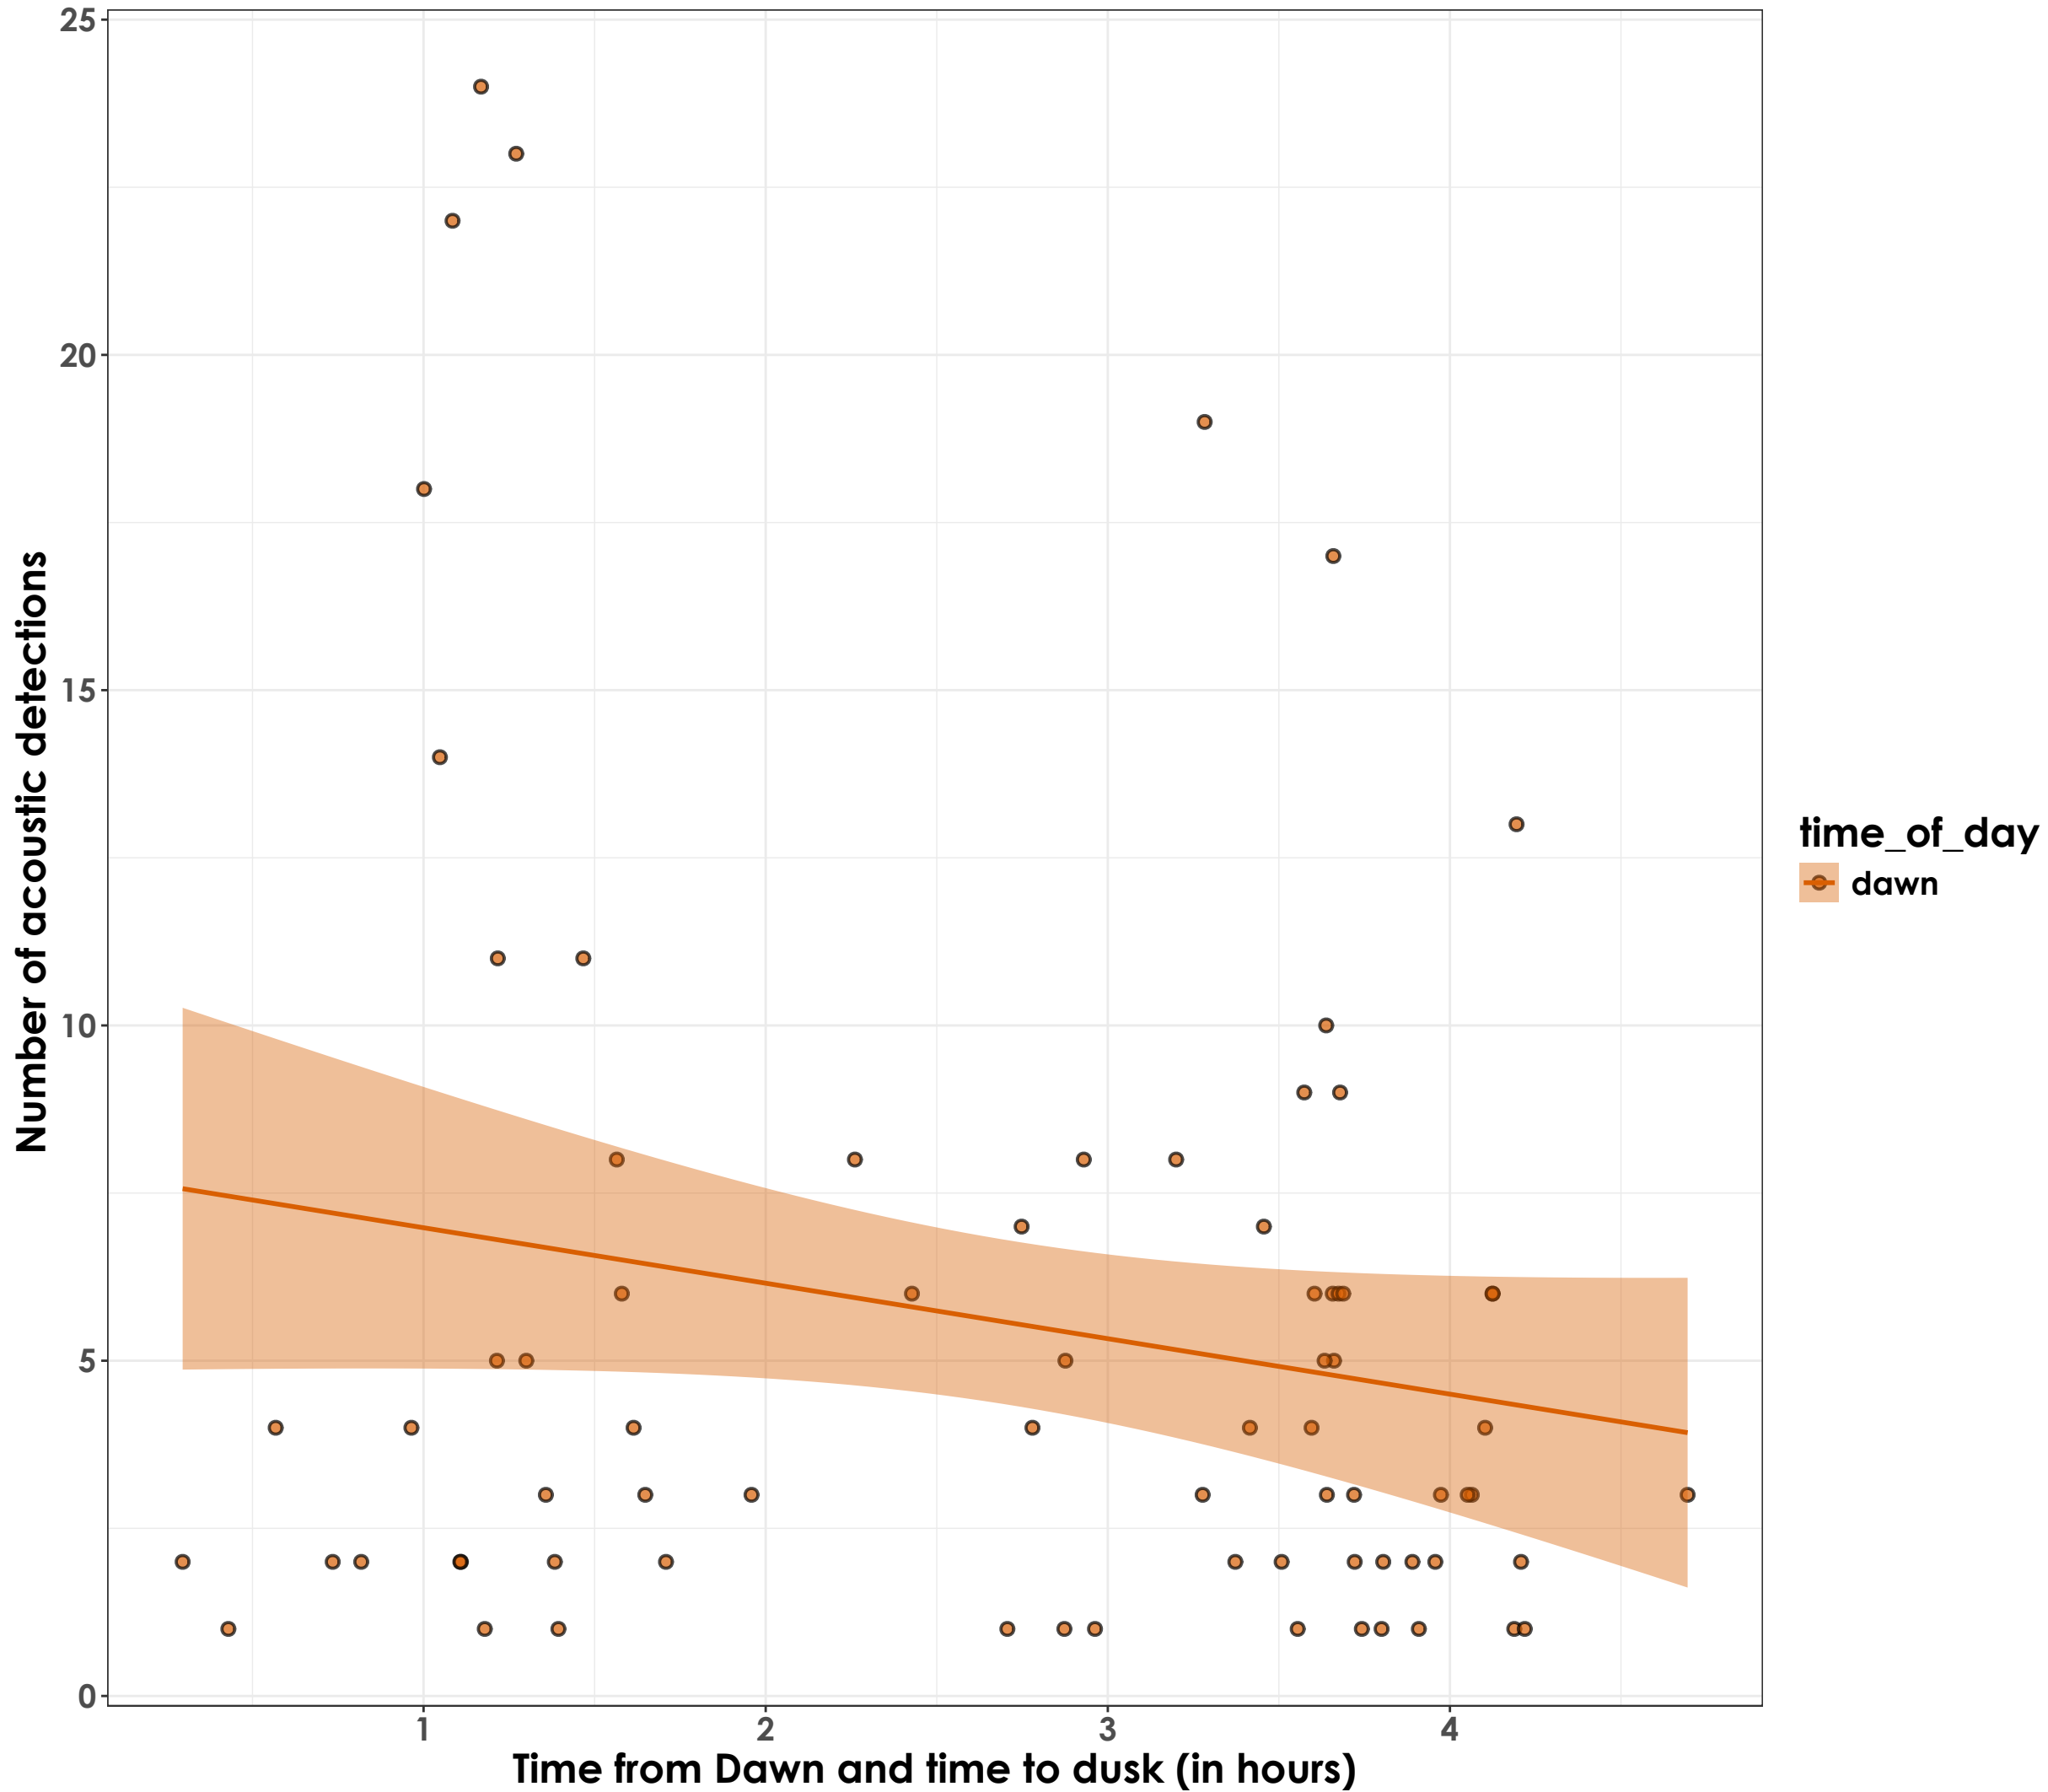

Jungle Babbler

Each dot represents the total number of detections after dawn or before dusk (in hours)

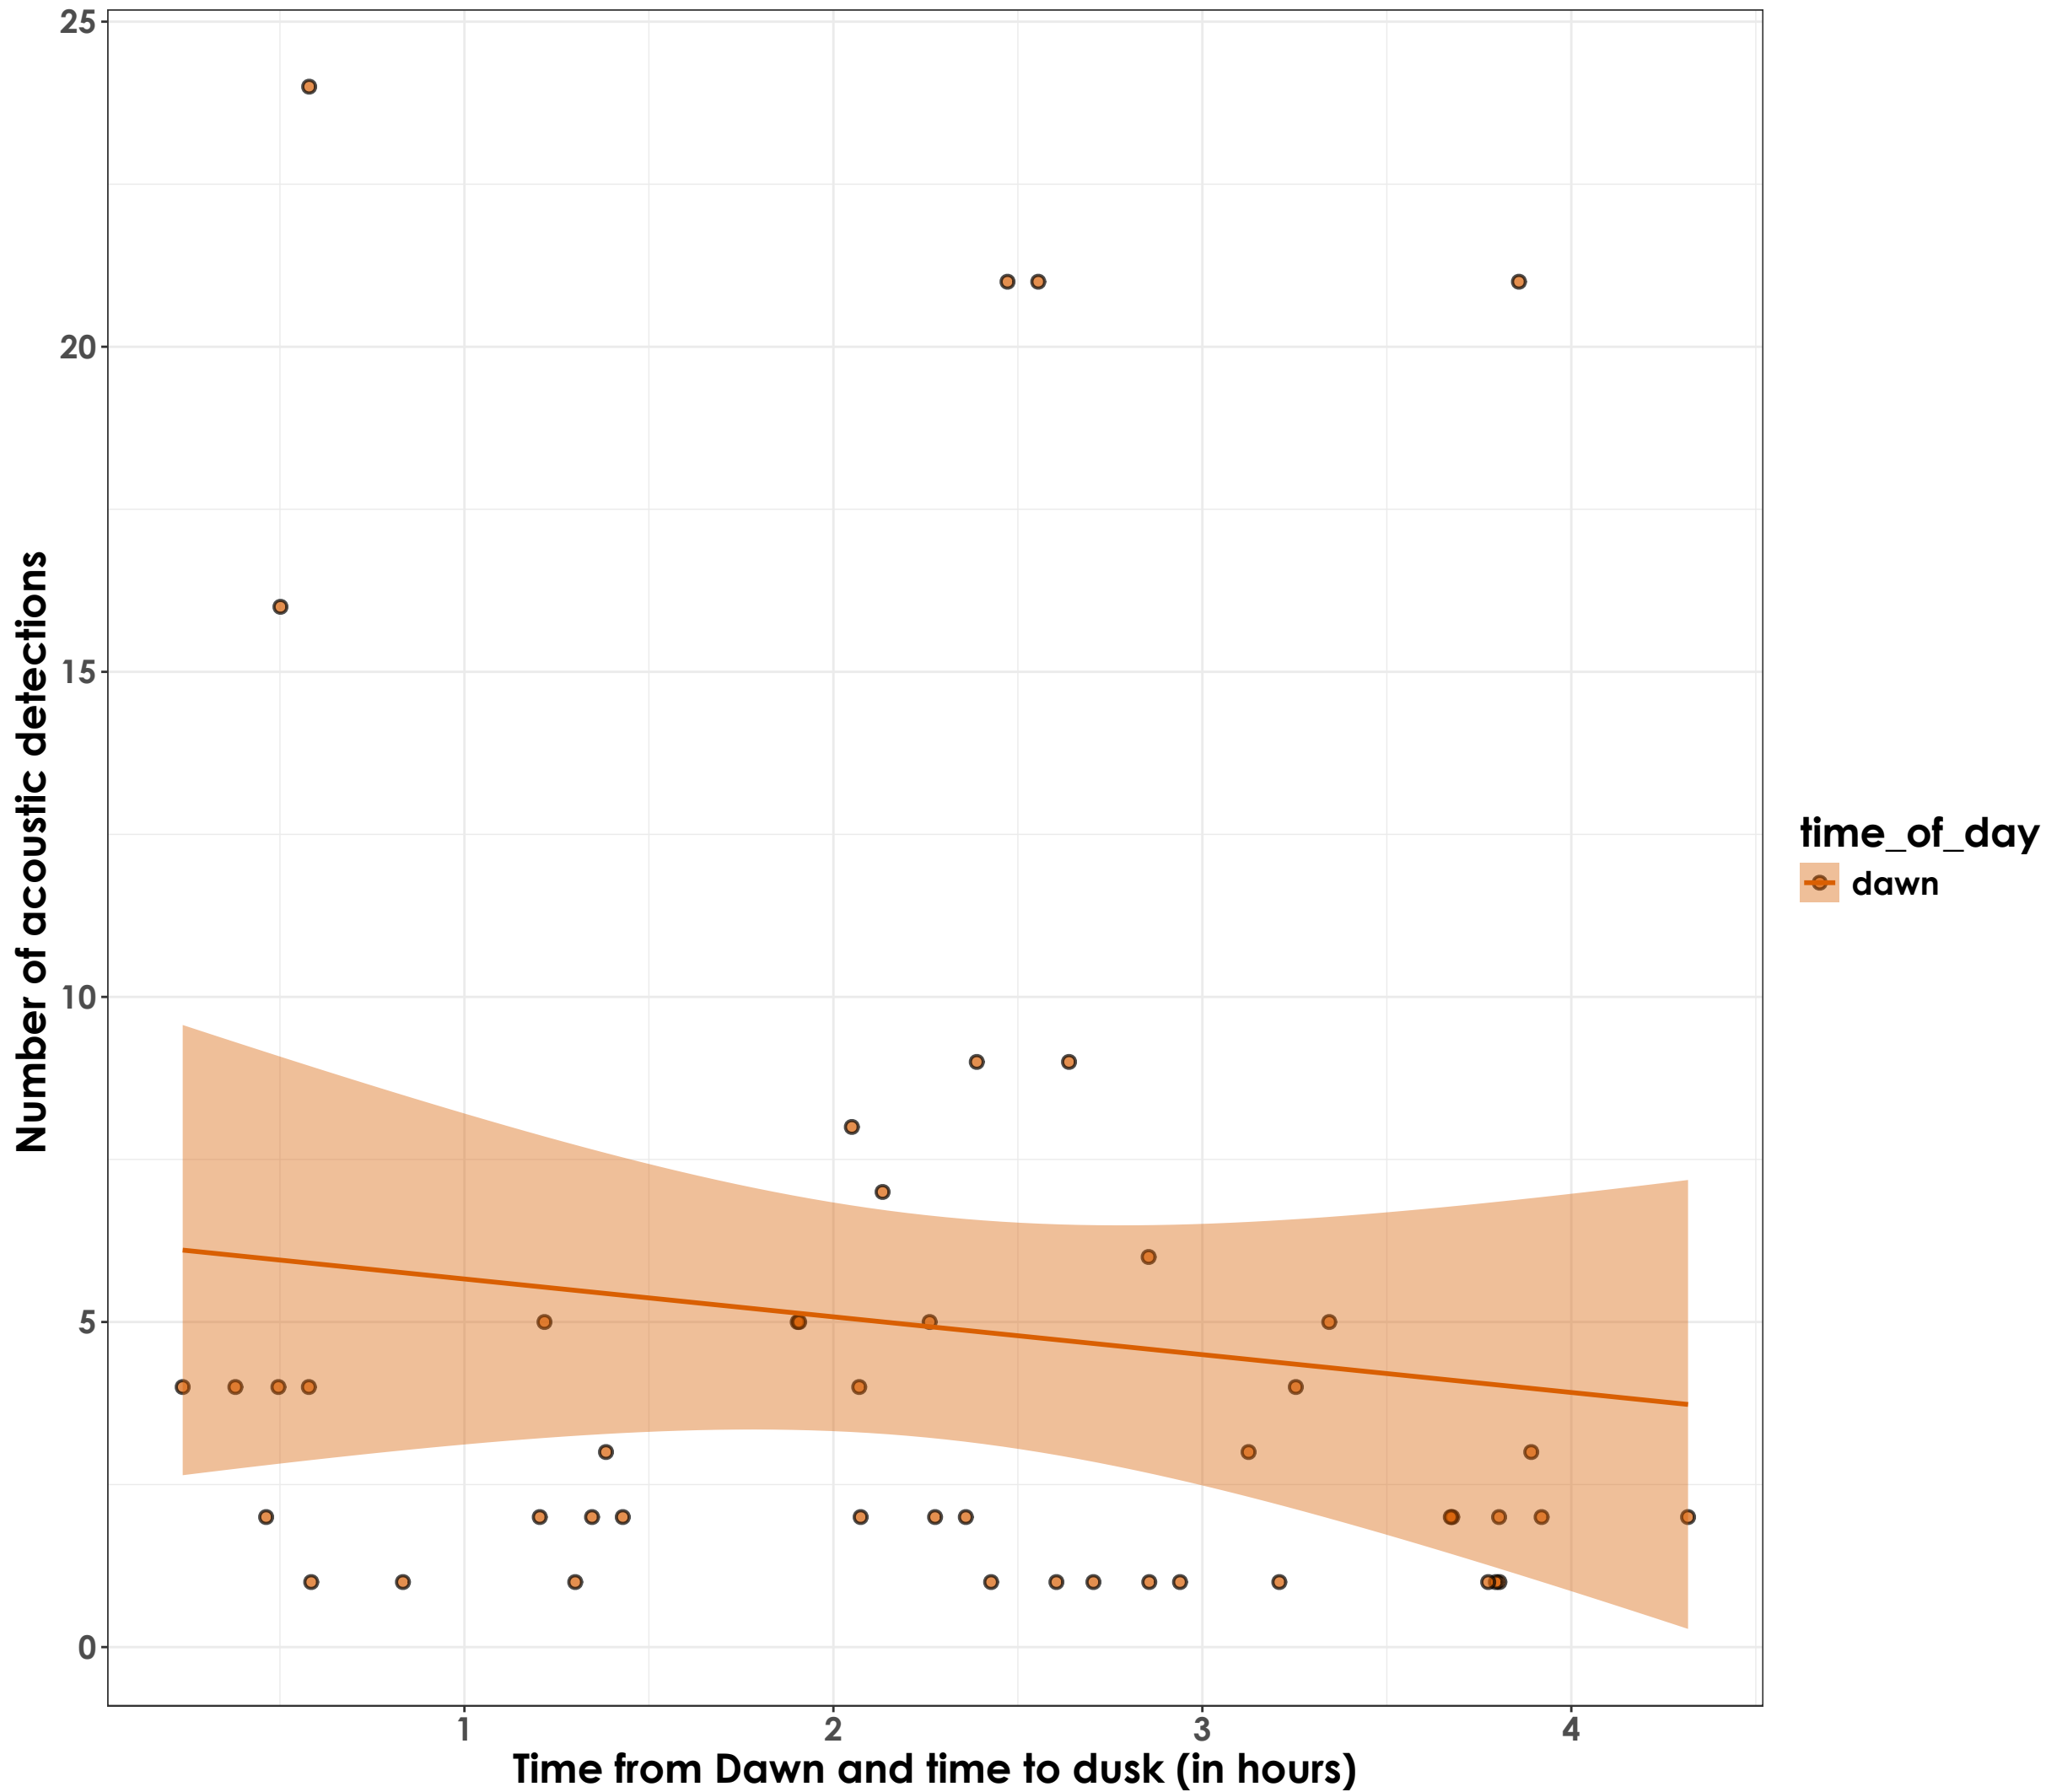

Little Spiderhunter

Each dot represents the total number of detections after dawn or before dusk (in hours)

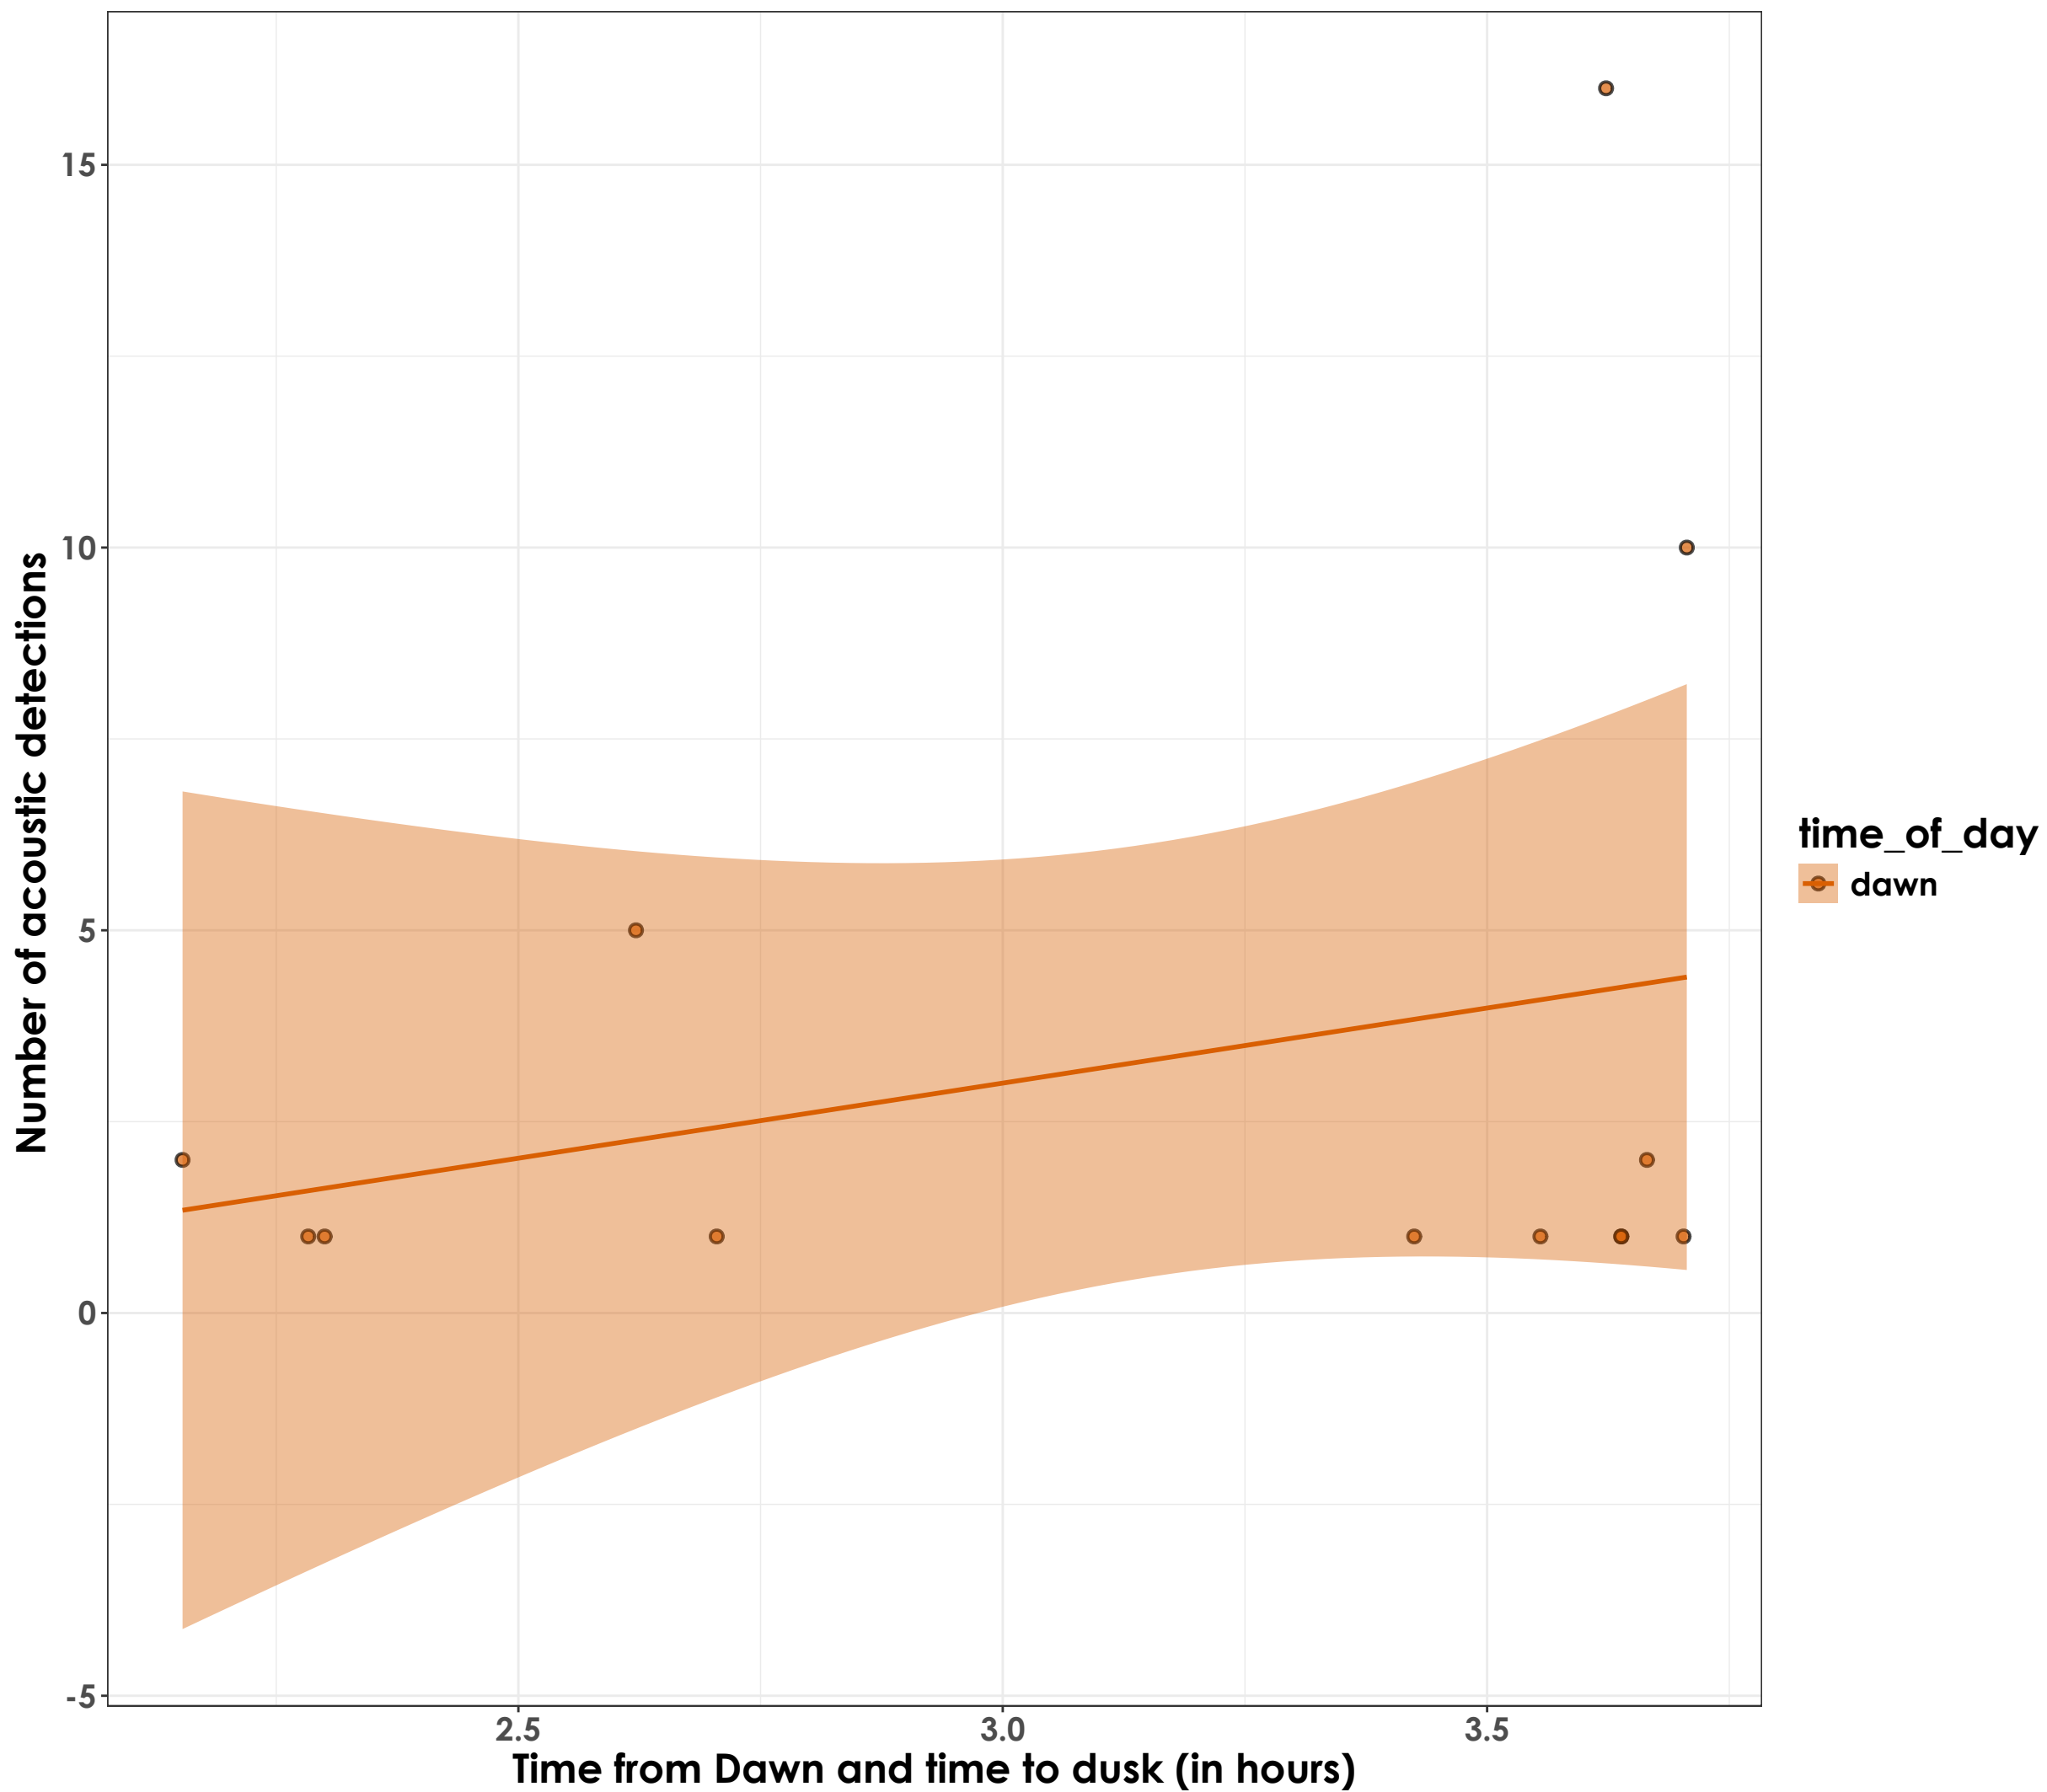

Indian Blackbird

Each dot represents the total number of detections after dawn or before dusk (in hours)

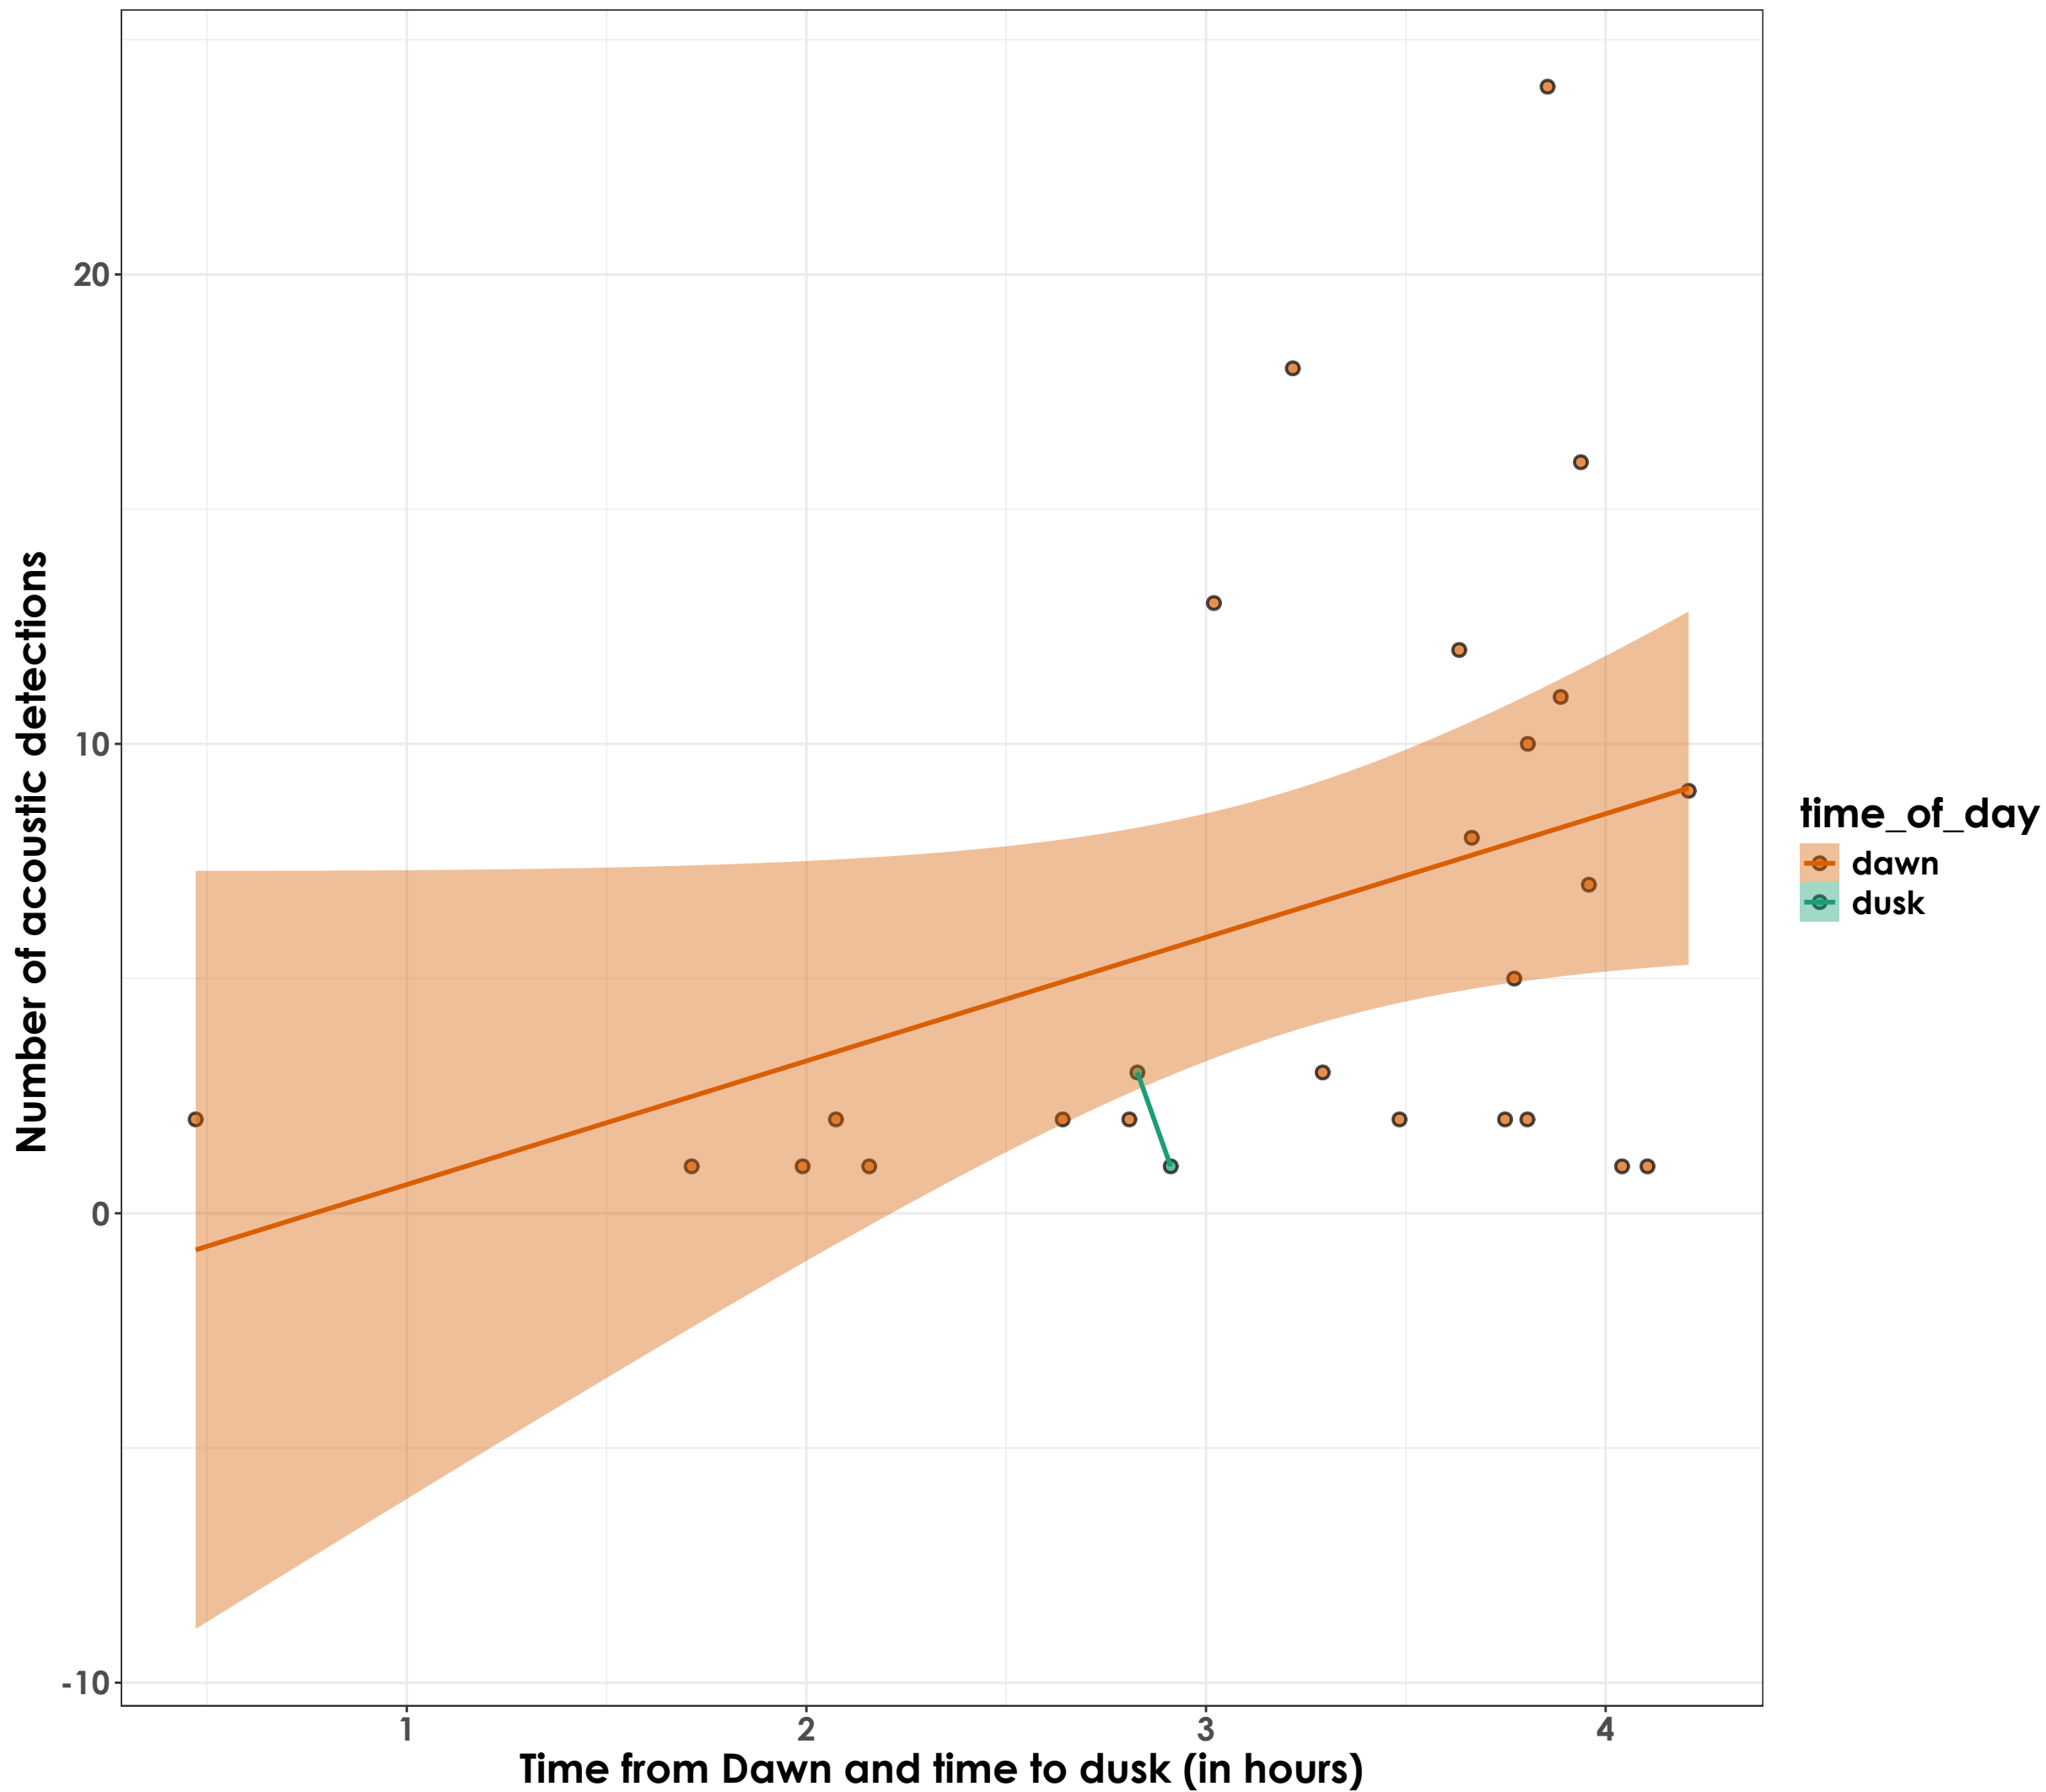

Oriental Honey-buzzard

Each dot represents the total number of detections after dawn or before dusk (in hours)

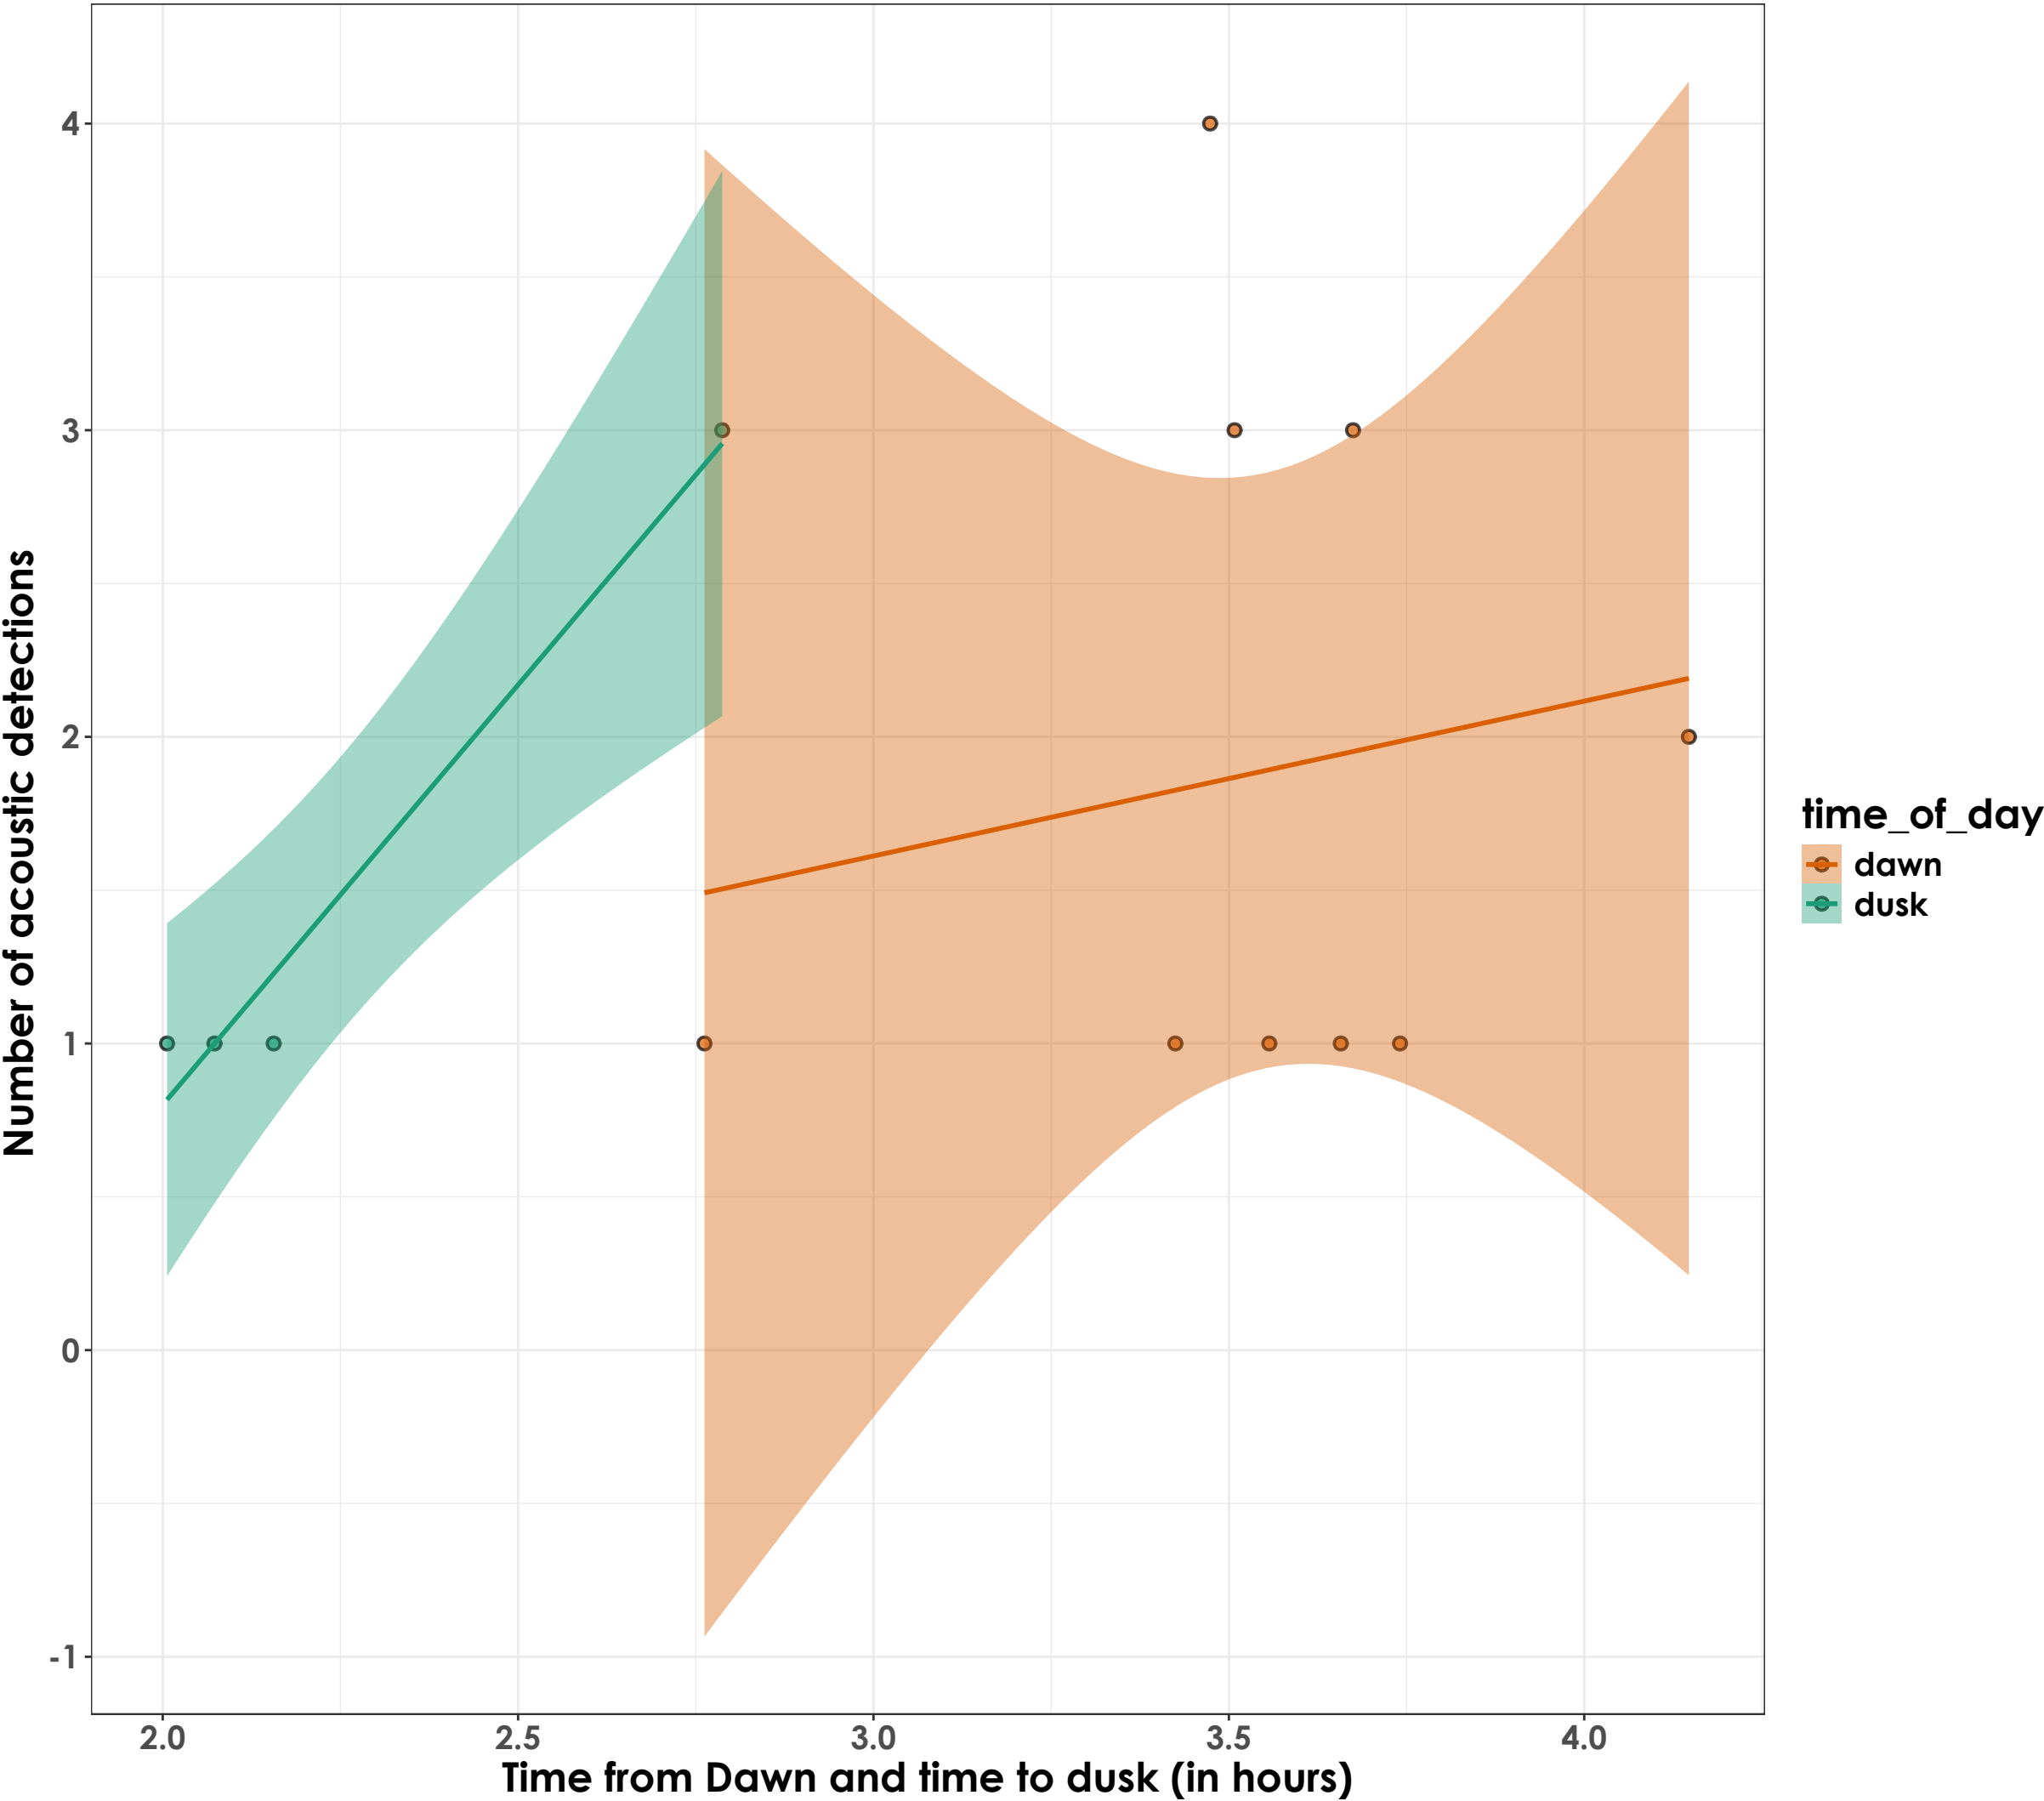

Small Minivet

Each dot represents the total number of detections after dawn or before dusk (in hours)

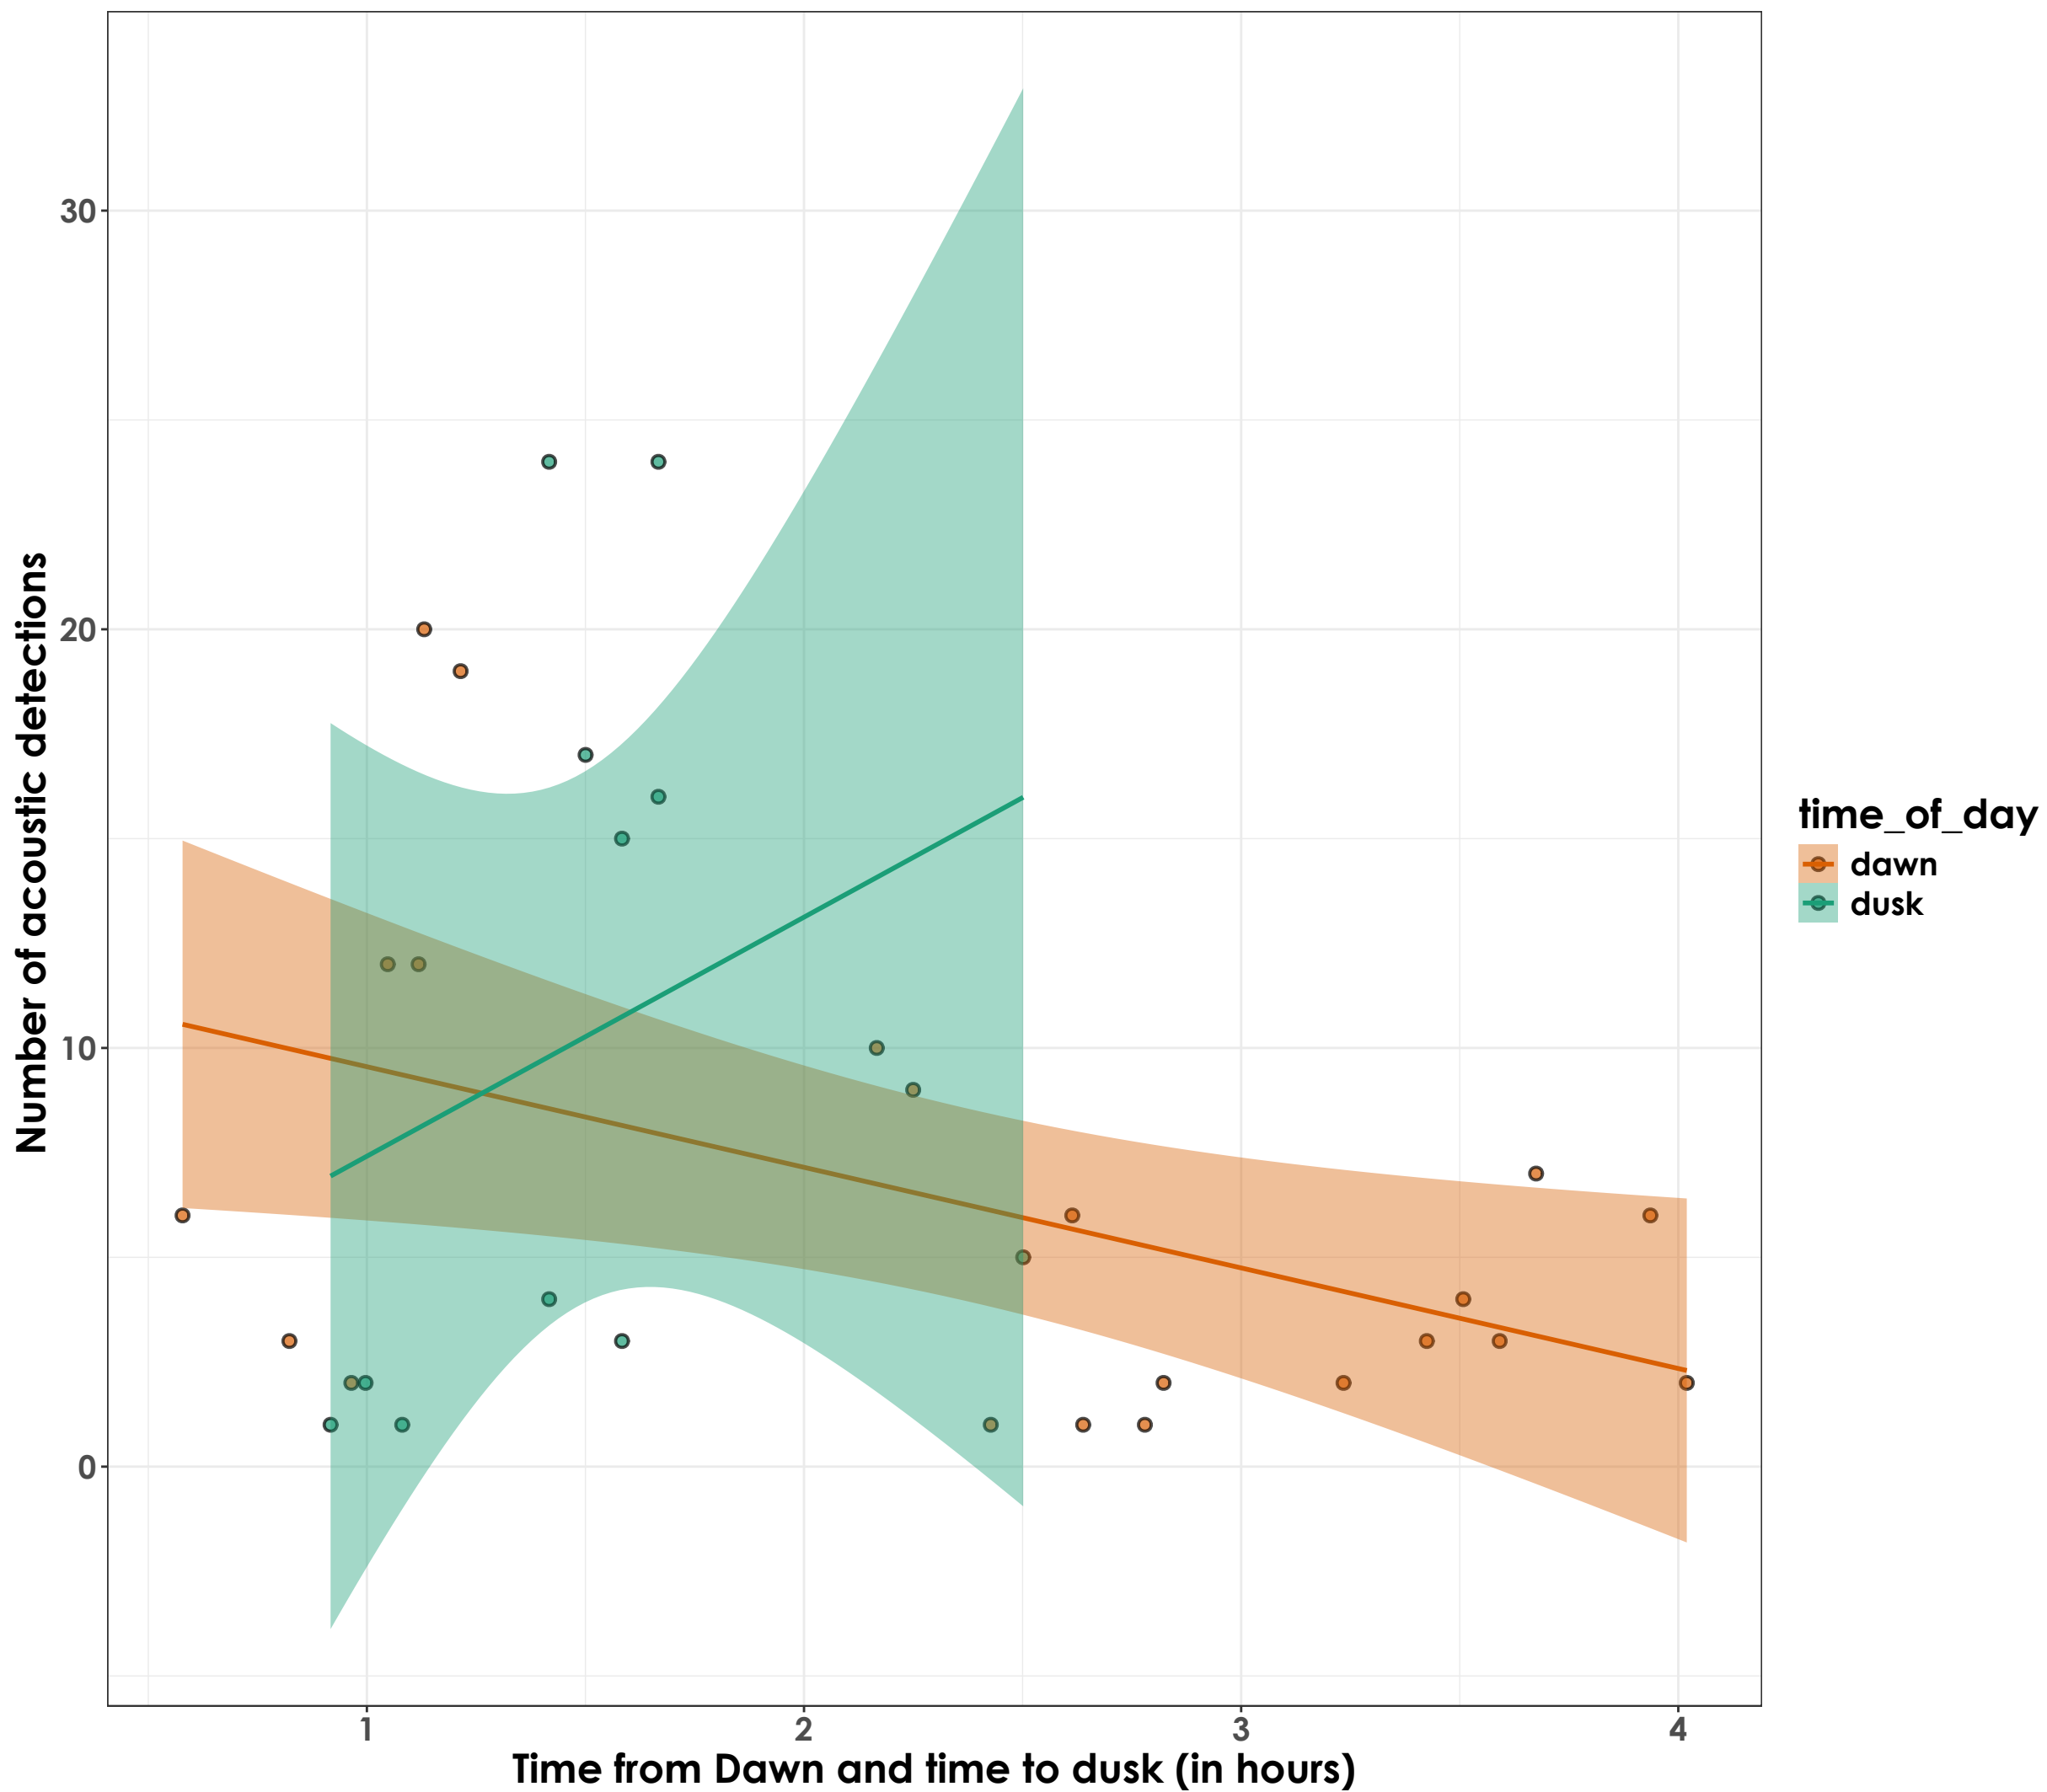

Crested Goshawk

Each dot represents the total number of detections after dawn or before dusk (in hours)

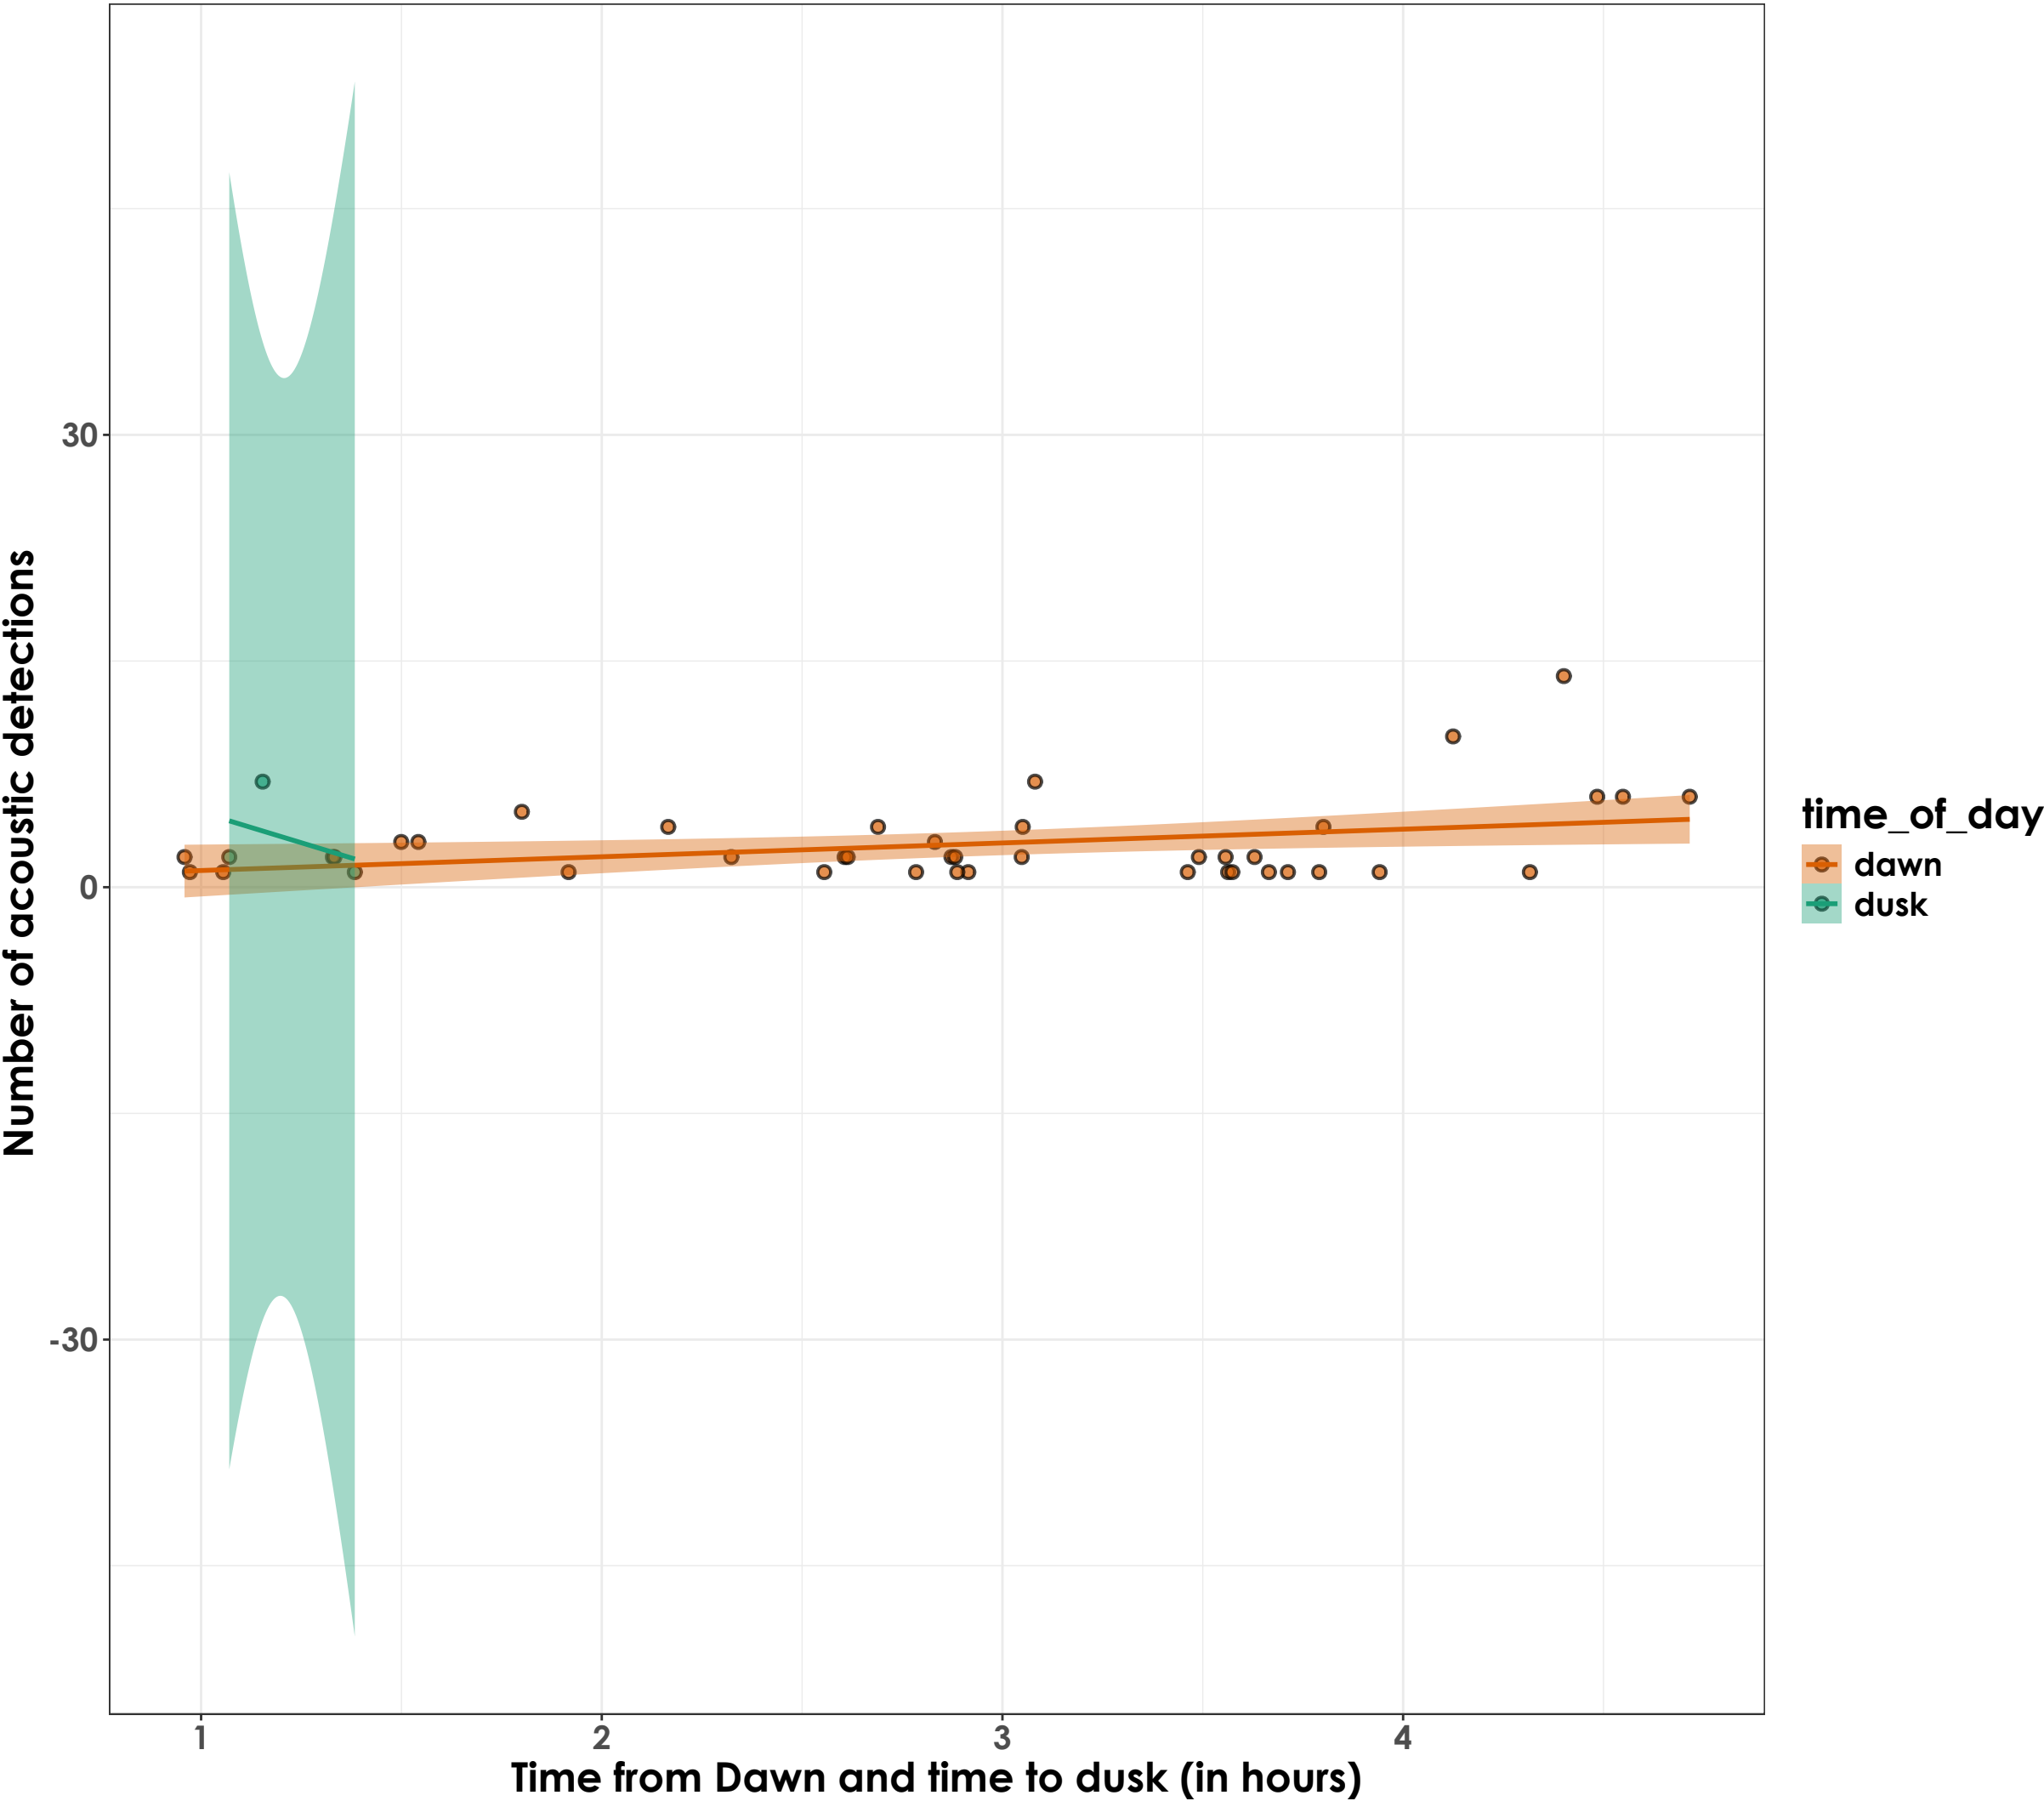

White-bellied Woodpecker

Each dot represents the total number of detections after dawn or before dusk (in hours)

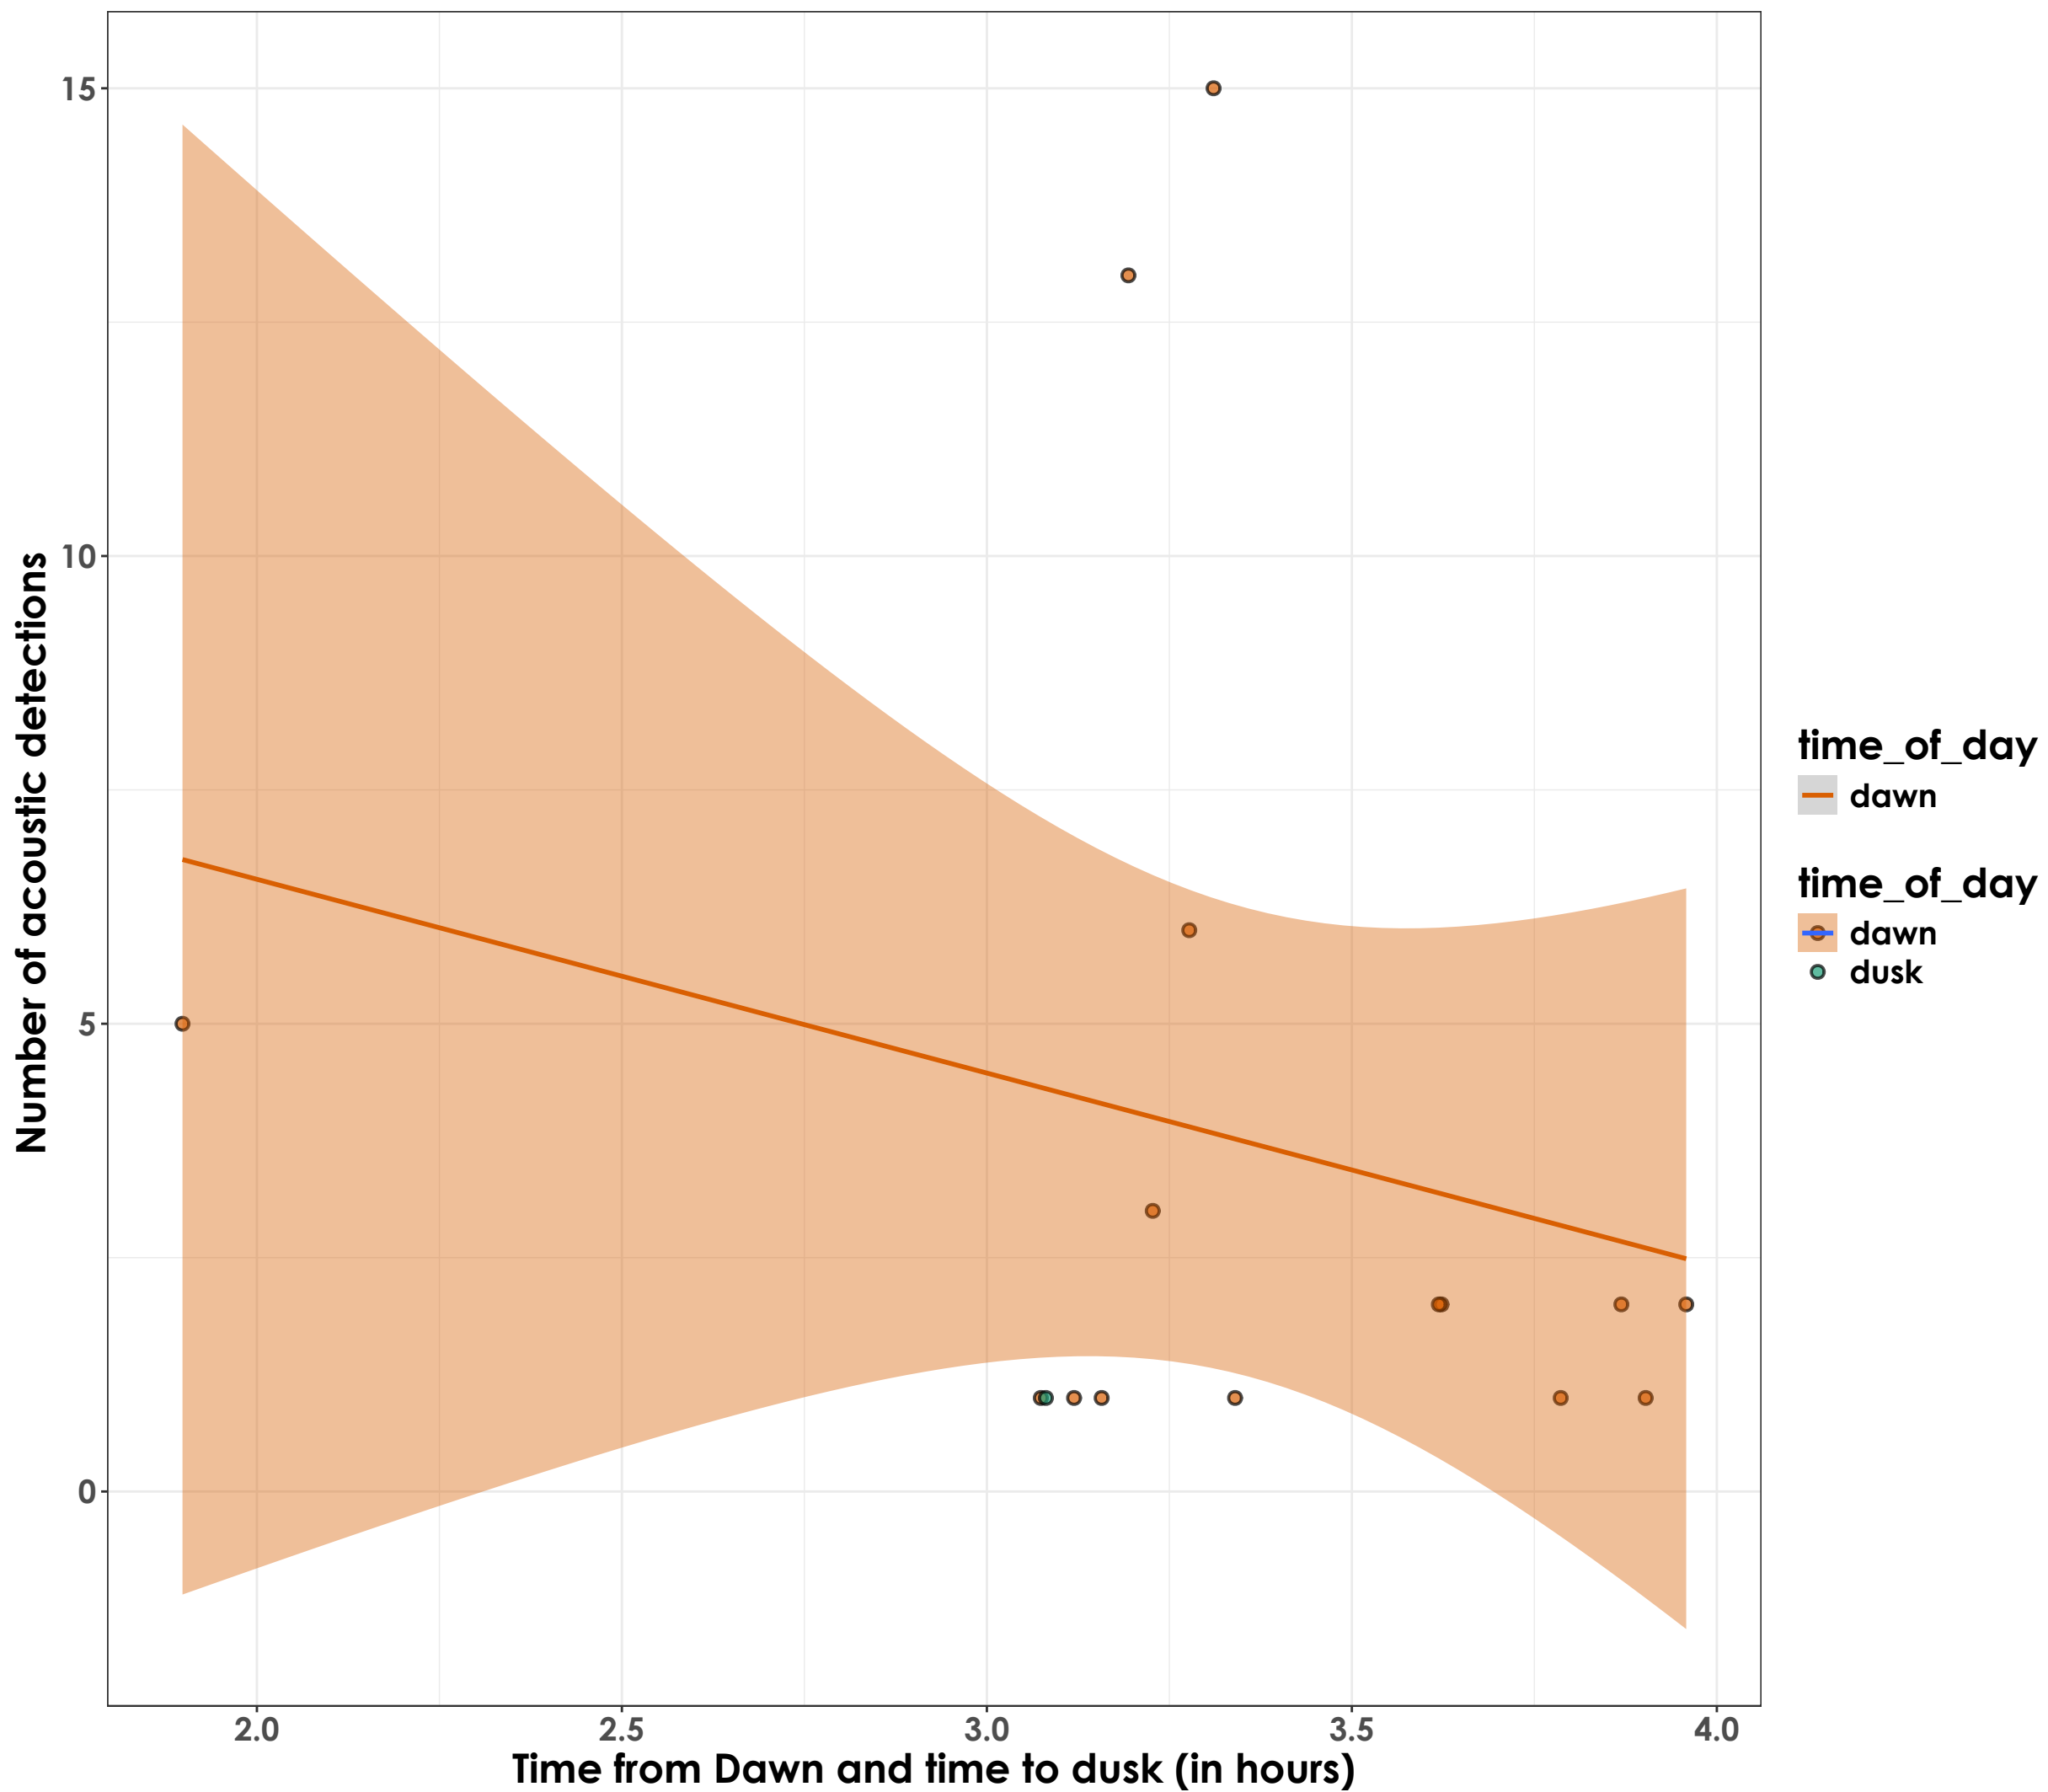

Rufous Babbler

Each dot represents the total number of detections after dawn or before dusk (in hours)

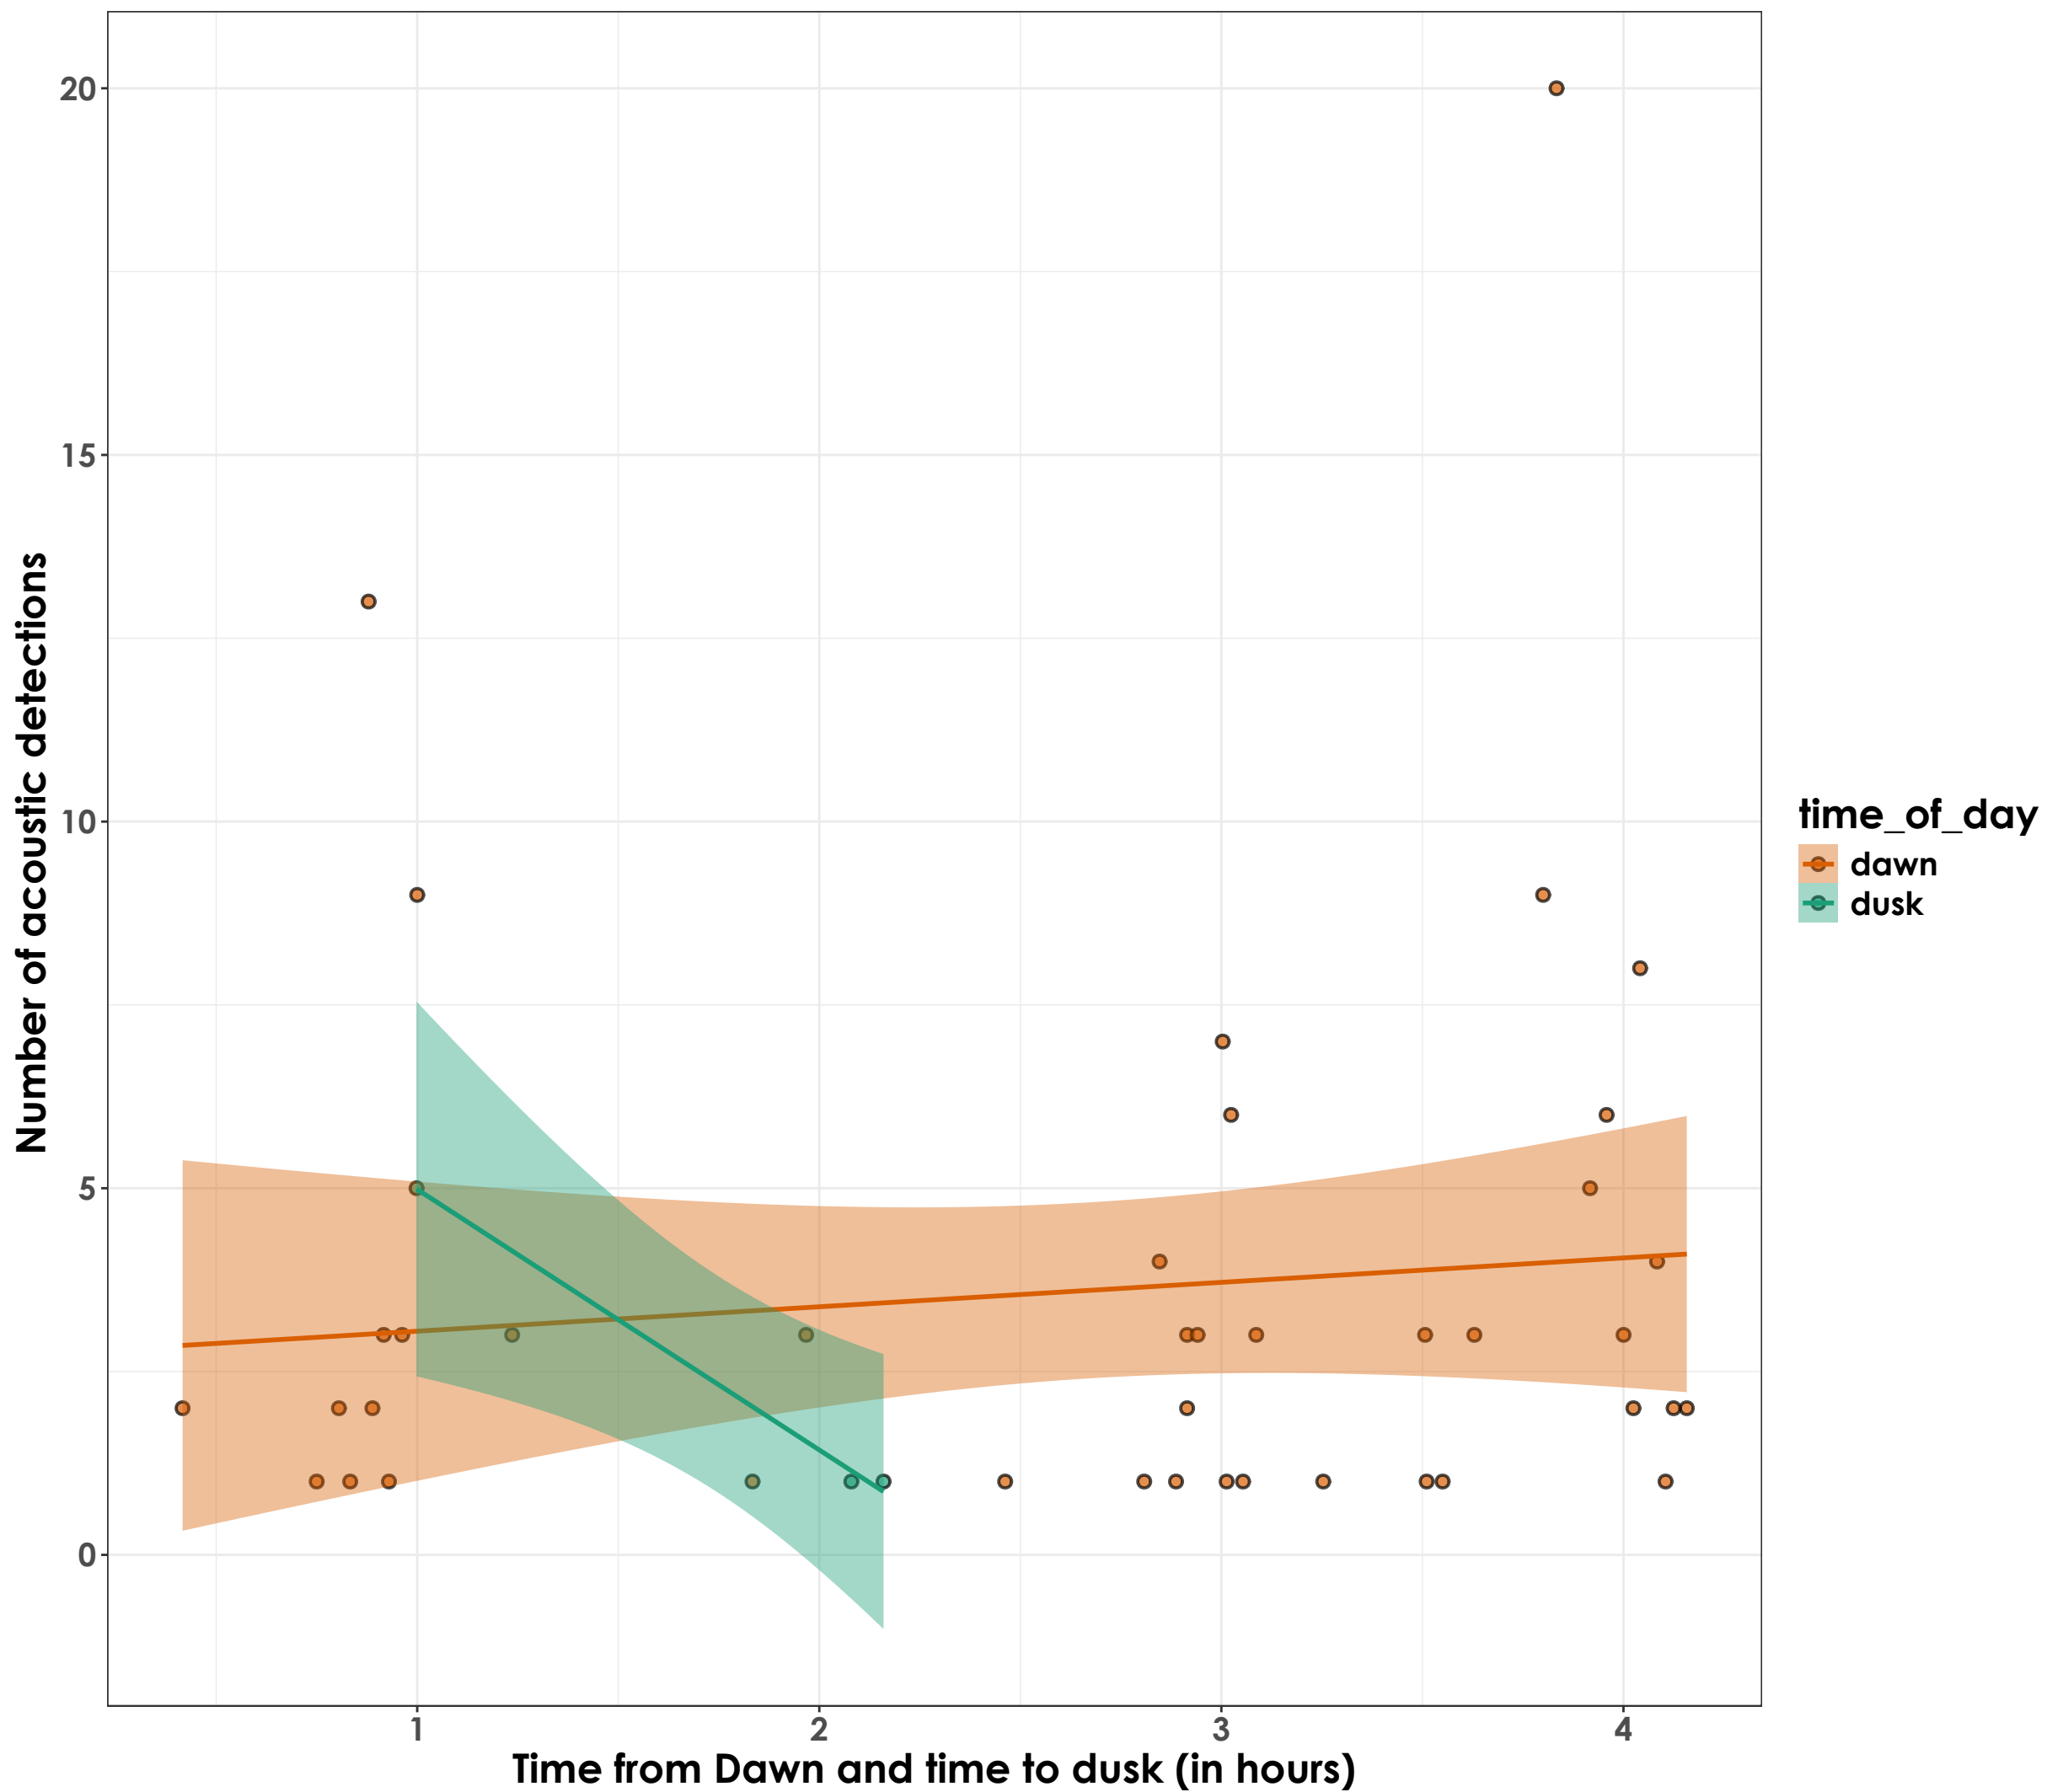

Jungle Myna

Each dot represents the total number of detections after dawn or before dusk (in hours)

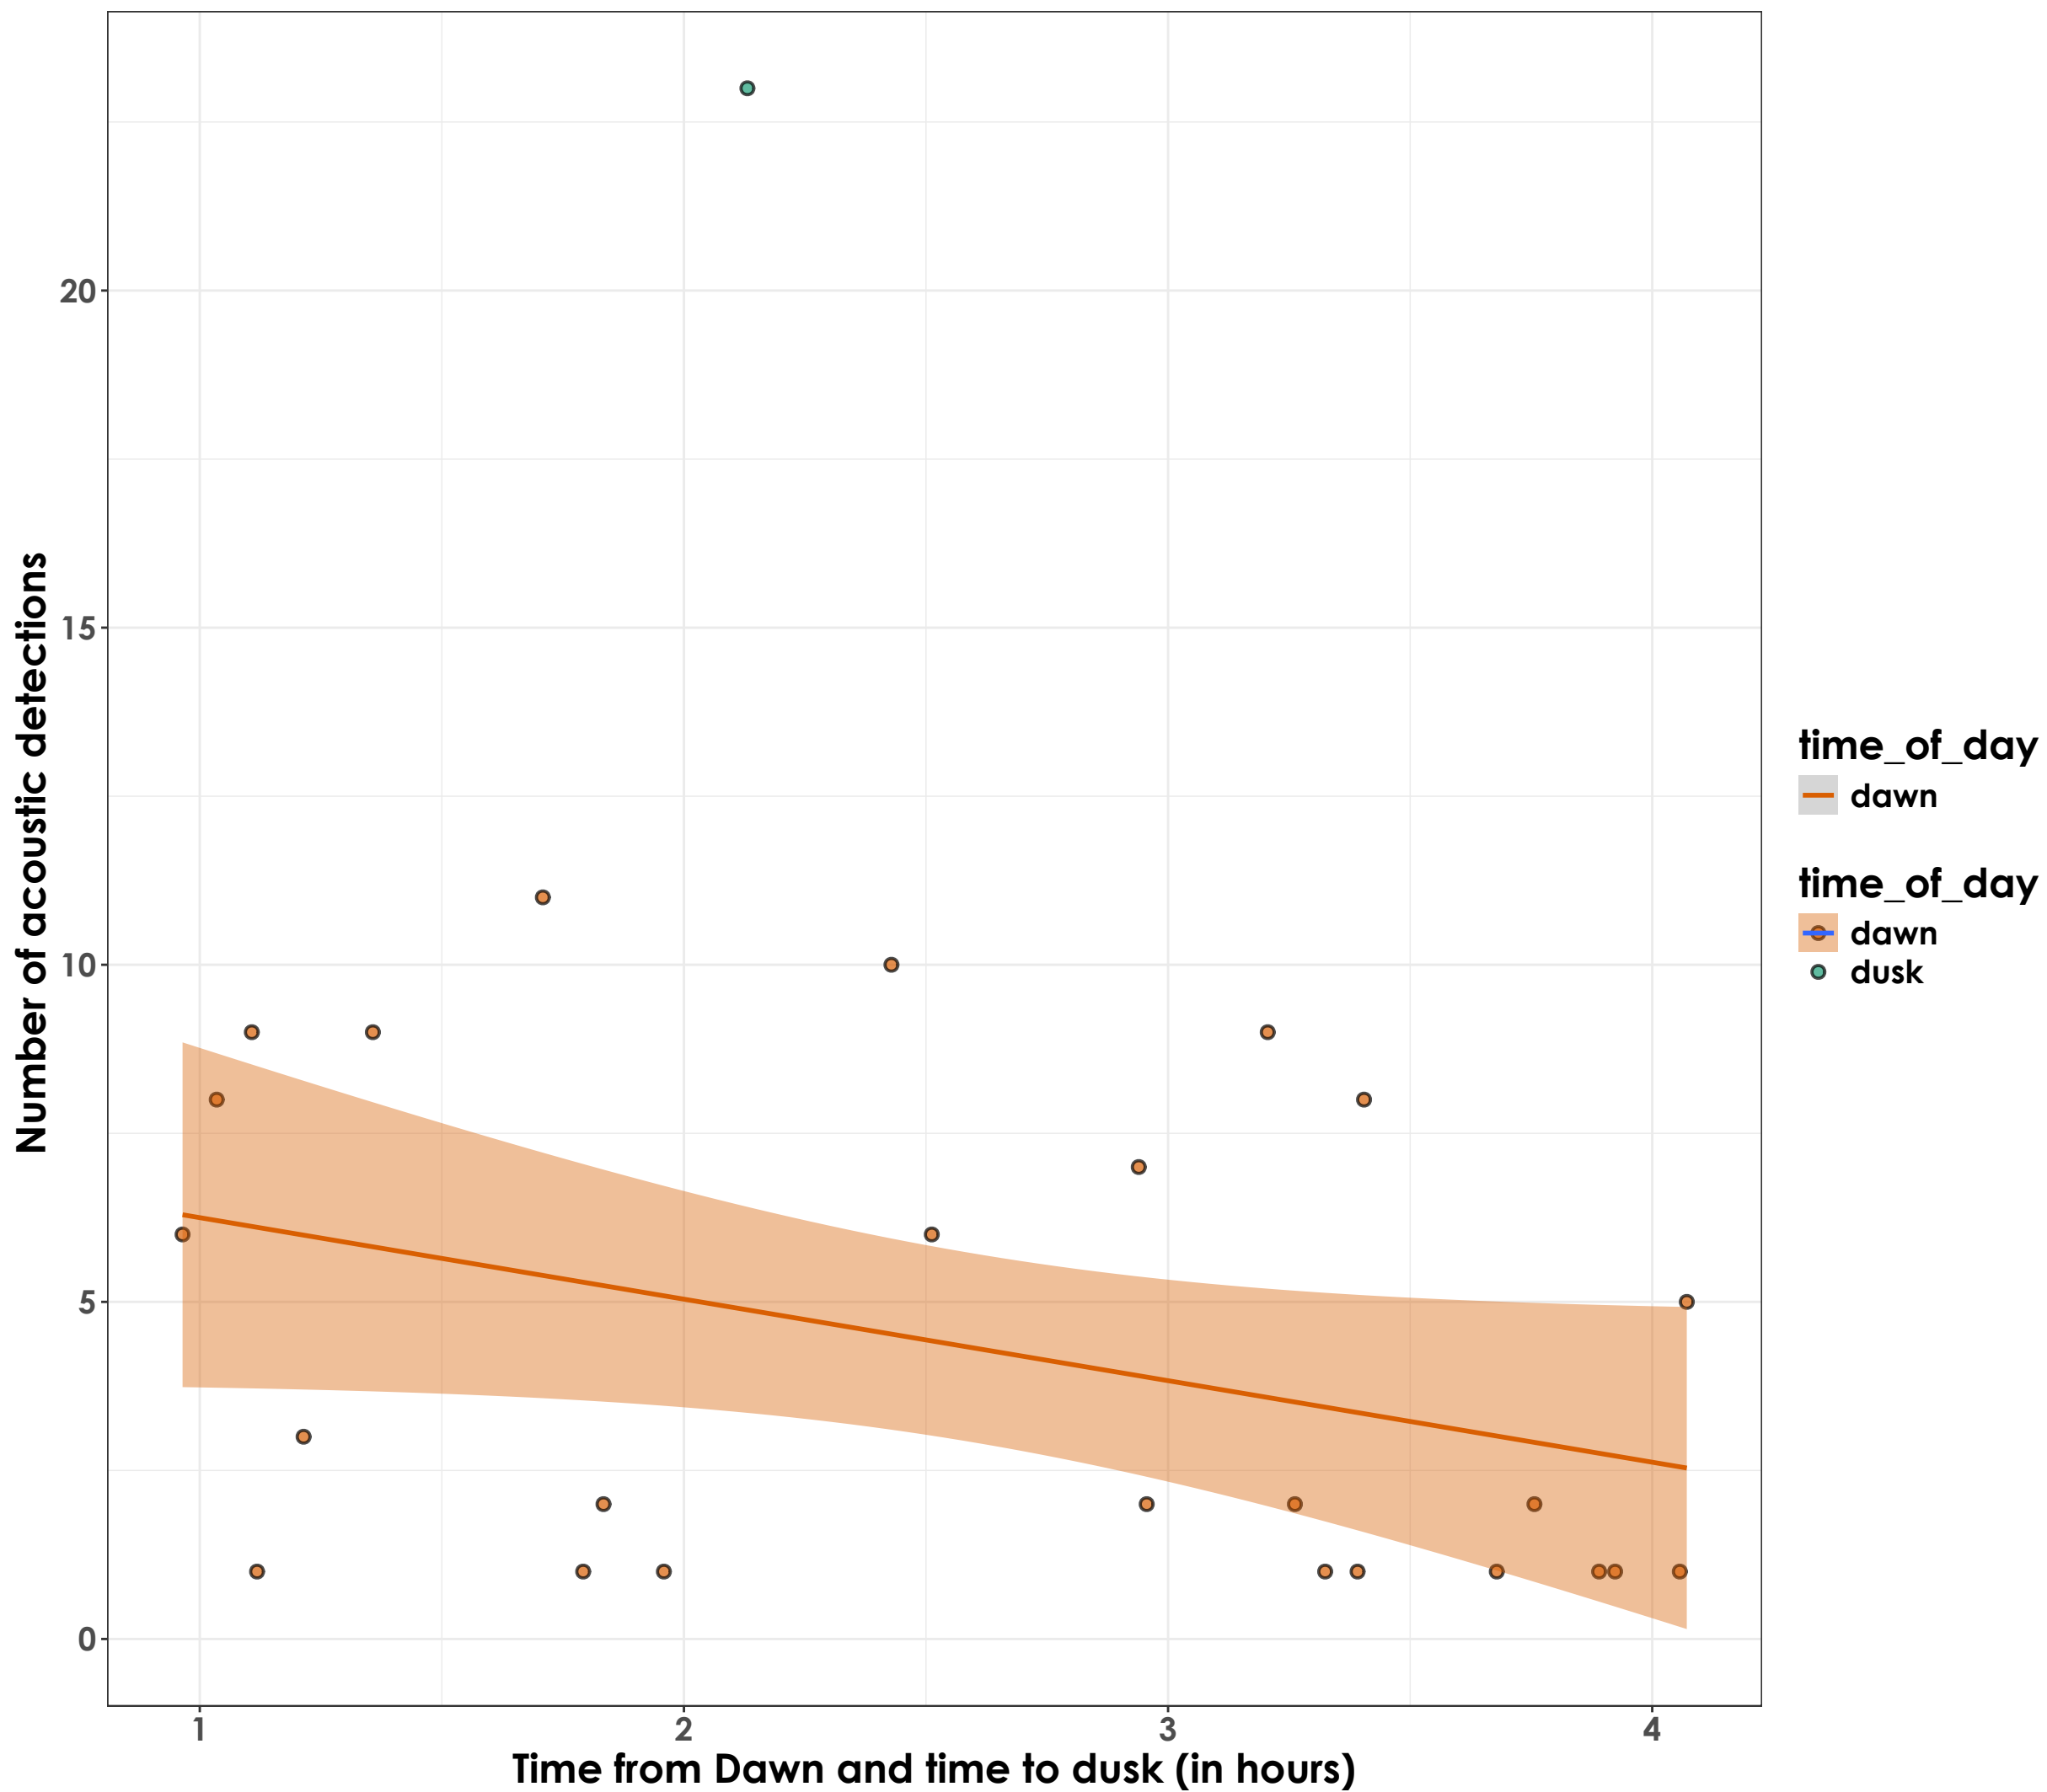

Malabar Woodshrike

Each dot represents the total number of detections after dawn or before dusk (in hours)

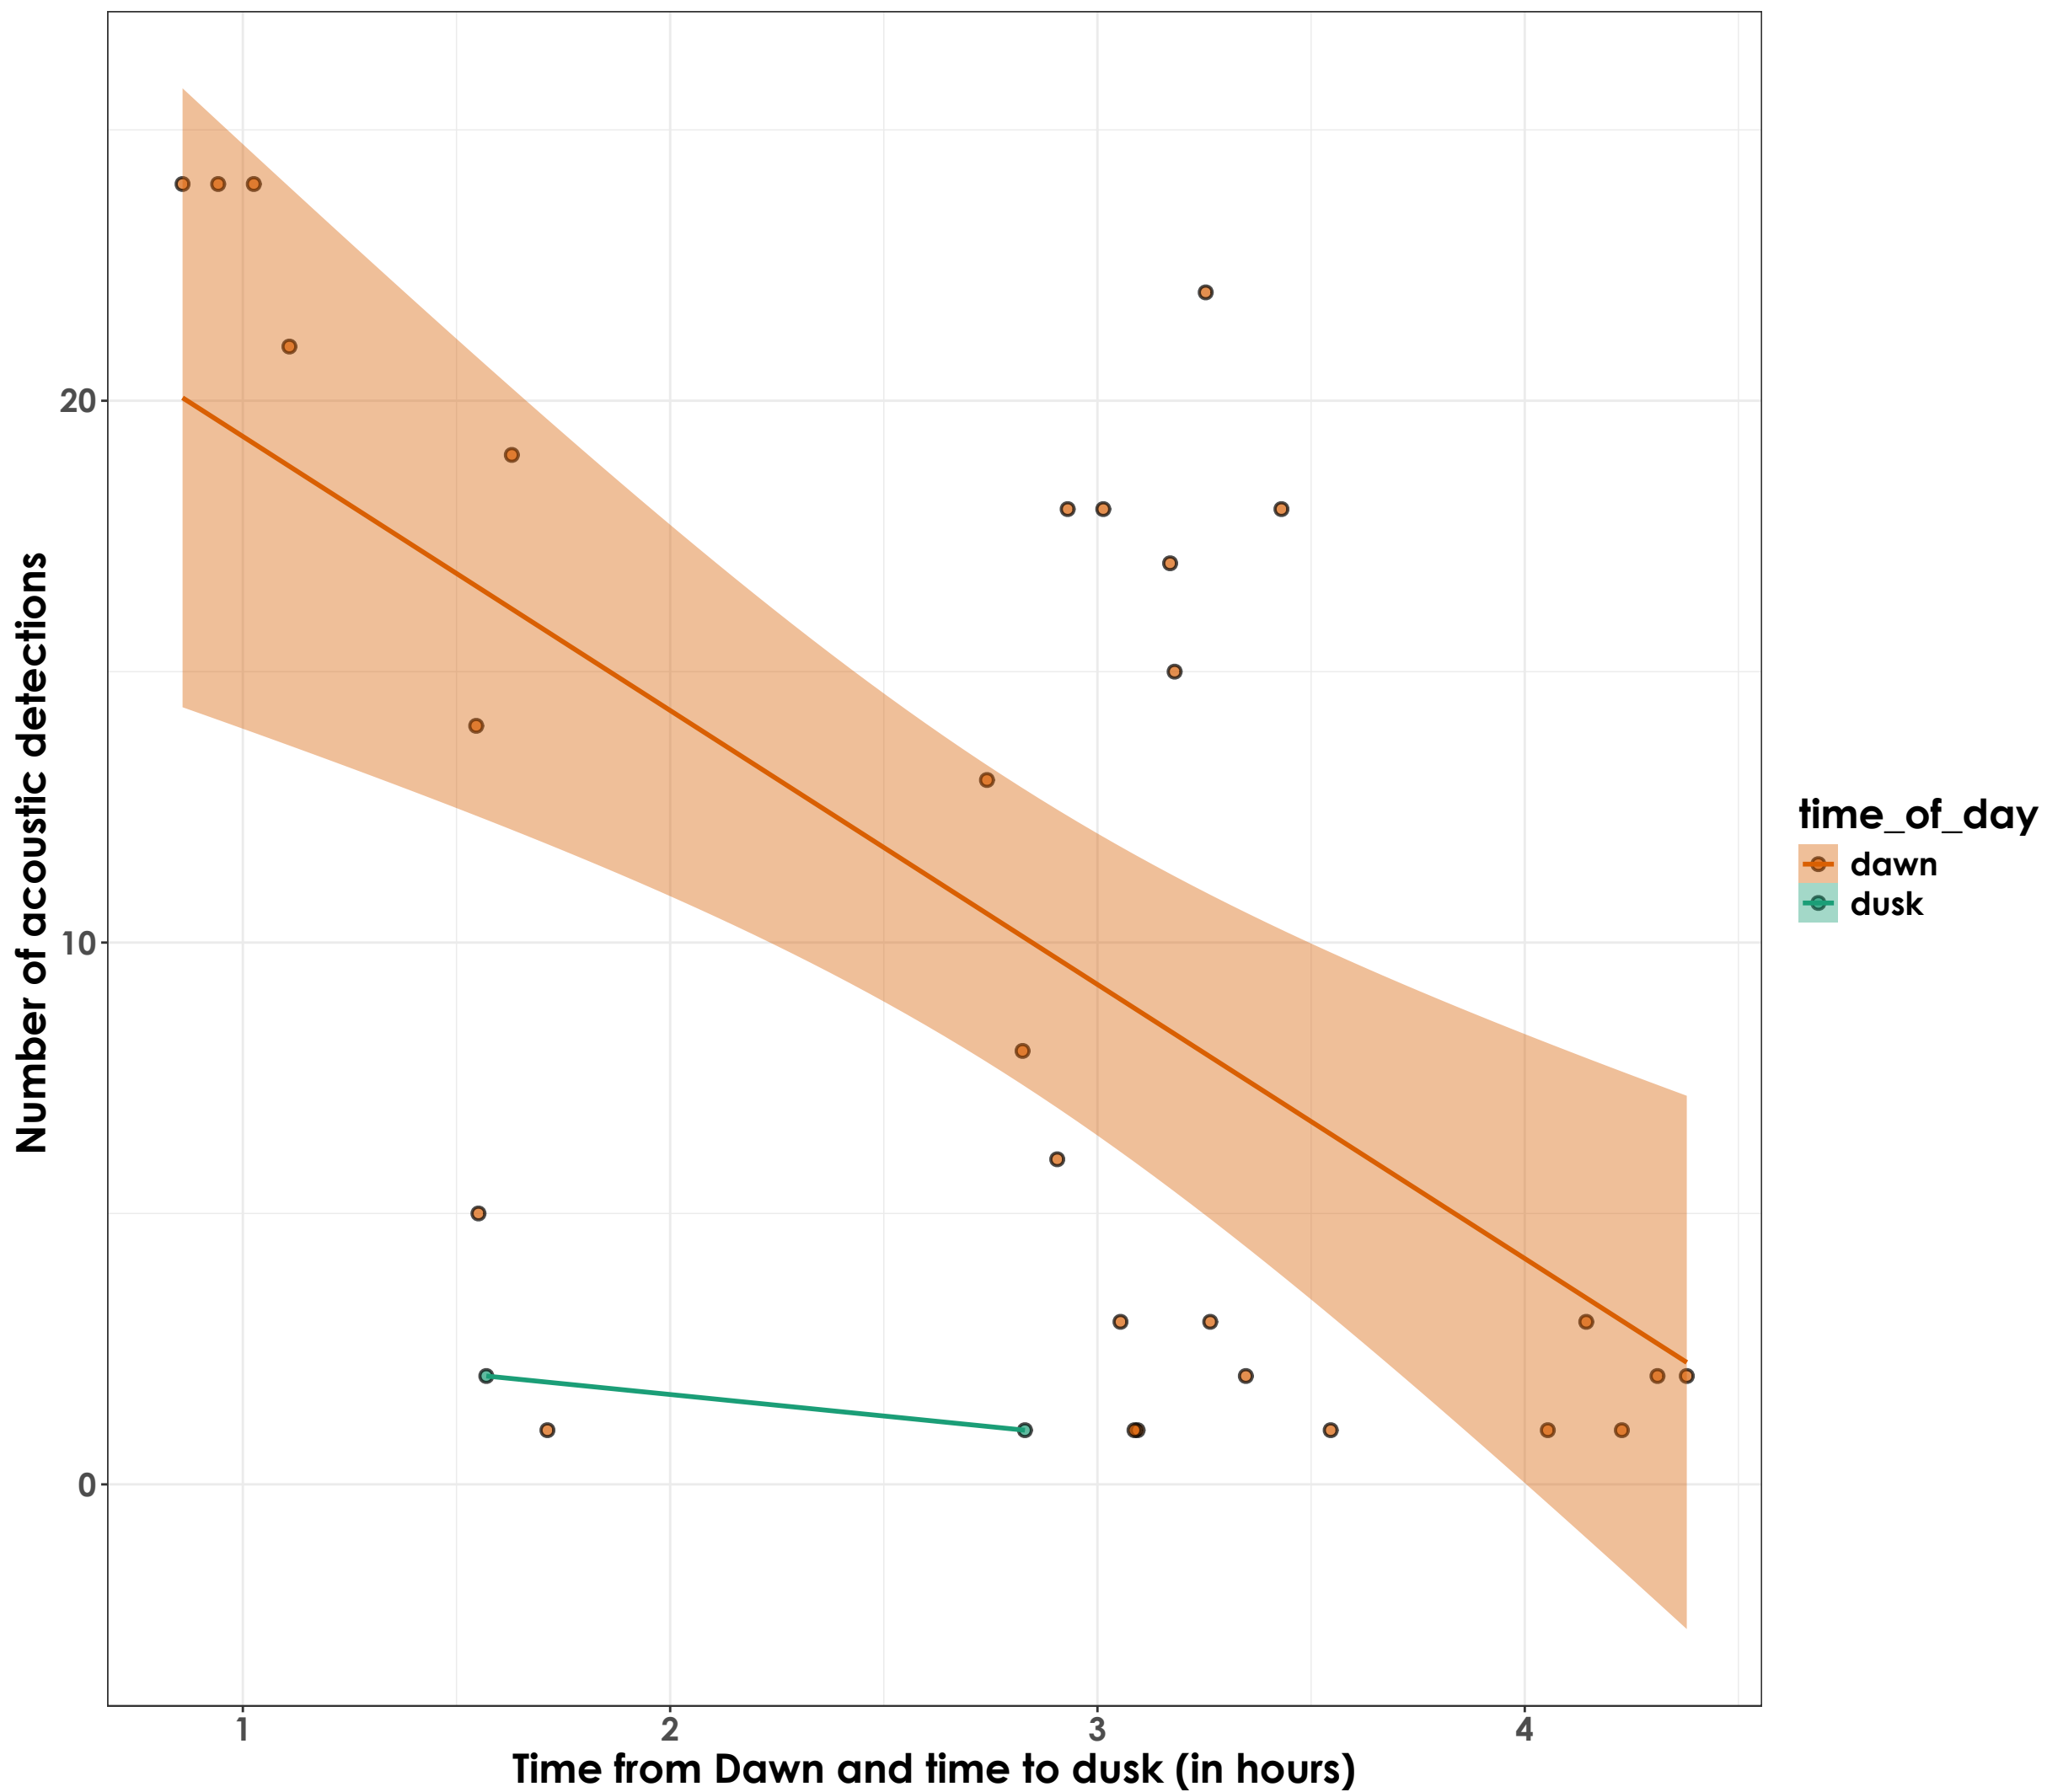

Rusty-tailed Flycatcher

Each dot represents the total number of detections after dawn or before dusk (in hours)

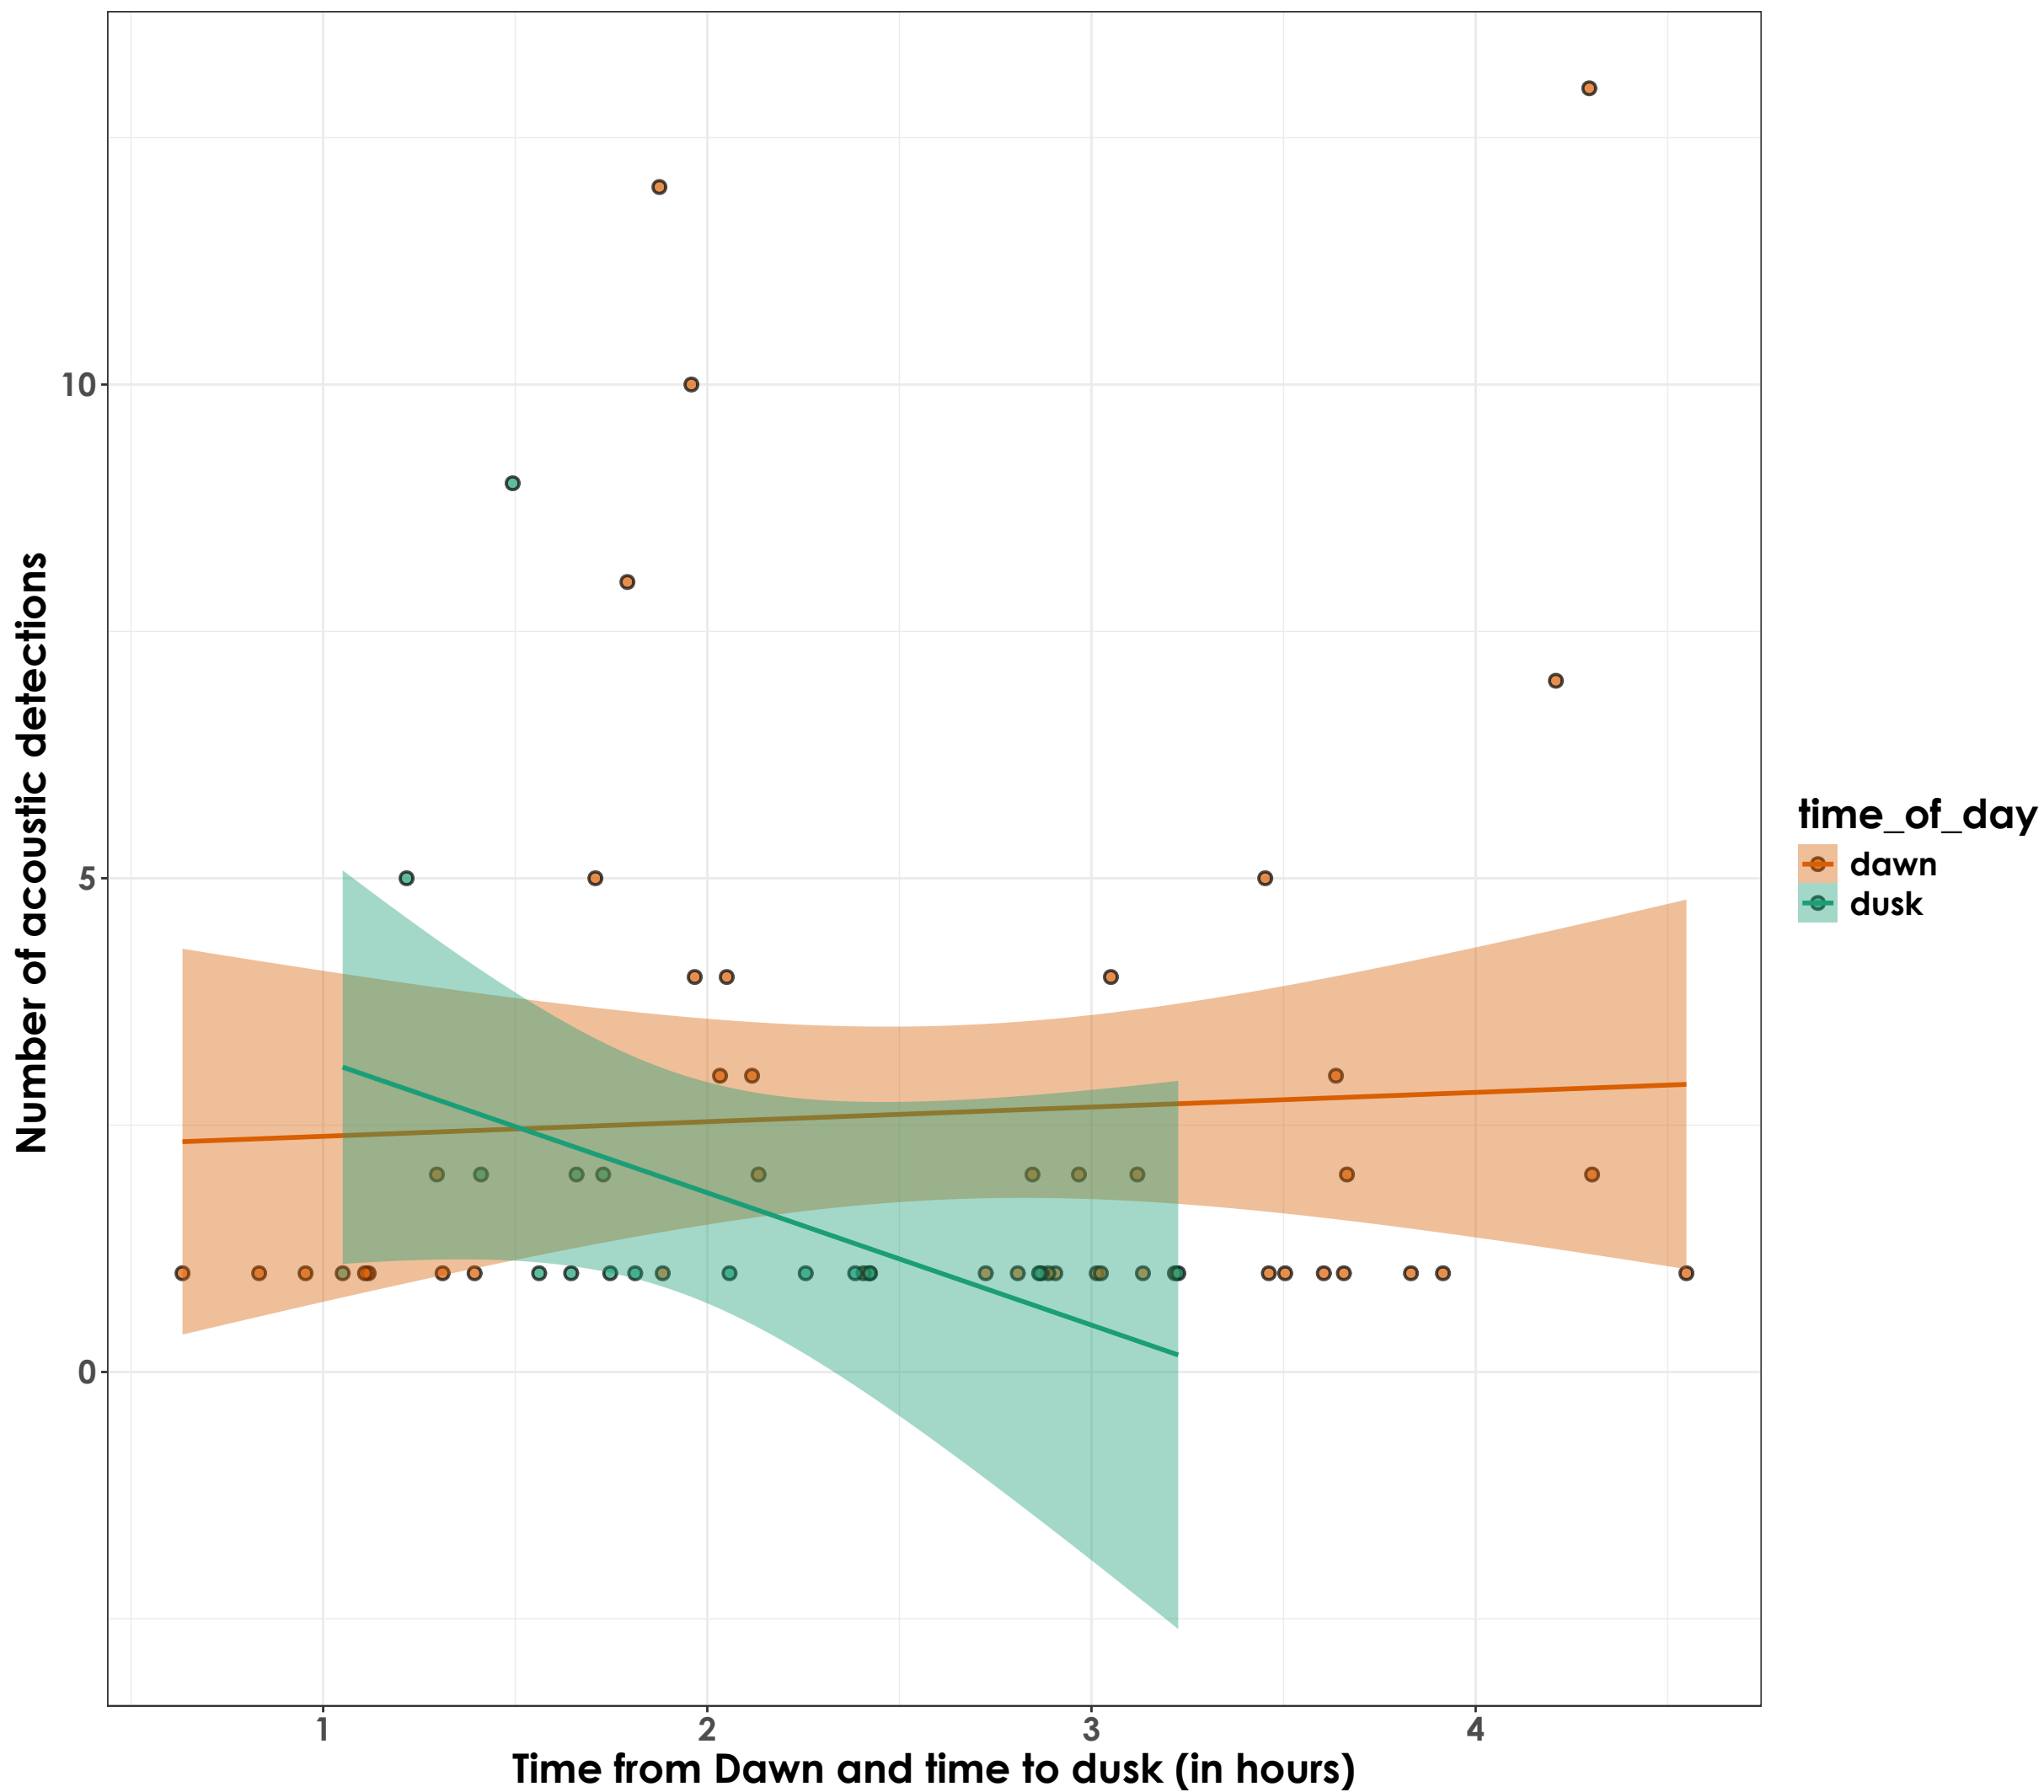

Eurasian Hoopoe

Each dot represents the total number of detections after dawn or before dusk (in hours)

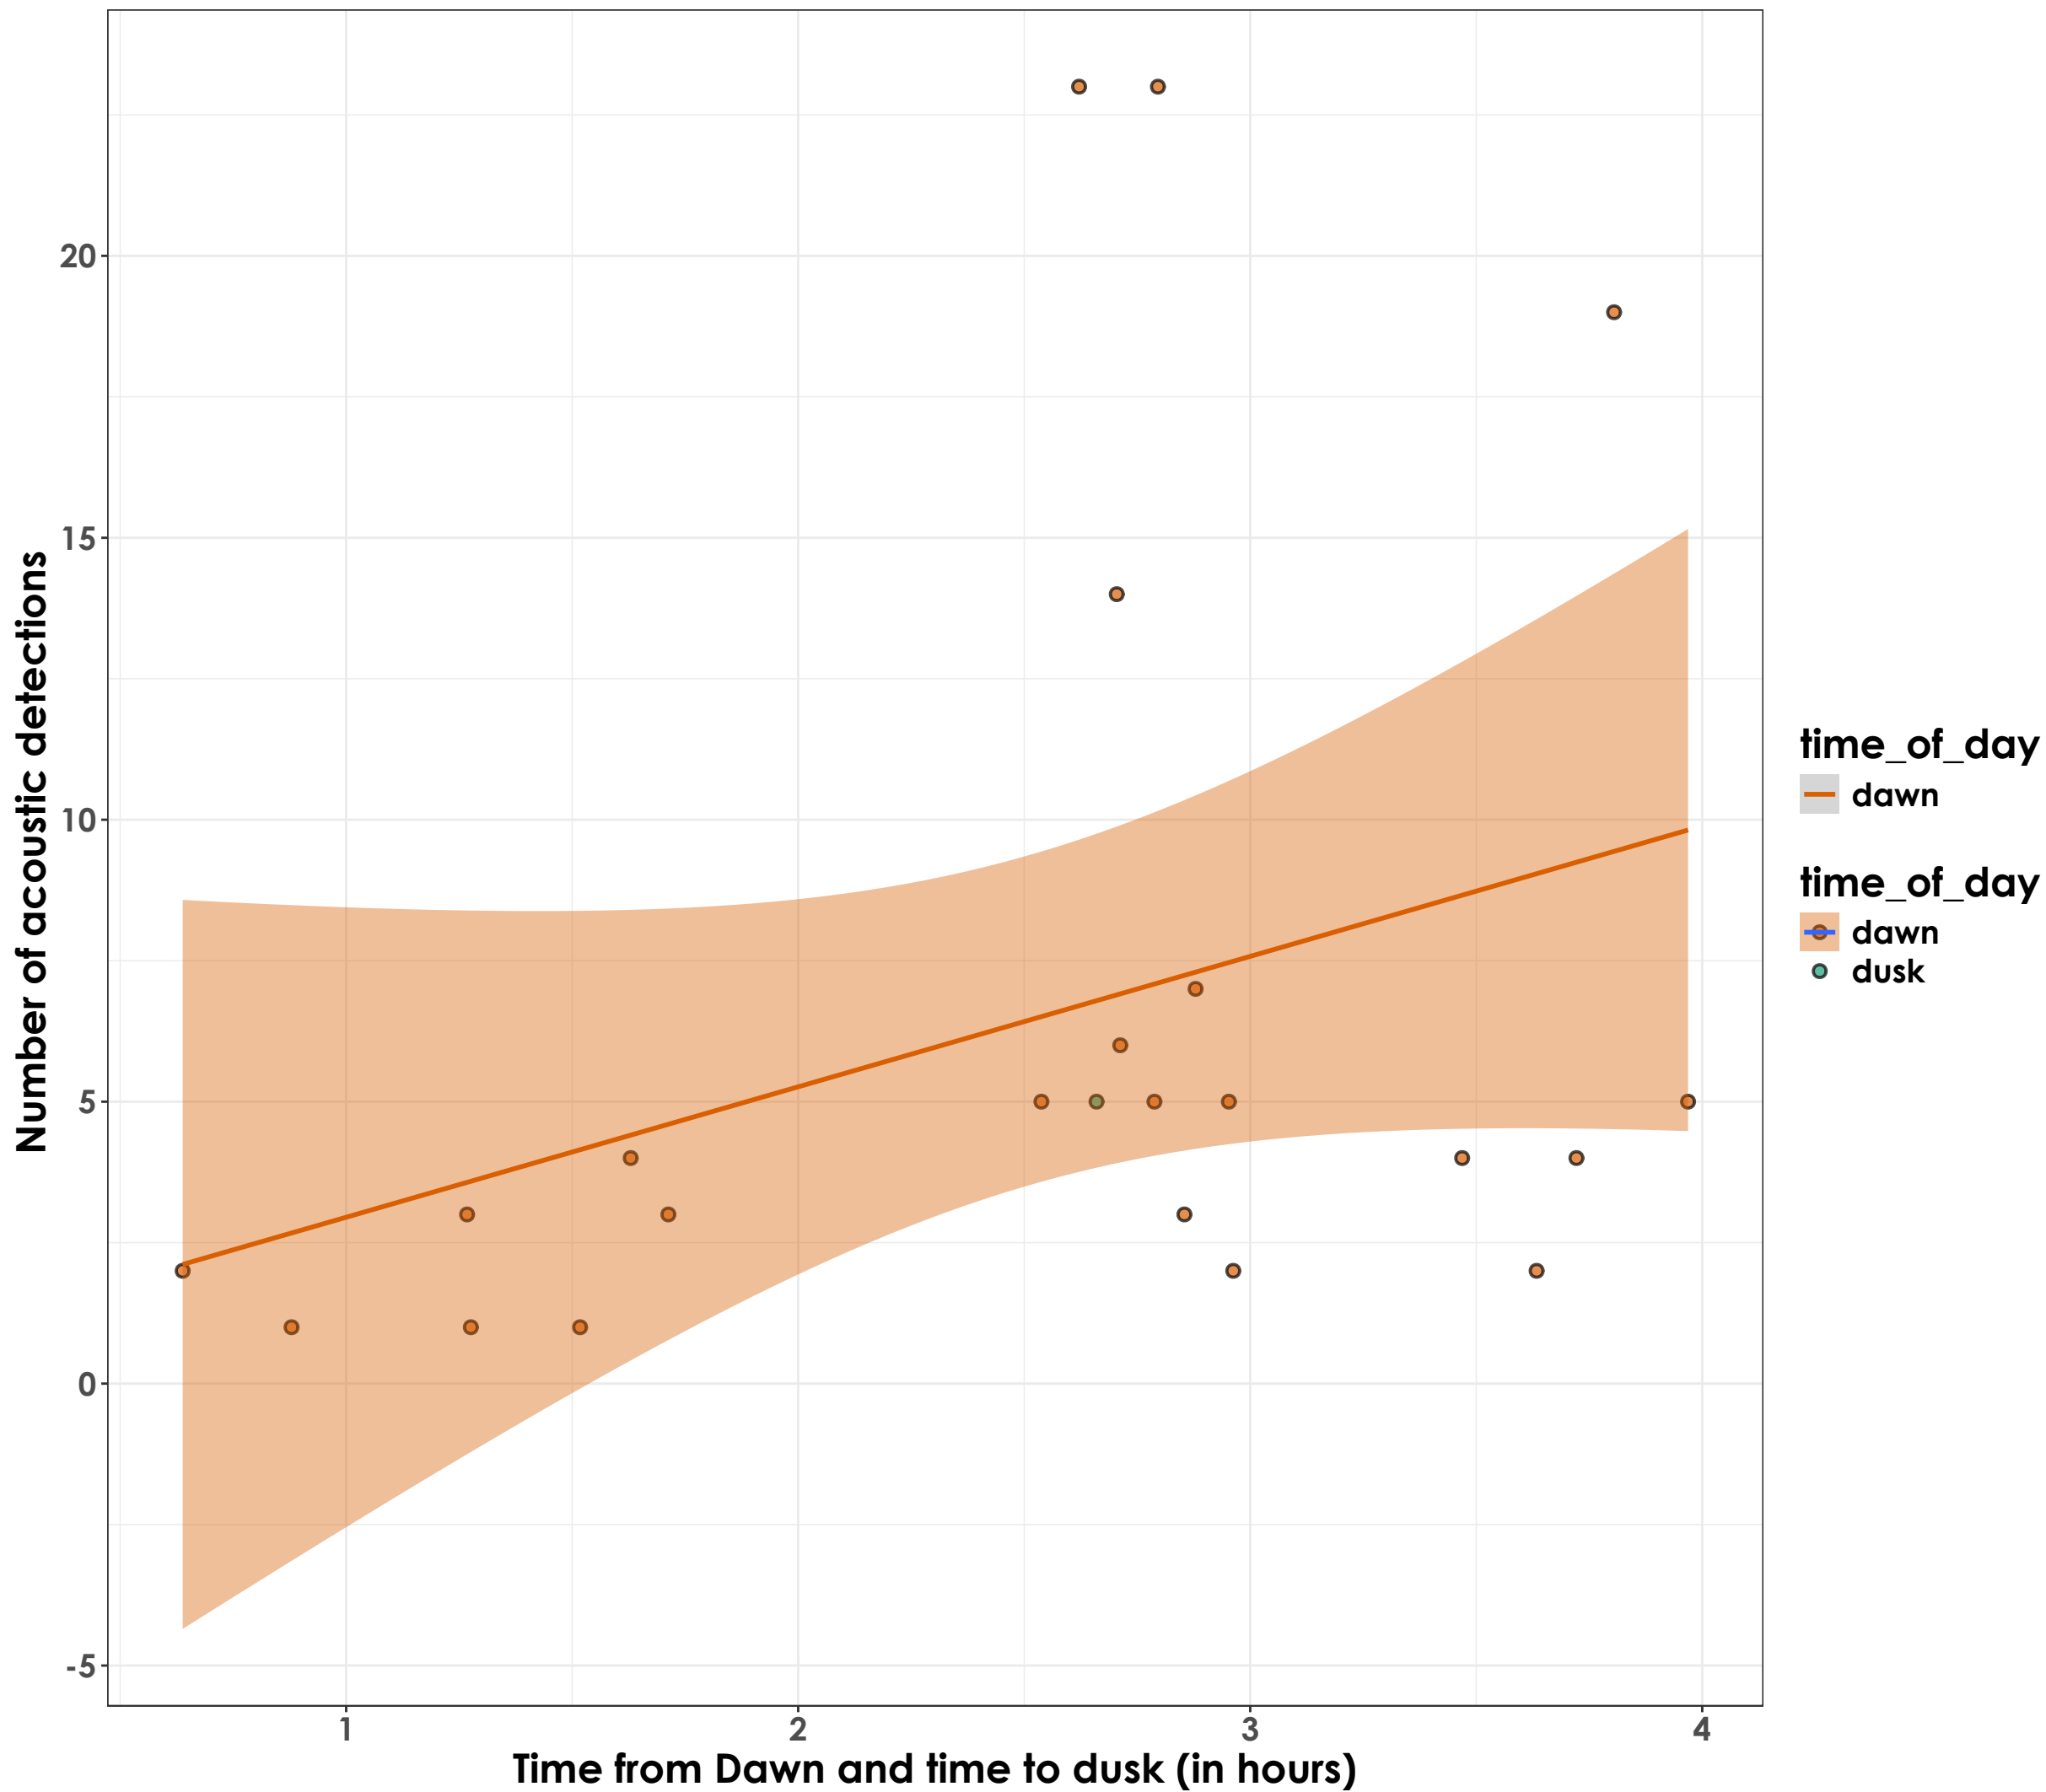

Black-rumped Flameback

Each dot represents the total number of detections after dawn or before dusk (in hours)

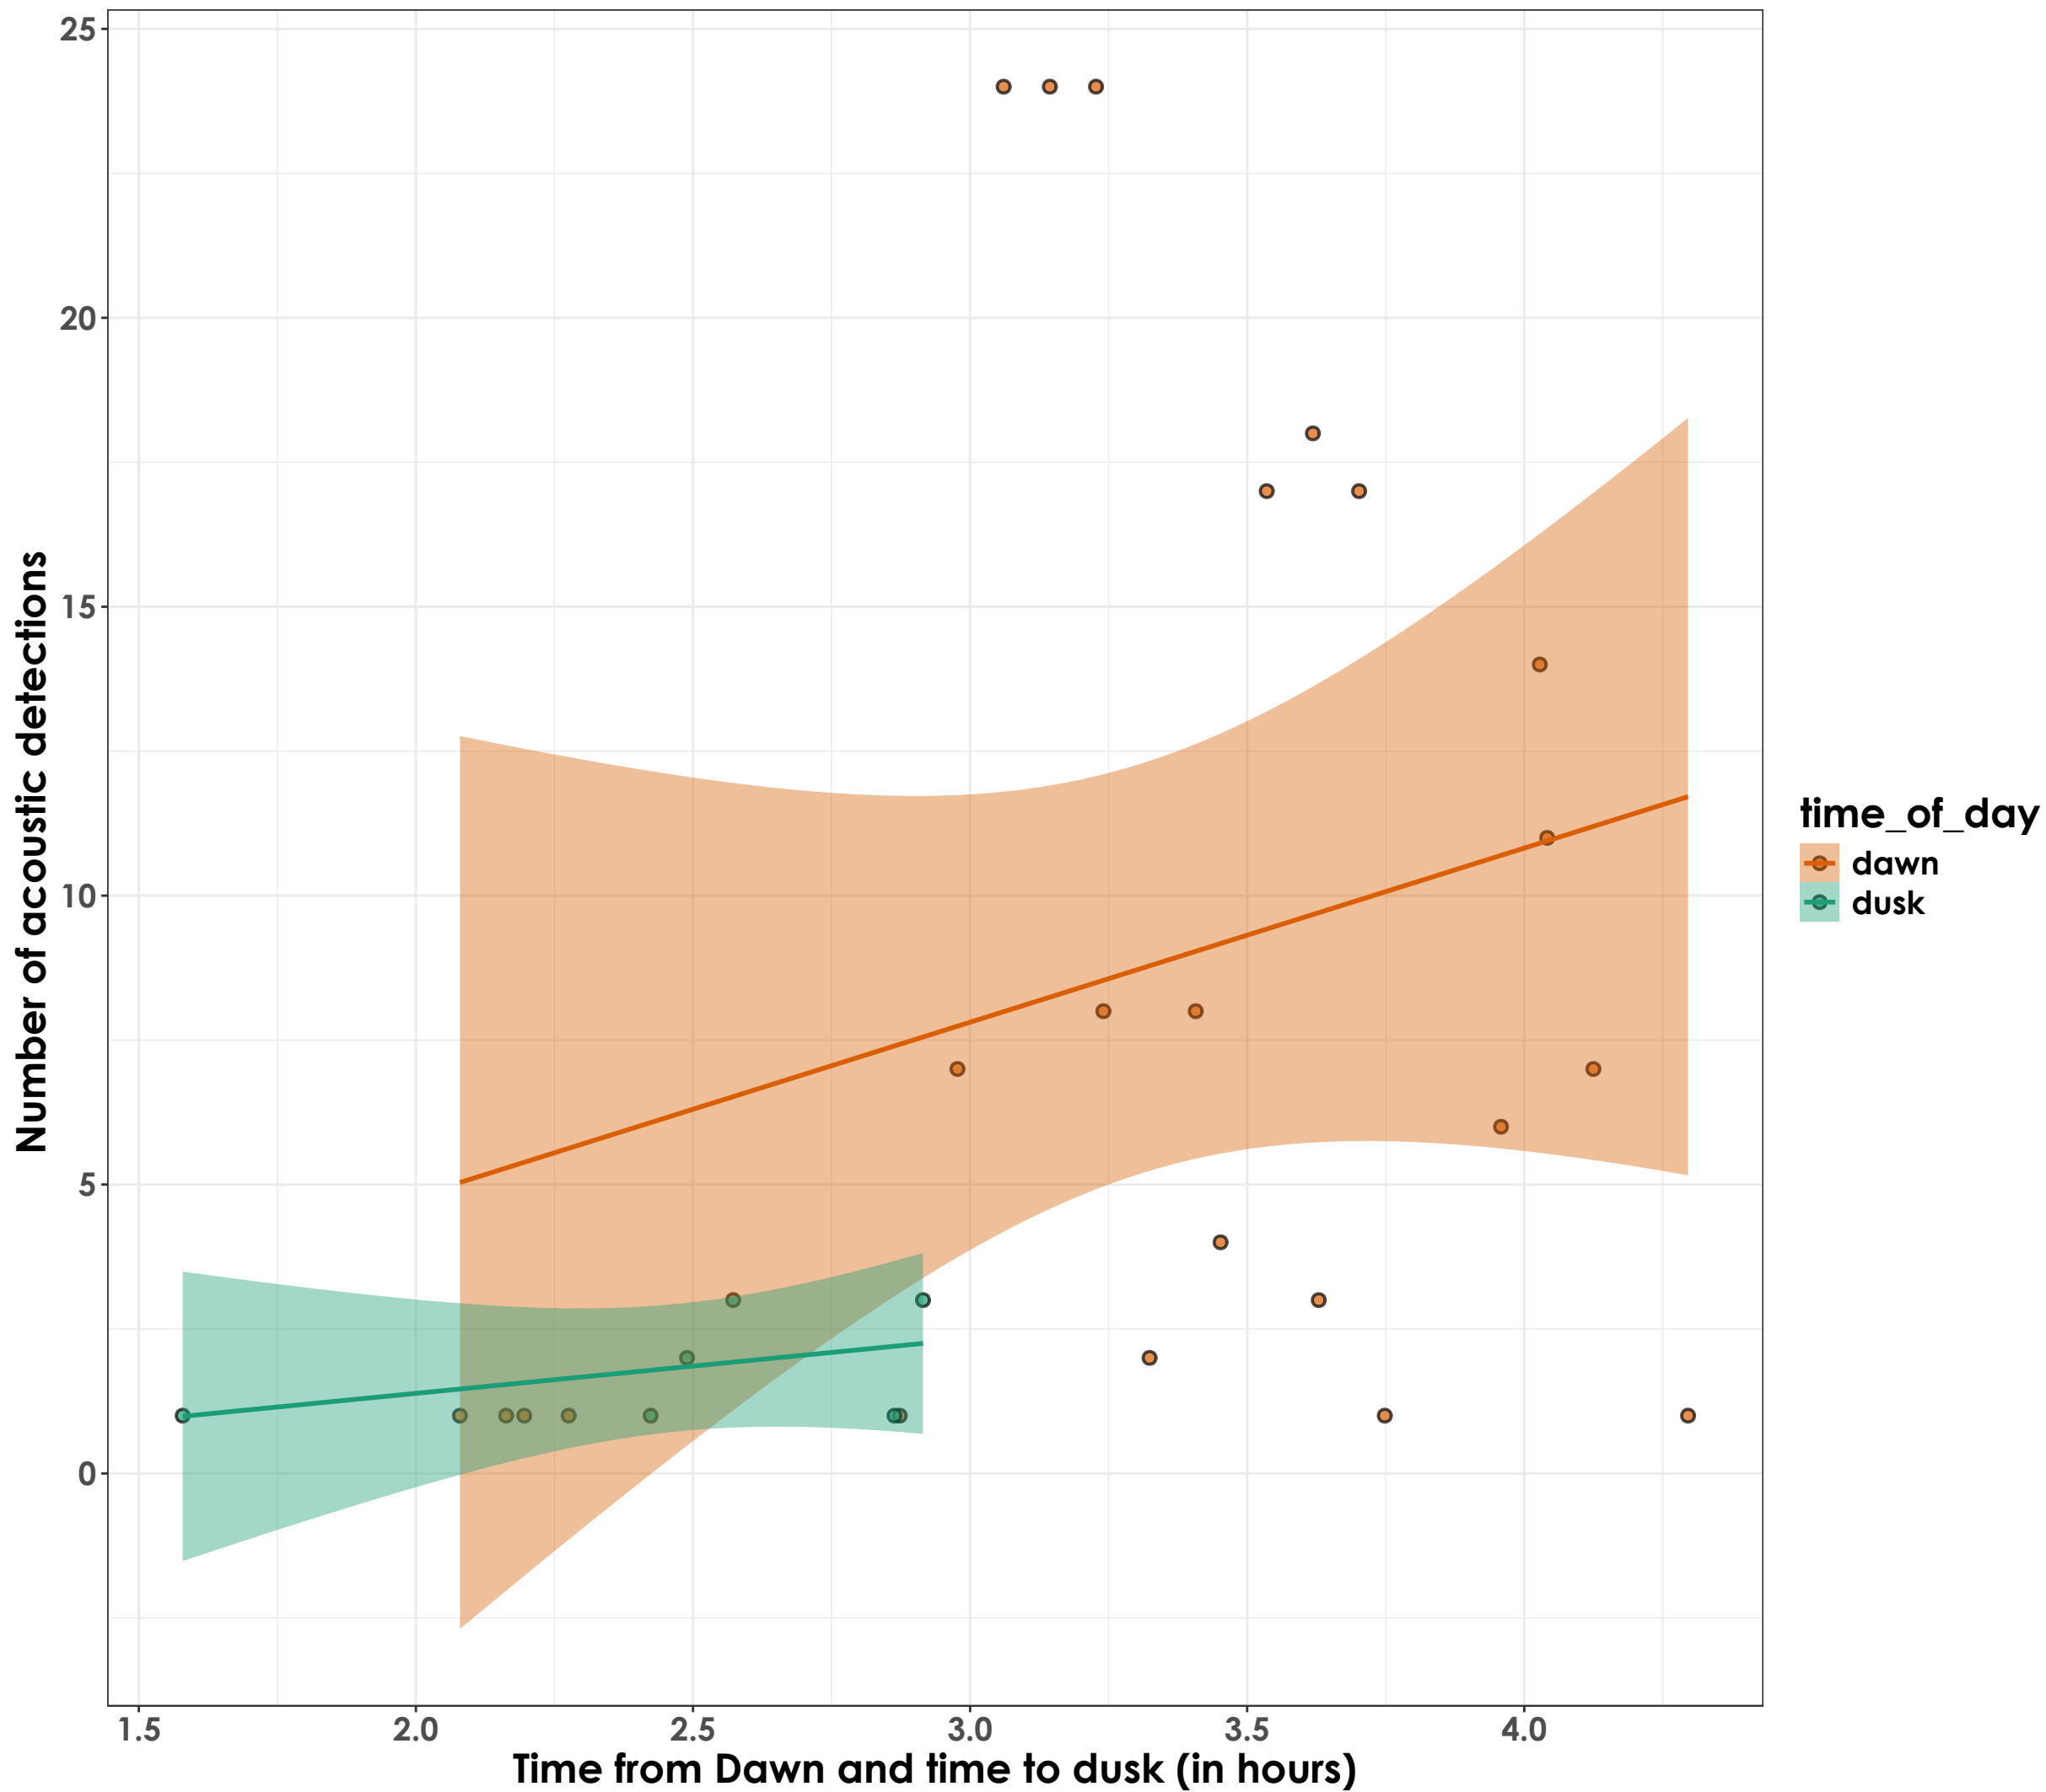

Flame-throated Bulbul

Each dot represents the total number of detections after dawn or before dusk (in hours)

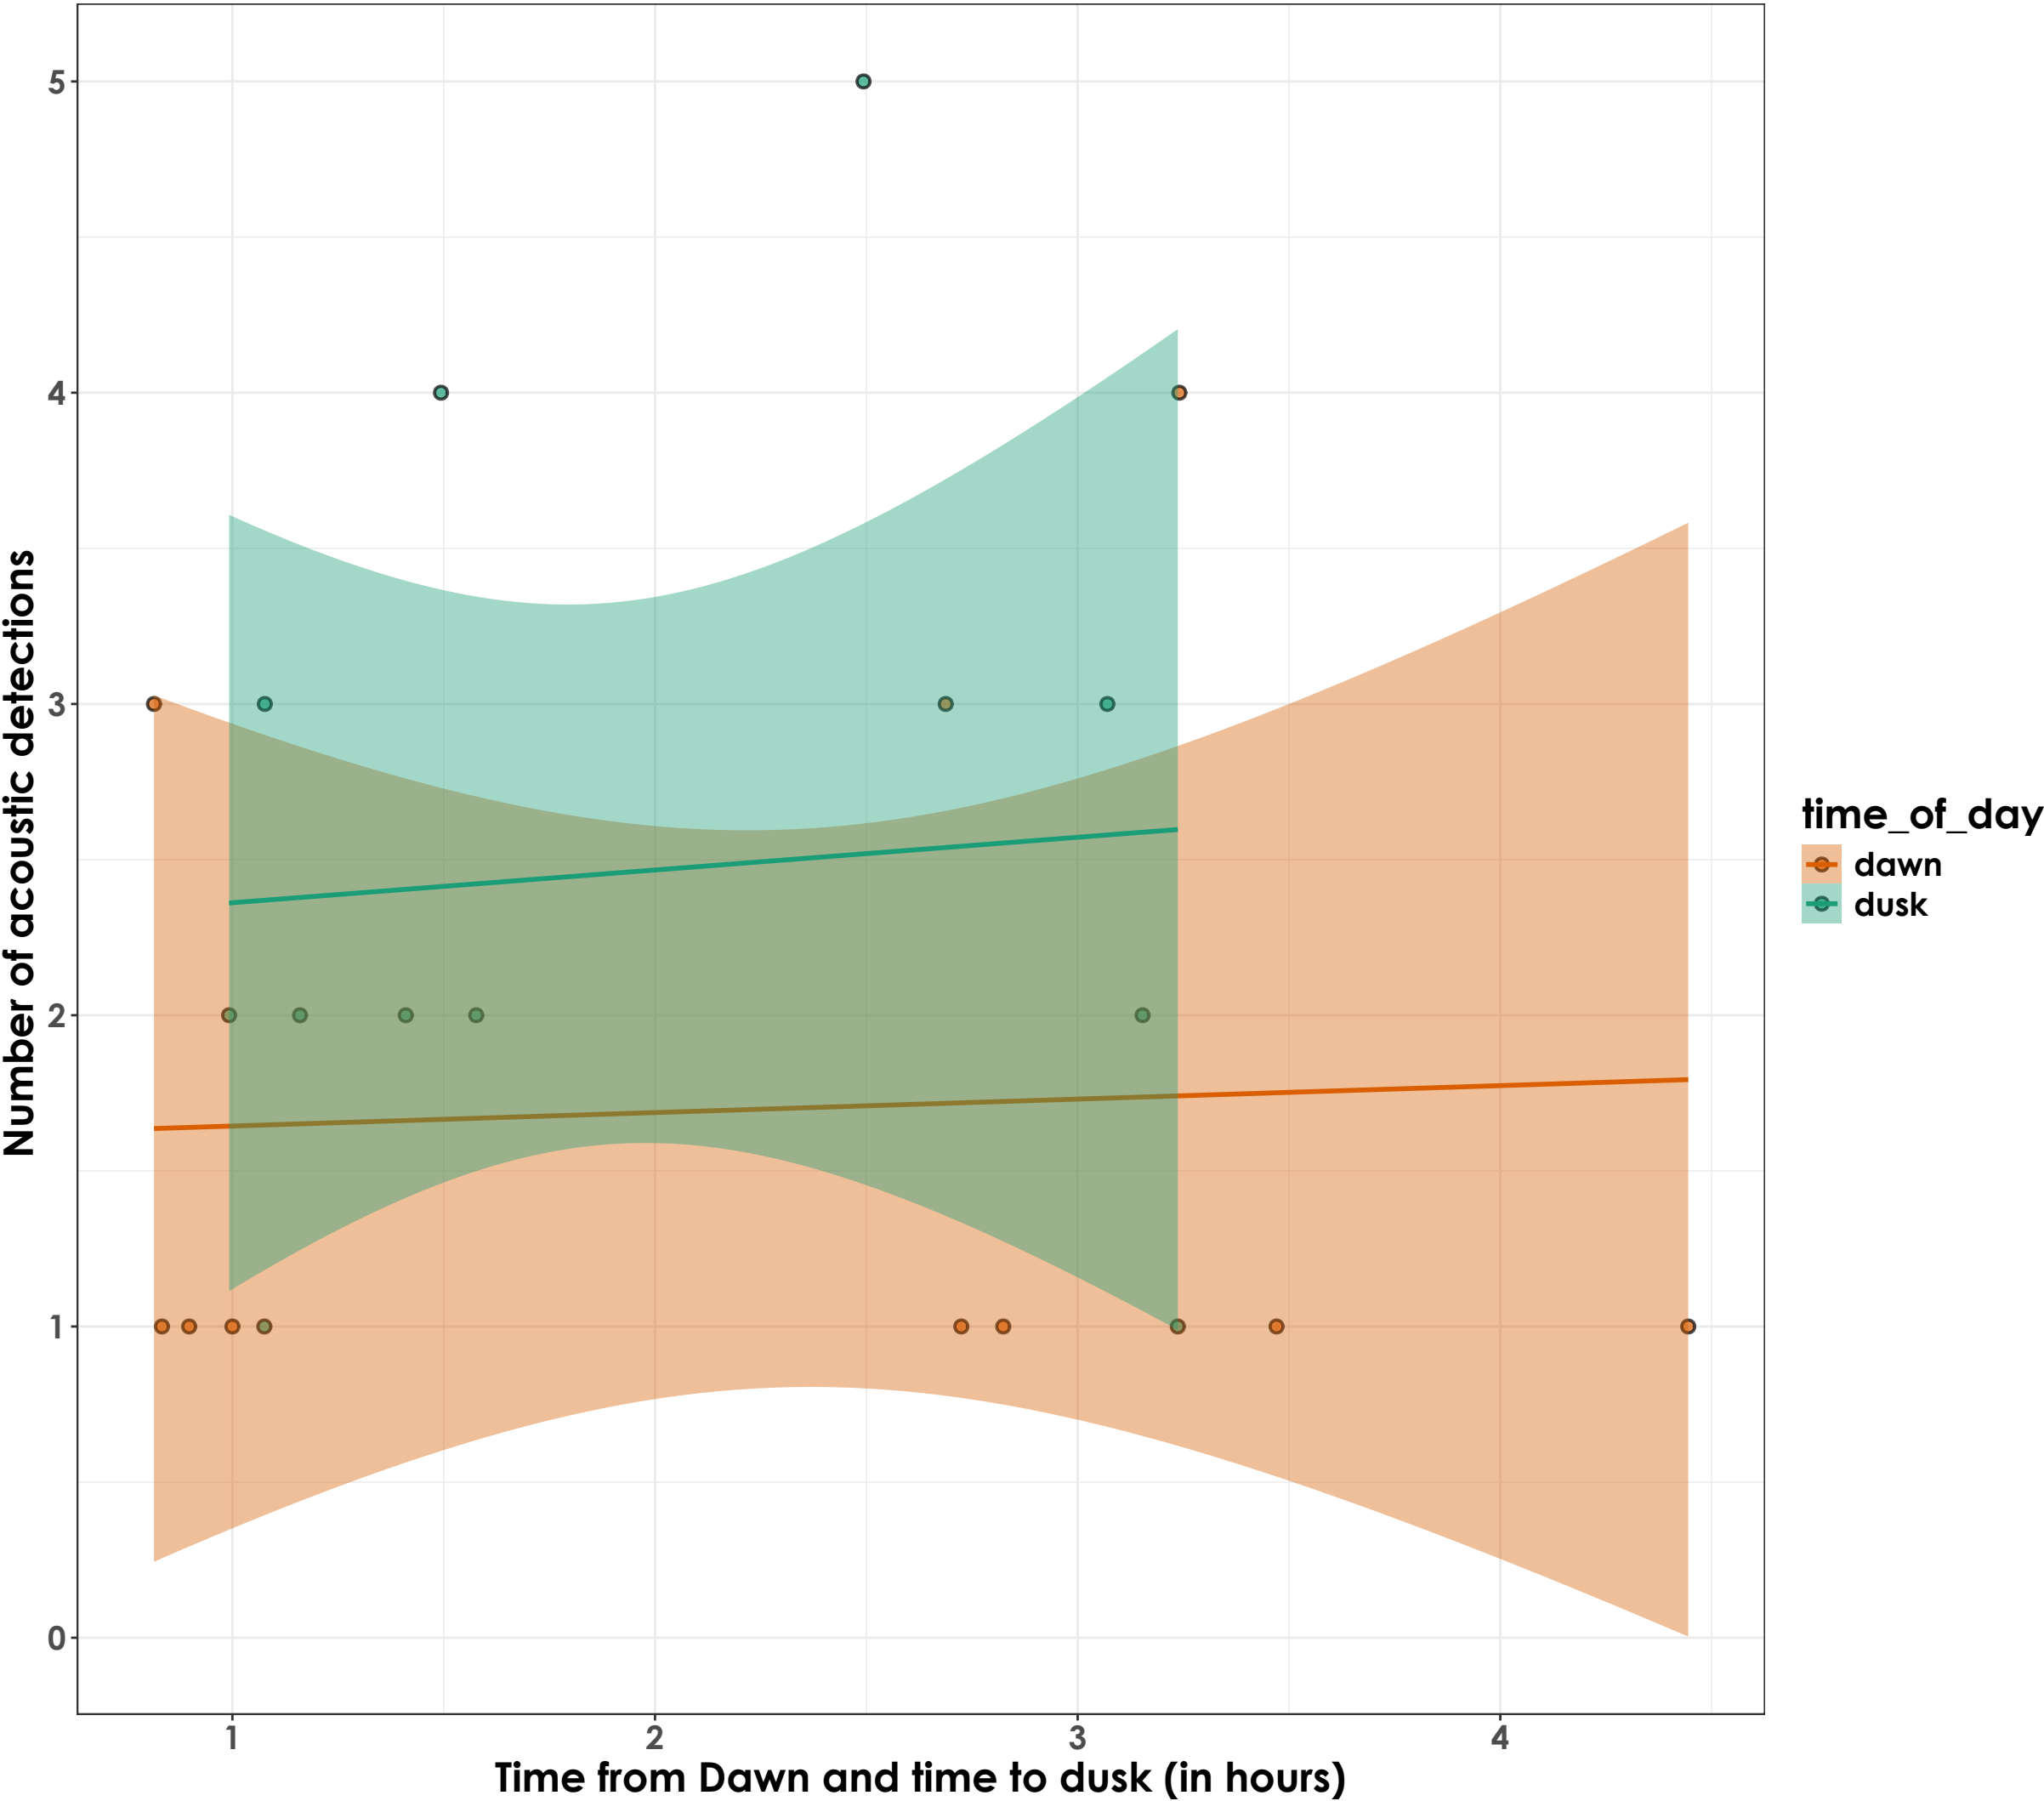

Gray-breasted Prinia

Each dot represents the total number of detections after dawn or before dusk (in hours)

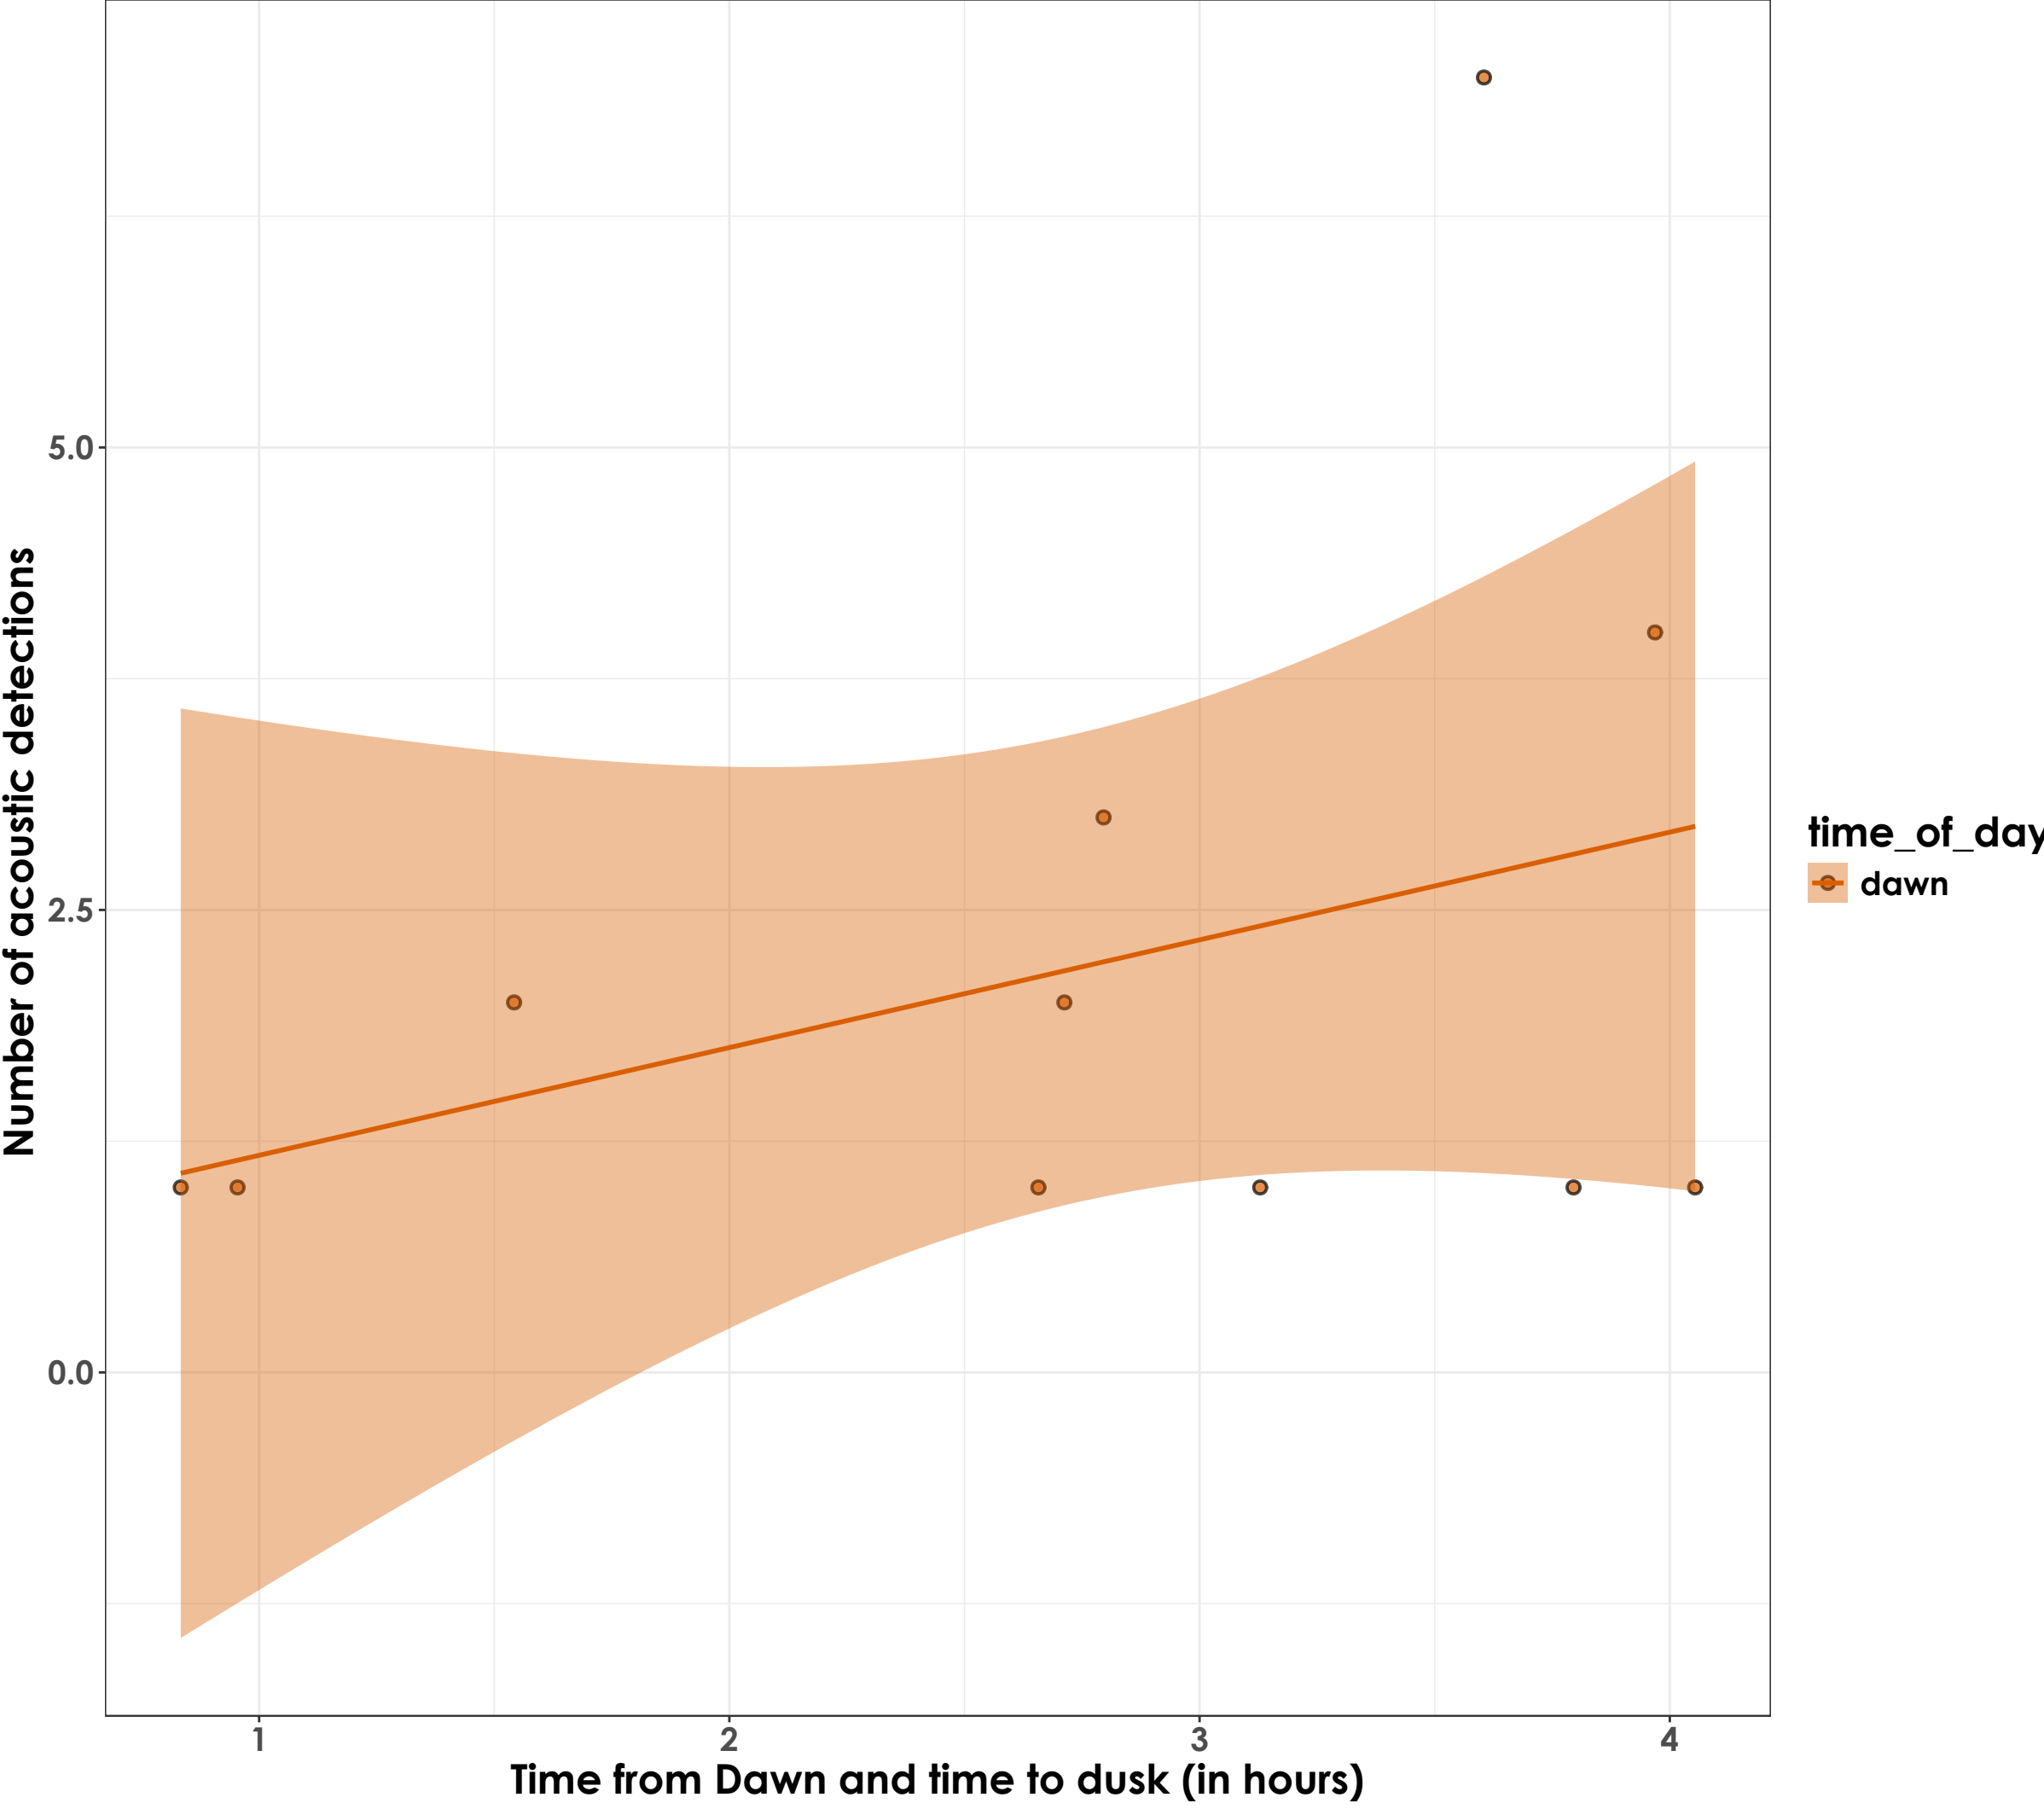

Gray-fronted Green-Pigeon

Each dot represents the total number of detections after dawn or before dusk (in hours)

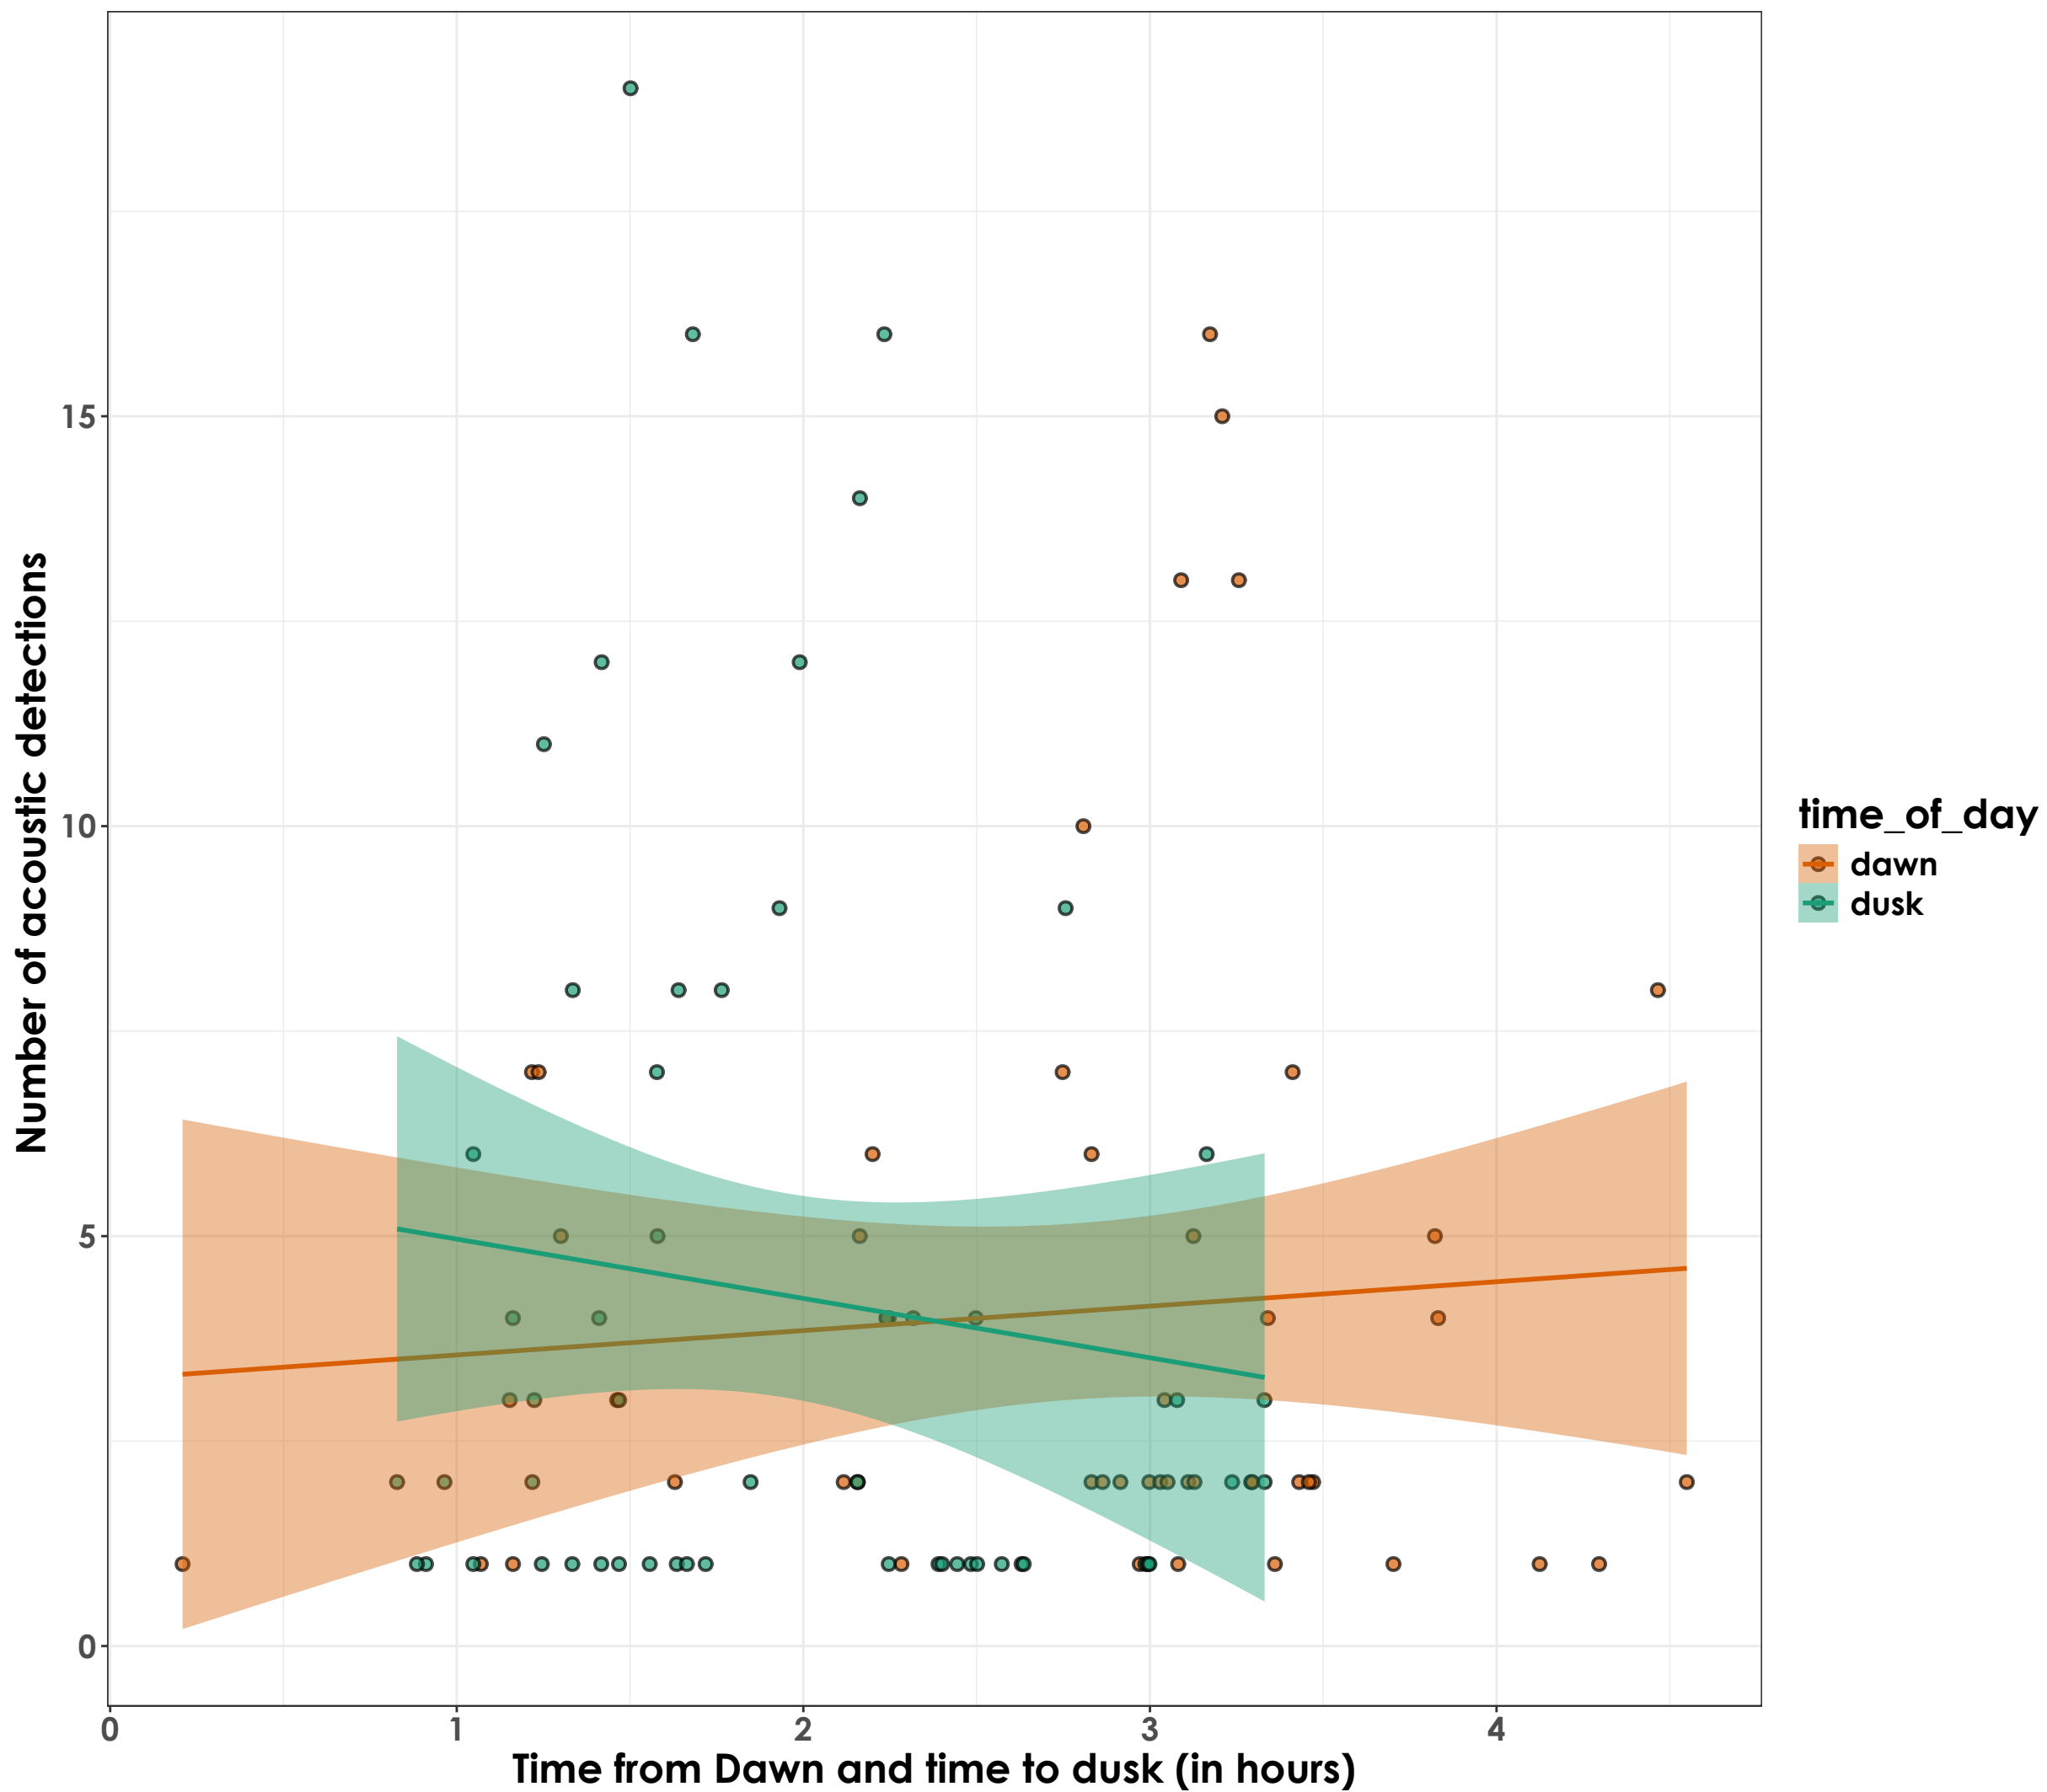

Black-throated Munia

Each dot represents the total number of detections after dawn or before dusk (in hours)

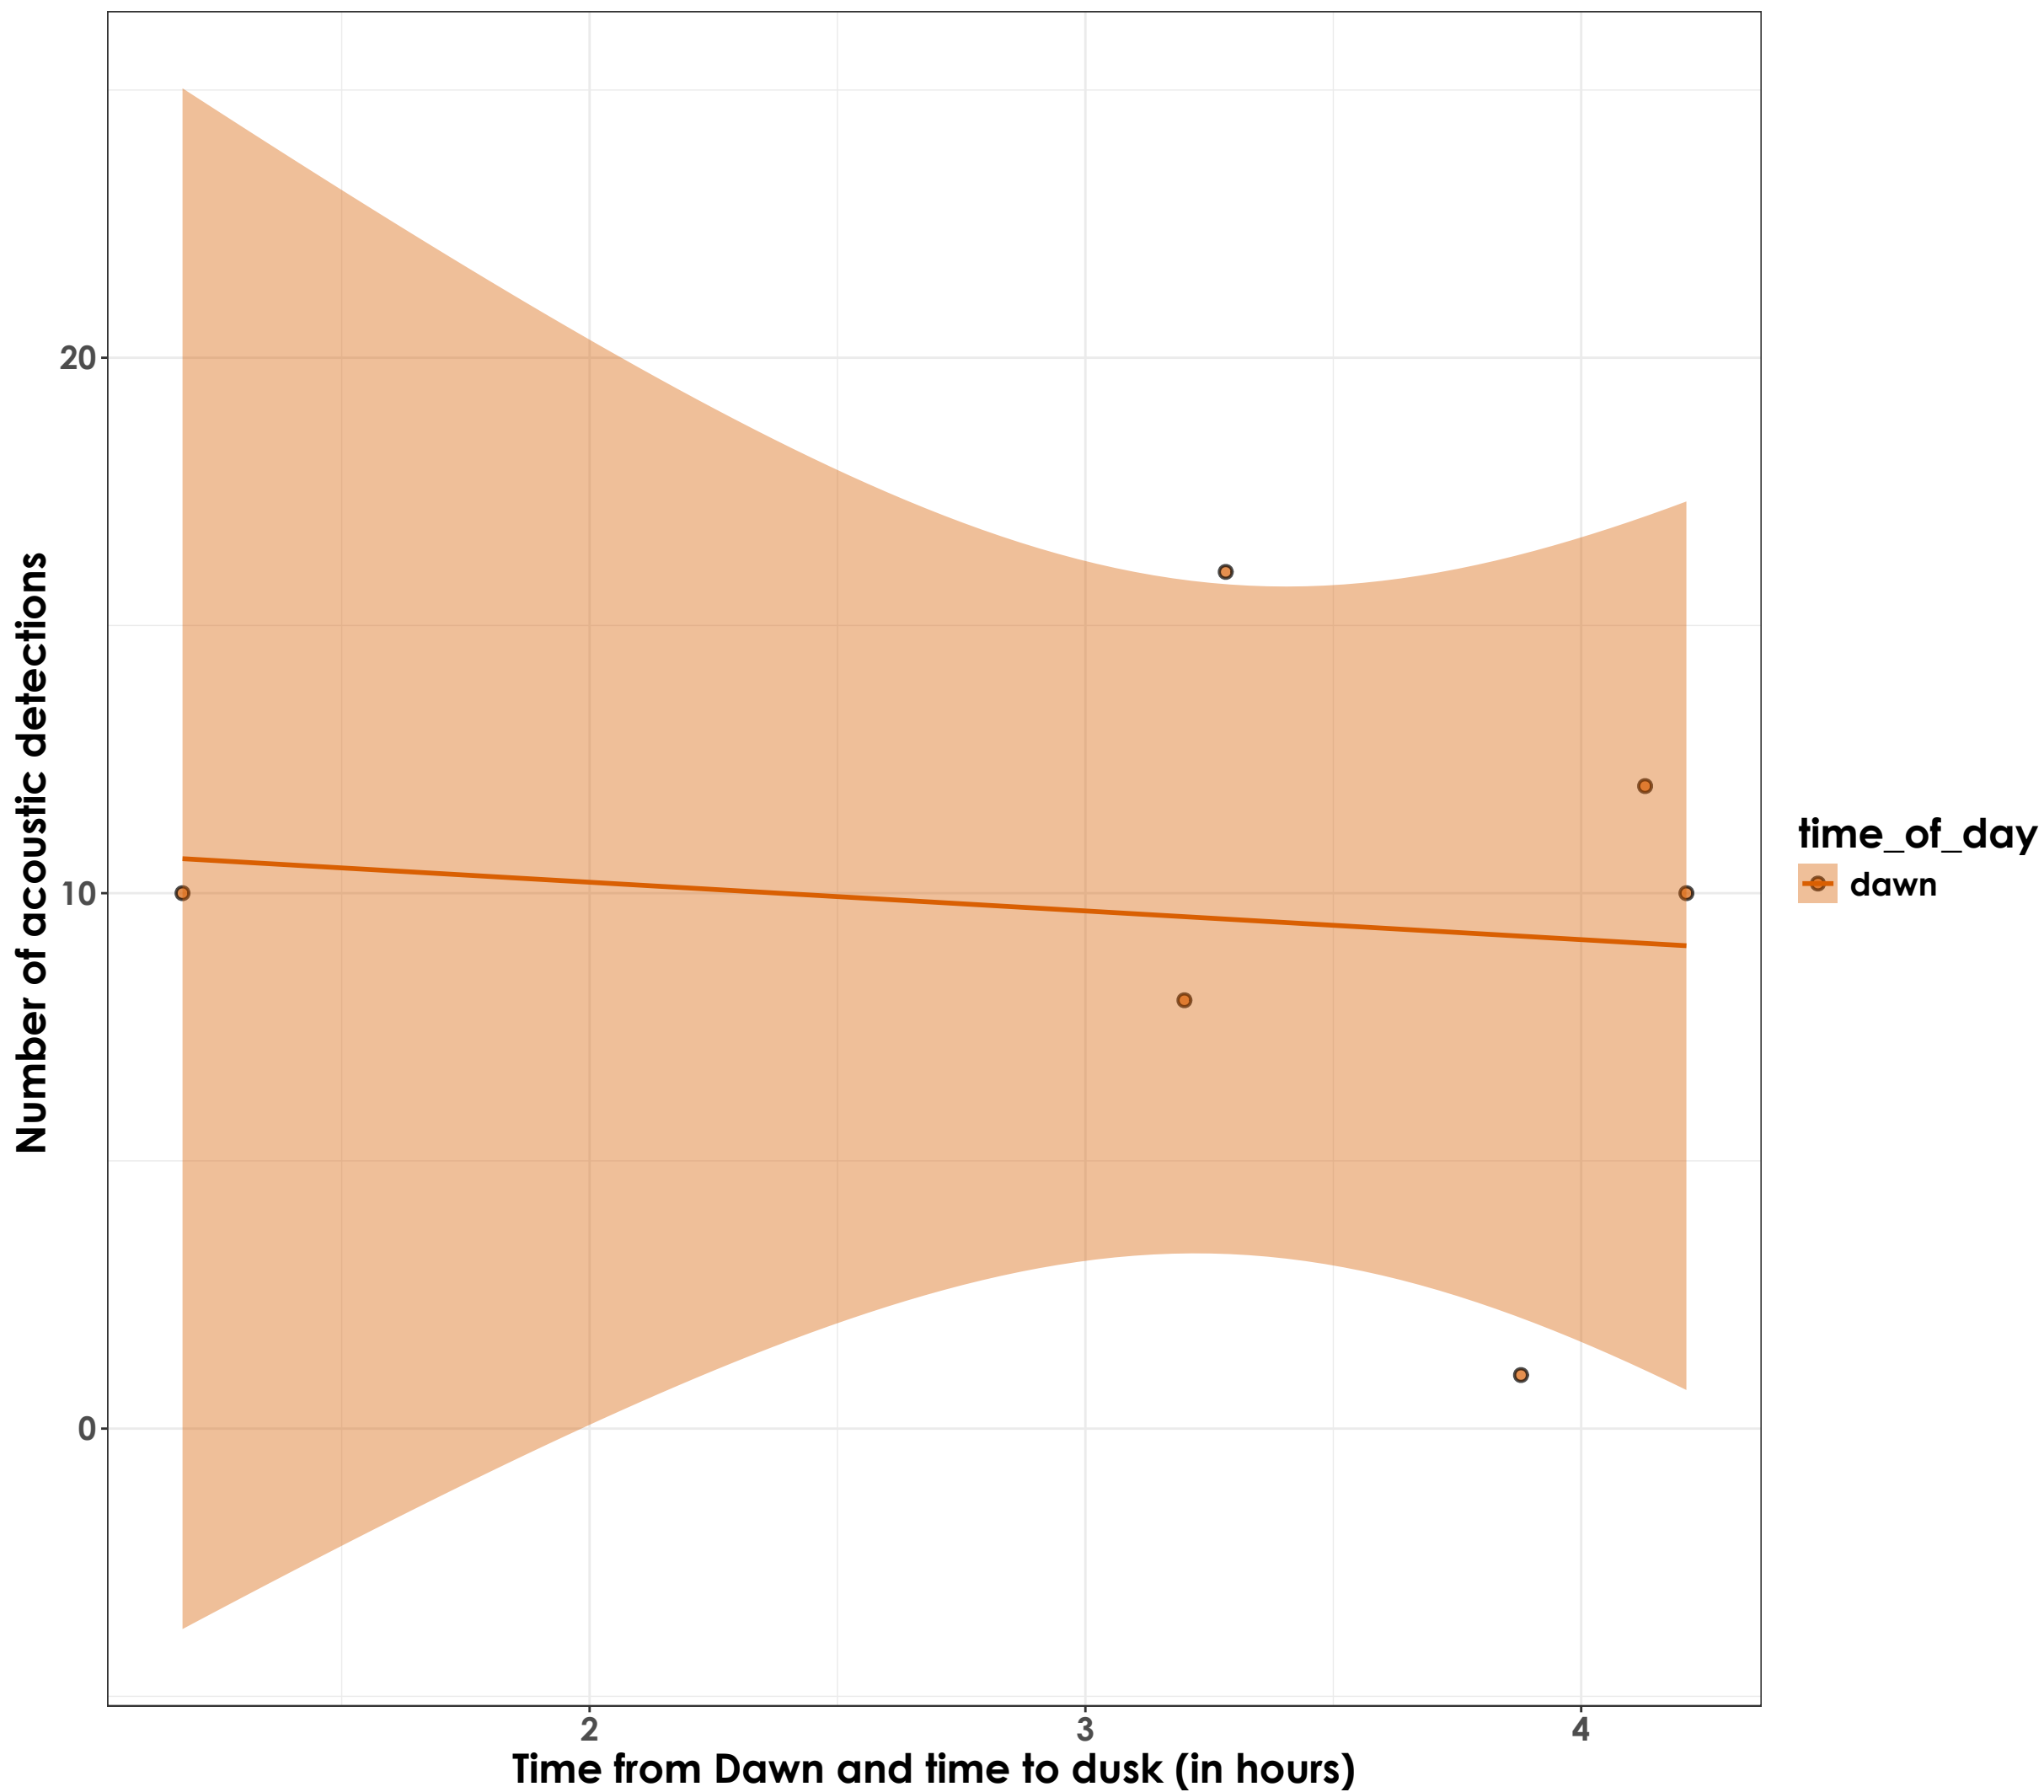

House Crow

Each dot represents the total number of detections after dawn or before dusk (in hours)

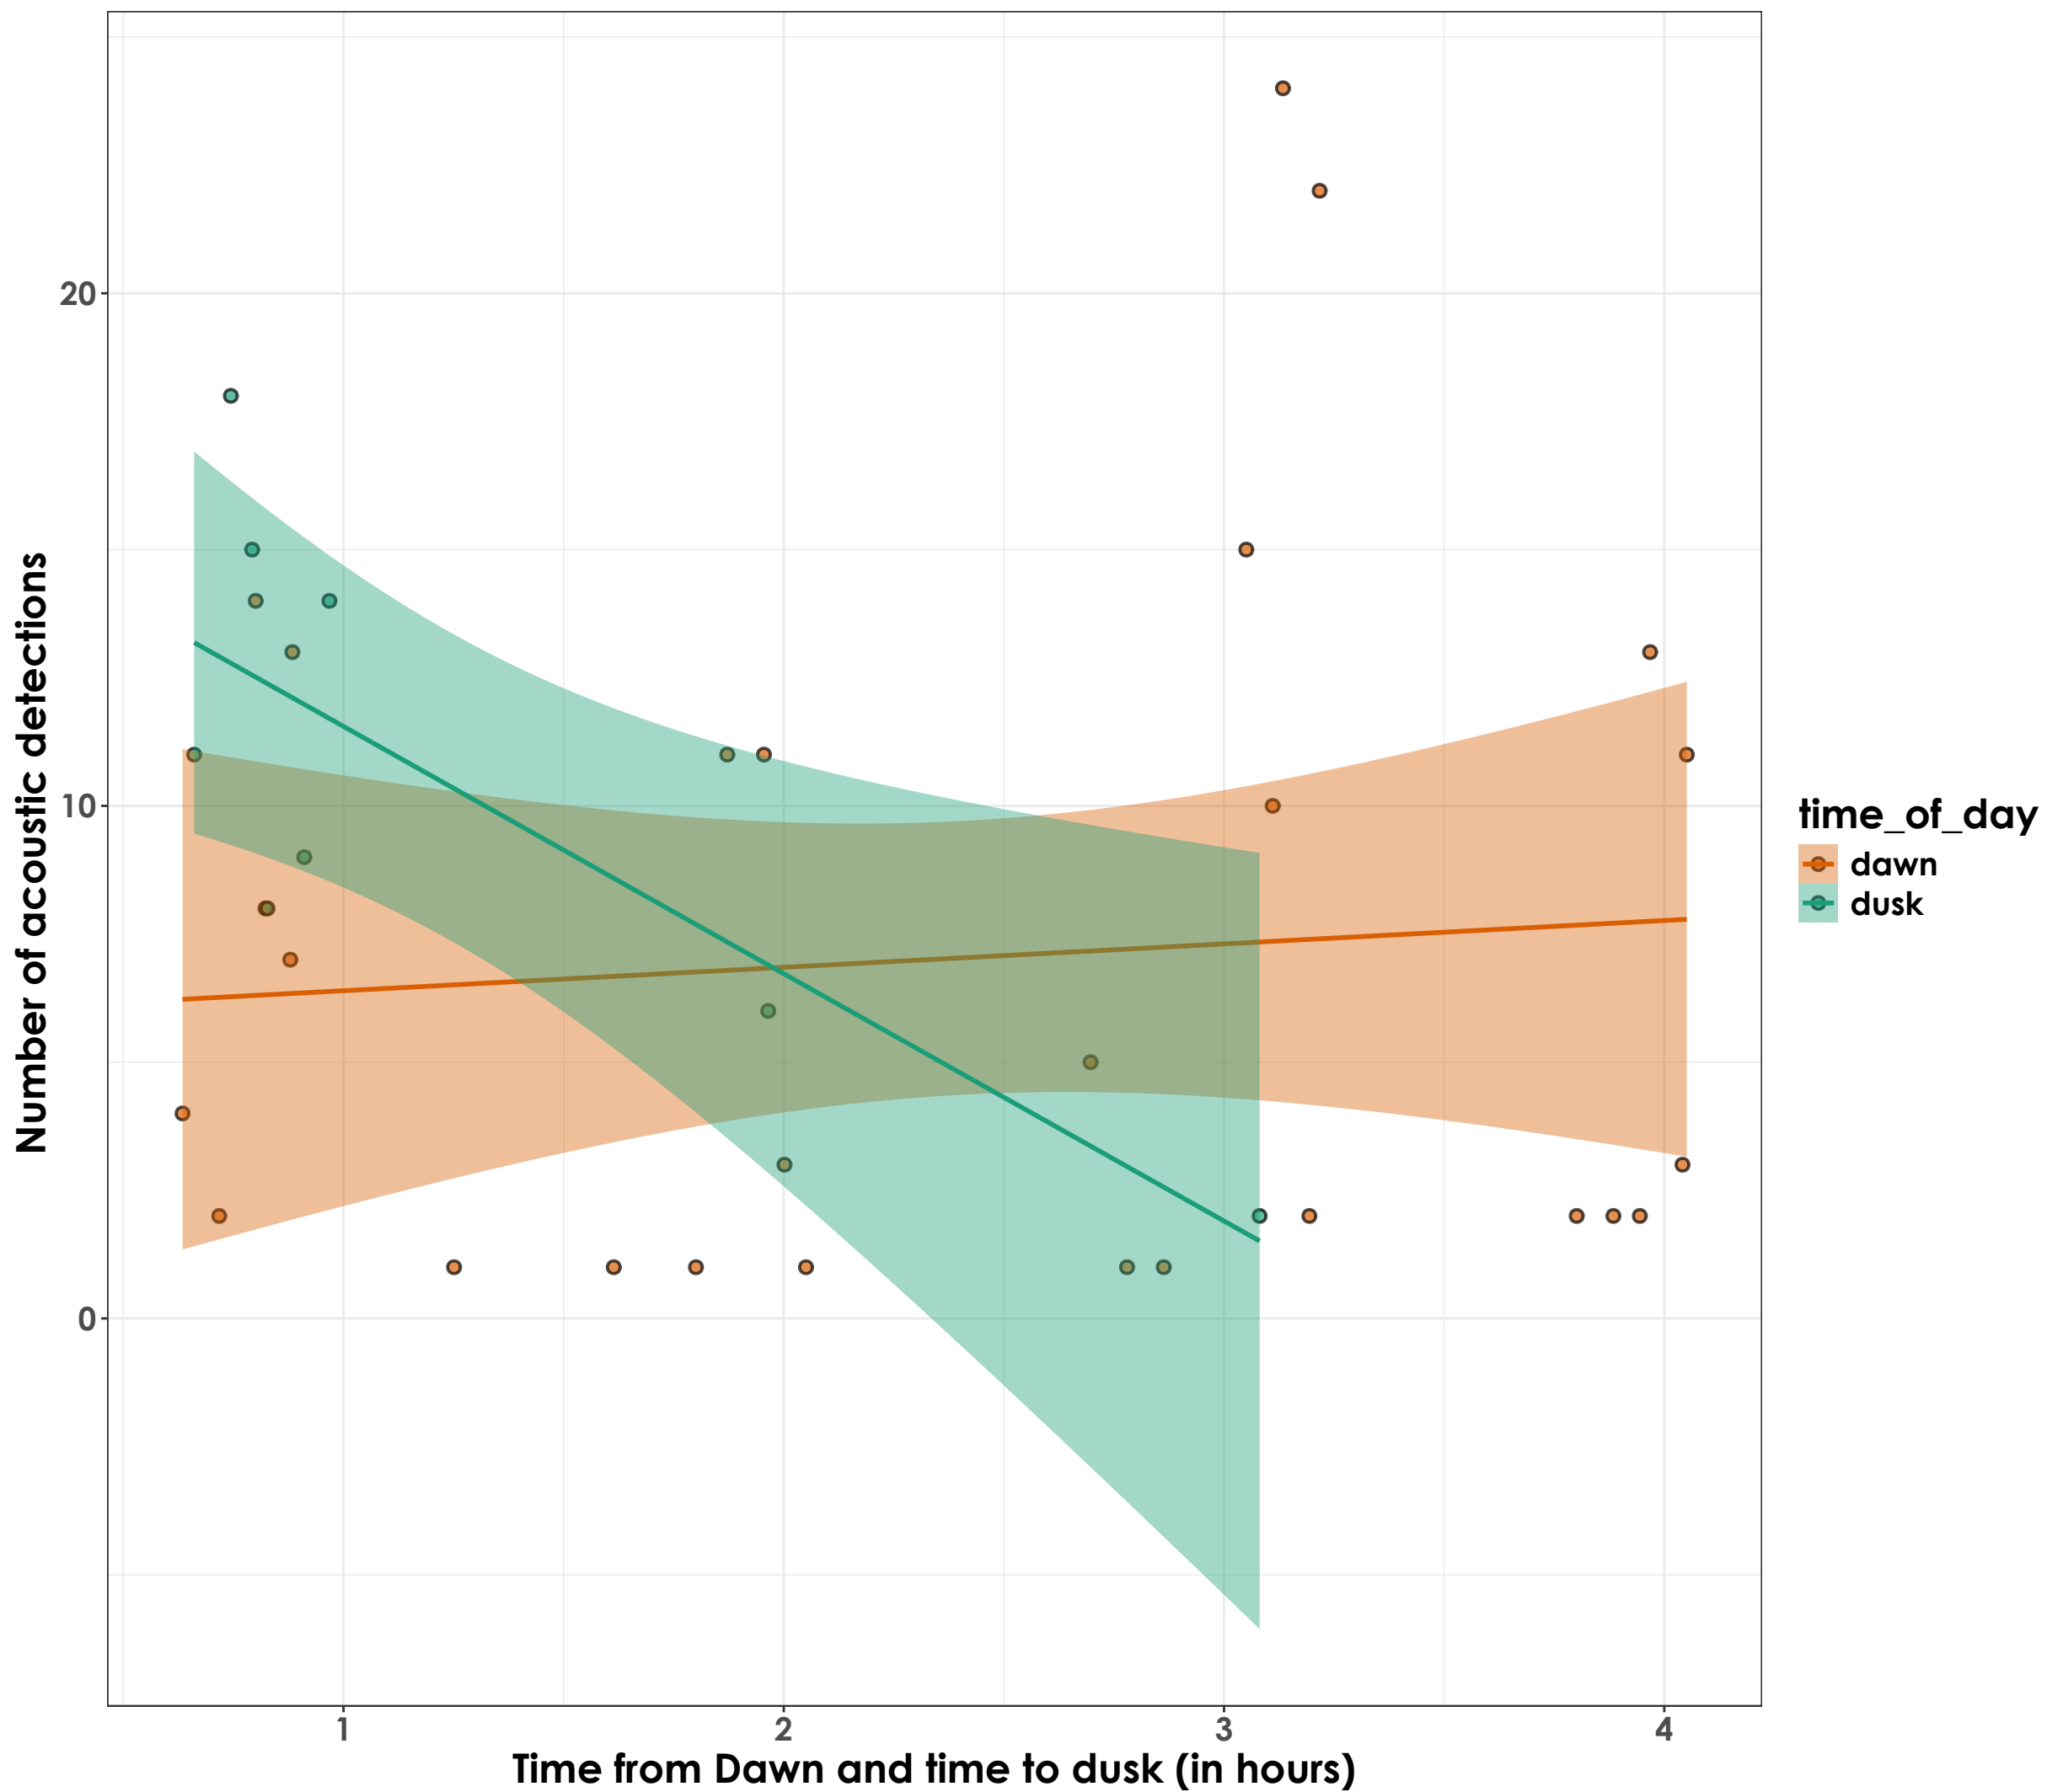

Yellow-eyed Babbler

Each dot represents the total number of detections after dawn or before dusk (in hours)

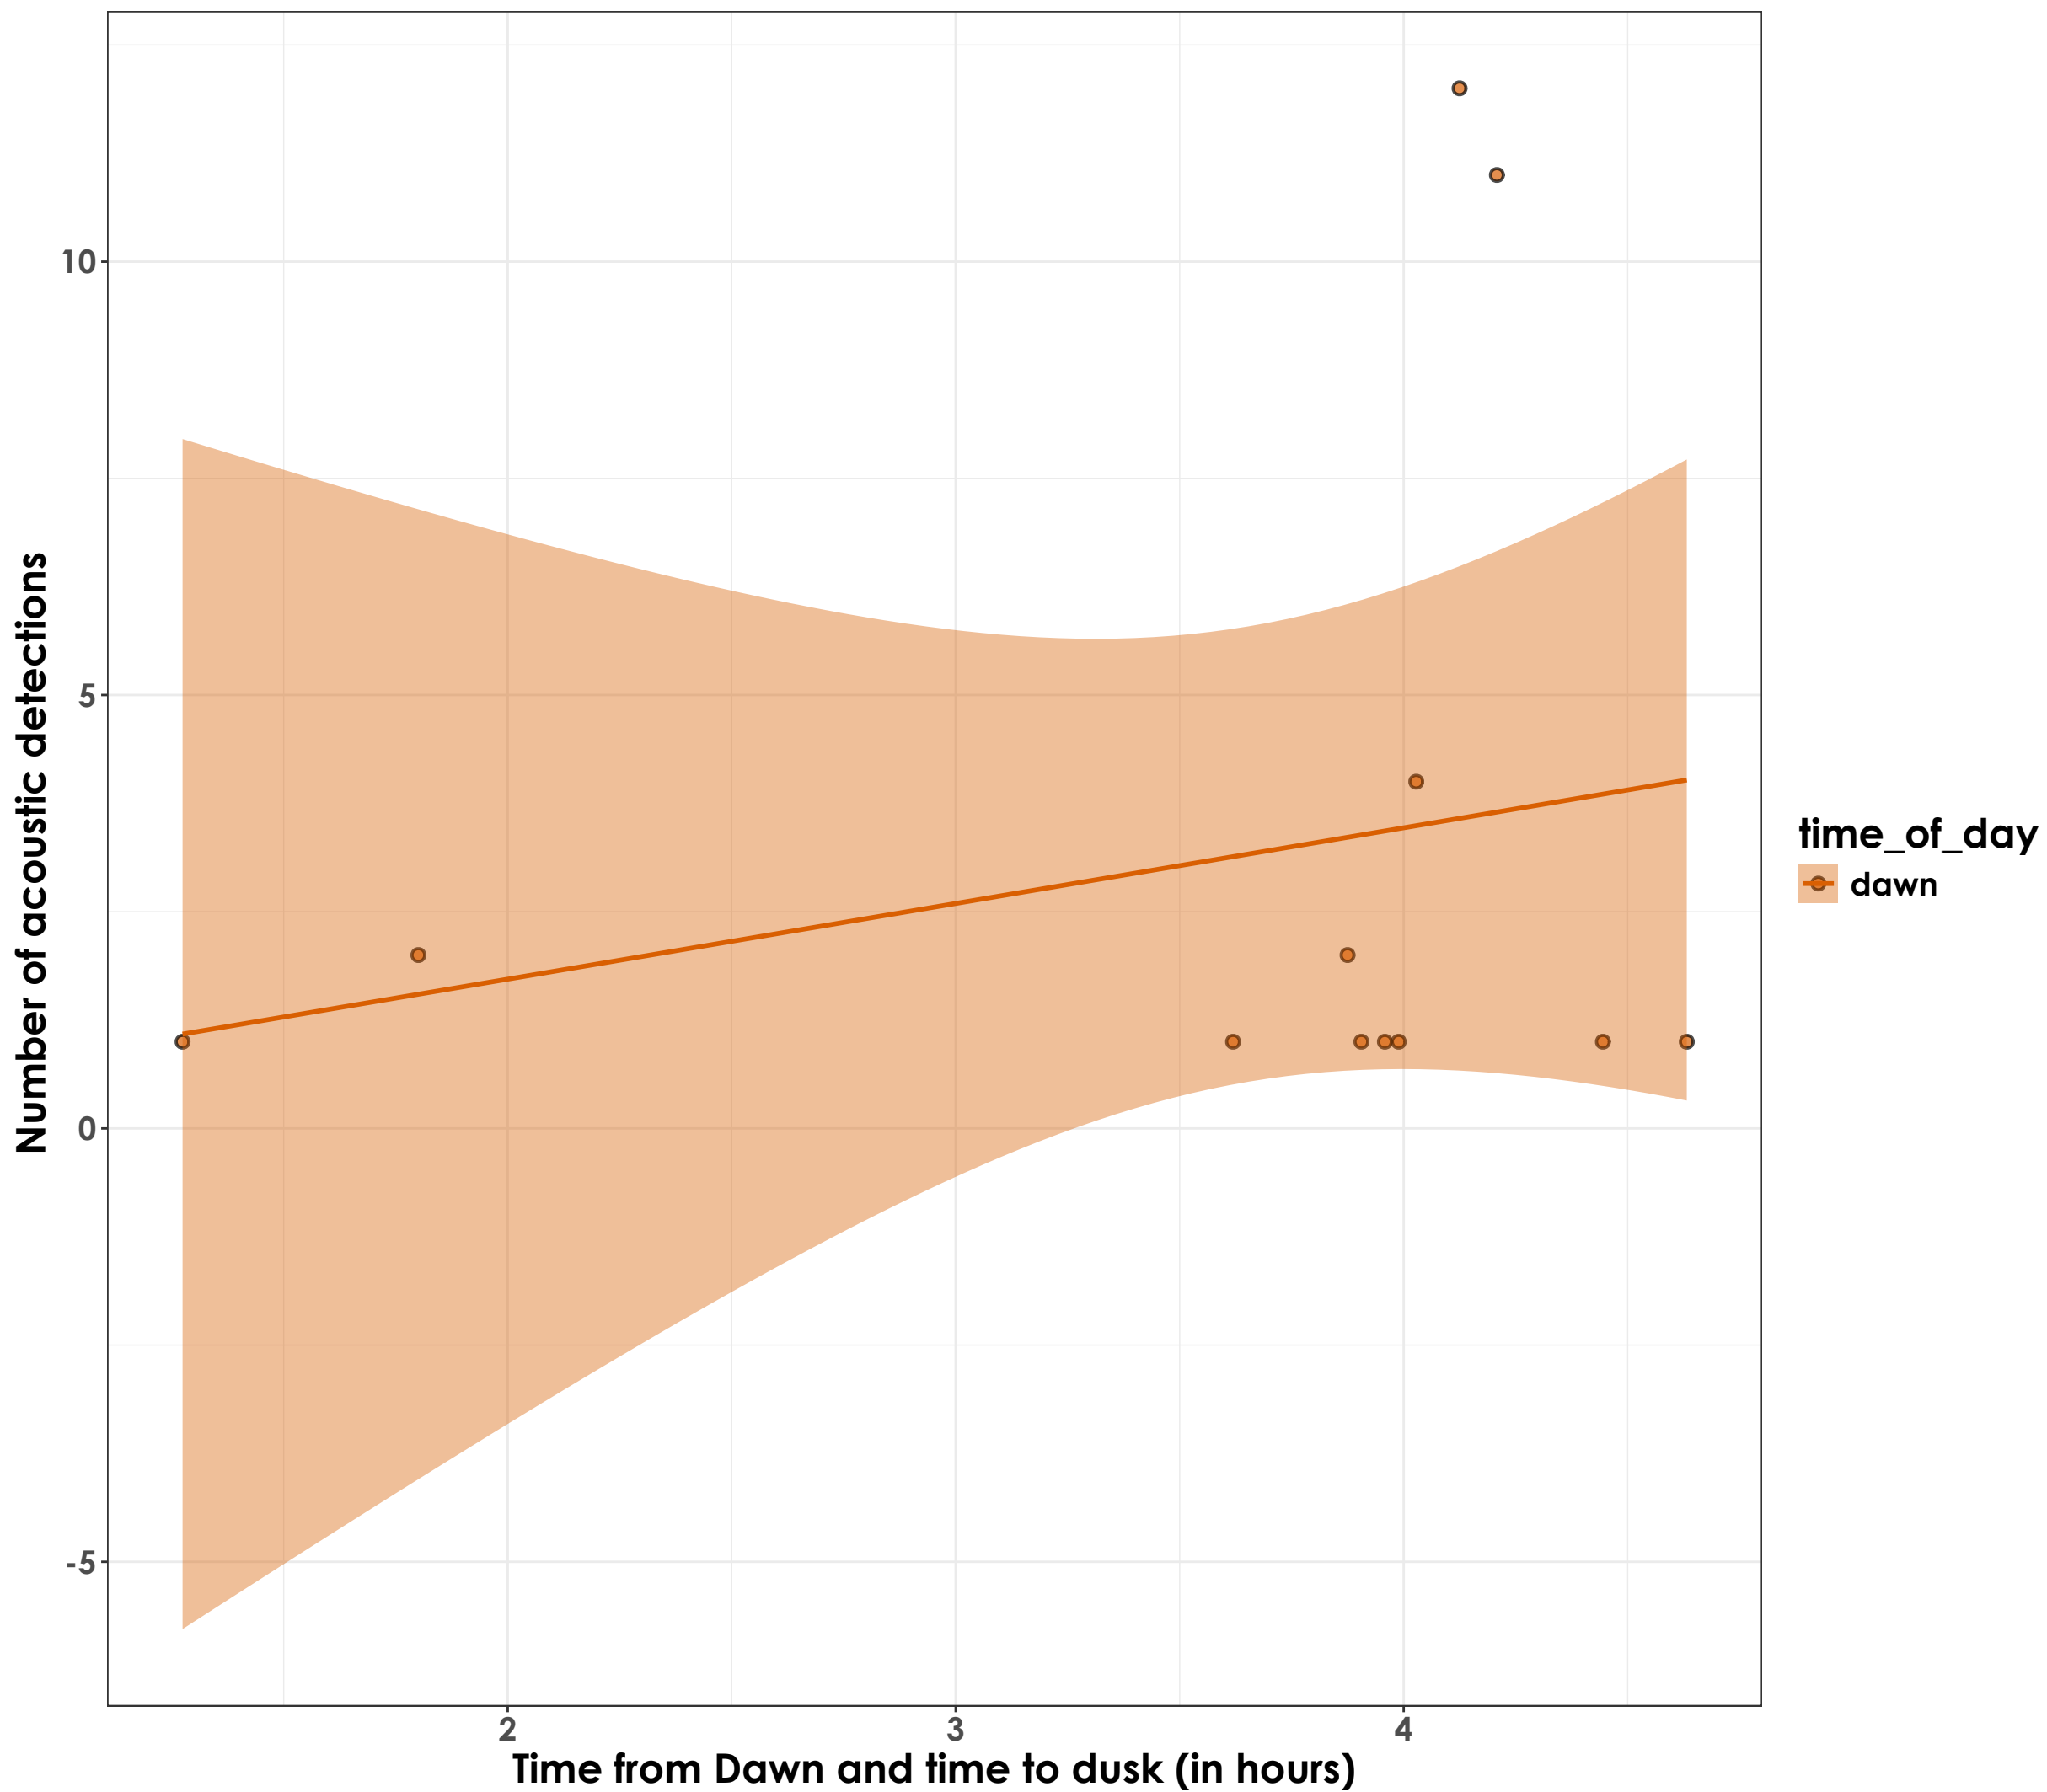

Golden-fronted Leafbird

Each dot represents the total number of detections after dawn or before dusk (in hours)

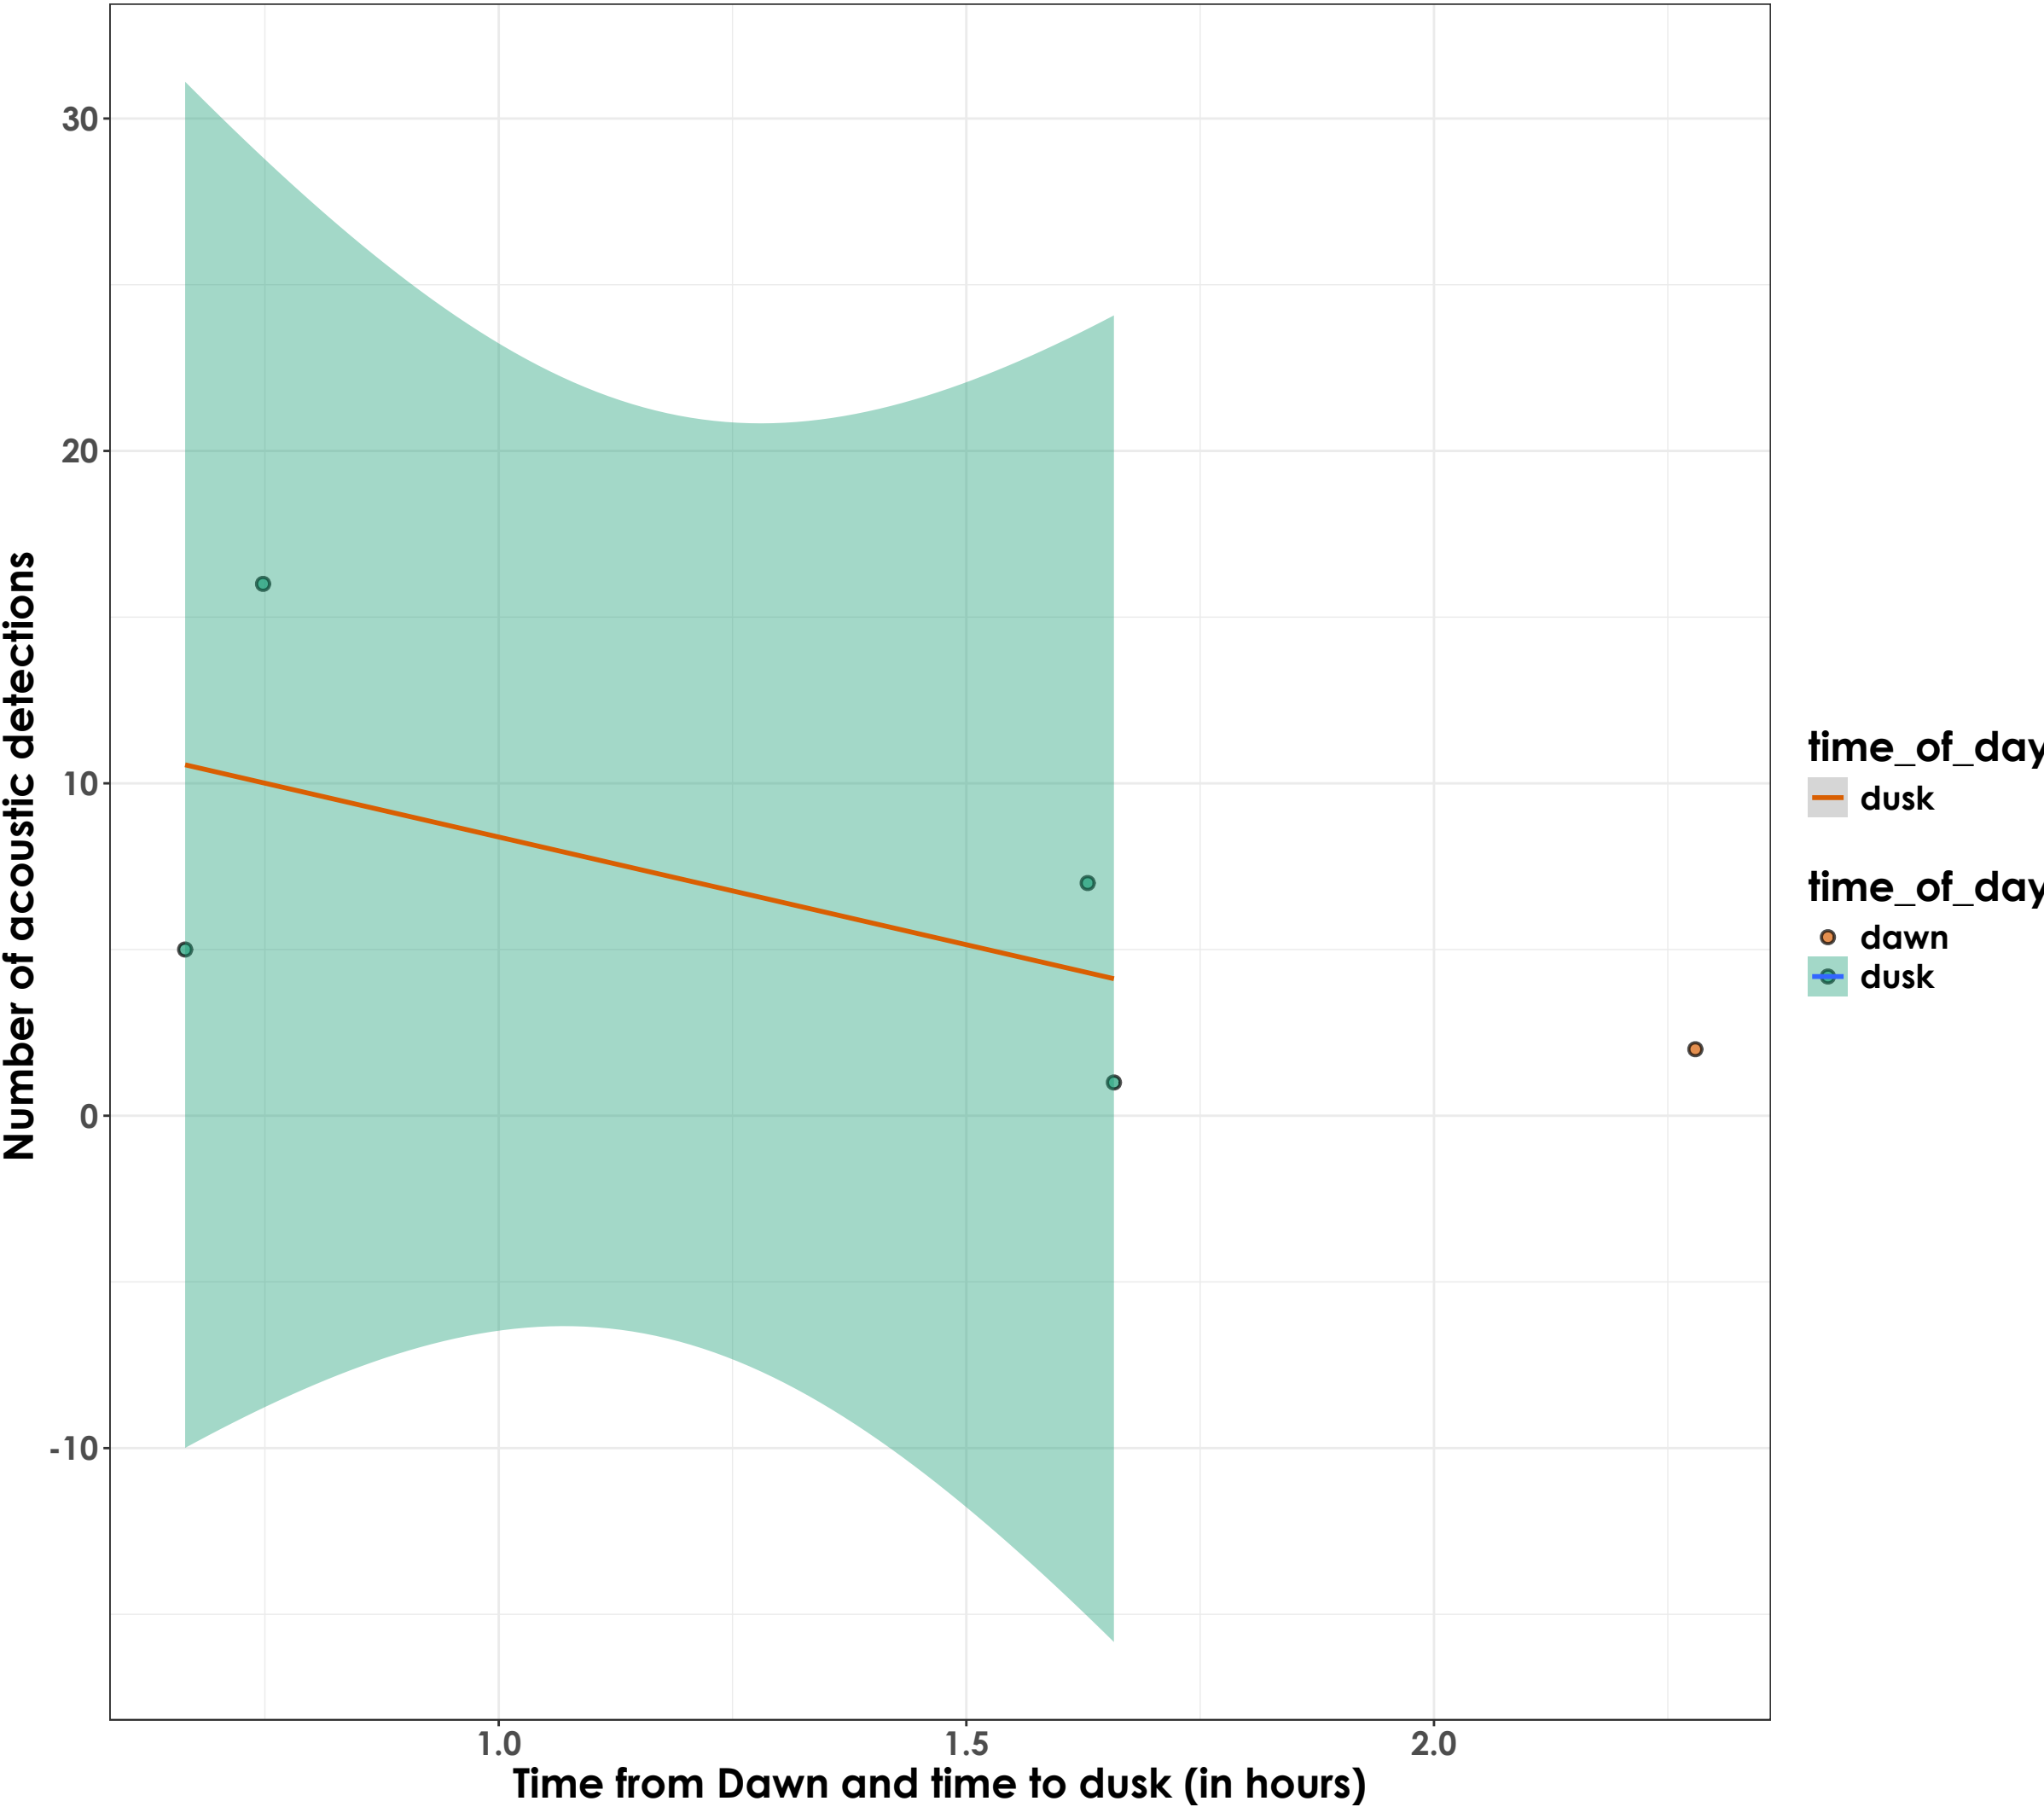

Rufous Woodpecker

Each dot represents the total number of detections after dawn or before dusk (in hours)

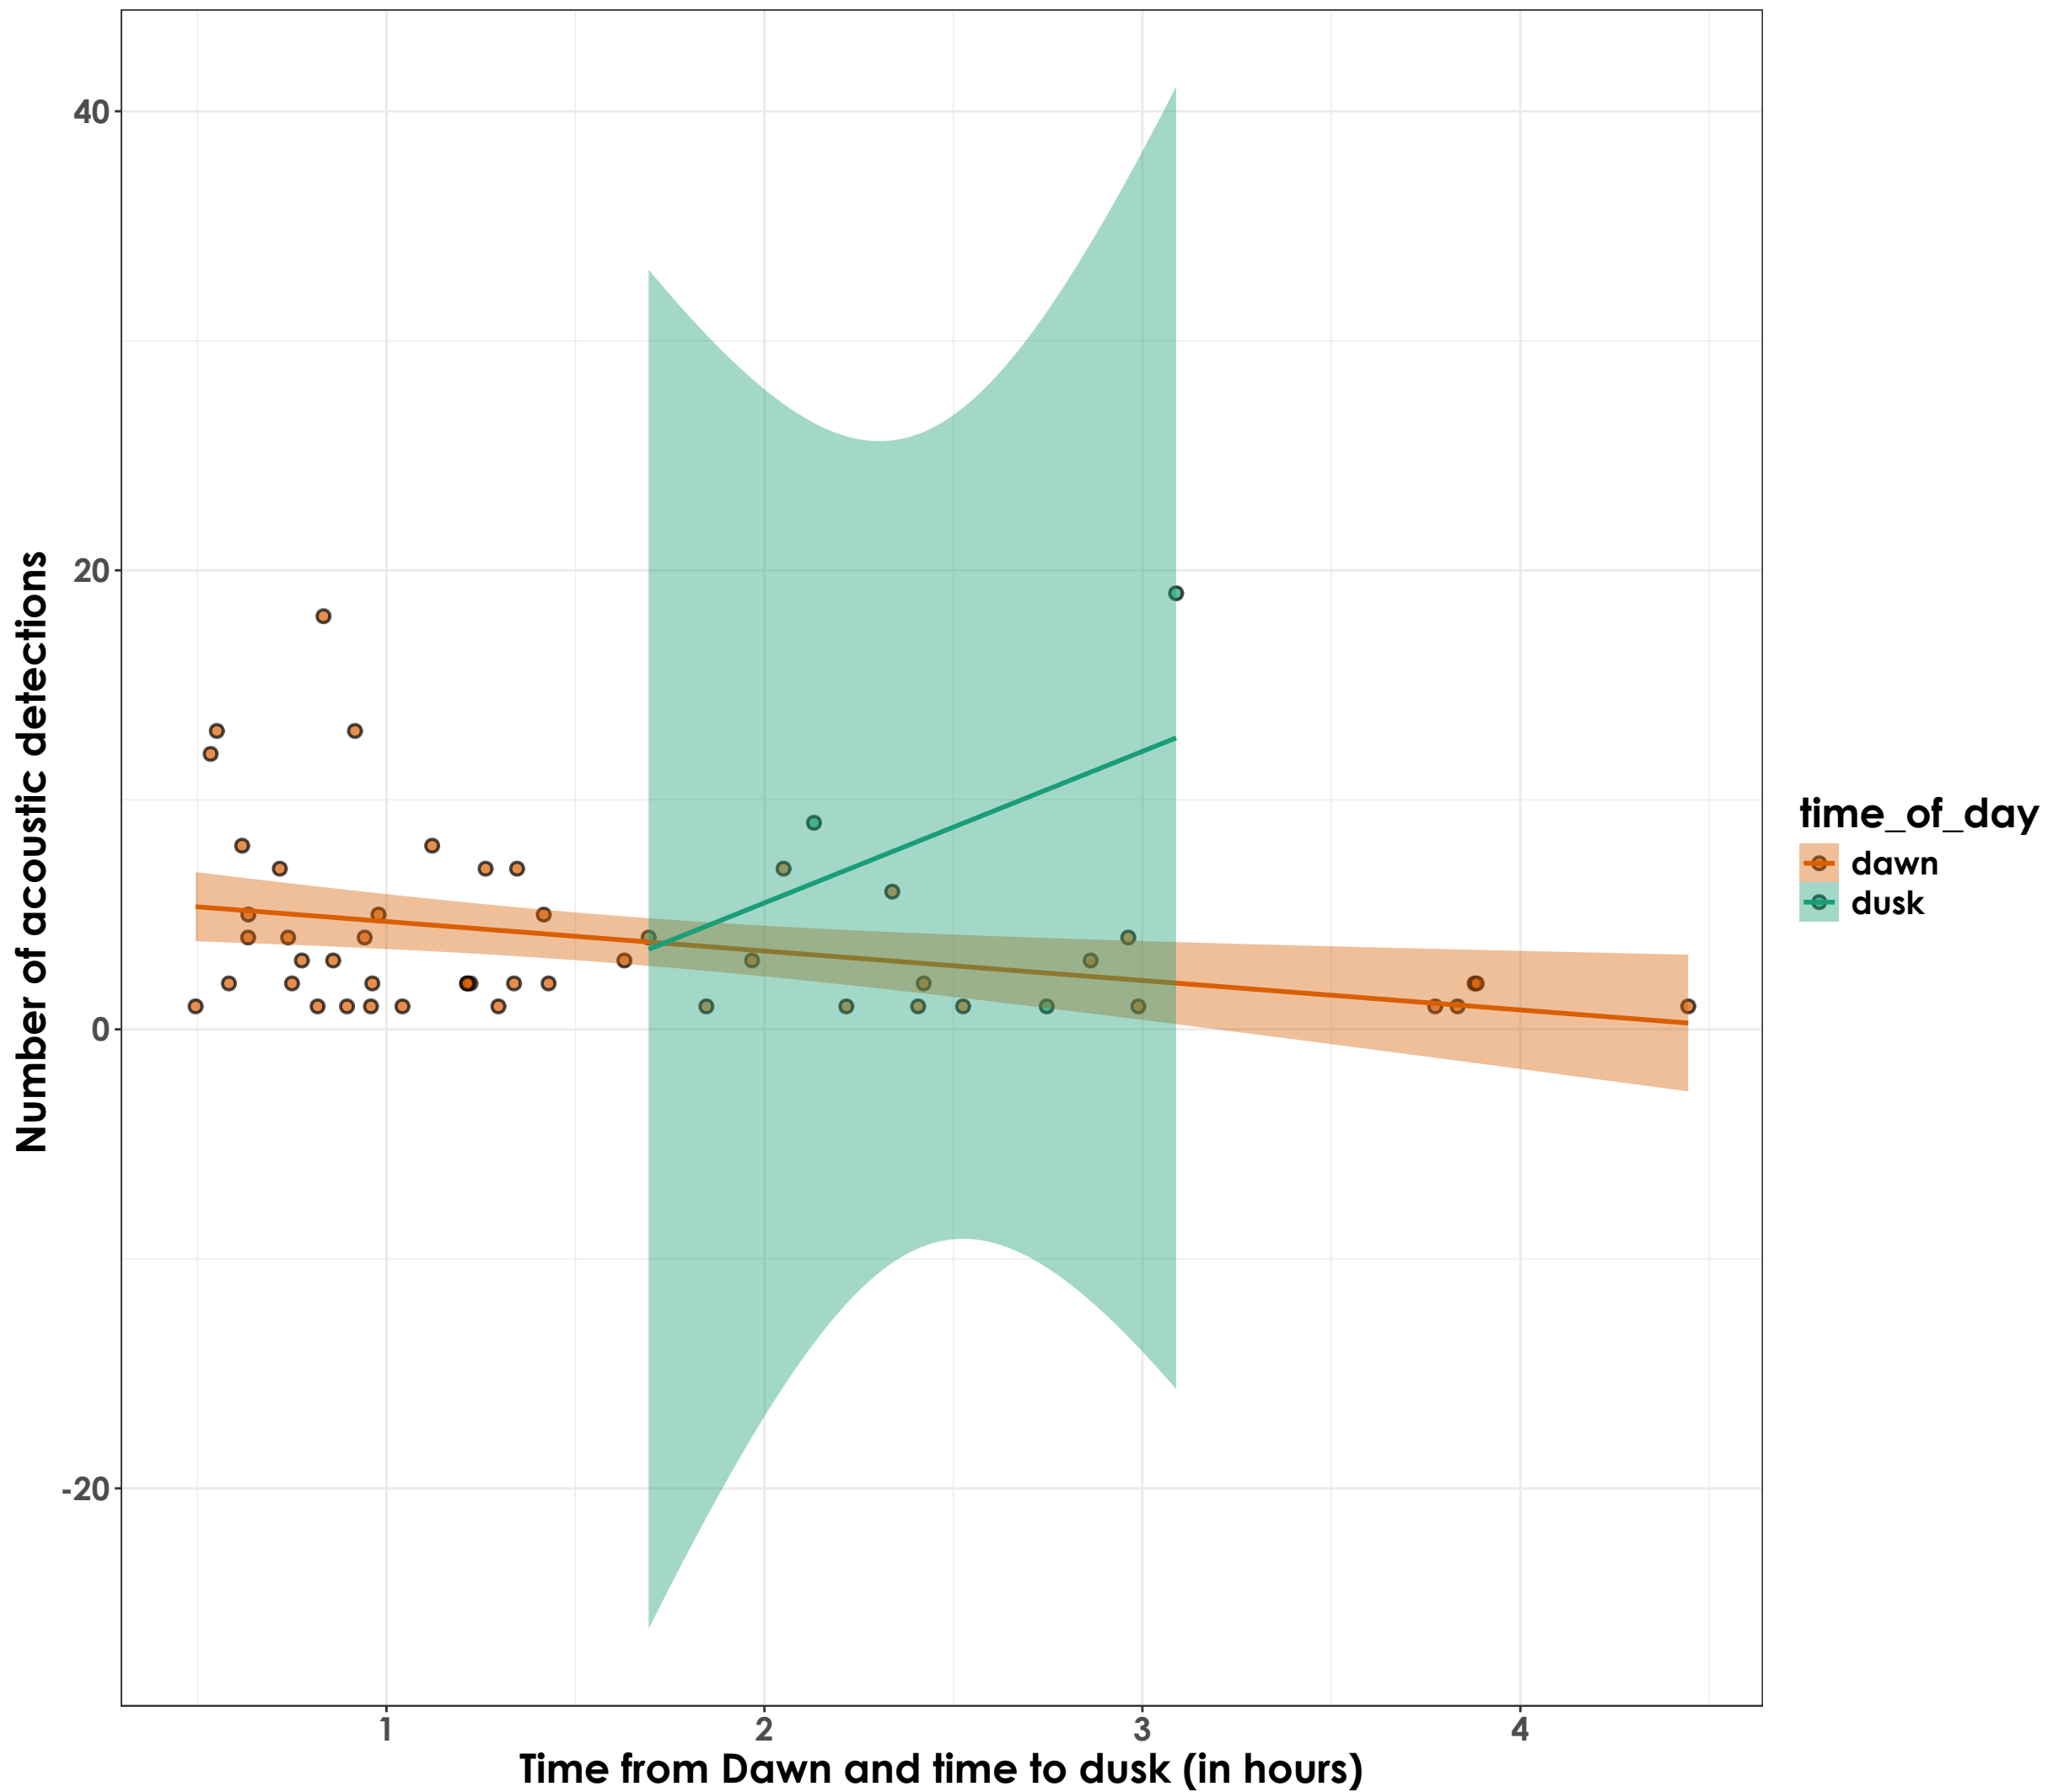

Brown Fish-Owl

Each dot represents the total number of detections after dawn or before dusk (in hours)

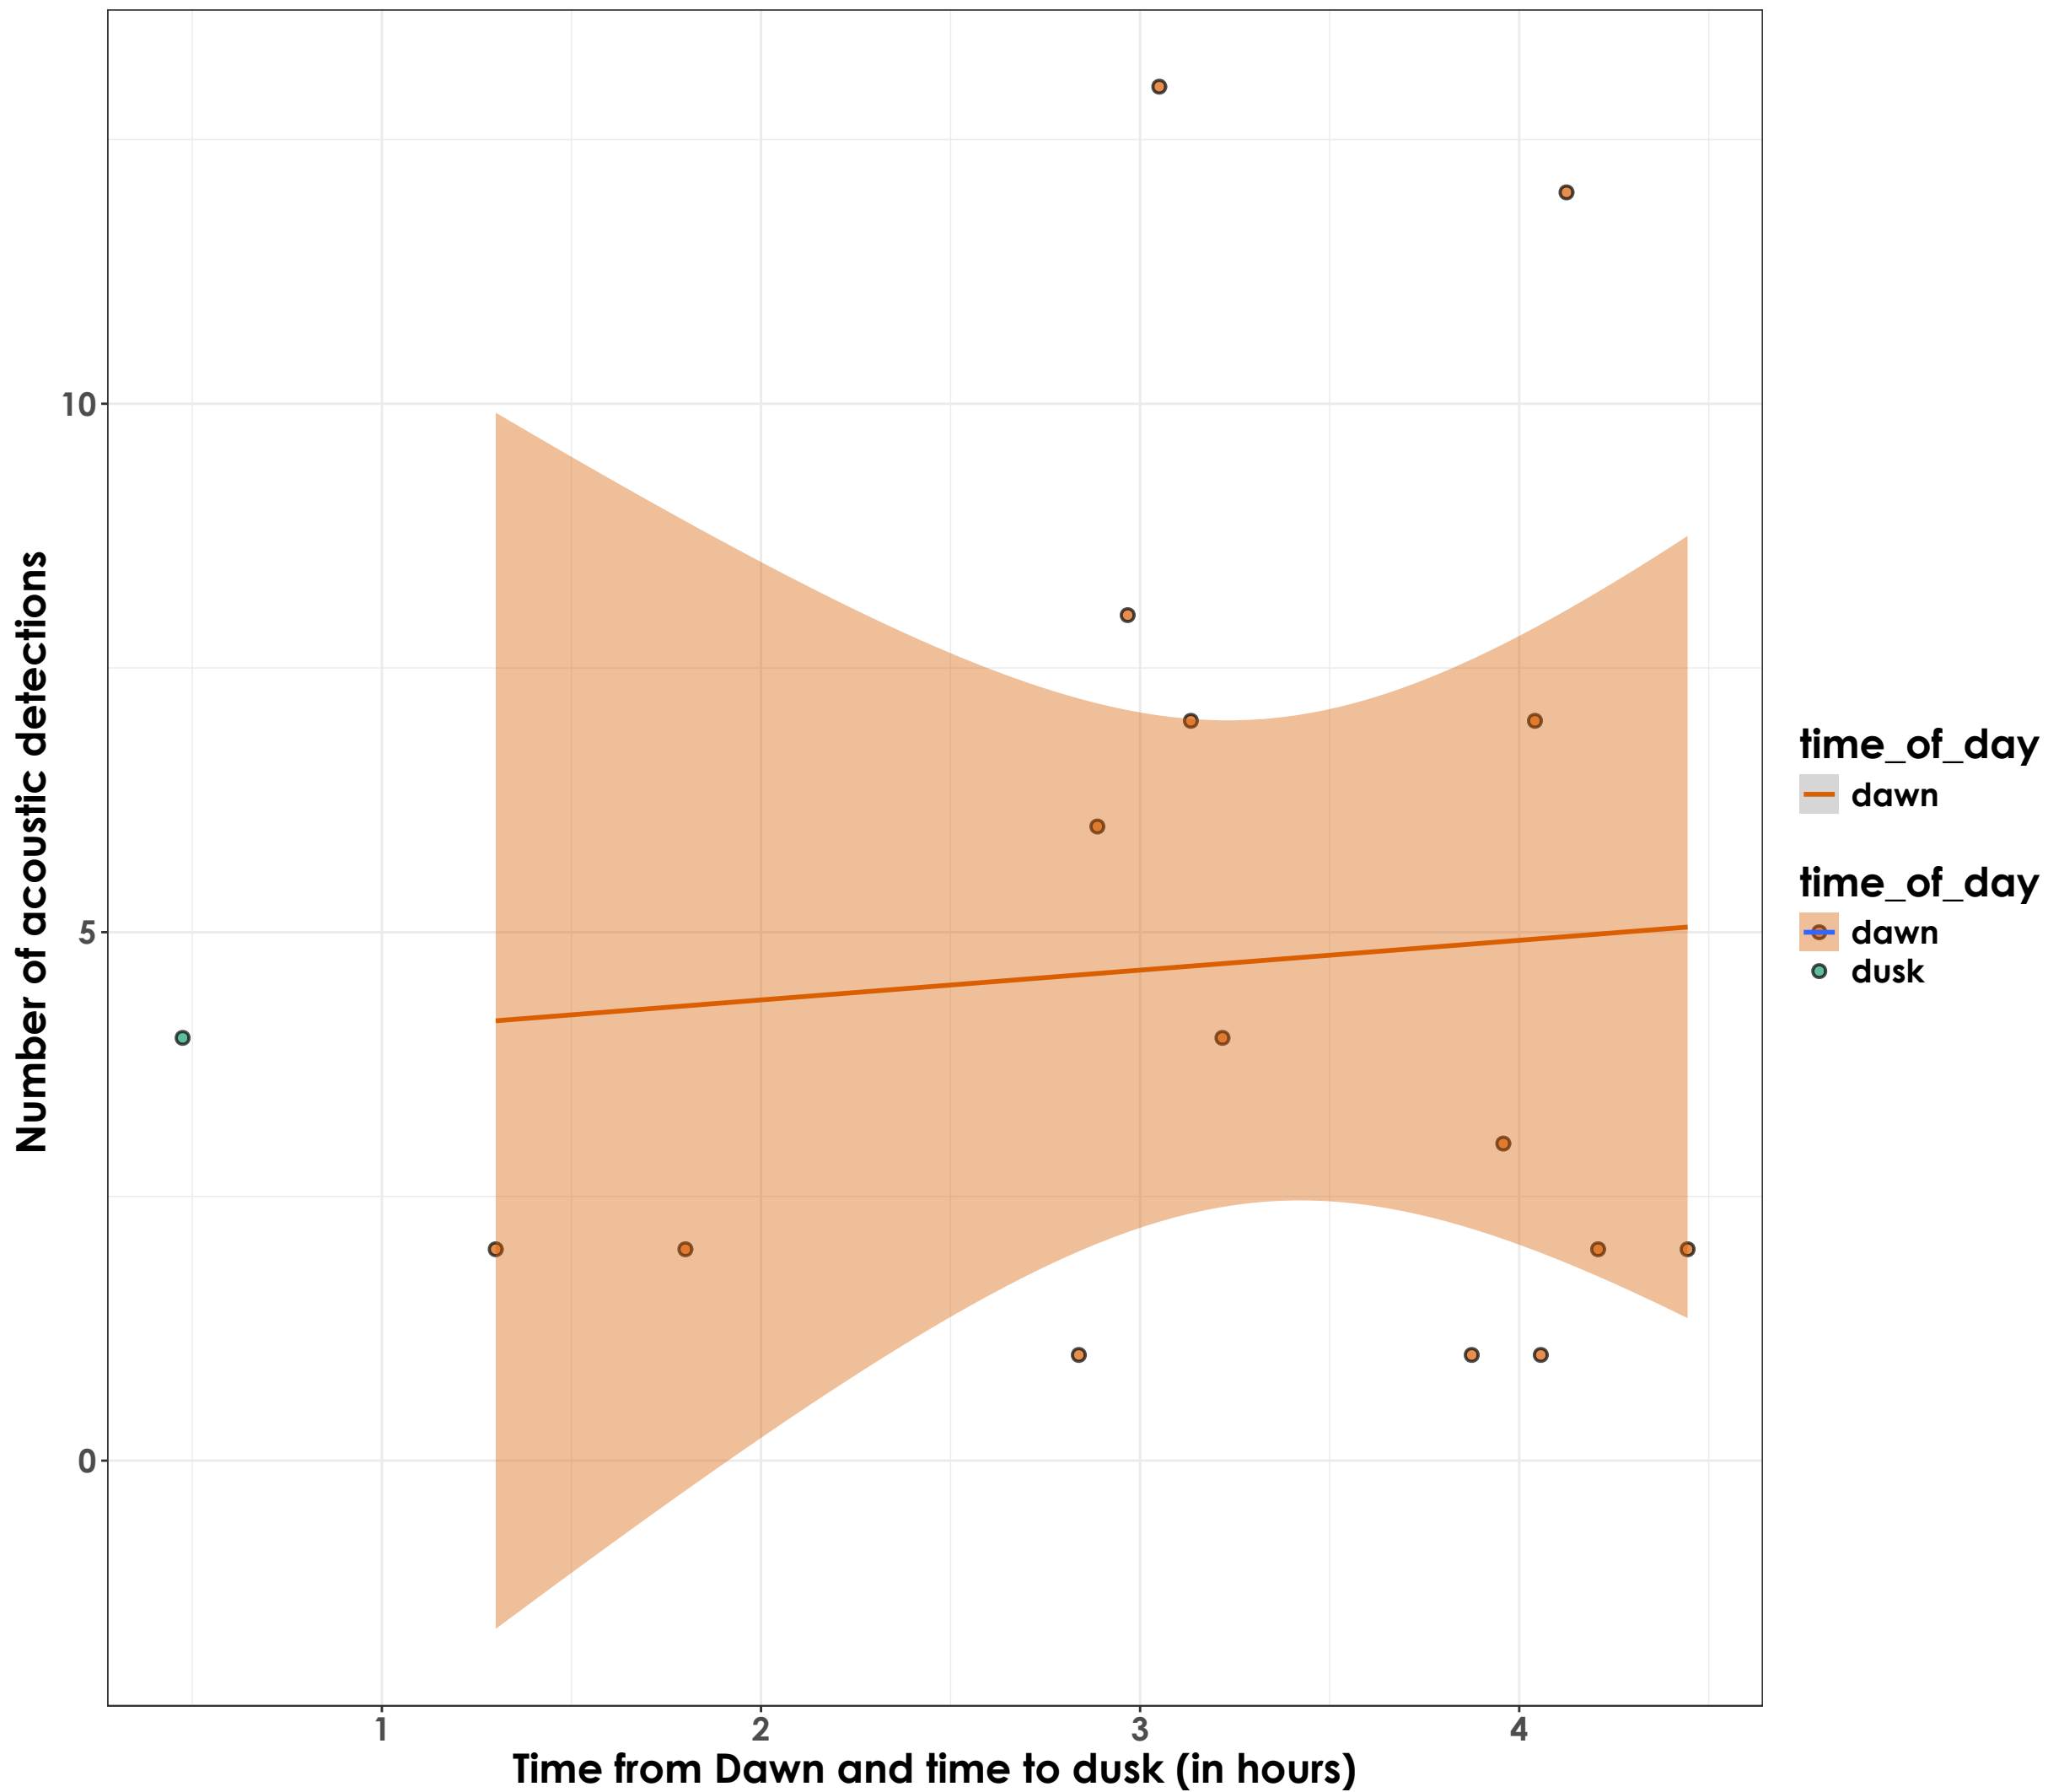

Red Spurfowl

Each dot represents the total number of detections after dawn or before dusk (in hours)

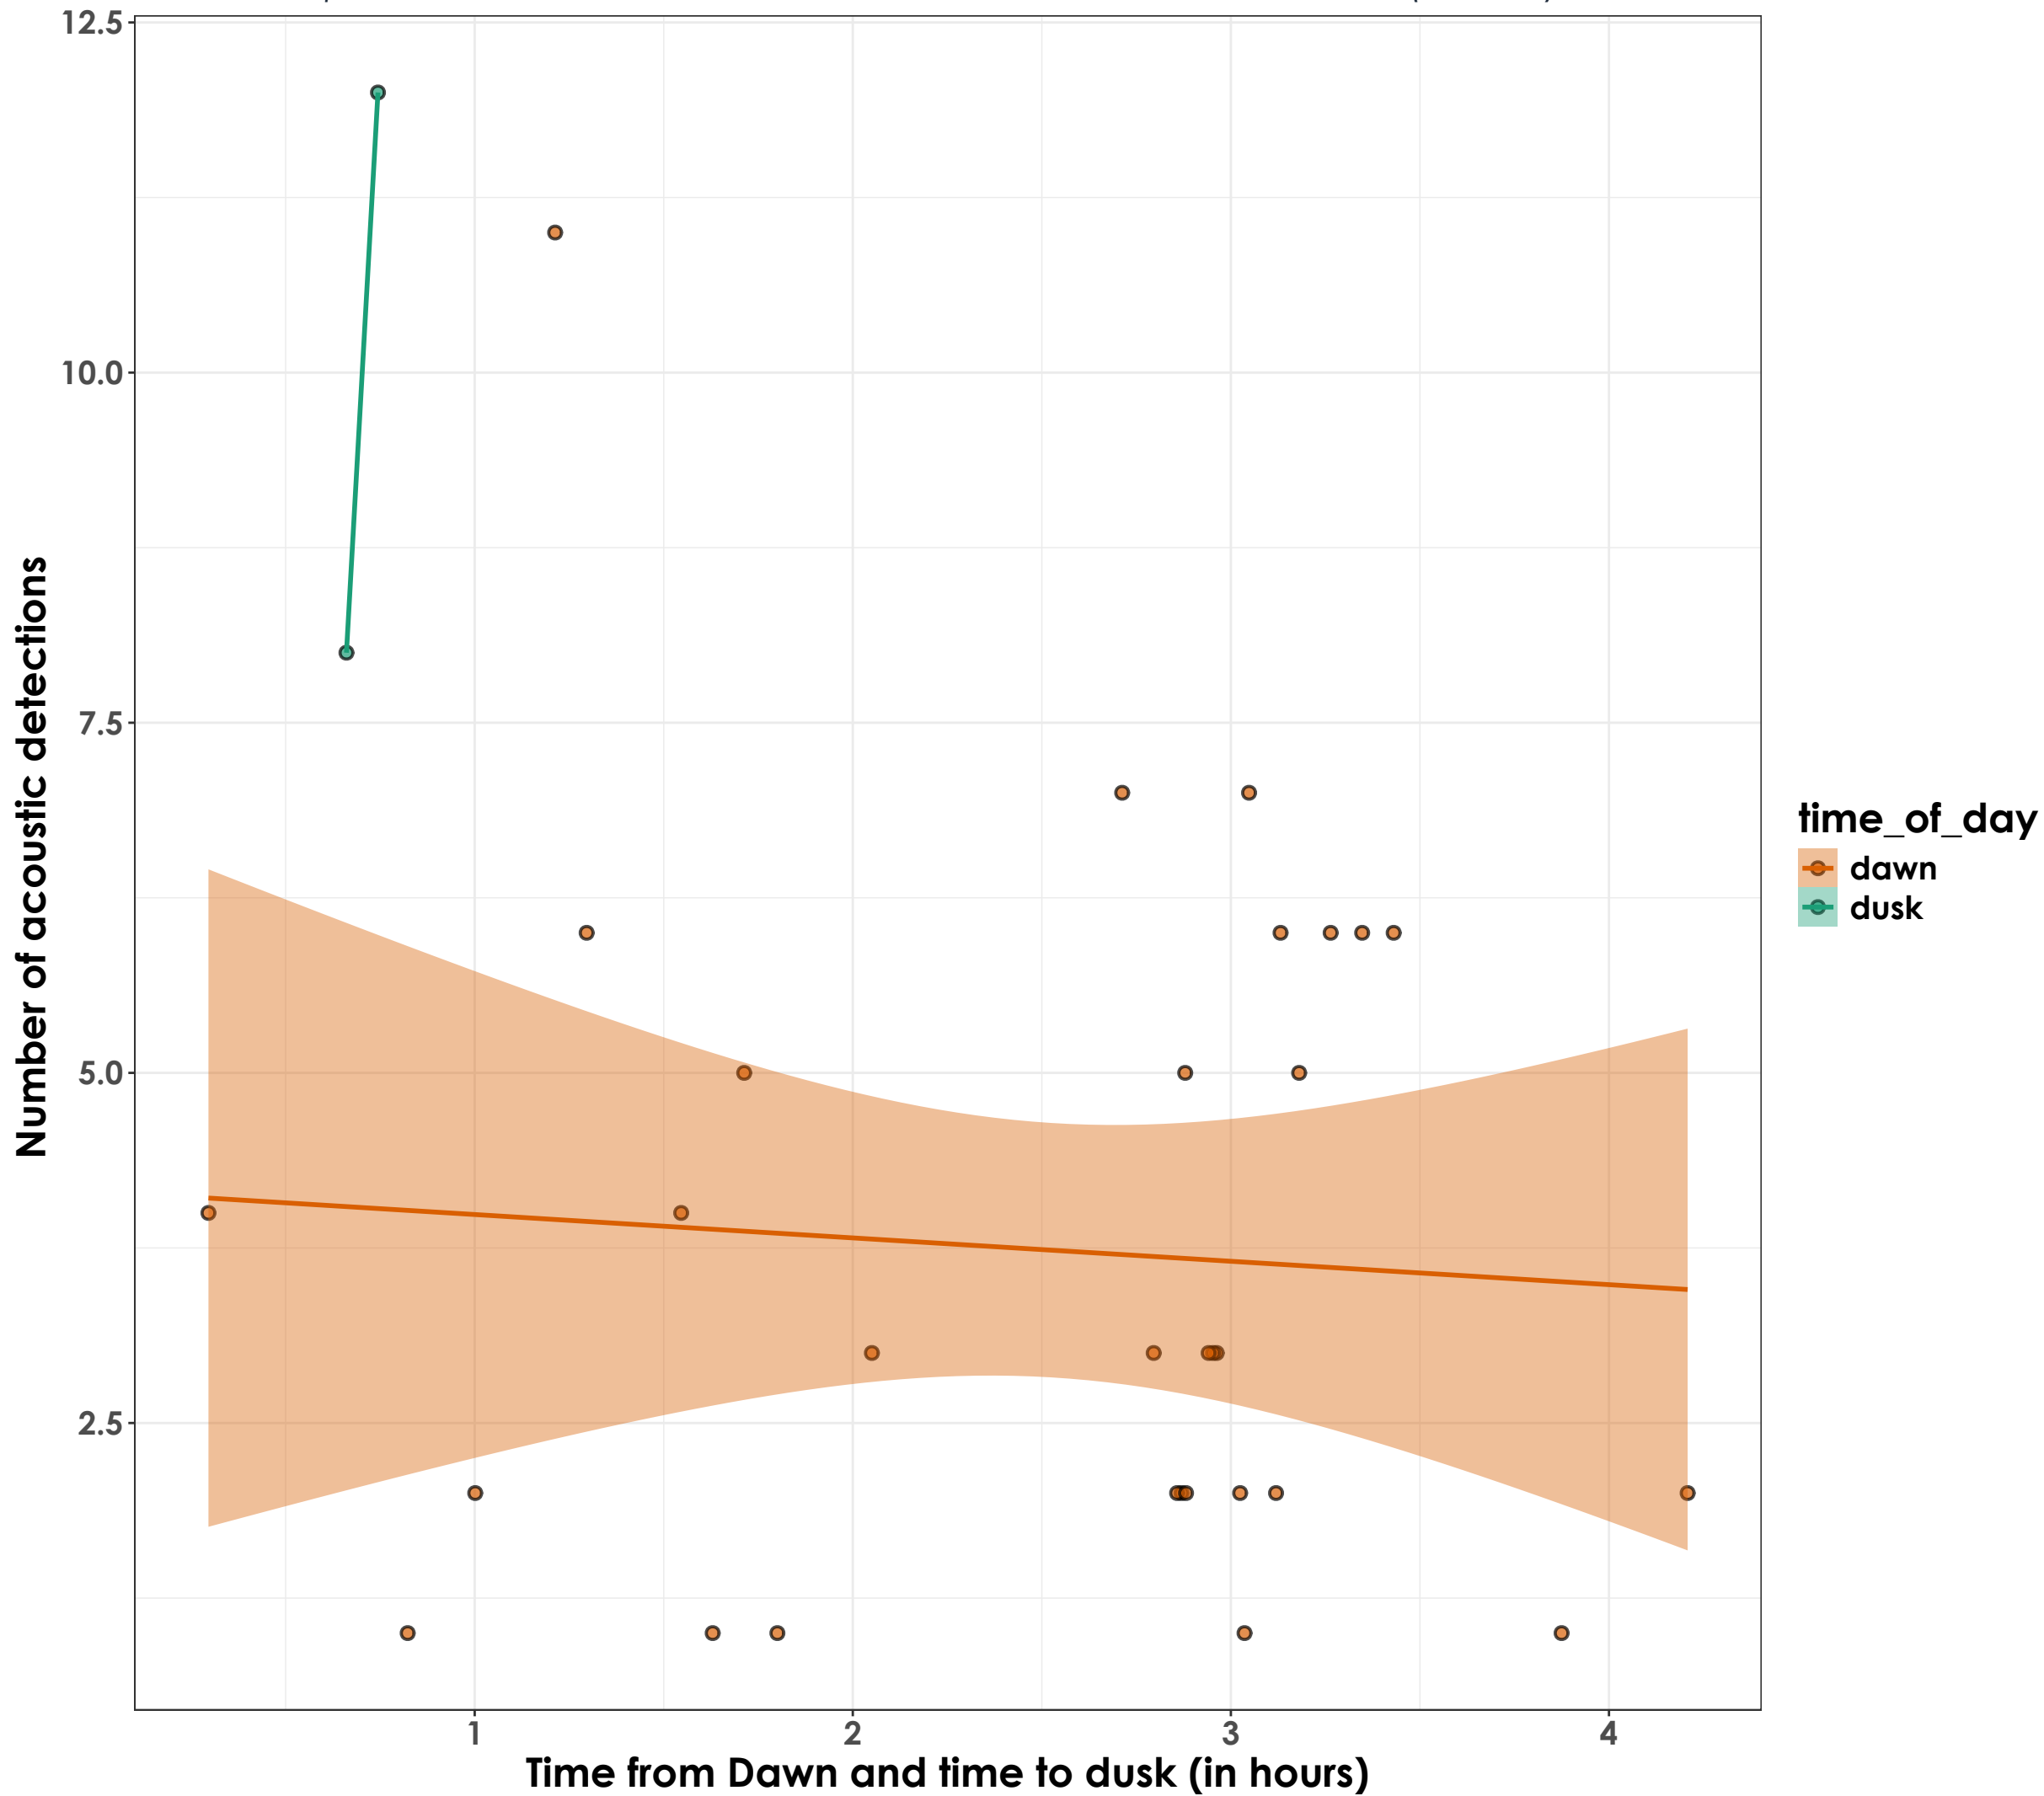

Red-wattled Lapwing

Each dot represents the total number of detections after dawn or before dusk (in hours)

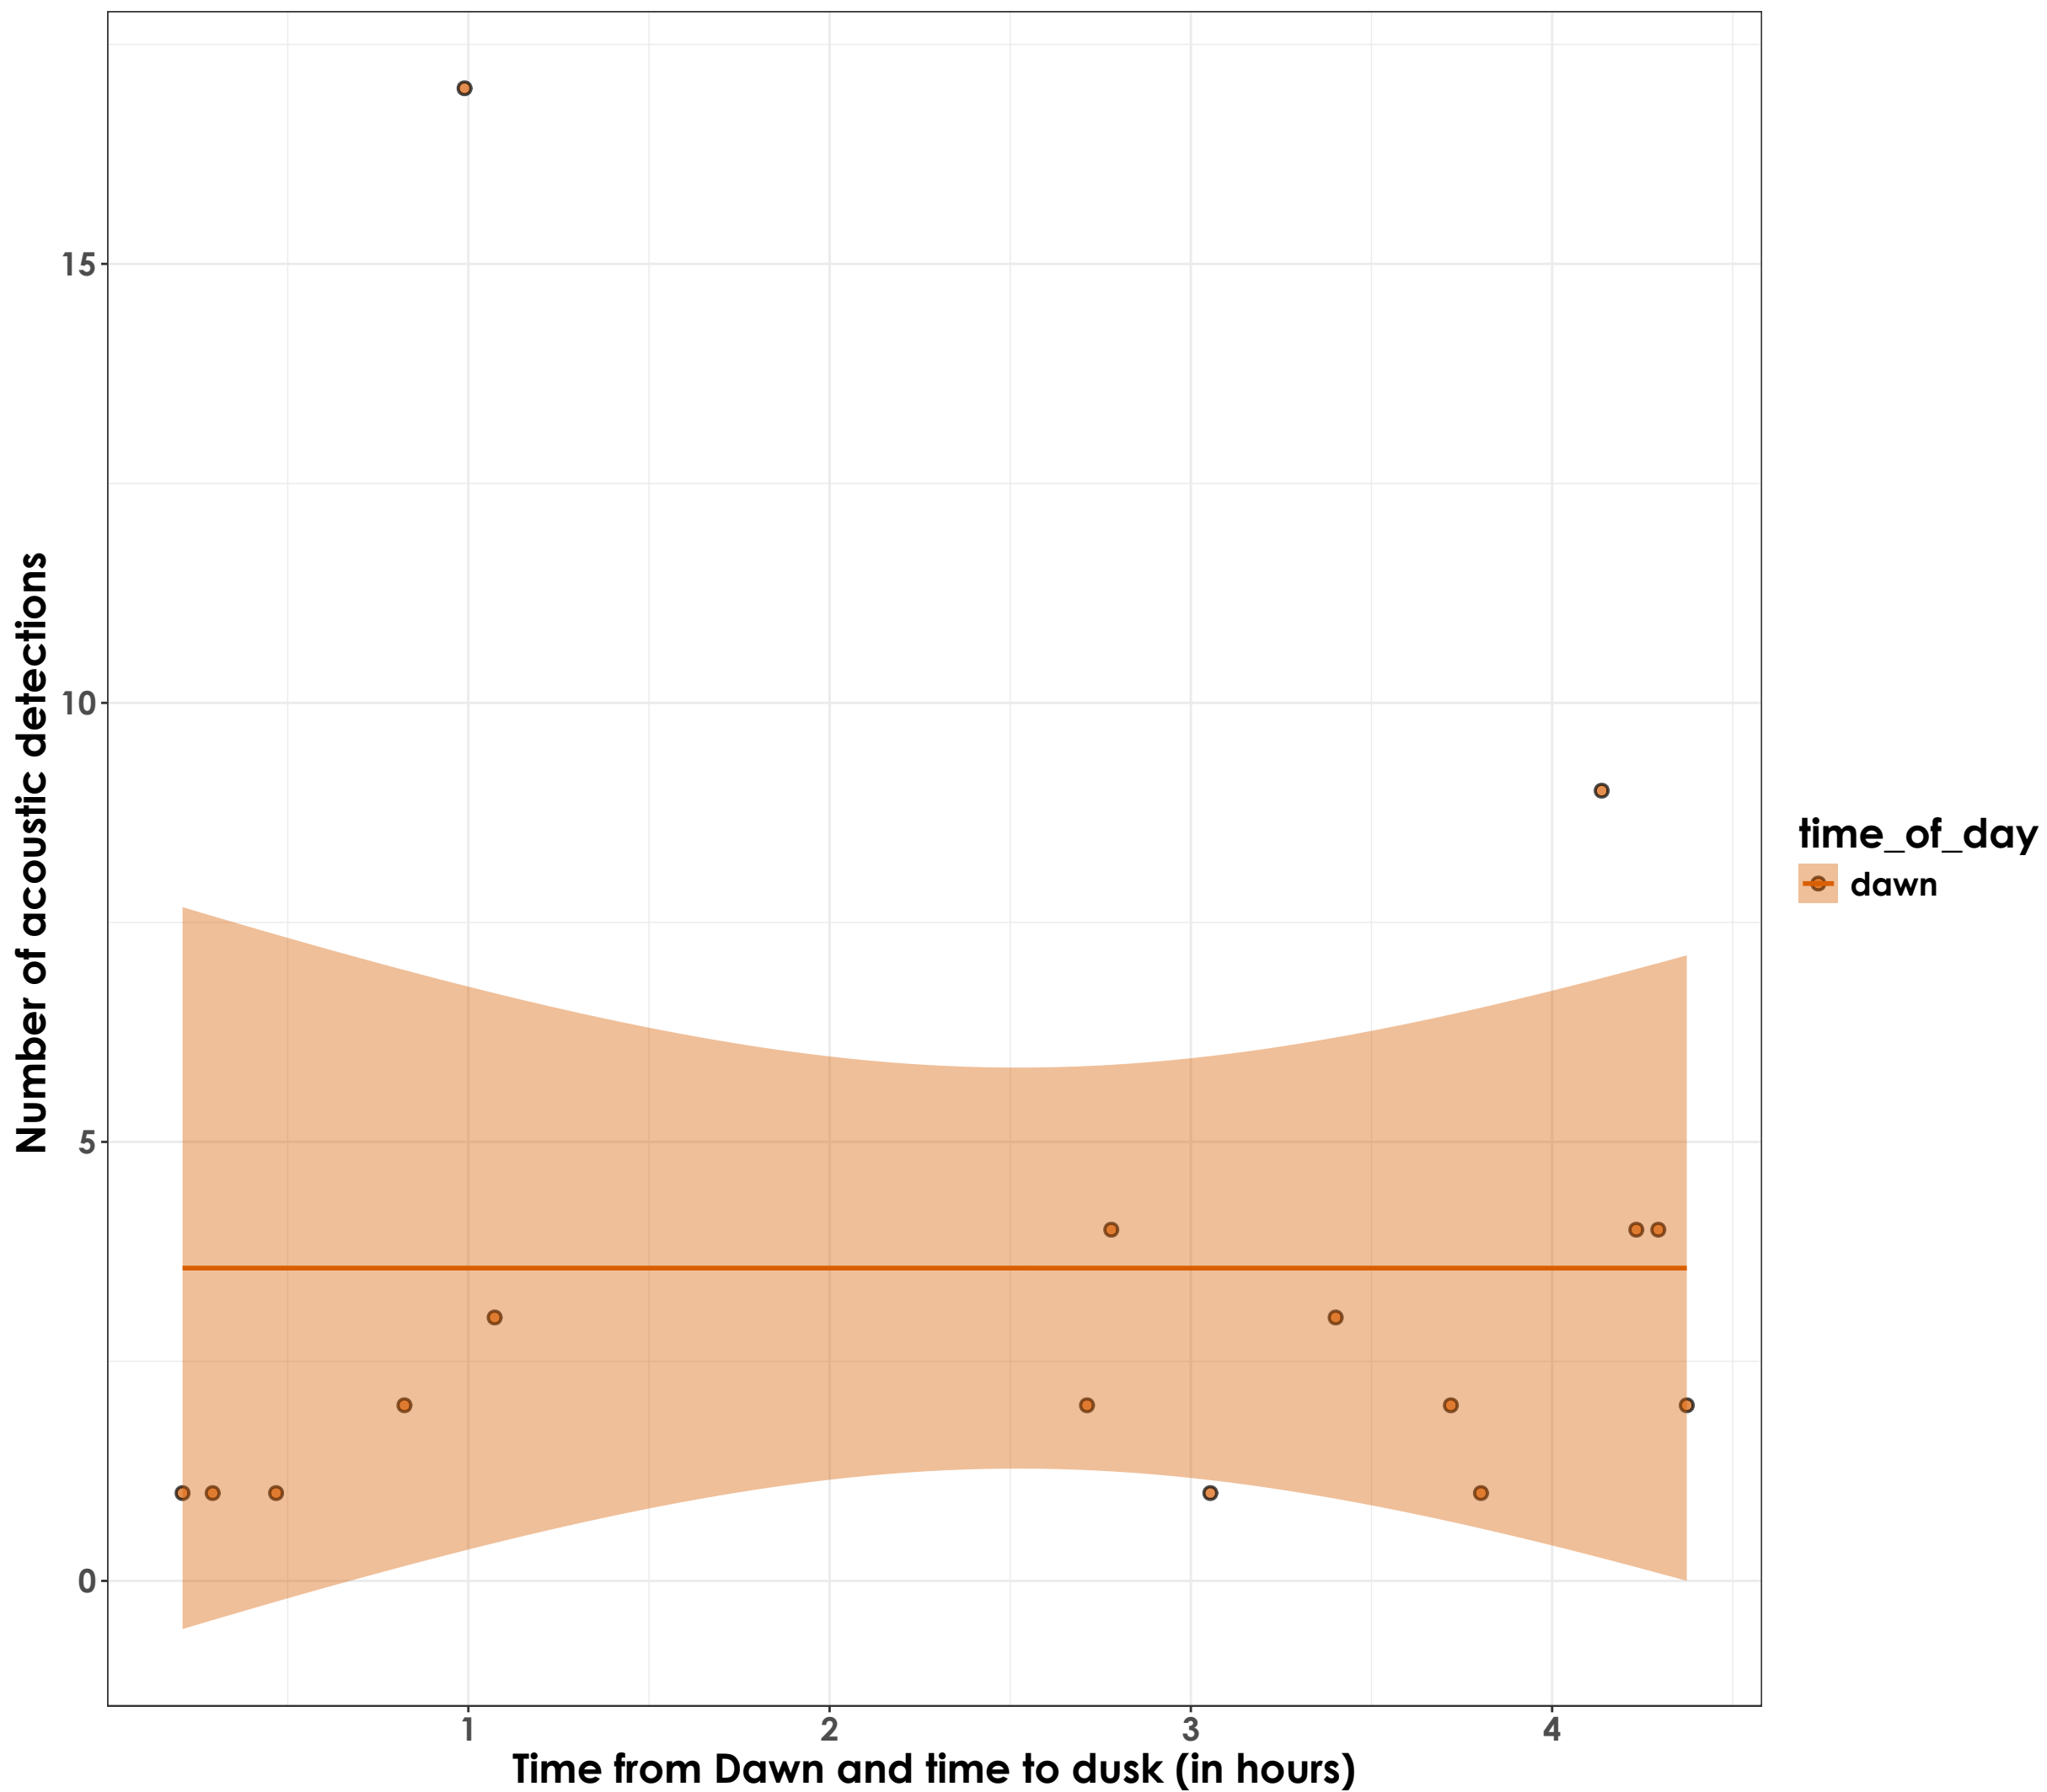

Common Hawk-Cuckoo

Each dot represents the total number of detections after dawn or before dusk (in hours)

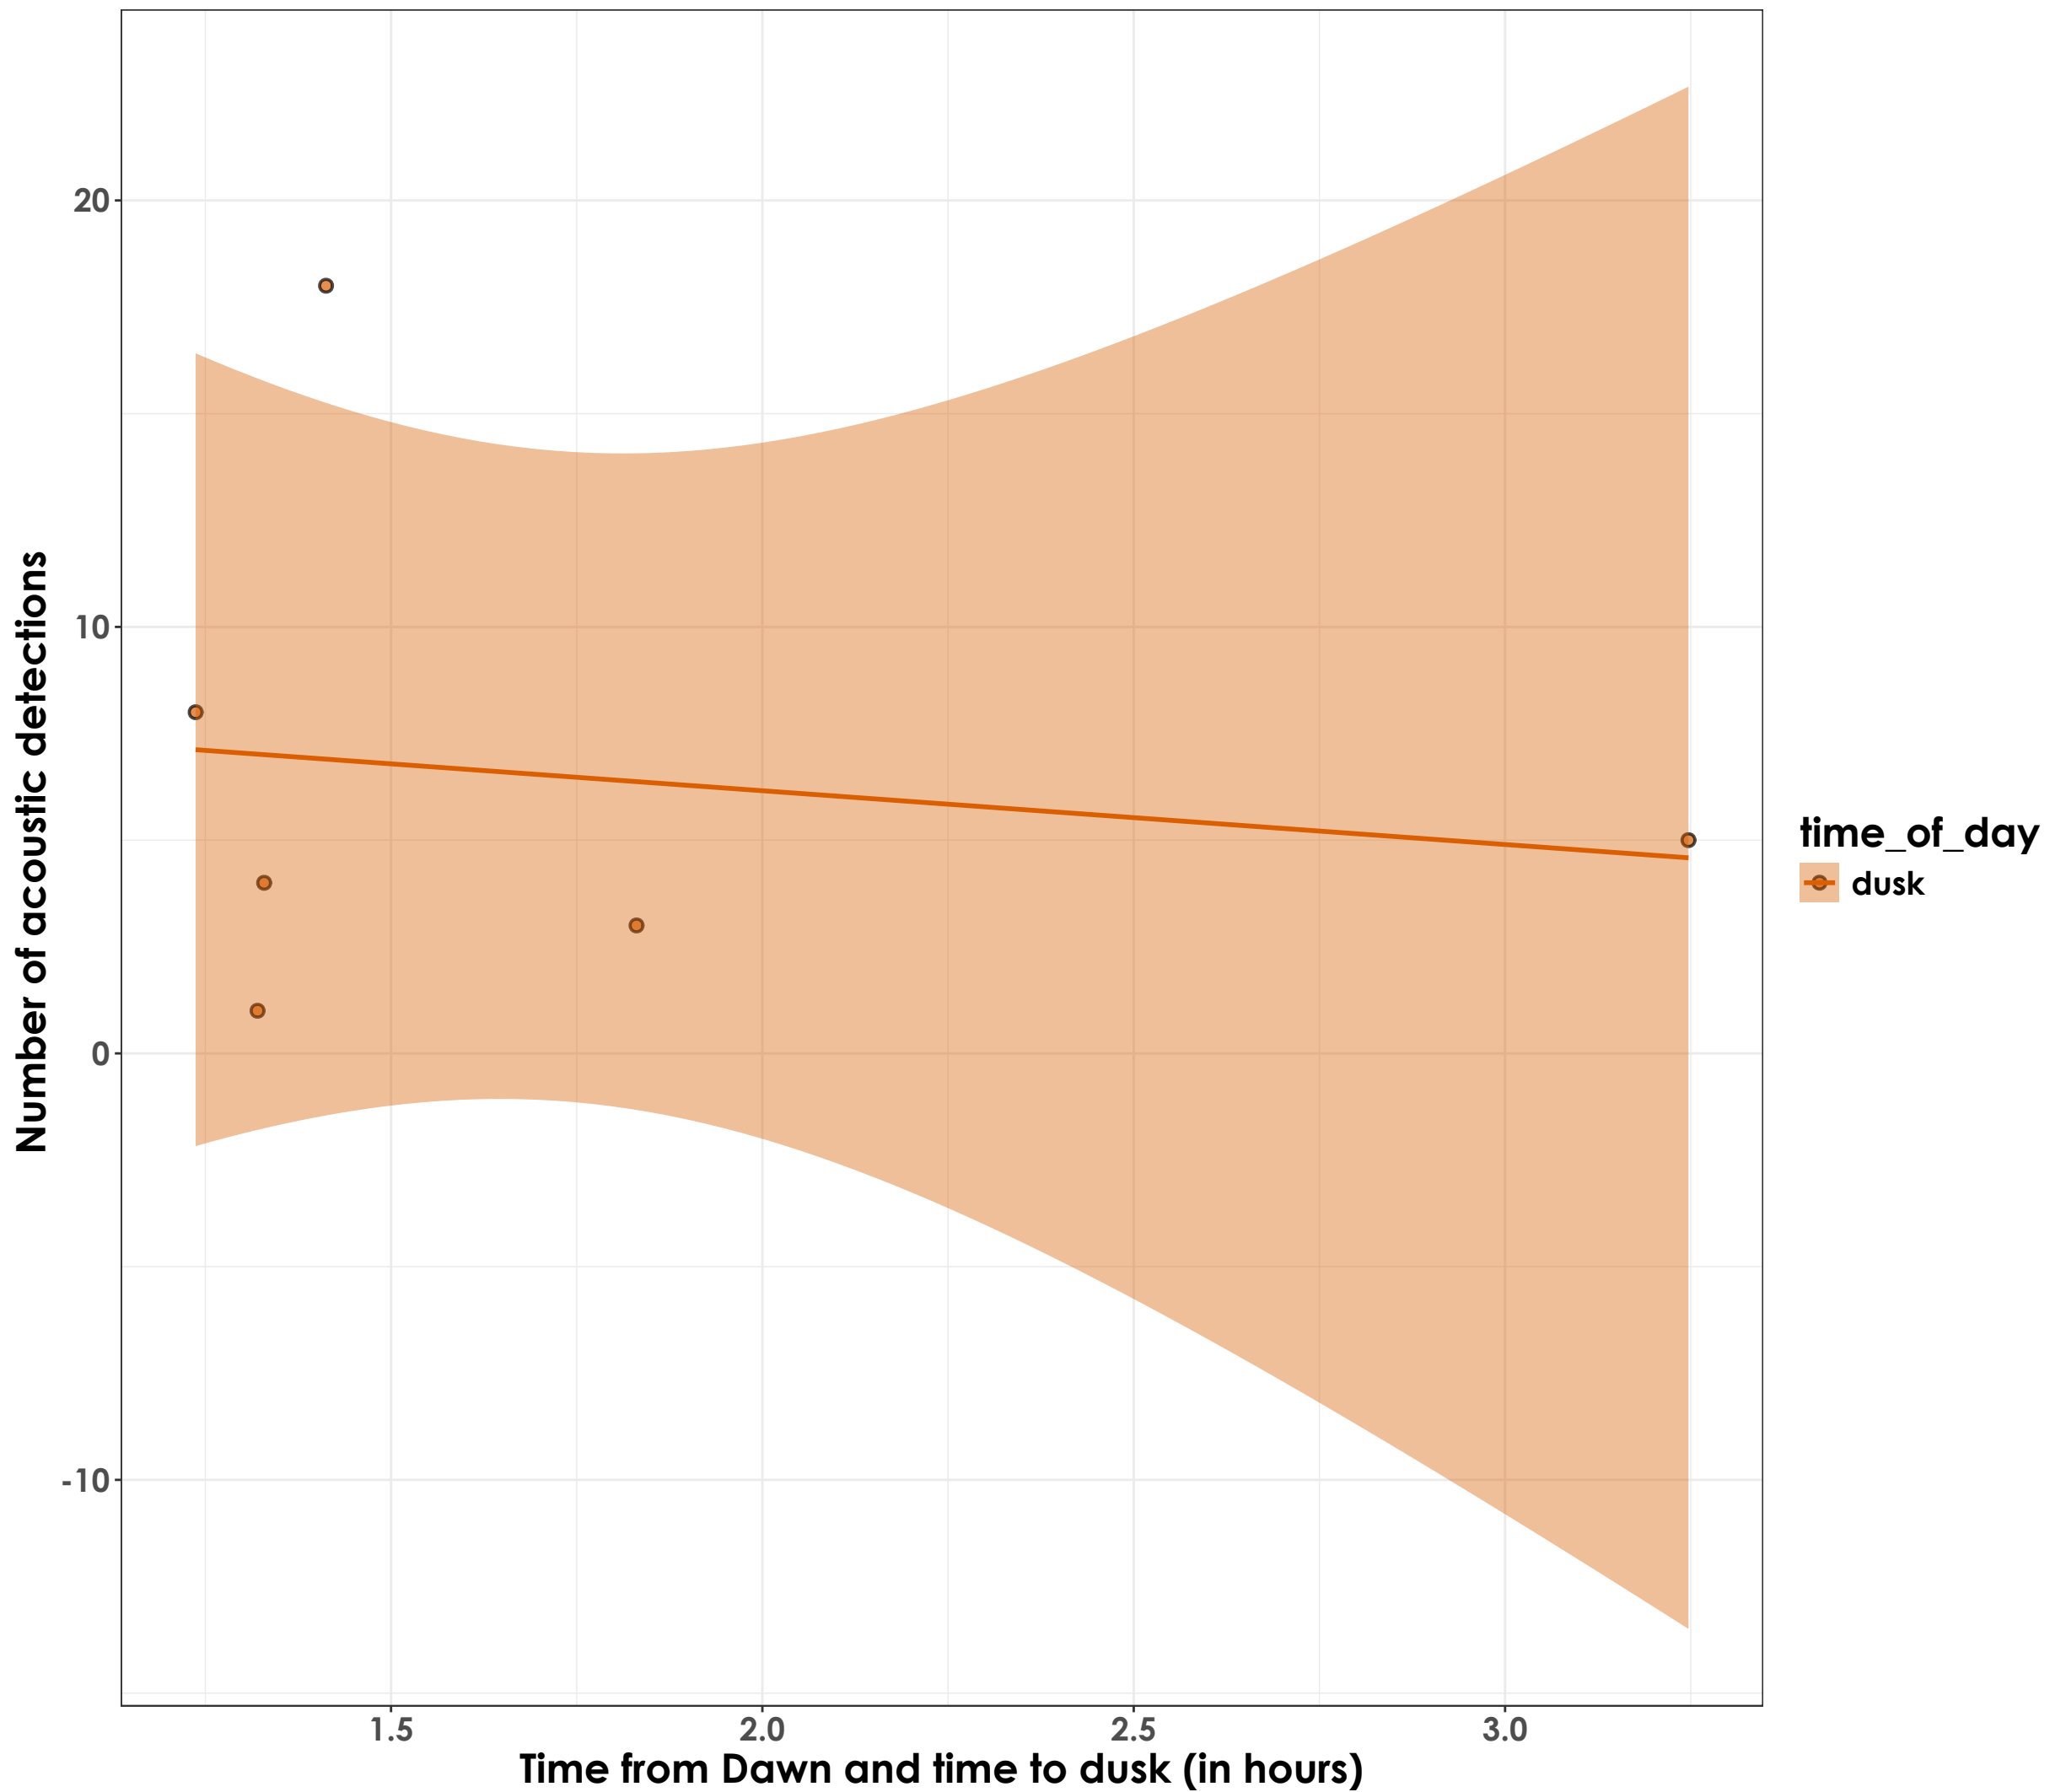

Pale-billed Flowerpecker

Each dot represents the total number of detections after dawn or before dusk (in hours)

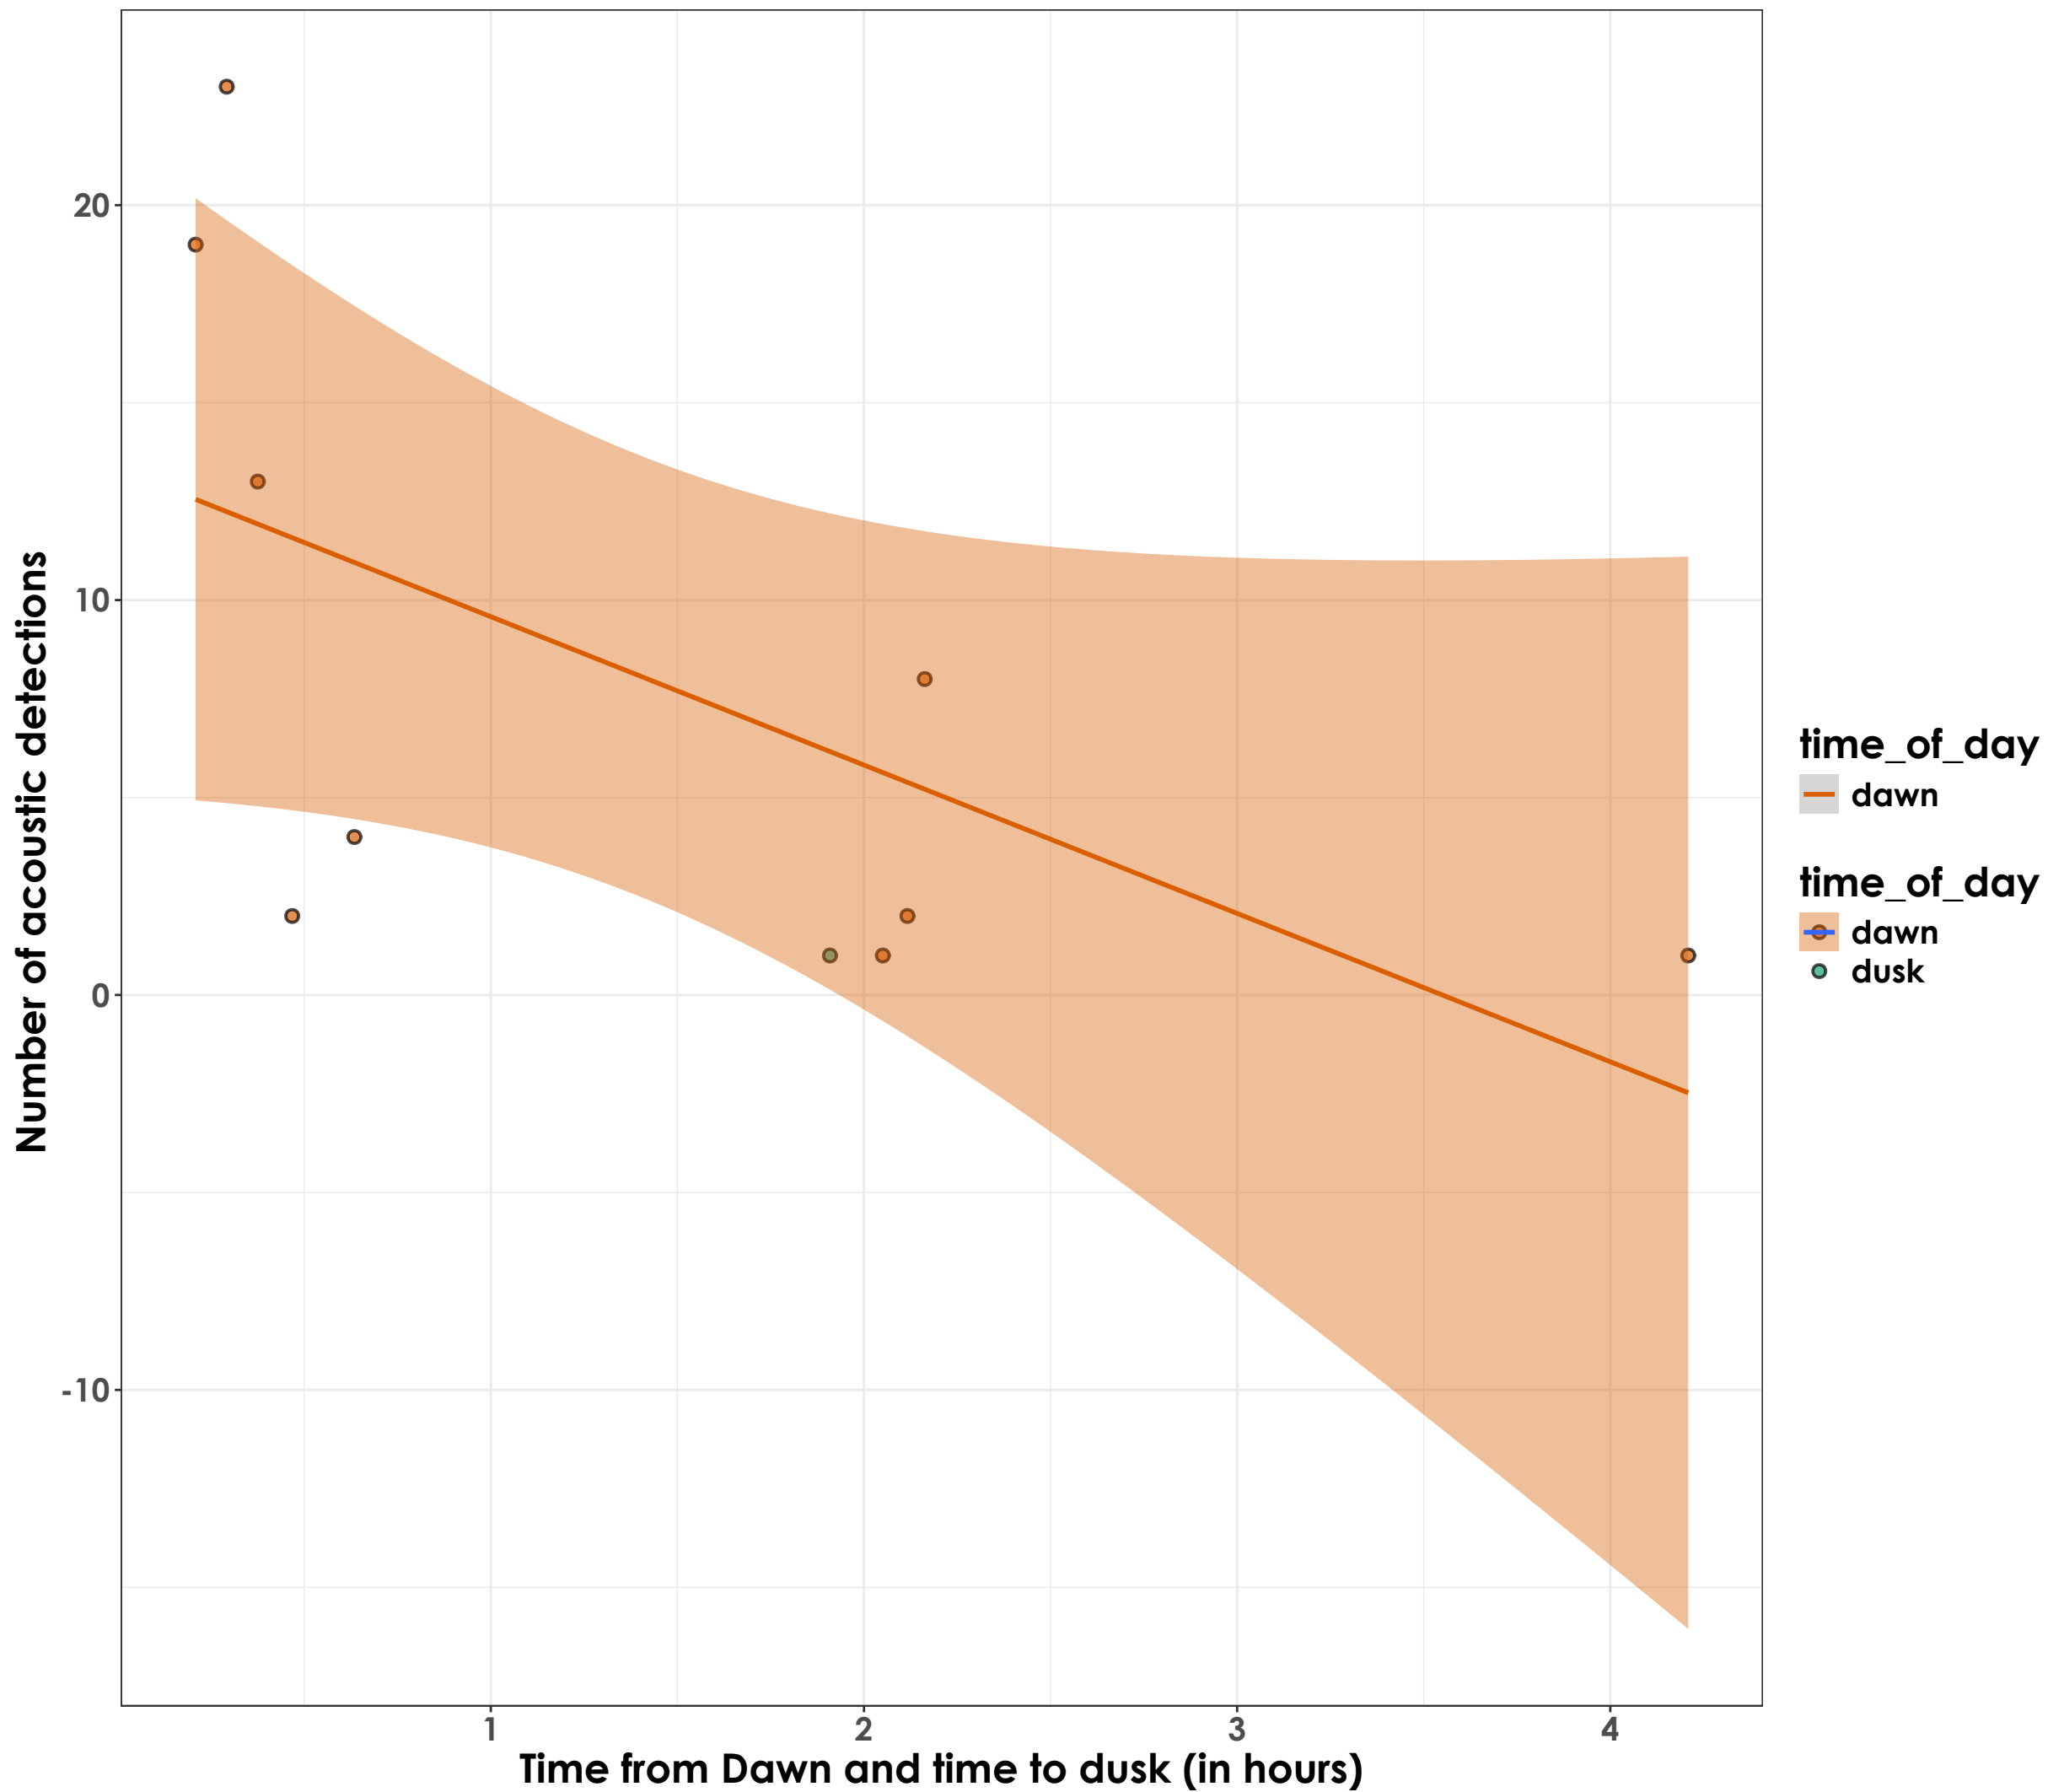

Pied Bushchat

Each dot represents the total number of detections after dawn or before dusk (in hours)

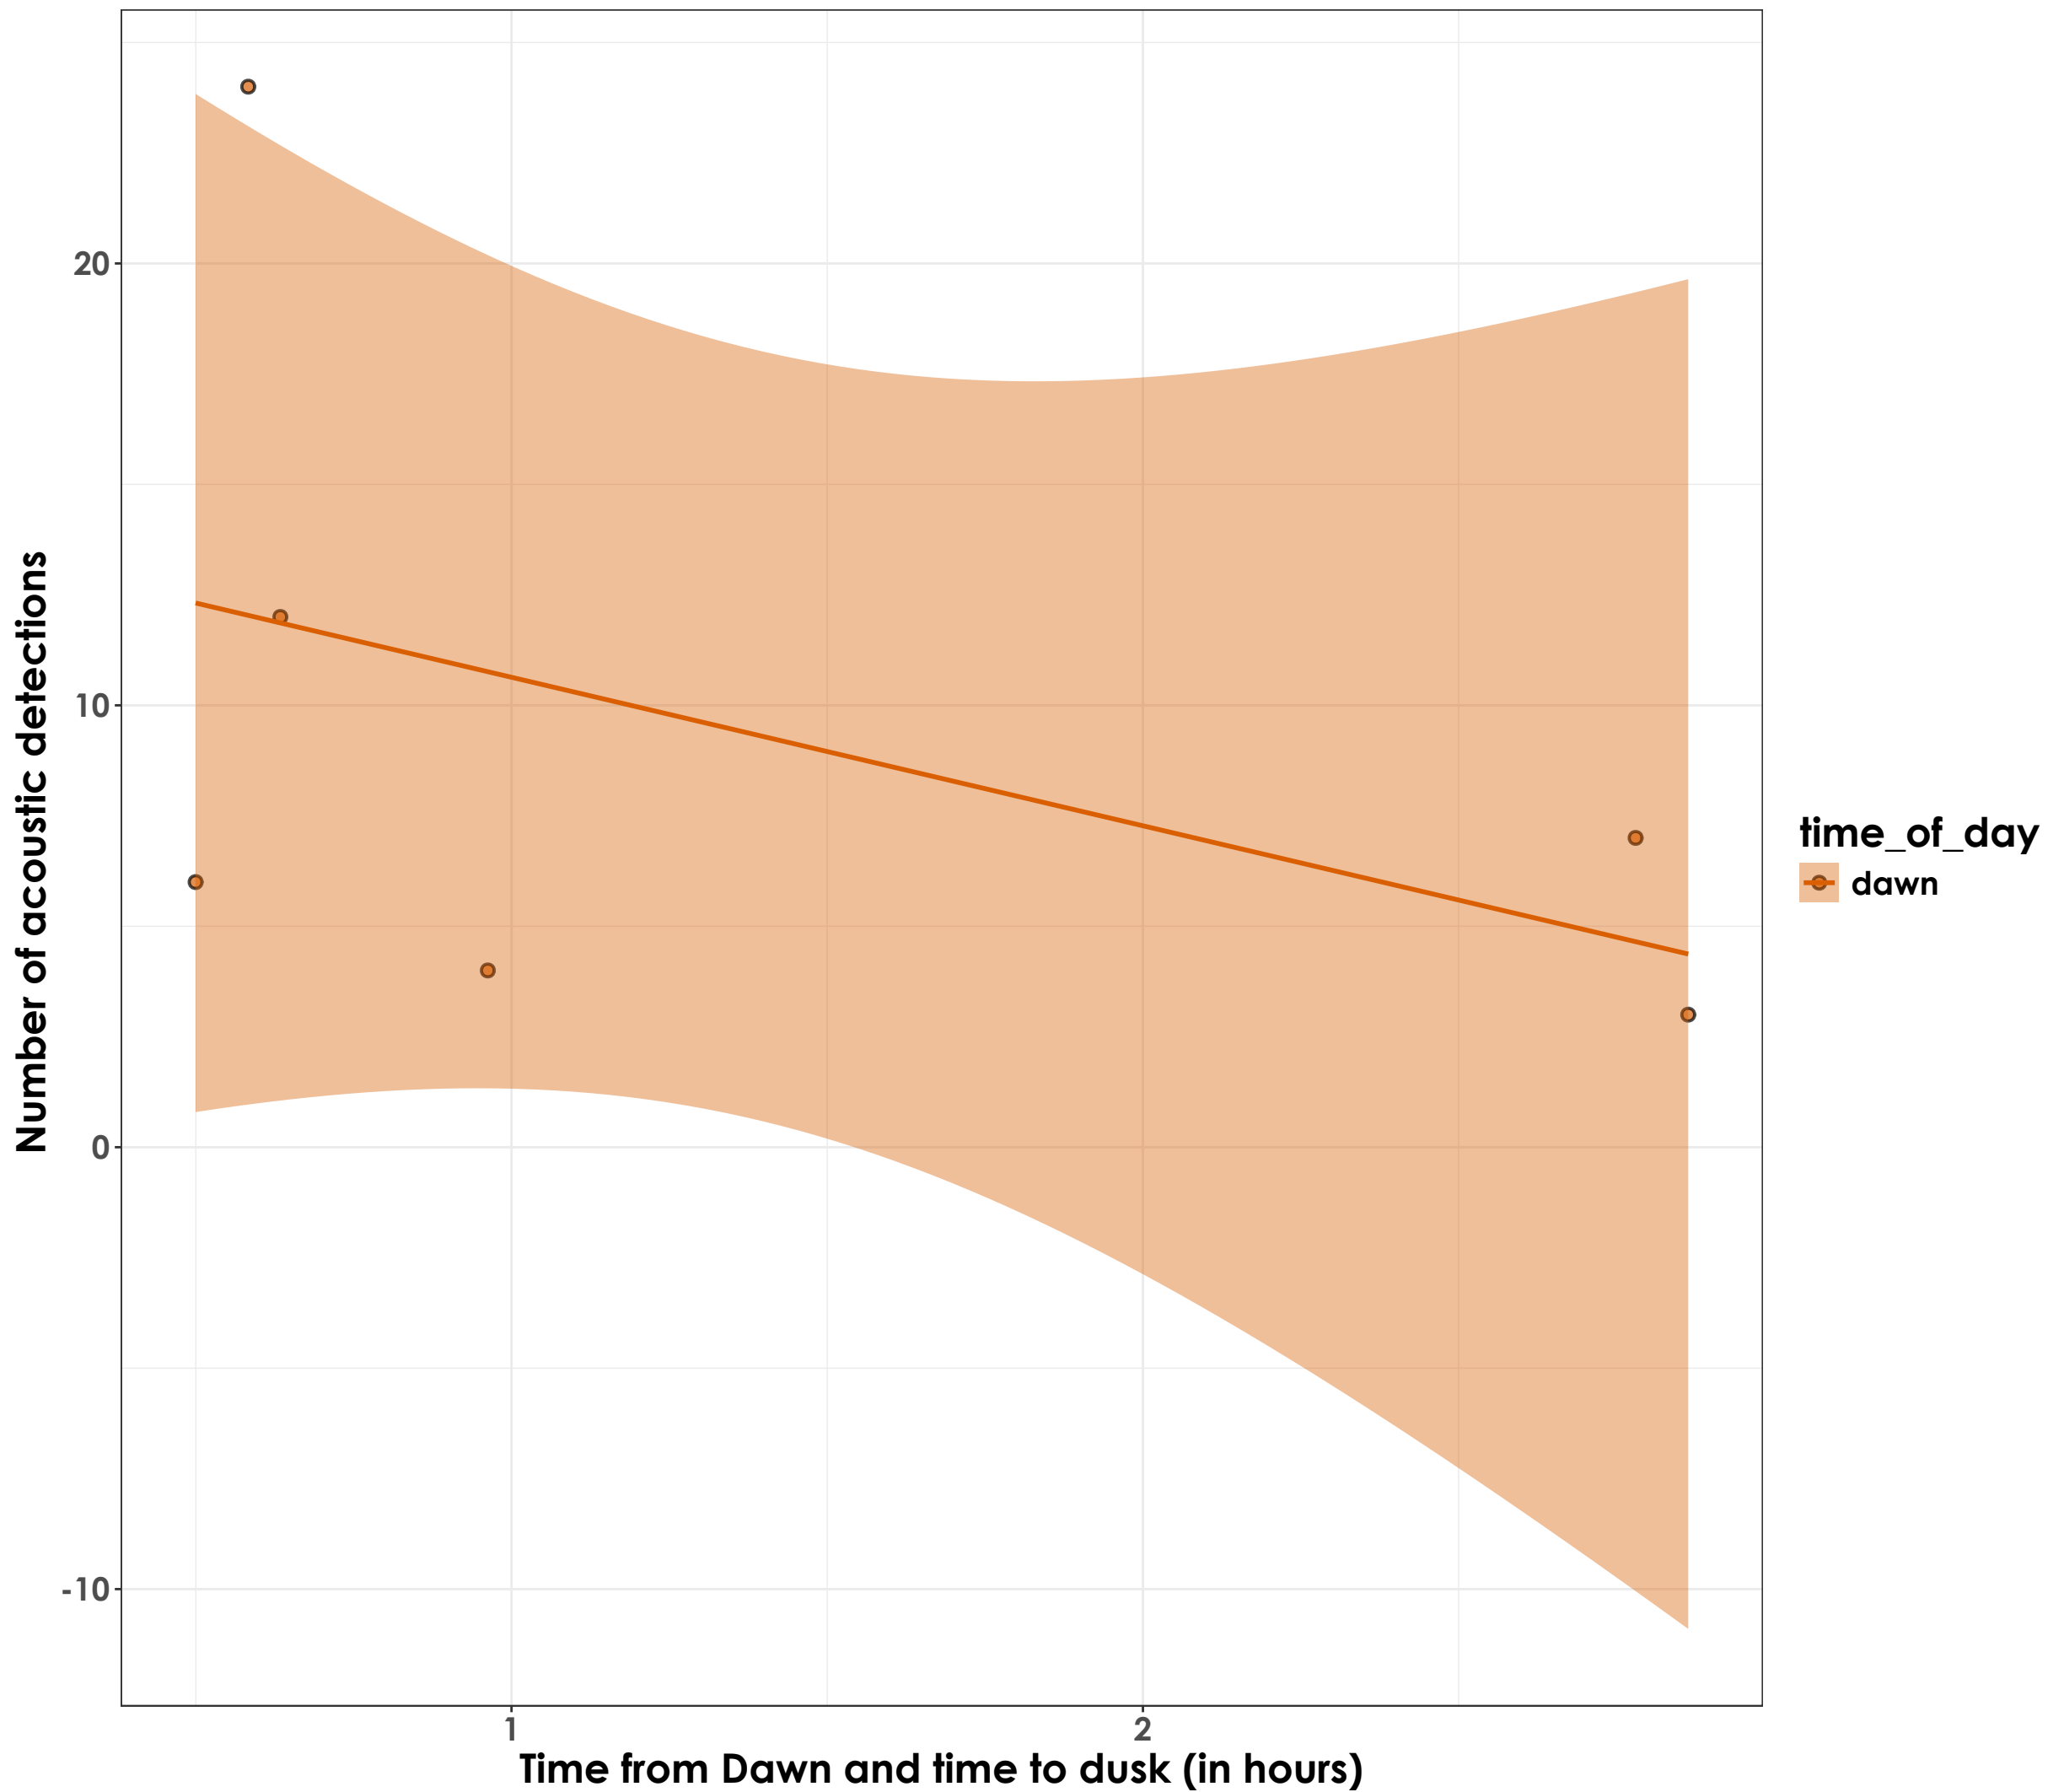

White-breasted Waterhen

Each dot represents the total number of detections after dawn or before dusk (in hours)

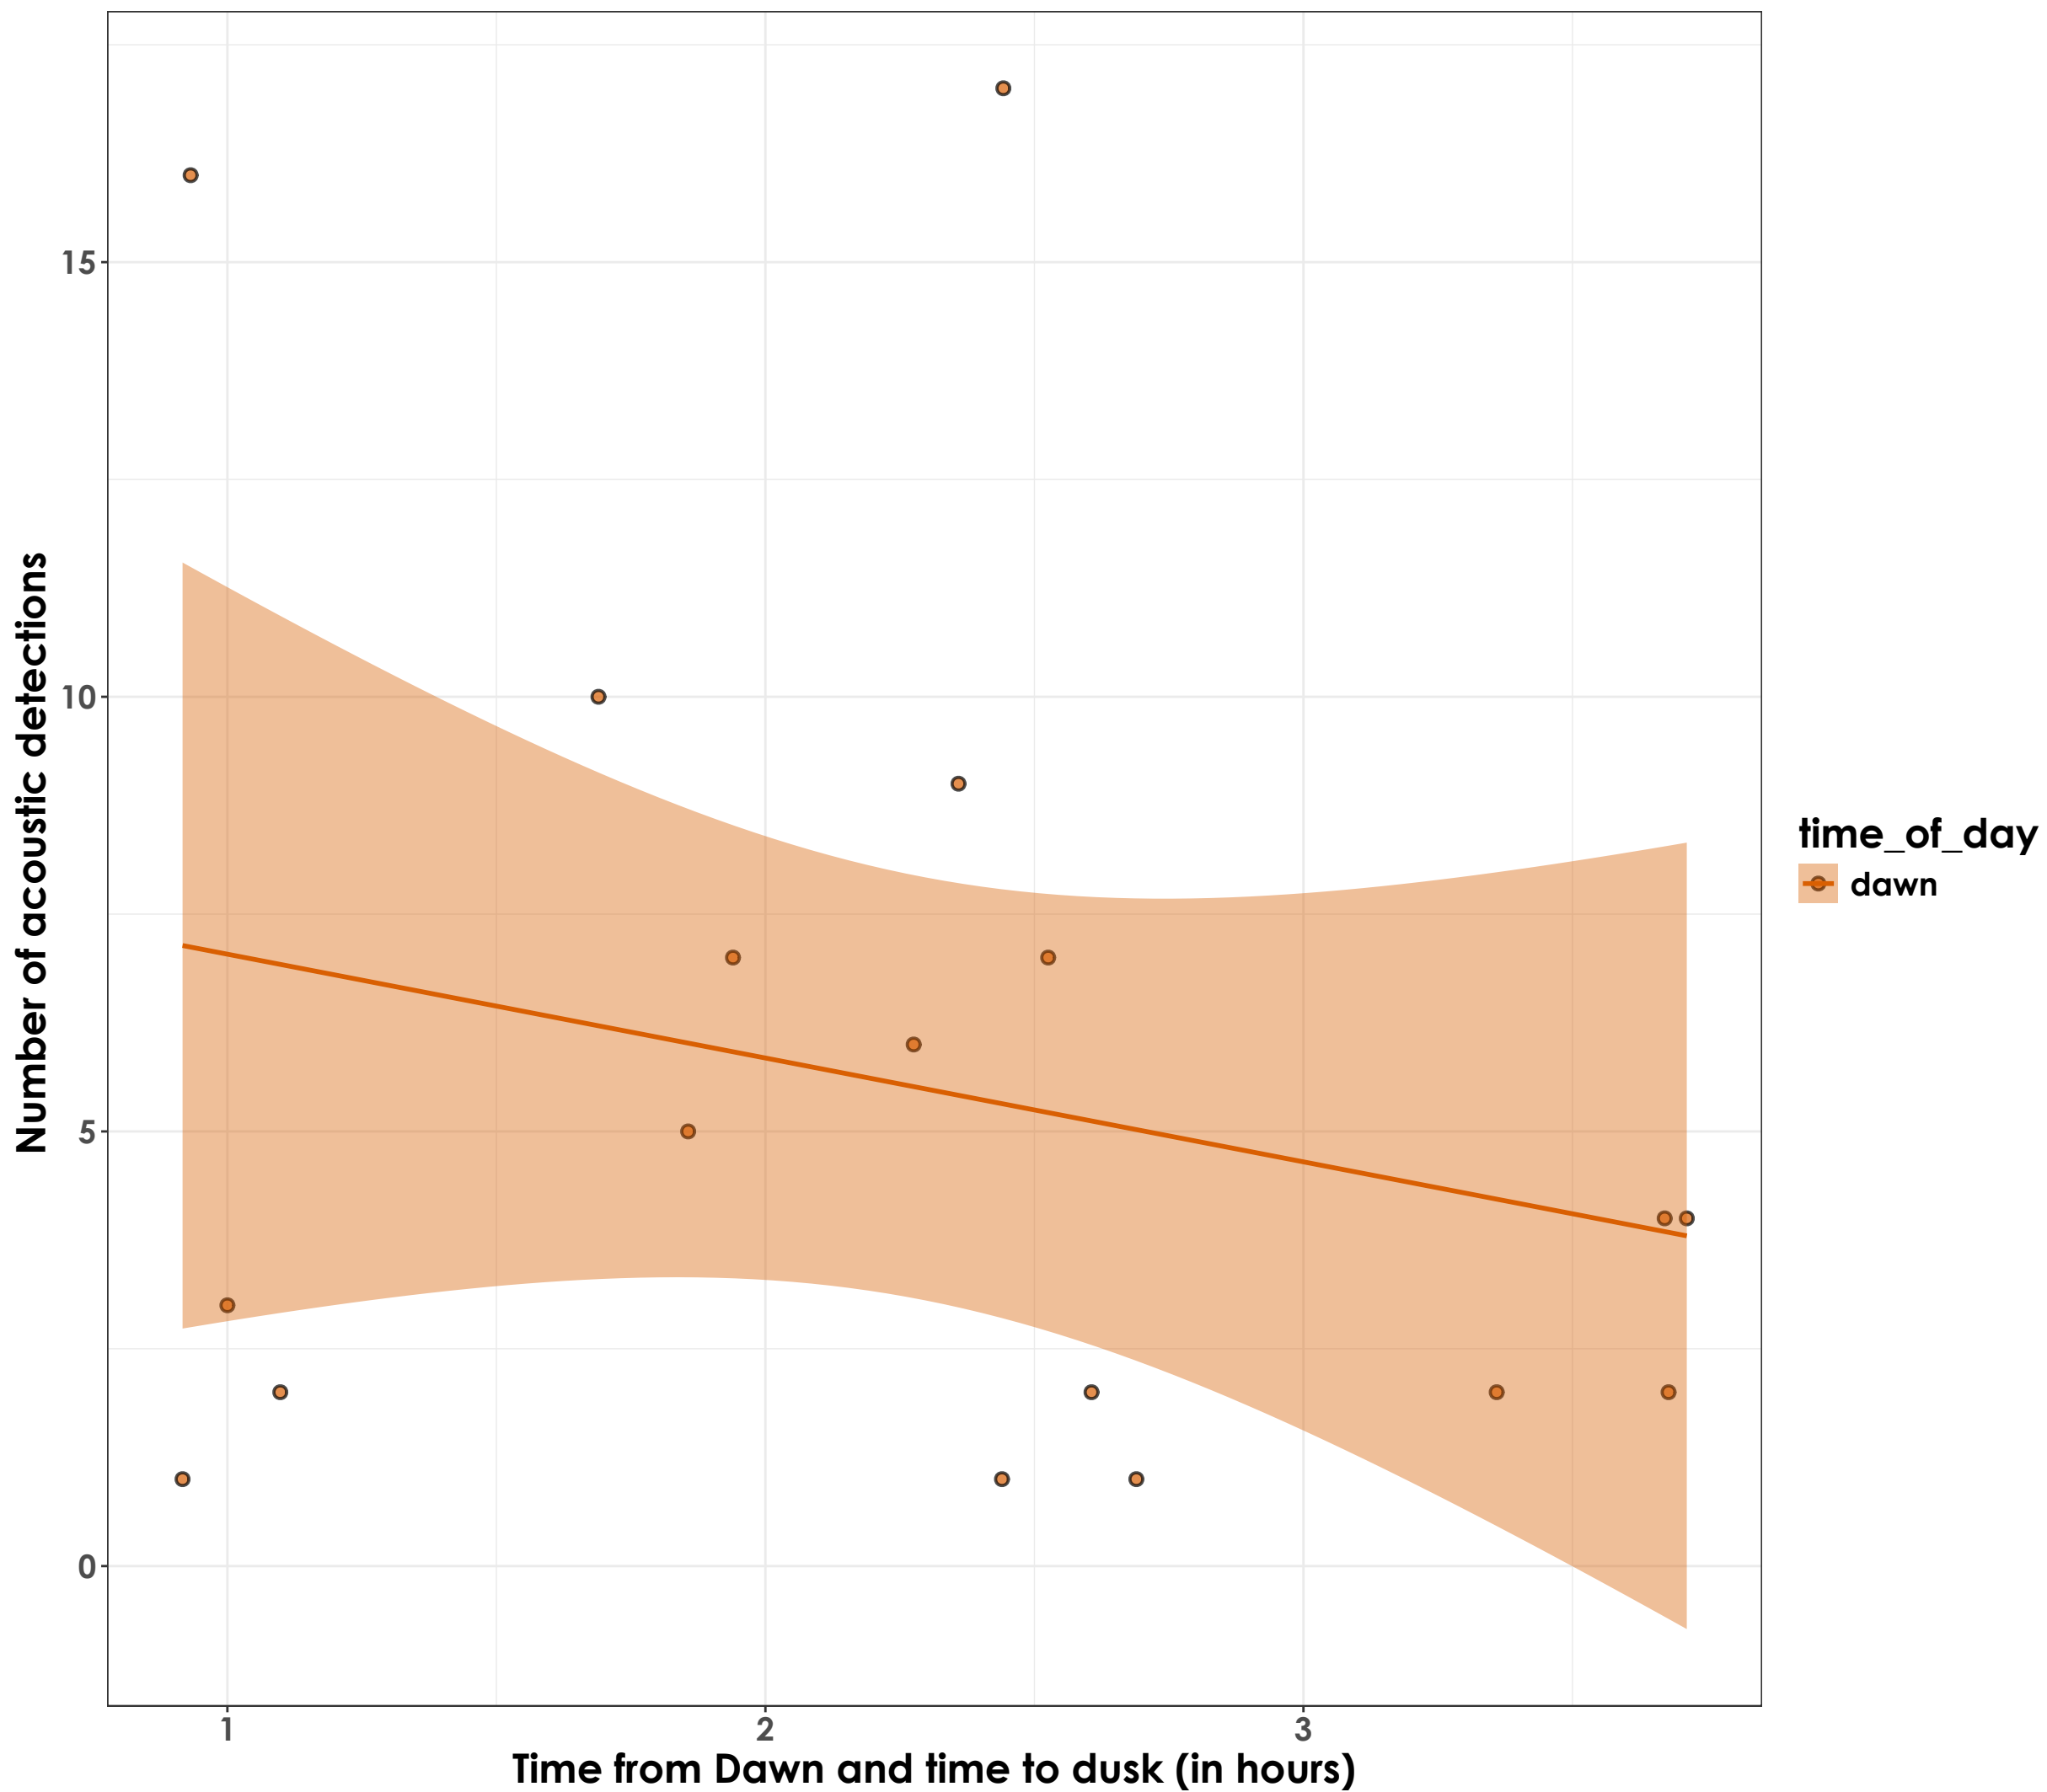

Forest Wagtail

Each dot represents the total number of detections after dawn or before dusk (in hours)

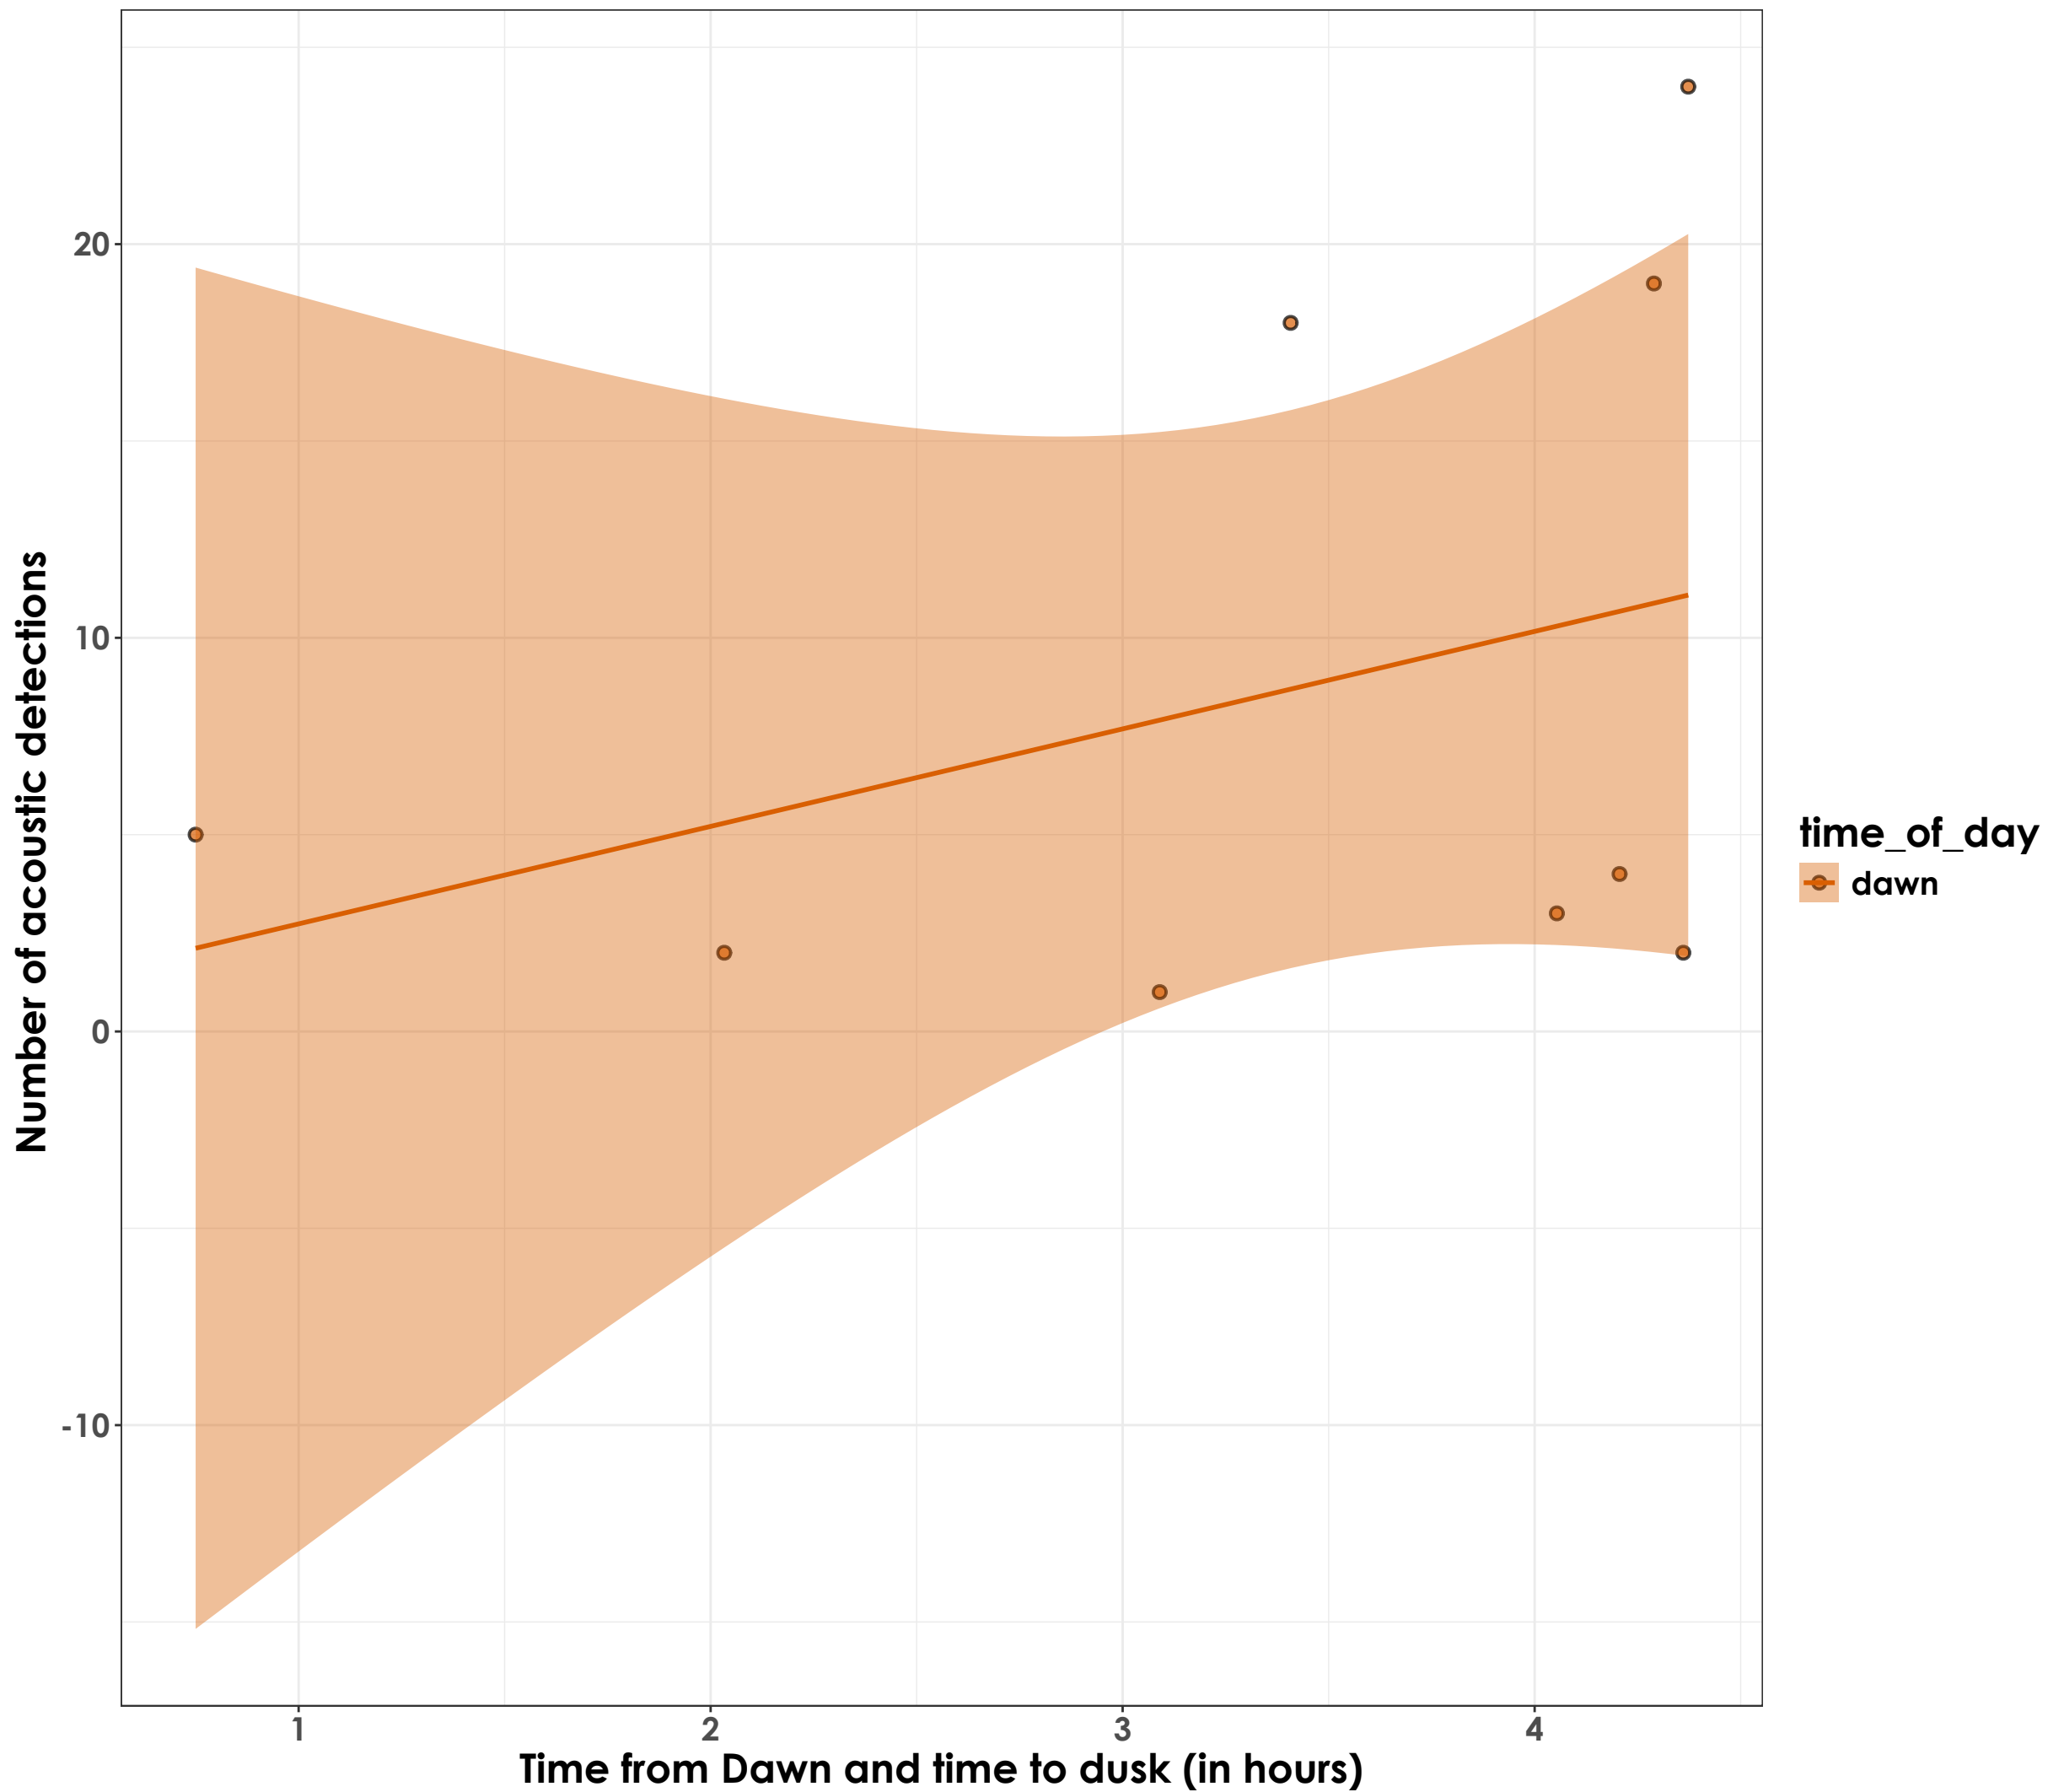

Common Rosefinch

Each dot represents the total number of detections after dawn or before dusk (in hours)

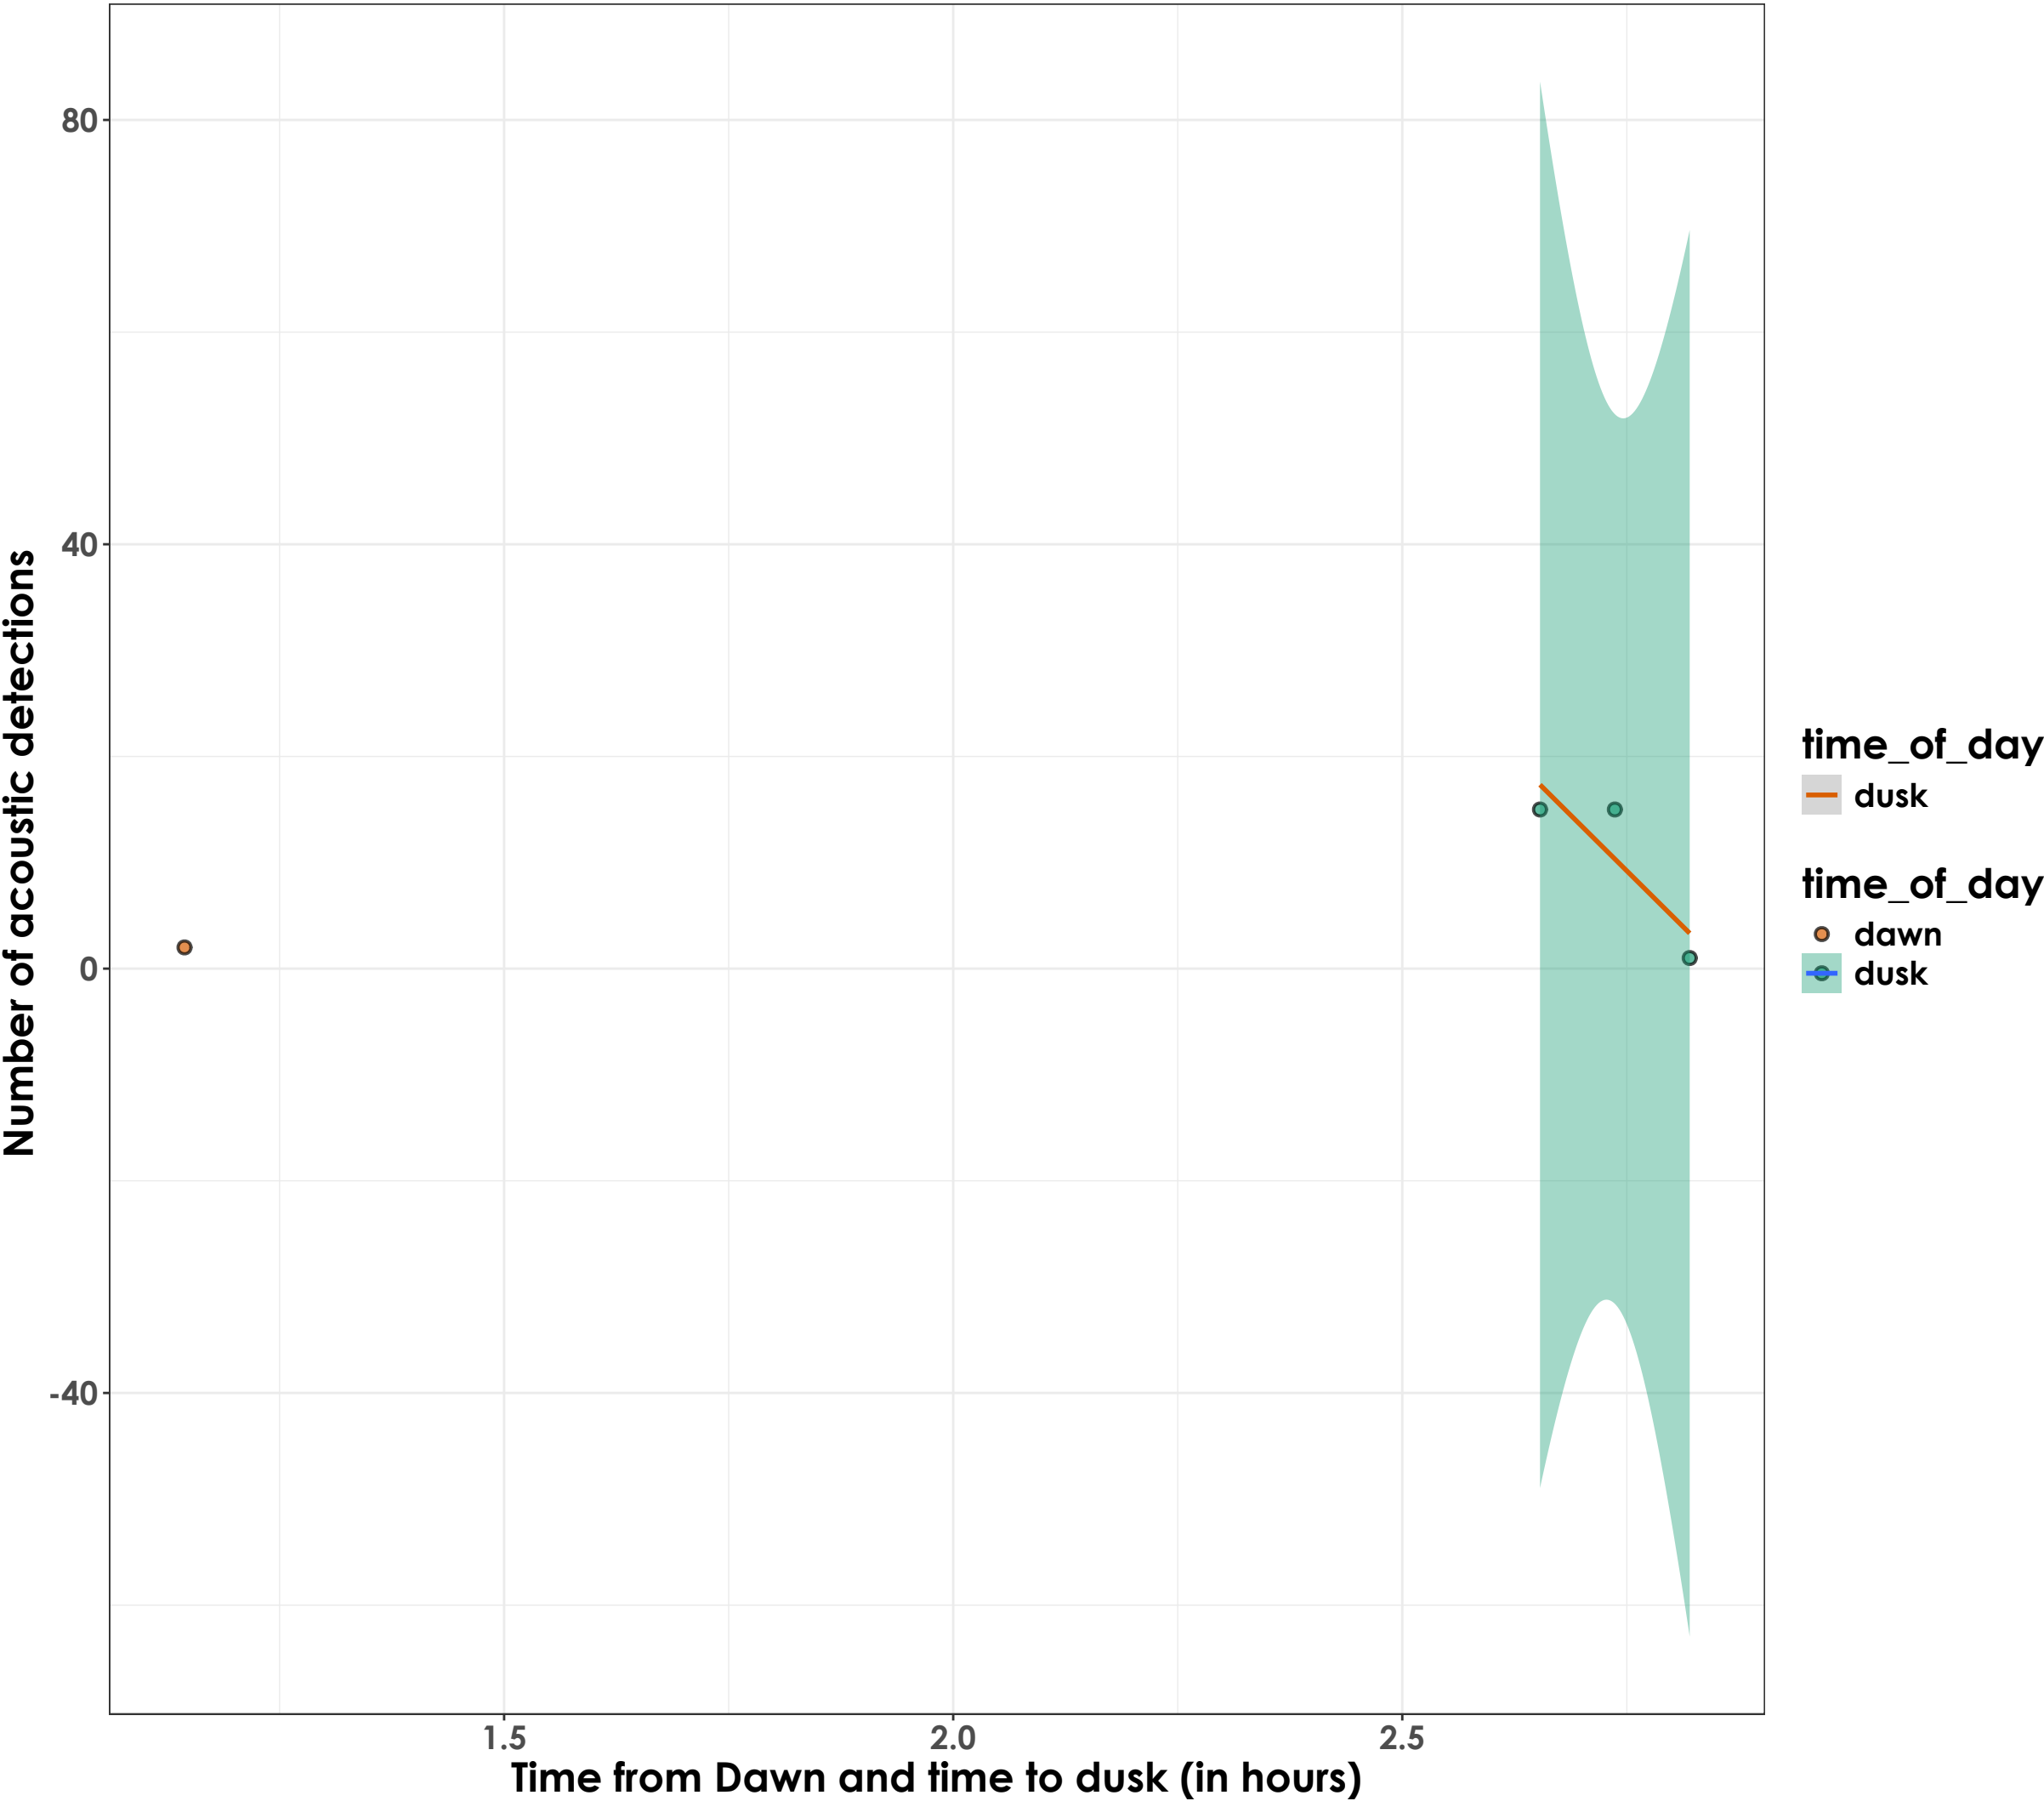

Red-vented Bulbul

Each dot represents the total number of detections after dawn or before dusk (in hours)

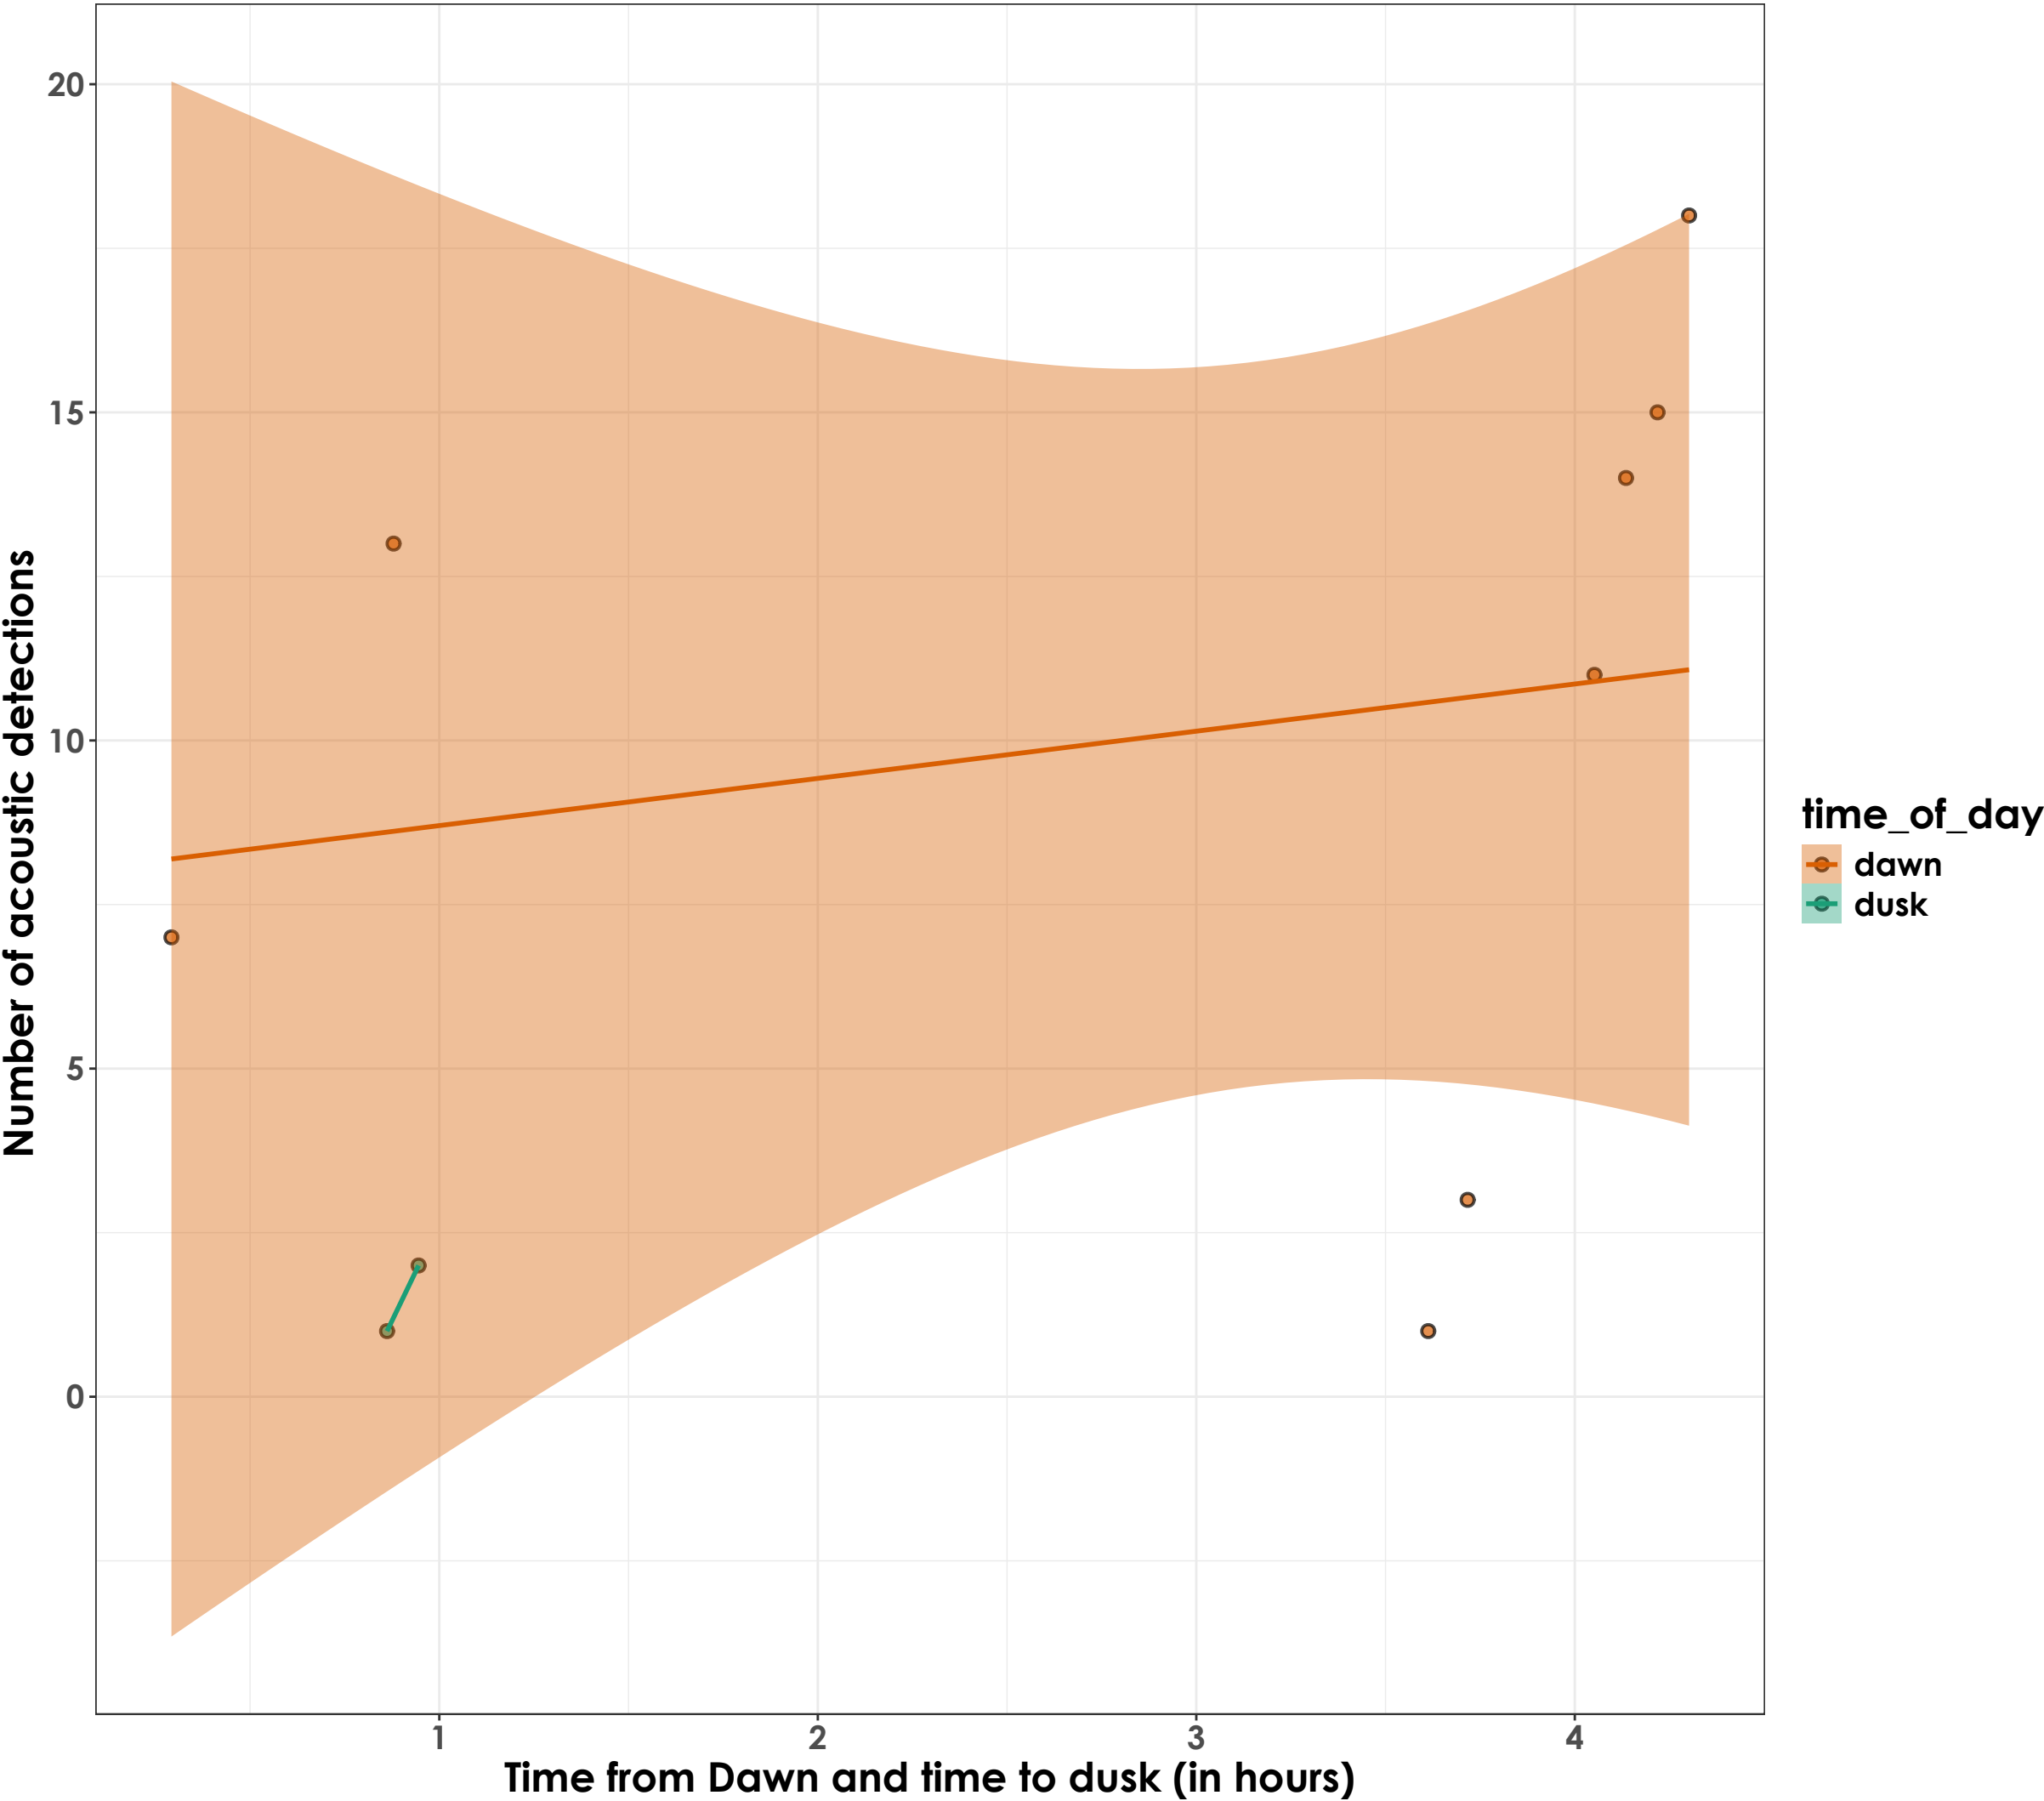

Black Eagle

Each dot represents the total number of detections after dawn or before dusk (in hours)

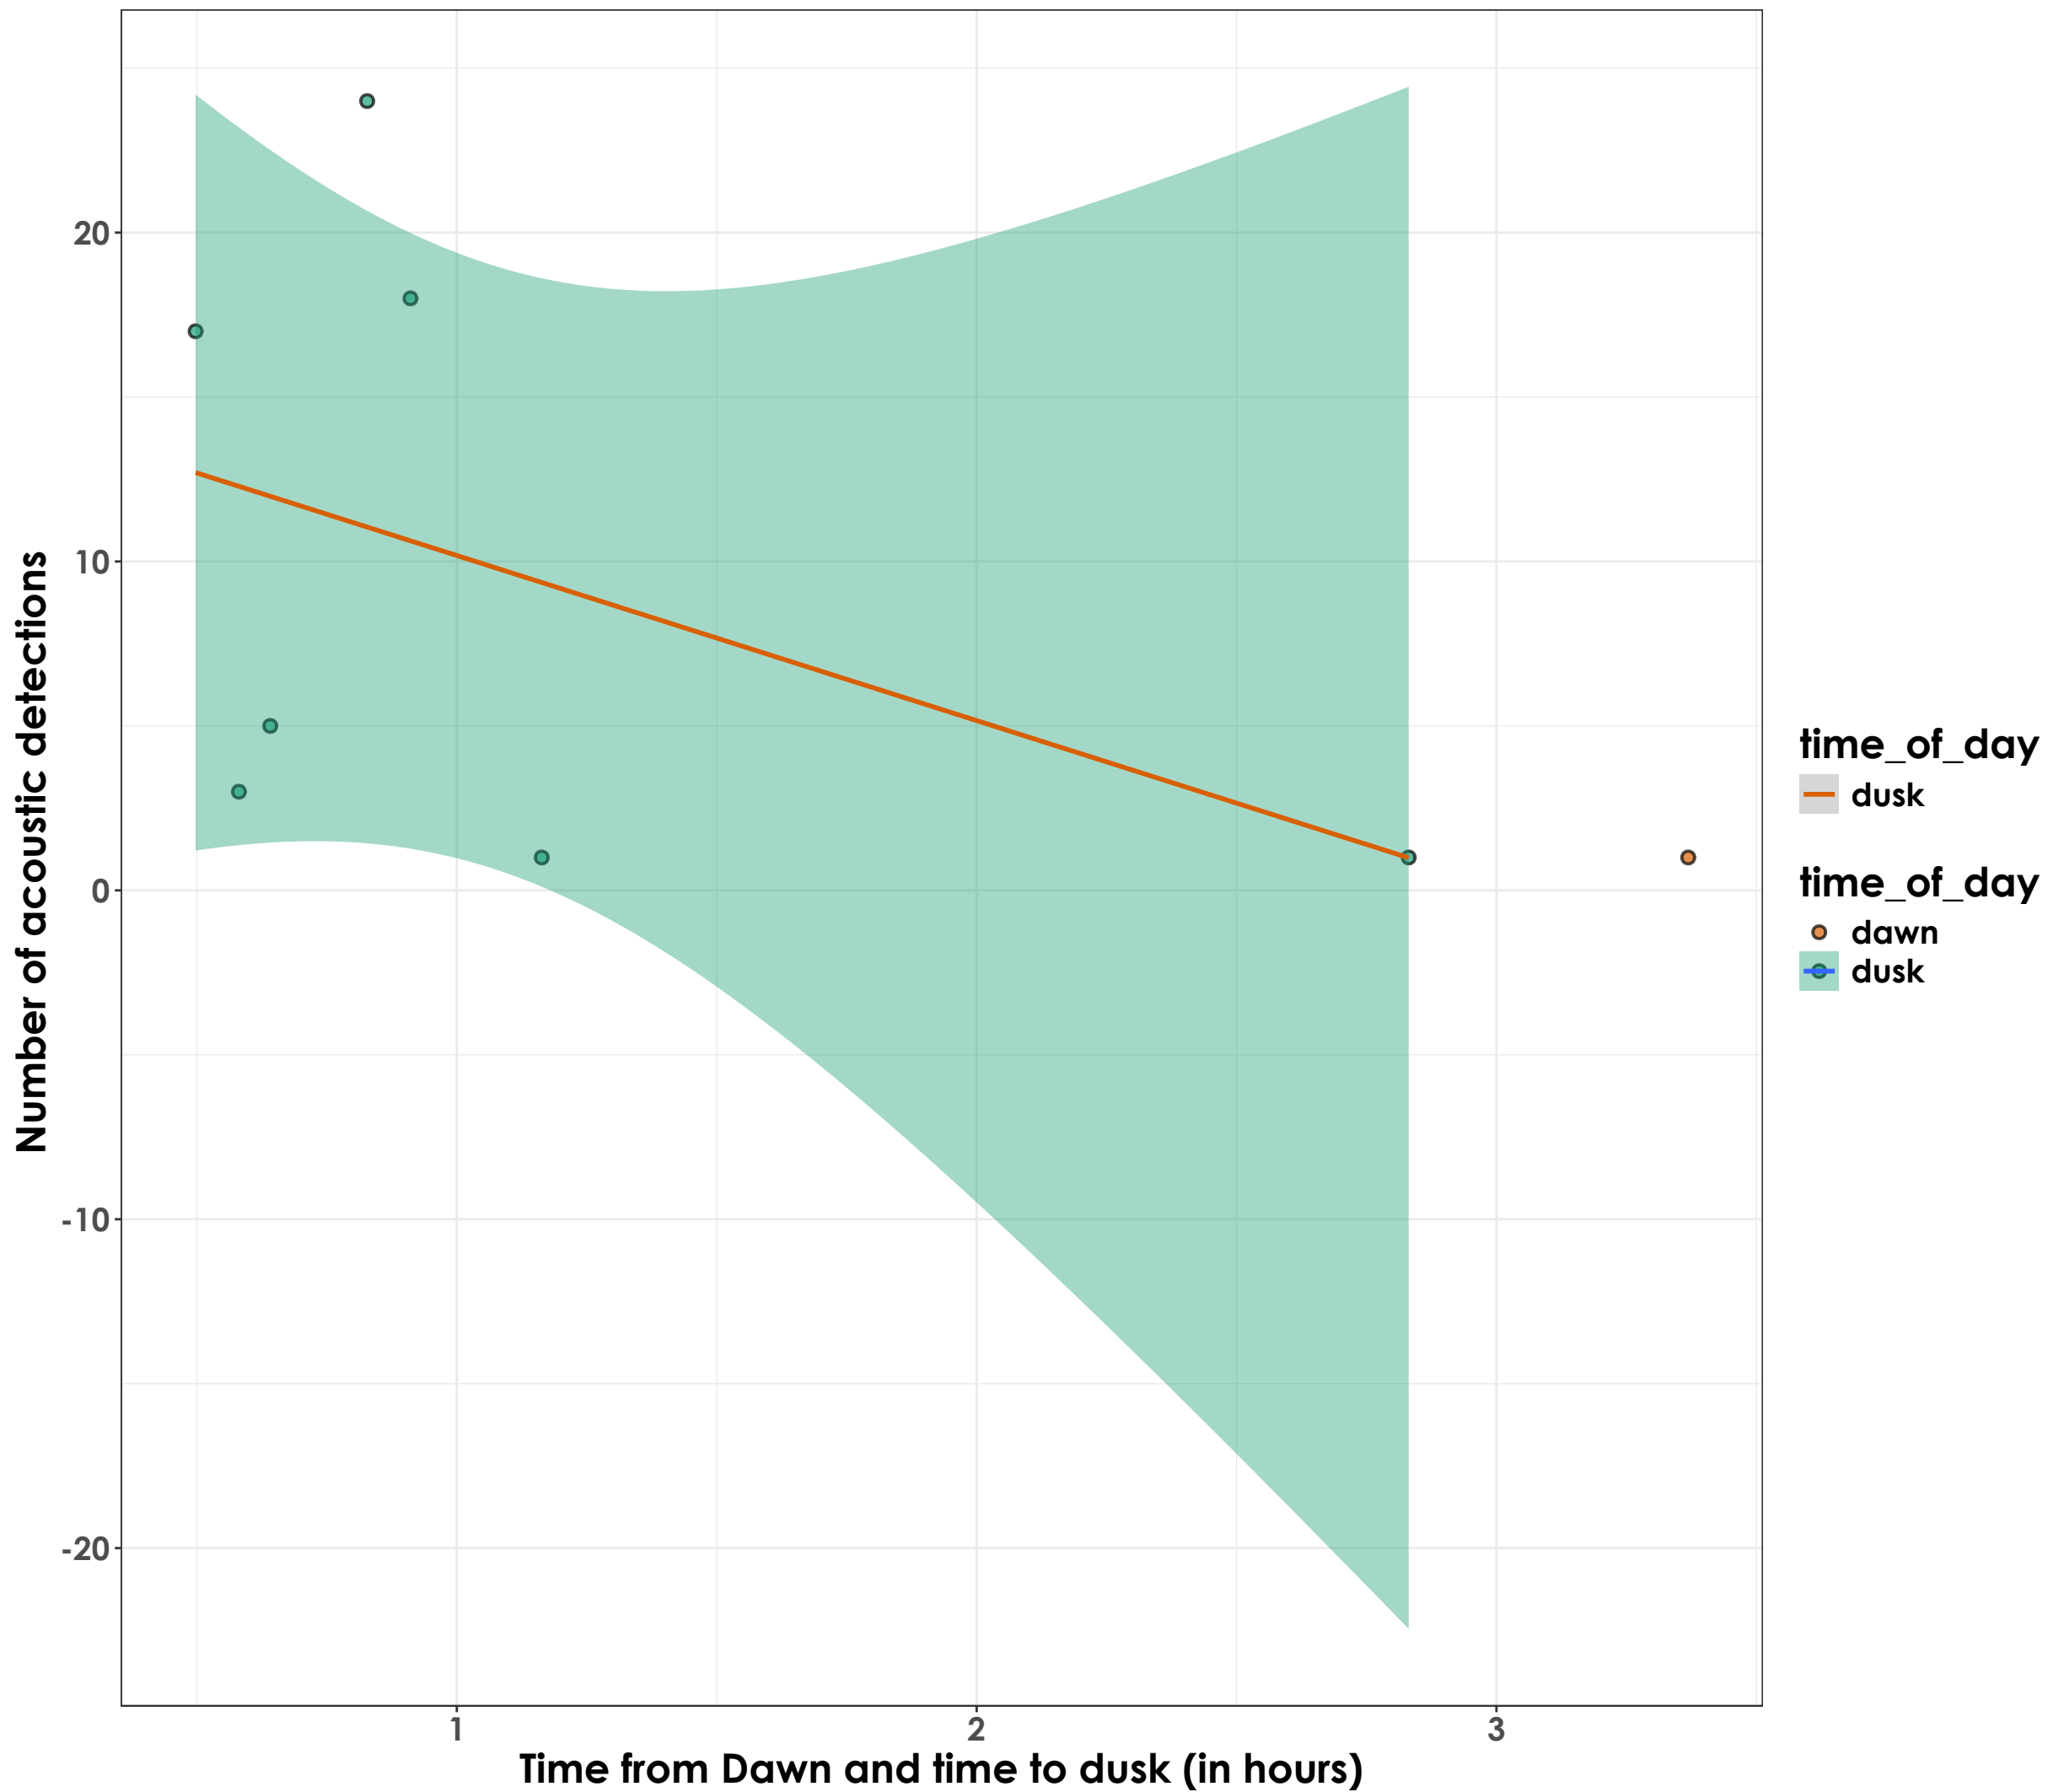

Thick-billed Warbler

Each dot represents the total number of detections after dawn or before dusk (in hours)

Indian Scops-Owl

Each dot represents the total number of detections after dawn or before dusk (in hours)

Heart-spotted Woodpecker

Each dot represents the total number of detections after dawn or before dusk (in hours)
